UNITED STATES SOLDIERS' AND AIRMEN'S HOME

1982 comparable appropriation	$24,421,000
1983 appropriation request	26,718,000
House allowance	26,718,000
Committee recommendation	26,718,000

The Committee recommends an appropriation of $26,718,000 for the Soldiers' and Airmen's Home. This is the same as the administration request and the House allowance. The recommendation is $2,297,000 more than the fiscal year 1982 comparable appropriation of $24,421,000.

The increase in the Home's appropriation over fiscal year 1982 is accounted for by increases in mandatory expenses such as salaries and material costs. The recommendation will provide 835 permanent positions.

The Committee is aware of certain badly needed repairs to the Home's physical plant. Of special concern, are several poorly operating elevators. The Committee urges the House to correct these problems to the extent possible within available funds. If these prove to be insufficient, the Home should submit a supplemental budget request.

COMPLIANCE WITH PARAGRAPH 7 RULE XVI, STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that the Committee identify in its report each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during the session." There are no items in the Committee bill requiring such identification pursuant to this requirement.

BUDGETARY IMPACT OF H.R. 7205—PREPARED BY THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SECTION 308(a) OF PUBLIC LAW 93-344

[In millions of dollars]

	Budget authority		Outlays	
	Committee allocation	Amount in bill	Committee allocation	Amount in bill
I. Comparison of amounts in the bill with the Committee allocation to its subcommittees of amounts in the First Concurrent Resolution for 1983: Subcommittee on Labor-HHS-Education and related agencies	90,400	[1] 87,261	101,400	[1] [2] 100,194
II. Projections of outlays associated with budget authority recommended in the bill:				
1983				[3] 78,159
1984				11,413
1985				2,055
1986				372
1987 and future year				48
III. Financial assistance to State and local governments for 1983 in the bill		36,145		29,162

[1] Includes previously enacted items.
[2] Includes outlays from prior-year budget authority.
[3] Excludes outlays from prior-year budget authority.

[Additional Views of Senator Andrews]

NATIONAL INSTITUTE ON NEUROLOGICAL AND COMMUNICATIVE DISORDERS AND STROKE

There have been exciting developments in the field of neurological and communicative disorders during the past 10 years. Prior to this the field of neurological disorders in particular was fraught with frustration and staggering unknowns. This was primarily due to the fact that the brain and nervous system were buried within a sheath of bone covering that defied use of the x-ray technology available at that time for diagnosis of the brain and nervous system disorders. Diagnosis, therefore, was imprecise and when surgical exploration was necessary, carried with it associated risks. Therefore, NINCDS funds were invested primarily in research to understand the basis for disorders as a foundation upon which to develop promising leads, information, and opportunities for clinical research. Funding was erratic as was support. Now in the past five years there has been an explosion in knowledge. An example of this lies in the area of stroke. In the late 60's and early 70's the characteristics of the several types of stroke had not been defined and it was extremely difficult to diagnose exactly what kind of a stroke had occurred. With the development of the CAT scanner, and now the PET scanner, we can now diagnose stroke type with some precision. Furthermore, work has begun on development of the best treatment for the particular stroke type. Similar progress has taken place in other areas of research concern.

However, funding of the NINCDS has not kept pace with this acceleration of technological and other research breakthroughs in the field. Since the government carries about 67 percent of the funding burden—closer to 95 percent of the burden for basic research—and since no private agency, whether nonprofit or for-profit, has the resources to conduct research beyond its particular disorder of concern, or its commercial interest, the field is hungry for the funds necessary to catch up with its most pressing needs.

A quantum jump in funding of sufficient magnitude would be a great boon to the field and produce concrete results far in excess of the usual expectation. This is a moderate amount of request for a field that has produced enzyme-replacement therapy as a preventive measure in the treatment of certain genetic disorders, such as Tay-Sachs disease; new medications in Parkinson's Disease therapy, and new devices to assist those who must master speech after the removal of a cancerous larynx, to name just a few.

In brain and central nervous system research lies the key to many problems in everything from immunology to genetic disorders, from aphasia to deafness. The brain is the conductor and the director of the multiplicity of organs and activities that must work together to produce a healthy functioning human being. If we can but learn its mechanisms and map it, then it follows that we can produce the means necessary to alleviate a great deal of pain and suffering associated with the lives of many Americans who are disabled.

Similarly, the ears and mouth are the basic instruments of communication. Without hearing or with only partial hearing, it is very difficult to respond to the requests or statements of others. Without the capability to speak, and speak in a fashion that is understandable, it becomes extremely difficult to let others know what our requests are and what our responses to their requests mean.

And finally, without the ability to move and walk, we cannot interact satisfactorily with our fellow human beings and must face constant frustration in just carrying out the daily activities in which we must engage from our very first waking rituals in the morning to our last chores before retiring.

[1] Fiscal year 1983 estimate proposed for later transmittal; no budget request yet proposed under new legislation enacted Oct. 13, 1982. [2] Budget proposes legislation to merge these activities into the primary care block grant. [3] Authorization repealed Public Law 97–35. [4] 19 percent set-aside for programs of national significance, hemophilia and genetic diseases. [5] The budget proposed legislation to transfer the women, infants, and children program from the Department of Agriculture to the MCH block grant and included an additional $650 million for this activity. This request has been considered under the fiscal year 1983 agriculture appropriation bill. [6] Fiscal year 1982 and fiscal year 1983 limitation included in Omnibus Reconciliation Act. [7] $82.6 million for this activity and related administrative costs requested in the President's budget under a new "health block grant" account not approved by the committee. [8] $433 million for this activity and related administrative costs originally requested under a new "health block grant" account not approved by the committee. [9] $433 million for this activity and related administrative costs originally requested under a new "health block grant" account not approved by the committee. [10] No limitation proposed for fiscal year 1983. [11] Funds for State and local administration proposed for transfer to new combined welfare administration block grant in fiscal year 1983 in President's budget not approved. [12] President's fiscal year 1983 budget assumes legislative savings of $1,883 million. [13] President's fiscal year 1983 budget assumes legislative savings of $139 million. [14] Includes medicare and medicaid funds not directly apropriated, but made available for PSRO. [15] Excludes $45 million made available in fiscal year 1983 by Public Law 97–248. [16] Does not include funds for State medicaid certifications. [17] President's budget assumes legislative savings of $270,400,000. [18] 2d year of 3-year phaseout. [19] Funds for State and local administration requested in combined welfare administration block grant in fiscal year 1983. [20] President's budget assumes legislative savings of $1,095,000,000. [21] President's fiscal year 1983 budget request assumes legislative savings of $120 million. [22] Authority for this proposed to be repealed by the President, but retained by the Congress. [23] President's fiscal year 1983 budget request assumes legislative savings of $145 million. [24] Currently an entitlement for fiscal year 1983 of $2,450,000,000. [25] Single consolidated request of $380.1 million in budget requests. [26] Also included here is request of $30,800,000 requested in budget under "Human Resources Research and Demonstrations." [27] Does not include $1,787,341,000 of fiscal year 1983 funds advanced in fiscal year 1982. [28] Proposed to be transferred to special education block grant. [29] Includes initial forward funding of $1,500,000. [30] Fiscal vear 1983 estimate proposed for later transmittal. [31] Requires legislation. [32] Fiscal year 1983 estimate originally proposed under A/S for human development HHS; classified as mandatory by the House, but discretionary by the Senate. [33] Requires legislation. [34] Fiscal year 1983 estimate proposed for later transmittal. [35] Assumes legislative savings of $912,369,000 in fiscal year 1983. [36] Fiscal year 1982 appropriation advanced in fiscal year 1980 was $172 million, fiscal year 1983 appropriation advanced in fiscal year 1981 was $137 million, fiscal year 1984 appropriation advanced in fiscal year 1982 is $130 million. [37] Does not include fiscal year 1983 funds advanced in previous year; $1,787,341,000 for assistance payments and $137,000,000 for CPB.

LABOR, HEALTH AND HUMAN SERVICES, AND EDUCATION APPROPRIATIONS, 1983—(H.R. 7205)

Mr. HATFIELD. Mr. President, the Labor, Health and Human Services, and Education appropriations bill for fiscal year 1983 (H.R. 7205) was reported to the Senate today, without written report. In lieu of a written report, the committee prepared a thorough explanation of its recommendations which will be printed in the RECORD.

Mr. President, this is a very unusual procedure, but one which is necessary to permit the early consideration of this very important measure. Under similar time constraints last year, the committee twice reported bills without written report, but with statements in explanation of the committee recommendations. By inserting the explanation of the committee's recommendations in the record we can be assured of rapid and full dissemination of what changes are proposed to the House passed bill so that Senators and their staff can prepare for the floor consideration of the measure.

Mr. President, it is with some reservations that the committee chose this procedure. It would have been preferable to issue a printed report in accordance with normal practice, however, under the circumstances we could find no other alternative. When we began this postelection session, only 6 of the 13 regular appropriations bills for fiscal year 1983 had passed the House, and only 4 had passed the Senate. In the last week and a half the House has passed three additional bills, the Senate two. Today the committee is reporting one of the bills passed by the House last week and ordered reported another bill as well, the Interior appropriations bill. Unfortunately, we have only another week and a half if Congress is to adjourn on the 17th of December.

If the normal 3-day waiting period for a written report prior to floor consideration is observed, action on these measures would be virtually precluded since I anticipate that most of next week will be devoted to the consideration of the continuing resolution and other urgent business.

Mr. President, again, I wish that we could have followed our normal procedure but under the circumstances I believe that our explanation in lieu of written report will fully satisfy concerns that Members of this body be informed of our recommendations.

FEDERAL-AID HIGHWAY IMPROVEMENT ACT OF 1982—S. 3043

Mr. STAFFORD. Mr. President, as in legislative session, I ask unanimous consent that I may, for the Committee on Environment and Public Works which today so ordered, report S. 3043, the Federal-Aid Highway Improvement Act of 1982.

Because of the expedited schedule for consideration of the text of this bill, I believe it would be useful for the text of the legislation ordered reported by the committee to be printed in the RECORD.

I ask unanimous consent that the text of S. 3043 be printed at this point in the RECORD.

There being no objection, the text was ordered to be printed in the RECORD, as follows:

TEXT OF S. 3043

To authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal-Air Highway Improvement Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "The additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984, the additional sum of $3,800,000,000 for the fiscal year ending September 30, 1985, the additional sum of $3,800,000,000 for the fiscal year ending September 30, 1986, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1987, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1988, the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1989, and the additional sum of $4,000,000,000 for the fiscal year ending September 30, 1990.".

HIGHWAY AUTHORIZATIONS

SEC. 103. (a) For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary program not to exceed $1,700,000,000 for the fiscal year ending September 30, 1983, $2,100,000,000 for the fiscal year ending September 30, 1984, $2,400,000,000 for the fiscal year ending September 30, 1985, and $2,400,000,000 for the fiscal year ending September 30, 1986, and $2,600,000,000 for the fiscal year ending September 30, 1987.

(2) For the Federal-aid rural program not to exceed $614,520,548 for the fiscal year ending September 30, 1983, and $700,000,000 for the fiscal year ending September 30, 1984, $700,000,000 for the fiscal year ending September 30, 1985, $700,000,000 for the fiscal year ending September 30, 1986, and $700,000,000 for the fiscal year ending September 30, 1987.

(3) For the Federal-aid urban program not to exceed $629,041,096 for the fiscal year ending September 30, 1983, and $800,000,000 for the fiscal year ending September 30,

1984, $800,000,000 for the fiscal ending September 30, 1985, and $800,000,000 for the fiscal year ending September 30, 1986, and $800,000,000 for the fiscal year ending September 30, 1987.

(4) For forest highways not to exceed $50,000,000 for the fiscal year ending September 30, 1983, $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986, and $50,000,000 for the fiscal year ending September 30, 1987.

(5) For public lands highways not to exceed $50,000,000 for the fiscal year ending September 30, 1983, $50,000,000 for the fiscal year ending September 30, 1984, $50,000,000 for the fiscal year ending September 30, 1985, and $50,000,000 for the fiscal year ending September 30, 1986, and $50,000,000 for the fiscal year ending September 30, 1987.

(6) For parkways and park highways $75,000,000 for the fiscal year ending September 30, 1983 and $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

(7) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, not to exceed $1,700,000,000 for the fiscal year ending September 30, 1983, and $1,700,000,000 for the fiscal year ending September 30, 1984, $1,800,000,000 for the fiscal year ending September 30, 1985, and $2,000,000,000 for the fiscal year ending September 30, 1986, and $2,000,000,000 for the fiscal year ending September 30, 1987.

(8) For the highway safety improvement program not to exceed $316,657,534 for the fiscal year ending September 30, 1983, and $400,000,000 for the fiscal year ending September 30, 1984, $400,000,000 for the fiscal year ending September 30, 1985, and $400,000,000 for the fiscal year ending September 30, 1986, and $400,000,000 for the fiscal year ending September 30, 1987.

(9) For Indian reservation highways $75,000,000 for the fiscal year ending September 30, 1983 and $100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

(b) The unapportioned or unallocated balance of sums authorized by sections 4 and 5 of the Federal-Aid Highway Act of 1982 is rescinded.

(c)(1) For each of the fiscal years 1984, 1985, 1986, 1987, and 1988, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(2) Subsection (g) of section 144 of title 23, United States Code, is amended as follows:

"(g) Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986 and September 30, 1987, all but $300,000,000 for fiscal years 1983, 1984, 1985, 1986, and 1987 shall be apportioned as provided in subsection (e) of this section; $300,000,000 for fiscal years 1983, 1984, 1985, 1986, and 1987 of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges and replacement and rehabilitation cost of each of which is more than $10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate bridges located on public roads, other than those bridges on public roads functionally classified as arterials or major collectors. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on public roads functionally classified as arterials or major collectors when he determines that such State has inadequate needs to justify such expenditure.".

(d) Of the sums apportioned to each State under subsections (a)(1), (a)(2), and (a)(3) of this section, beginning with fiscal year 1984, not less than 60 per centum of such program funds shall be expended by the States on projects for resurfacing, restoring, rehabilitating, and reconstructing existing highway facilities for the purpose of preserving or enhancing the operational integrity, efficiency, and safety of such existing highways unless the State certifies to the Secretary that such percentage of funds are in excess of the resurfacing, restoring, rehabilitating, and reconstructing needs of existing highways in the State and the Secretary accepts such certification.

DISCRETIONARY BRIDGE CRITERIA

SEC. 104. The Secretary of transportation shall develop a selection process for discretionary bridges authorized to be funded under section 144(g) of title 23, United States Code, and shall propose and issue a final regulation no later than six months after the date of enactment of this Act, including a formula resulting in a rating factor based on the following criteria for such process. Such criteria shall give funding priority to those discretionary bridges already eligible under section 144(g) of title 23, United States Code. Eligible bridges after the issuance of a final regulation shall only include those with a rating factor of one hundred or less, based on a scale of zero to infinity. The criteria for such additional bridges which the Secretary shall consider are:

(1) sufficiency rating computed as illustrated in appendix A of the Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation's Bridges, USDOT/FHWA (latest edition);

(2) average daily traffic using the most current value from the national bridge inventory data;

(3) average daily truck traffic;

(4) defense highway system status;

(5) the State's unobligated balance of funds received under section 144 of title 23, United States Code, and the total funds received under section 144 of title 23, United States Code;

(6) total project cost; and

(7) special consideration should be given to bridges closed to all traffic or restricted to loads less than ten tons. Other unique considerations and the need to administer the program from a balanced national perspective should also be considered.

INTERSTATE SYSTEM RESURFACING APPORTIONMENT

SEC. 105. (a) Section 104(b)(5)(B) of title 23, United States Code, is amended (1) by striking the number "55" and inserting in lieu thereof "60" and (2) by striking the number "45" and inserting in lieu thereof "40".

(b)(1) The Secretary of Transportation shall make a full and complete study regarding the procedures for distributing Federal financial assistance for resurfacing, restoring, rehabilitating, and reconstructing routes on the Interstate System in order to maintain a high level of transportation service. The study shall analyze current conditions and factors including, but not limited to, volume and mix of traffic, weight and size of vehicles, environmental, geographical, and meteorological conditions in various States, and other pertinent factors that can be utilized to determine the most equitable and efficient method of apportioning available Interstate 4R funds to the several States. In conducting the study the Secretary shall consider such criteria as need, national importance, impact on individual State highway programs, structural and operational integrity, and any other relevant criteria, to determine the most equitable method of distribution.

(2) In conducting this study the Secretary shall consult with other agencies of the Federal Government, the States and their political subdivisions, and other interested private organizations, groups, and individuals.

(3) The Secretary shall report to Congress not later than six months after the date of enactment of this section the results of such study together with recommendations for necessary legislation.

INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 106. Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows: "In addition to any funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed $175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980, and September 30, 1981, not to exceed $275,000,000 for the fiscal year ending September 30, 1982, not to exceed $800,000,000 for the fiscal year ending September 30, 1983, not to exceed $1,800,000,000 for the fiscal year ending September 30, 1984, not to exceed $2,400,000,000 for the fiscal year ending September 30, 1985, not to exceed $2,800,000,000 for the fiscal year ending September 30, 1986, not to exceed $3,200,000,000 for the fiscal year ending September 30, 1987, and not to exceed $3,400,000,000 for the fiscal year ending September 30, 1988. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under section 103 and 139(c) of title 23, United States Code (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-aid Highway Act of 1978), except that where a State certifies to the Secretary that any part of

such sums are in excess of the needs of such State for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System and the Secretary accepts such certification, such State may transfer sums apportioned it under section 104(b)(5)(B) to its apportionment under section 104(b)(1) of title 23, United States Code. Such sums may also be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence, Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury.".

INTERSTATE SUBSTITUTION AUTHORIZATION

SEC. 107. (a) In addition to any funds authorized to be appropriated out of the general fund, there is authorized to be appropriated, out of the Highway Trust Fund, for substitute highway projects under section 103(e)(4) of title 23, United States Code, $500,000,000 for the fiscal year ending September 30, 1983, $600,000,000 for the fiscal year ending September 30, 1984, $600,000,000 for the fiscal year ending September 30, 1985, and $650,000,000 for the fiscal year ending September 30, 1986, and $650,000,000 for the fiscal year ending September 30, 1987. Funds authorized to carry out this section shall be available for obligation in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(b)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of Section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located." and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the area or areas to be served, and which are selected by the Governor or the Governors of the State or the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Govenors of the States in which the withdrawn route was located.".

(c)(1) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by inserting in the second sentence after the words "approved by Congress," the words "or up to and including the approved 1983 interstate cost estimate, whichever is earlier,".

(2) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by striking in the second sentence the phrases "the date of enactment of the Federal-Aid Highway Act of 1976 or" and "whichever is later, and in accordance with the design of the route or portion thereof that is the basis of the latest cost estimate,".

(3) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by inserting in the second sentence after the words "approval of each substitute project under this paragraph," the words "or the date of approval of the 1983 interstate cost estimate, whichever is earlier,".

(d) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end of such subsection the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection.".

(e) The first sentence of section 120(d) of title 23, United States Code, is amended by inserting after the words "traffic control signalization," the following: "including traffic control signalization projects under section 103(e)(4) of this title, notwithstanding the provisions of the fifth sentence of section 103(e)(4),".

FEDERAL-AID PRIMARY PROGRAM

SEC. 108. (a) Section 104(b)(1) of title 23, United States Code, is amended by (1) striking out "and priority primary routes" in the first sentence, and by (2) striking out "(other than the District of Columbia)" in the second sentence.

(b) Section 147 of title 23, United States Code, is repealed.

(c) Effective on October 1, 1982, any unobligated amount authorized under subsection (c) of section 104 of the Federal-Aid Highway Act of 1978 shall be apportioned by the Secretary of Transportation in the same manner as funds apportioned under section 104(b)(1) of title 23, United States Code, for the Federal-aid primary system, and shall thereafter remain available for obligation for the same period as such apportionment.

(d) The analysis of chapter 1 of title 23 is amended by deleting

"147. Priority Primary Routes."

and inserting in lieu thereof

"147. Repealed.".

FEDERAL-AID URBAN PROGRAM

SEC. 109. Section 103 of title 23, United States Code, is amended by deleting subsection (d) and inserting in lieu thereof the following:

"(d) The Secretary may approve Federal-aid urban programs in urban areas which programs shall be selected by the appropriate local officials so as to serve the goals and objectives of the community, with the concurrence of the State highway department, as provided in section 105 of this title. The programs shall facilitate transportation in the urban area and include projects to: reduce congestion and improve the flow of traffic on arterial and collector routes, aid integration of different transportation modes to and from airports and other terminals and business districts, support clean air and energy conservation objectives, make highway capital improvements, improve highway safety, eliminate safety hazards and roadside obstacles, implement transportation systems management activities and serve other national goals and objectives. All public roads in urban areas are eligible except those on the primary system and the Interstate System. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to urban programs, except those provisions determined by the Secretary to be inconsistent with this subsection. The Secretary shall not waive the applicability of the planning requirements of section 134 of this title.".

FEDERAL-AID RURAL PROGRAM

SEC. 110. Section 103 of title 23, United States Code, is amended by deleting subsection (c) and inserting in lieu thereof:

"(c) The Federal-aid rural program shall be selected by the State highway agencies and the appropriate local road officials in cooperation with each other, subject to approval by the Secretary as provided in subsection (f) of this section and section 105 of this title. In making such selections, the needs of agriculture roads, rural mail routes, public school bus routes, local rural roads, airport and water port access roads, and goods movement shall be considered. All public roads, except those in the primary system, the Interstate System, and those in urban areas are eligible. Projects to improve highway safety and nonurbanized public transportation projects, including facilities and technical assistance, are also eligible for assistance under this section. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to rural programs, except those provisions determined by the Secretary to be inconsistent with this subsection.".

TRANSFERABILITY

SEC. 111. Paragraphs (1) and (2) of subsection (d) of section 104 of title 23, United States Code, are amended by striking out "50" each place it appears and inserting in lieu thereof at each such place "100".

HIGHWAY SAFETY IMPROVEMENT PROGRAM

SEC. 112. (a) Section 151 of title 23, United States Code, is amended to read as follows:

"§ 151. Highway safety improvement program

"(a) The Secretary, in cooperation with the States, shall establish a highway safety improvement program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for railway-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the highway safety improvement program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a highway safety improvement program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective of reducing the number and severity of highway traffic accidents. Each State shall have a process for collecting, maintain-

ing, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements, for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained.

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

"(d)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than the Interstate System).

"(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except that the Federal share of safety improvement projects for the elimination of hazards of rail-highway crossings shall not exceed that as provided in section 120(d) of this title.

"(3) The unobligated balance of contract authority established prior to enactment of this section for carrying out section 402 by the Federal Highway Administration shall remain available for obligation as provided prior to enactment of this section and shall lapse not later than September 30, 1984.

"(e) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1), except that the Secretary is authorized to waive such provisions of this title that he deems inconsistent with the purposes of this section.

"(f) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the country or municipality in which such project is located.

"(g) One-half of 1 per centum of funds authorized for carrying out this section shall be made available to the Secretary of the Interior, who shall exercise the responsibilities assigned to States under subsection (b) of this section in carrying out this section on Indian reservations. Such funds shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section.

"(h) Each State shall report to the Secretary of Transportation not later than December 30 of each year, on the progress being made to implement the highway safety improvement program and the effectiveness of safety improvements in reducing the number and severity of accidents. The Secretary of Transportation shall submit a report to the Congress not later than April 1 of each year on the progress being made by the States in implementing the highway safety improvement program.".

(b) Section 152 of title 23, United States Code, is repealed.

(c) The analysis of chapter 1 of title 23, United States Code, is amended by deleting

"151. Pavement marking demonstration program.", and

"152. Hazard elimination program.",

and inserting in lieu thereof

"151. Highway safety improvement program.", and

"152. Repealed.".

(d) Section 203(e) of the Highway Safety Act of 1973 (Public Law 93-87), as amended by the Congressional Reports Elimination Act of 1980 (Public Law 96-470), is repealed.

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

SEC. 113. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

"(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the following formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, eligible for replacement, (2) Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, eligible for rehabilitation, (3) off-system bridges, and bridges on public roads not functionally classified as arterials or major collectors eligible for replacement, and (4) off-system bridges and bridges on public roads not functionally classified as arterials or major collectors eligible for rehabilitation. The square footage of deficient Federal-aid system bridges, or bridges on public roads functionally classified as arterials or major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by the average national unit cost, on a State-by-State basis, as determined by the Secretary; and the total cost of each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 9.25 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for three years after the close of the fiscal year for which they are authorized.".

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

FEDERAL LANDS HIGHWAYS PROGRAM

SEC. 114. (a) Section 202 of title 23, United States Code, is amended to read as follows:

"SEC. 202. ALLOCATIONS.—(a) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest highways according to the relative needs of the various elements of the national forest system as determined by the Secretary, taking into consideration the need for access as identified by the Secretary of Agriculture through renewable resource and land use planning, and the impact of such planning on existing transportation facilities.

"(b) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest development roads and trails according to the relative needs of the various national forests. Such allocation shall be consistent with the renewable resource and land use planning for the various national forests.

"(c) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for public lands highways among those States having unappropriated or unreserved public lands, nontaxable Indian lands or other Federal reservations, on the basis of need in such States, respectively, as determined by the Secretary upon application of the State highway departments of the respective States. The Secretary shall give preference to those projects which are significantly impacted by Federal land and resource management activities.

"(d) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for park roads and parkways each according to the relative needs of the various elements of the national park system, taking into consideration the need for access as identified through land use planning and the impact of such planning on existing transportation facilities.

"(e) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for Indian reservation roads according to the relative needs of the various reservations as jointly identified by the Secretary and the Secretary of the Interior.".

(b) Section 204 of title 23, United States Code, is amended to read as follows:

"SEC. 204. FEDERAL LANDS HIGHWAYS PROGRAM.—(a) Recognizing the need for all Federal roads which are public roads to be treated under the same uniform policies as roads which are on the Federal-aid systems, there is established a coordinated Federal lands highways program which shall consist of the forest highways, public lands highways, park roads, parkways, and Indian reservation roads as defined in section 101 of title 23, United States Code.

"(b) Funds available for forest highways and public lands highways shall be used by the Secretary to pay for the cost of construction and improvement thereof. Funds available for park roads, parkways, and Indian reservation roads shall be used by the Secretary of the Interior to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary and the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State, or civil subdivision thereof as deemed advisable. In the case of Indian reservation roads, Indian labor may be employed in such construction and improvement under such rules and regulations as may be prescribed by the Secretary of the Interior.

"(c) Before approving as a project on an Indian reservation road or bridge any project on a Federal-aid system in a State, the Secretary must determine the obligation of funds for such project is supplementary to and not in lieu of the obligation, for projects on Indian reservation roads and bridges, of a fair and equitable share of funds apportioned to such State under section 104 of this title.

"(d) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, country, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contributed.

"(e) Construction of each project shall be performed by contract awarded by competitive bidding, unless the Secretary or the Secretary of the Interior shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest.

"(f) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

"(g) The Secretary shall transfer to the Secretary of Agriculture from appropriations for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

"(h) Funds available for each class of Federal lands highways shall be available for adjacent vehicular parking areas and scenic easements.".

(c)(1) The definition of "park roads and trails" in section 101(a) of title 23, United States Code, is amended to read as follows: "The term 'park road' means a public road that is located within or provides access to an area in the national park system.".

(2) The term "Indian reservation roads and bridges" in section 101(a) of title 23, United States Code, is amended to read as "Indian reservation roads"; and the definition of such term is amended by deleting the words "and bridges" each place they appear and by inserting the word "public" before "roads" the first place it appears.

(3) Section 101(a) of title 23, United States Code, is amended by adding after the definition of the term "forest development roads and trails" the following new definition: "The term 'Federal lands highways' in accordance with section 204 of this title means forest highways, public lands highways, park roads, parkways, and Indian reservation roads which are public roads.".

(d) Sections 206, 207, 208, 209, and 214(c) of title 23, United States Code, are repealed.

(e) The analysis of chapter 2 of title 23, United States Code, is amended by deleting the following headings:

"202. Apportionment or allocation.";
"204. Forest highways.";
"206. Park Roads and trails.";
"207. Parkways.";
"208. Indian reservation roads."; and
"209. Public lands highways."

and inserting in lieu thereof:

"202. Allocations.";
"204. Federal Lands Highways Program.";
"206. Repealed.";
"207. Repealed.";
"208. Repealed."; and
"209. Repealed.".

(f) Section 203 of title 23, United States Code, is amended by striking out the term "park roads and trails" wherever it appears and inserting in lieu thereof the term "park road".

PROGRAM CONSOLIDATION

SEC. 115. (a)(1) Sections 143, 148, 155, and 156 of title 23, United States Code, are repealed.

(2) Section 163 of the Federal-Aid Highway Act of 1973, as amended, is repealed.

(b)(1) Any unobligated balance of contract authority established by any Act prior to enactment of subsection (a) of this section for carrying out sections 143 and 148 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unexpended balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out sections 155 and 156 of title 23, United States Code, and section 163 of the Federal-Aid Highway Act of 1973, as amended, shall remain available for expenditure under the conditions applicable prior to such enactment.

(3) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out sections 148, 155, and 156 of title 23, United States Code, is rescinded.

(c) The analysis of chapter 1, United States Code, is amended by striking

"143. Economic growth center development highways."

and inserting in lieu thereof

"143. Repealed.";

by striking

"148. Development of a national scenic and recreational highway."

and inserting in lieu thereof

"148. Repealed.";

by striking

"155. Access highways in public recreation areas on certain lakes."

and inserting in lieu thereof

"155. Repealed.";

and by striking

"156. Highways crossing Federal projects."

and inserting in lieu thereof

"156. Repealed.".

CARPOOL AND VANPOOL PROJECTS

SEC. 116. (a) Section 120(d) of title 23, United States Code, is amended by inserting before the words "may amount to 100 per centum" the words "or commuter carpooling and vanpooling".

(b) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a) of section 104, title 23, United States Code, to carry out the provisions of subsection (d) of section 126 of the Federal-Aid Highway Act of 1978.

PUBLIC TRANSPORTATION

SEC. 117. Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) delete in the first sentence the words "bus lanes" and insert in lieu thereof the following: "high occupancy vehicle lanes" and delete the words "bus and other" and insert in lieu thereof the following: "high occupancy vehicle and".

(2) In subsection (b) delete the word "bus" and insert in lieu thereof "high occupancy vehicle".

(3) In subsection (f) delete the words "public mass transportation systems" and insert in lieu thereof "high occupancy vehicles".

FRINGE AND CORRIDOR PARKING

SEC. 118. Section 137 of title 23, United States Code, is amended by inserting the following new subsection (f):

"(f)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

"(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, political subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms 'facilities' and 'parking facilities' are synonymous and shall have the same meaning given 'parking facilities' in subsection (c) of this section".

EMERGENCY RELIEF

SEC. 119. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu thereof the following: "An emergency fund is authorized for expenditure by the Secretary, subject to the provisions of this section and section 120 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State or responsible local official because of imminent danger of collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23, United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978, are authorized to have been appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than $100,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980,".

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: *"Provided,* That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed $30,000,000 in any State.".

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as follows:

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125 of this title shall not exceed 75 per centum of the cost thereof: *Provided*, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a comparable facility. As used in this section with respect to bridges and in section 144 of this title, 'a comparable facility' shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life.".

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the words "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

BICYCLE TRANSPORTATION PROGRAM

SEC. 120. Section 217 of title 23, United States Code is amended—

(1) by striking in the first sentence of subsection (a), the words "and the multiple use of highway rights-of-way" and "on or in conjunction with highway rights-of-way";

(2) by inserting after the first sentence in subsection (a) the following: "Federal-aid highway projects may include nonconstruction programs or projects which can reasonably be expected to enhance the safety and use of bicycles.";

(3) by striking out in subsection (b) the words "that provided in section 120 of this title" and inserting in lieu thereof "100 per centum"; and

(4) by striking out subsection (e).

HIGHLAND SCENIC HIGHWAY

SEC. 121. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles, and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks shall be limited and controlled by permit.".

ALLOCATION OF URBAN FUNDS

SEC. 122. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

CERTIFICATION ACCEPTANCE

SEC. 123. (a) Subsection 117(a) of title 23, United States Code, is amended by striking out "projects on Federal-aid systems, except the Interstate System," and inserting in lieu thereof "Federal-aid projects on systems other than the Interstate System" and by adding at the end thereof the following new sentence: "Notwithstanding the above, the Secretary may discharge any of his responsibilities under this title relative to the physical construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects using the procedures of this section.".

(b) Subsection 117(b) is amended by striking out "make a final inspection of each subject project upon its" and inserting in lieu thereof "establish procedures for the inspection of such projects upon".

(c) Subsection 117(f)(1) is amended by striking out the words "the Federal-aid secondary system," when they first appear and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System," and by striking out "all projects on the Federal-aid secondary system" and inserting in lieu thereof "such projects".

(d) Subsection 117(f)(3) is revised to read as follows:

"(3) Paragraphs (1) and (2) of this subsection shall not be construed to relieve the Secretary of his obligation to establish procedures for the inspection of such projects upon completion and to require an adequate report of the estimated and actual cost of construction as well as other information as he determines necessary.".

(e) Subsection 105(b) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects".

(f) Subsection 106(b) of title 23, United States Code, is amended to read as follows:

"(b) In addition to the approval required under subsection (a) of this section, proposed specifications for projects for construction, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation and reconstruction projects, except in States where all public roads and highways are under the control and supervision of the State highway department, shall be determined by the State highway department and the appropriate local road officials in cooperation with each other.".

(g) Subsection 112(e) of title 23, United States Code, as amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects,".

DEFENSE ACCESS ROAD

SEC. 124. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding $5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu thereof "Funds appropriated for defense maneuvers and exercises".

MAINTENANCE

SEC. 125. (a) Subsection (a) of section 116 of title 23, United States Code, is amended by striking the second sentence.

(b) Subsection (b) of section 116 of title 23, United States Code, is amended by striking "constructed on the Federal-aid secondary system or within a municipality,".

(c) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types on one or more of the Federal-aid systems or programs in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as the Secretary deems most appropriate until such project shall have been put in proper condition of maintenance.".

(d) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as (m).

(e) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed.".

(f) Section 119 of title 23, United States Code, is amended by striking subsection (b).

(g) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

"(g) Not later than one year after the date of issuance of initial guidelines under subsection (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year period, the amount

withheld shall be reapportioned to all other eligible States.".

CONSTRUCTION

SEC. 126. (a) Subsection (a) of section 114 of title 23, United States Code, is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system or under a Federal-aid program shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance with the laws of that State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State highway department shall not erect any information signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users.".

(b) Subsection (a) of section 113 of title 23, United States Code, is amended to read as follows: "The Secretary shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors on the construction work performed on highway projects on the Federal-aid systems, the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs, shall be paid wages at rates not less than those prevailing on the same type of work on similar construction in the immediate locality as determined by the Secretary of Labor in accordance with the Act of August 30, 1935, known as the Davis-Bacon Act (40 U.S.C. 267a)."

(c) Subsection (c) of section 121 of title 23, United States Code, is amended by striking the words "following inspections".

RESEARCH AND PLANNING

SEC. 127. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

"(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title.".

(b) Subsection (c)(2) of section 307, title 23, United States Code, is amended by striking "1964" and inserting in lieu thereof "1983", and by striking "section 104" and inserting in lieu thereof "sections 104 and 144".

(c) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:

"(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments, exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

(d) Section 307(c)(1) of title 23, United States Code, is amended by adding in the last sentence after the words "highways and highway systems" the words "and for study, research and training on engineering standards and construction materials, including evaluation and accreditation of inspection and testing,".

NONDISCRIMINATION

SEC. 128. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex".

(b) Section 140 of title 23, United States Code, is amended by adding new subsection (c) as follows:

"(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete, on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(a) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed $10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C. 252(e).".

(c) The title of section 140 of title 23, United States Code, is amended to read:

"§ 140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking out

"140. Equal employment opportunity."

and inserting in lieu thereof

"140. Nondiscrimination.".

INTERAGENCY AGREEMENTS

SEC. 129. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156 the following new section:

"§ 157. Interagency agreements

"Not later than one hundred and eighty days after the date of enactment of this section, the Secretary shall enter into agreements with the Secretaries of the Departments of Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of such other Federal departments, agencies, and instrumentalities as the Secretary determines, to minimize, to the greatest extent possible, duplication, paperwork, and delays in the development and approval of projects under this title and any other provision of law relating to the Federal highway programs. Notwithstanding any other provision of law, such agreements shall provide that actions on applications or requests for permits, licenses, findings, and other approvals and determinations required for such projects will be fully coordinated by the Department of Transportation with the review process established under the National Environmental Policy Act of 1969, as amended, and, to the greatest extent practicable, that a decision with respect to each such application or request will be made contemporaneously with approval of the environmental impact statement, finding of no significant impact, or categorical exclusion required for such project, but in no event later than one hundred eighty days after the date of approval of such environmental review document.".

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 130. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1983 shall not exceed $12,000,000,000, for fiscal year 1984 shall not exceed $12,800,000,000, for fiscal year 1985 shall not exceed $13,600,000,000, for fiscal year 1986 shall not exceed $14,500,000,000, and for fiscal year 1987 shall not exceed $14,900,000,000. These limitations shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, section 9 of the Federal-Aid Highway Act of 1981, and section 118 of the United Station Redevelopment Act of 1981. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code.

(b) For the fiscal years 1983, 1984, 1985, 1986, and 1987, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all State with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Codes;

(2) after August 1, 1983, August 1, 1984, August 1, 1985, August 1, 1986, and August 1, 1987, respectively, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year. In revising such distributions, the Secretary shall give priority to those states which, because of statutory changes under Amendments and under P.L. 97-134, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

CERTIFICATION OF STATE PROCEDURES

SEC. 131. (a) The Secretary of Transportation in cooperation with the State of Vermont shall carry out a project to demonstrate the feasibility of reducing the time and the cost required to complete highway projects, other than projects on the Interstate System, in areas that require improved access between rapidly growing suburban areas and established urban core areas, by extending the coverage of State certifications under section 117(a) of title 23 of the United States Code, to any Federal law, regulation, or policy that applies to such projects.

(b) In implementing this section, the Secretary shall review applications for projects submitted by the State of Vermont with respect to which the State agrees to assume the responsibility of the Secretary with regard to any such Federal law, regulation, or policy. The Secretary shall be deemed to have fulfilled his reponsibility under such law, regulation, or policy, provided that—

(1) the Secretary finds that the State has procedures which are sufficient to assure that the project will be carried out in accordance with the provisions of such law, regulation, or policy;

(2) the State highway department is authorized and consents to accept the jurisdiction of the Federal courts in any suit brought to enforce any such Federal law or regulation; and

(3) the State highway department certifies that the project has been carried out in accordance with the procedures specified under subsection (b)(1) of this section.

(c) In carrying out the demonstration project authorized under this section, the Secretary may continue to discharge his responsibilities directly with respect to those laws, regulations, and policies for which he finds State procedures are not sufficient.

(d) In implementing this section, the Secretary shall consider the procedures developed pursuant to section 141 of the Federal-Aid Highway Act of 1976, as amended, and shall encourage the State to carry out its responsibilities in cooperation with appropriate political subdivisions of the State.

(e) There is authorized to be appropriated out of the Highway Trust Fund to carry out the project authorized under this section a sum not to exceed $50,000,000.

(f) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(g) Not later than six months after the completion of such project, the Secetary shall submit a report to Congress which includes, but is not limited to, a description of the methods used to accomplish the project and the changes, if any, required to adopt expanded certification. The report should also contain recommendations for applying the methods to other highway projects, and any changes to existing law which may be necessary to permit more widespread use of expanded certification acceptance.

ALASKA HIGHWAY

SEC. 132. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provision of law any obligation limitation enacted for fiscal year 1983 or for any fiscal year thereafter shall not apply to projects authorized by the previous sentence.".

(b) This amendment shall be effective upon the date of the enactment of this Act.

TERRITORIAL HIGHWAY PROGRAM

SEC. 133. (a) Section 215 of title 23, United States Code, is hereby repealed.

(b)(1) The unobligated balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available until expended under the conditions applicable prior to such enactment.

(c) Section 120(i) of title 23, United States Code, repealed.

(d) Section 401 of title 23, United States Code, is amended by deleting the second thereof.

(e) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportionment.".

(f) The analysis of chapter 2 of title 23, United States Code, is amended by deleting:

"215. Territories highway development program."

and inserting in lieu thereof:

"215. Repealed.".

ACCELERATION OF BRIDGE PROJECTS

SEC. 134. Section 147 of the Surface Transportation Assistance Act of 1978, as amended by section 15 of Public Law 96-106 (93 Stat. 798) is repealed. Funds previously set aside in accordance with such section 147 shall be available for obligation for a period of two years from the date of enactment of this Act. Such funds may be obligated under the same conditions which existed prior to the repeal of such section 147. Funds not obligated within that period of availability shall be permanently withdrawn and such funds shall be apportioned by the Secretary to the several States in accordance with section 144(e) of title 23, United States Code.

LAKE ROAD EROSION DEMONSTRATION

SEC. 135. (a) The Secretary of Transportation is authorized to carry out demonstration projects in and around Devils Lake, North Dakota, for the purpose of demonstrating construction techniques to prevent wave erosion on closed basin lakes with grade level highway crossings.

(b) The Secretary is authorized to reimburse from funds authorized by subsection (c) the State of North Dakota for funds previously expended on projects described in subsection (a).

(c) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this section not to exceed $4,500,000 for the fiscal year ending September 30, 1983.

(d) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall not exceed 75 per centum of the total cost thereof and such fund shall remain available until expended.

TRUCK SAFETY DEMONSTRATION

SEC. 136. The Secretary of Transportation, in cooperation with the State of Idaho, shall conduct a project on a primary segment of highway experiencing a high incidence of truck accidents. The study shall include an analysis of factors contributing to truck accidents such as weather conditions, sight distance, road curvature, roadway width, and gradient. The study shall also include an analysis of the benefit-cost ratio of certain safety improvements implemented to correct hazards contributing to truck accidents.

(b) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this section not to exceed $6,500,000.

(c) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost if any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(d) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project not later than one hundred eighty days after completion of such project.

DEFINITION

SEC. 137. The definition of the term "construction" in section 101(a), title 23, United States Code, is amended by striking the period at the end thereof and inserting in lieu thereof the following: "and also includes costs incurred by the State in performing Federal-aid project related audits which directly benefit the Federal-aid highway program."

REPORTS

SEC. 138. (a) Section 307 of title 23, United States Code, is amended by adding a new subsection (e) as follows:

"(e) The Secretary shall report to the Congress in January 1983, and in January of every second year thereafter, estimates of the future highway needs of the Nation."

(b) Section 3 of Public Law 89-139, 79 Stat. 578, August 28, 1965, and section 17 of the Federal-Aid Highway Act of 1968 are hereby repealed.

CONSTRUCTION BY STATES IN ADVANCE OF APPORTIONMENT

SEC. 139. (a) Section 115(a) of title 23, United States Code, is amended to read as follows:

"(a)(1) When a State has obligated all funds apportioned or allocated to it under sections 103(e)(4), 104, or 144, of this title, other than Interstate funds, and proceeds to construct any highway substitute, Federal-aid system or program or bridge project, other than an Interstate project funded under section 104(b)(5) of this title, without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary is authorized to pay to such State the Federal share of the costs of construction of such project when addition-

al funds are apportioned to such State under sections 103(e)(4), 104, or 144 of this title if—

"(A) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects, and

"(B) the project conforms to the applicable standards adopted under section 109 of this title.

"(2) The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State. No application may be approved which will exceed the State's expected apportionment of such authorizations.".

(b) Section 115(c) of title 23, United States Code, is amended by striking "104" and inserting in lieu thereof "103(3)(4), 104, or 144".

DESIGN AND CONSTRUCTION QUALITY ASSURANCE STUDY

SEC. 140. (a) The Secretary of Transportation is directed to coordinate a study with the National Bureau of Standards, the American Society for Testing and Materials, the Office of Technology Assessment, and other organizations as deemed appropriate, to examine (1) to determine the existing quality of design, construction, products, use, and systems for highways and bridges; (2) to determine the need for uniform standards and criteria for design, processing, products, and applications, including personnel training and implementation of enforcement techniques; and (3) to determine the manpower needs and cost of developing a national system for the evaluation and accreditation of testing and inspection agencies.

(b) The Secretary shall submit such study to the Congress not later than one year after the date of enactment of this section.

VENDING MACHINES

SEC. 141. Notwithstanding section 111 of title 23, United States Code, before October 1, 1983, any State may permit the placement of vending machines in rest and recreation areas and in safety rest areas constructed or located on rights-of-way of the National System of Interstate and Defense Highways in such State. Such vending machines may only dispense such food, drink, and other articles as the State highway department determines are appropriate and desirable. Such vending machines may only be operated by the State. In permitting the placement of vending machines under this section, the State shall give priority to vending machines which are operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the Randolph-Sheppard Act (20 U.S.C. 107(a)(5)). The costs of installation, operation, and maintenance of vending machines under this section shall not be eligible for Federal assistance under title 23, United States Code.

RELOCATION OF UTILITY FACILITIES

SEC. 142. (a) Section 101(a) of title 23, United States Code, as amended by section 106 of this Act, is amended by inserting the phrase "and utility appurtenances," after the word "crossing," in the definition of "construction."

(b) Section 123 of title 23, United States Code, is amended—

(1) by striking in subsection (a) "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof "a Federal-aid system or under a Federal-aid program,"; and

(2) by adding a new subsection (d) at the end thereof to read as follows: "(d) When a State relocates utilities solely to correct hazards to the traveling public from utility appurtenances on or near the right-of-way of Federal-aid projects, the Secretary may waive the provisions of subsection (a) of this section to the extent such provisions restrict Federal participation in such work if the Secretary determines such waiver would serve a public purpose by facilitating the State's safety improvement program."

TECHNICAL AMENDMENTS

SEC. 143. (a) Section 101(a) is amended as follows:

(1) In the tenth sentence, by inserting the words "or under one of the Federal-aid programs" immediately after the words "Federal-aid systems";

(2) In the nineteenth sentence, by striking the period at the end thereof and adding the words "or under the Federal-aid programs.";

(3) In the thirtieth sentence, by deleting the words "secondary system" and inserting in lieu thereof the words "rural program", and by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In the thirty-first sentence, by deleting the word "system" each time it appears and inserting in lieu thereof the word "program"; and

(5) By adding after the twenty-eighth sentence the following sentence: "The term 'Federal-aid program' means any one of the Federal-aid highway programs described in section 103 of this title.".

(b)(1) Section 103 is amended by adding to the title the words "and programs" after the words "Federal-aid systems";

(2) Section 103(a) is amended to read as follows: "For the purpose of this title, the Federal-aid systems, which consist of the primary system and the Interstate System, along with the Federal-aid programs, which consist of the Federal-aid rural program and the Federal-aid urban program, are established and continued pursuant to the provisions of this section.";

(3) Section 103(f) is amended to read as follows: "The Secretary shall have authority to approve in whole or in part the Federal-aid primary system, the Federal-aid rural program, the Federal-aid urban program, and the Interstate System, as and when such systems and programs or portions thereof are designated, or to require modifications or revisions thereof. No Federal-aid system or program or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.";

(4) Subsections (g) and (h) of section 103 are repealed; and

(5) The analysis of chapter 1 of title 23 is amended by deleting

"103. Federal-aid systems."

and inserting in lieu thereof

"103. Federal-aid system and programs.".

(c) Section 104 is amended as follows:

(1) In subsections (a) and (b)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems" each time they appear;

(2) In paragraph (2) of section 104(b), by deleting the words "secondary system" and inserting in lieu thereof the words "rural program";

(3) In paragraph (6) of section 104(b) by deleting the word "system" and inserting in lieu thereof the word "program";

(4) In subsection (c)(1), by deleting the phrase ", commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-Aid Highway Act of 1956 (70 Stat. 374),"; and

(5) In subsection (f)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems".

(d) Section 105 is amended as follows:

(1) In the first sentence of subsection (a) by inserting the words "and programs" after the words "Federal-aid systems", and by deleting in the third sentence the comma and all that follows and inserting a period after the word "part"; and

(2) In subsection (d) by deleting the words "programs for", and by deleting the words "on the Federal-aid urban system" and inserting in lieu thereof the words "under the Federal-aid urban program".

(e) Section 106 is amended as follows:

(1) Section 106(b) is amended by striking the word "on" and inserting in lieu thereof the word "under," and by striking the word "system" each place it appears and inserting in lieu thereof the word "program".

Section 106(d) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(f)(1) Section 108(a) is amended by inserting the words "or under any of the Federal-aid highway programs," immediately after the words "Interstate System," the first time they appear, and by inserting the words "and programs" immediately after the words "Federal-aid highway systems" the second time they appear;

(2) Section 108(c)(2) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system"; and

(3) The last sentence of section 108(c)(3) is amended by inserting the words "or under the Federal-aid program" immediately after the words "Federal-aid system".

(g)(1) Section 109(a) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(2) Section 109(c) is amended by deleting the words "Projects on the Federal-aid secondary system" and inserting in lieu thereof the words "Federal-aid rural program projects";

(3) Section 109(e) is amended by deleting the phrase "No funds shall be approved for expenditure on any Federal-aid highway," and inserting in lieu thereof the following phase: "No funds shall be approved for expenditure on any highway on the Federal-aid highway system or under the Federal-aid highway program,";

(4) Section 109(h) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system";

(5) Section 109(i) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system" each time they appear in the first and second sentences, by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system" in the third sentence, by inserting the words "or program" immediately after the words "Federal-aid system" in the fifth sentence, and by inserting the words "or under" immediately after the word "in such sentence; and

(6) Section 109(l)(1) is amended by inserting the words "or under any Federal-aid

program" immediately after the words "Federal-aid system".

(h)(1) Section 113(a) is amended by deleting the words "the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems," and inserting in lieu thereof the words "the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs,"; and

(2) Section 113(b) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(i) Section 115(a) is amended to read as follows:

"(a) When a State has obligated all funds for the primary system or for any of the Federal-aid programs, other than the Interstate System, apportioned to it under section 104 of this title, and proceeds to construct any projects without the aid of Federal funds, including one or more parts of any project, on the primary system or under any of the Federal-aid programs in such State, other than the Interstate System, as that system may be designated or any of those programs may be comprised at that time, in accordance with all procedures and all requirements applicable to projects on the primary system or under any such program, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 104 of this title if—

"(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects on the Federal-aid system or under the Federal-aid program involved, and

"(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that no application may by approved which will exceed the State's expected apportionment of such authorization.".

(j) Section 118(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(k)(1) Section 120(a) is amended by deleting in the first sentence all of the words between "(a)" and "(A)" and inserting in lieu thereof the words "Subject to the provisions of subsection (d) of this section, the Federal share payable on account of any project, financed with primary, rural, or urban funds, on the Federal-aid primary system, under the Federal-aid rural program, and under the Federal-aid urban program shall either"; and

(2) Section 120(g) is amended by deleting the words "Federal-aid highways" and inserting in lieu thereof the words "Federal-aid projects".

(l) Section 121(c) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(m) Section 123(a) is amended by deleting the words "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof the words "a Federal-aid system or under a Federal-aid program,".

(n) Section 124(a) is amended by inserting the words "or under any of the Federal-aid programs," immediately after the phrase "including the Interstate System,".

(o) Section 129 is amended as follows:

(1) In subsection (c), b inserting the words "and programs" immediately after the words "Federal-aid highway systems";

(2) In subsections (f) and (g)(2), by inserting the words "or programs" immediately after the words "Federal-aid systems" each time they appear; and

(3) In subsection (i), by deleting the words "Federal-aid system, other than the Interstate System," and inserting in lieu thereof the words "Federal-aid project other than one of the Interstate System,".

(p) Section 135(b) is amended by placing a period after the word "flow" and deleting the remainder of the sentence.

(q) 137(a) is amended by deleting the words "project on the Federal-aid urban system" and inserting in lieu thereof the words "project under the Federal-aid urban program".

(r) Section 140(a) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words "Federal-aid systems".

(s) Section 141(b) of title 23, United States Code, is amended to read as follows:

"(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing in accordance with section 127 of this title all State laws respecting maximum vehicle size and weights permitted on all roads receiving funds under the Federal-aid program, including the primary system, the Interstate System, and is a route functionally classified as an arterial or major collector.".

(t) Section 142 is amended as follows:

(1) In subsection (a)(1) by inserting the words "and highways under the Federal-aid programs" immediately after the words "Federal-aid systems", and by deleting the words "as a project on any Federal-aid system";

(2) In subsection (a)(2) by deleting the words "project on the Federal-aid urban system" each place it appears and inserting in lieu thereof "project under the Federal-aid urban program"; and

(3) In subsection (e)(2) by deleting the words "projects on the Federal-aid urban system" and inserting in lieu thereof "projects under the urban program".

(u) Section 149 is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(v) Section 150 is amended as follows—

(1) By deleting the word "system" in the title and inserting the word "program" in lieu thereof.

(2) By amending the analysis of chapter 1 of title 23, United States Code, by deleting:

"150. Allocation of urban system funds.".

and inserting in lieu thereof:

"150. Allocation of urban program funds.".

(w) Section 302(b) is amended by deleting the words "on the Federal-aid secondary system," and inserting in lieu thereof the words "under the Federal-aid rural program", and by deleting the words "secondary funds," and inserting in lieu thereof the words "rural funds,".

(x) Section 304 is amended by inserting the words "and highways under the Federal-aid programs" between the word "systems" and the comma.

(y) Section 317(d) is amended by inserting the words "or under a Federal-aid program" immediately after the words "Federal-aid system".

(z) Section 320(a) is amended by inserting the words "or programs" immediately after the words "highway systems" in the second sentence.

(aa) Section 322 is amended as follows:

(1) In subsection (c)(1) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is a route functionally classified as an arterial or major collector,"; and

(2) In subsection (c)(2) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is not a route functionally classified as an arterial or major collector,".

(bb) Section 402(d) is amended by inserting the words "and programs" immediately after the words "Federal-aid systems".

TEMPORARY MATCHING FUND WAIVER

SEC. 144. (a) Notwithstanding any other provision of law, the Federal share of any qualifying project approved by the Secretary of Transportation under section 106(a), and of any qualifying project for which the United States becomes obligated to pay under section 117, of title 23, United States Code, during the period beginning on the date of enactment of this Act and ending September 30, 1983, shall be such percentage of the construction cost as the State highway department requests, up to and including 100 per centum.

(b) For purposes of this section, the term "qualifying project" means a project approved by the Secretary of Transportation under section 106(a) of title 23, United States Code, or a project for which the United States becomes obligated to pay under section 117 of title 23, United States Code, for which the Governor of the State submitting the project has certified, in accordance with regulations established by the Secretary, that sufficient funds are not available to pay the cost of the non-Federal share of the project.

(c) The total amount which may be obligated for qualifying projects in any State under subsection (a) shall not be greater than the excess of—

(1) The amount of obligation authority distributed to such State for fiscal year 1983 under section 104(b) of this Act, or

(2) the amount of obligation authority distributed to such State for fiscal year 1982 under section 3(b) of the Federal-Aid Highway Act of 1981.

(d) The total amount of such increases in the Federal share as are made pursuant to subsection (a) for any State shall be repaid to the United States by such State on or before September 30, 1984. Such payments shall be deposited in the Highway Trust Fund and such repaid amounts shall be credited to the last apportionment made for the category of funds for which the money so used was originally apportioned.

If a State has not made the repayment as required by subsection (d) of this section, the Secretary shall deduct from funds apportioned to a State under section 104(b) of

title 23, United States Code, except for section 104(b)(5)(A), in each of the fiscal years ending September 30, 1985, and September 30, 1986, a pro rata share of each category of such apportioned funds, the total amount of which shall be equal to 50 per centum of the amount needed for repayment.

MINIMIZATION OF CONTRIBUTIONS

SEC. 145. (a) On October 1, the Secretary of Transportation shall allocate among the States, as defined in title 23, United States Code, amounts sufficient to insure that a State's percentage of apportionments in each such fiscal year of primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and rail-highway crossings funds under sections 104(b), 144 and 152 of title 23, United States Code and section 203 of the Highway Safety Act of 1973, as amended, shall not be less than 85 per centum of the percentage of estimated tax payments attributable to highway users in that State paid into the Highway Trust Fund, excluding the Mass Transit Account, in the latest fiscal year for which data is available.

(b) Amounts allocated pursuant to subsection (a) of this section shall be available for obligation when allocated for the year authorized plus three fiscal years, shall be subject to the provisions of title 23, United States Code, and may be obligated for primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and rail-highway crossings projects. Obligation limitations for Federal-aid highways and highway safety construction programs established by this Act or any subsequent Act shall not apply to obligations made under this section except where the provision of law establishing such limitation specifically amends or limits the applicability of this sentence. Sums allocated pursuant to this section shall not be considered to be sums allocated for purposes of section 104(b) of this Act.

(c) In order to carry out this section there is authorized to be appropriated, out of the Highway Trust Fund, excluding the Mass Transit Account, $526,000,000 for the fiscal year ending September 30, 1983, and such sums as may be necessary for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

COMMERCIAL MOTOR VEHICLE SIZE AND WEIGHT

SEC. 146. Section 127 of title 23, United States Code, is amended by striking the words "that such overall gross weight may not exceed eighty thousand pounds," following "*Provided*" and inserting in lieu thereof the following:

(1) "That each State shall establish a maximum gross weight of eighty-thousand pounds, a single axle weight of twenty thousand pounds, a tandem axle weight of thirty-four thousand pounds,"; and

(2) By striking the words "thereof that could" immediately following "combinations" and insert "which the States determined could".

INNOVATIVE TECHNOLOGIES

SEC. 147. (a) The Congress hereby finds and declares that it is in the national interest to encourage and promote utilization by the States of highway and bridge surfacing, resurfacing, or restoration materials which are produced from recycled materials or which contain asphalt additives to strengthen the materials. Such materials conserve energy and reduce the cost of resurfacing or restoring our highways.

(b) The Secretary of Transportation is hereby authorized for each of the fiscal years through September 30, 1985, to increase the Federal share as provided in sections 119, 120 and 144 of title 23, United States Code, by five per centum of any project submitted by the State highway departments which contains in the plans, specifications, and estimates submitted, pursuant to section 106, of title 23, United States Code, the use of the materials described in subsection (a). To be eligible for such supplemental Federal assistance, significant amounts of asphalt additives or recycled materials must be used in each project approved by the Secretary.

ENERGY IMPACTED ROADS

SEC. 148. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection—

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway department may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects."

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection—

"(k) Notwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as a result of transportation activities to meet national energy requirements and will continue to incur such use is 85 per centum of the cost of such project.".

DEMONSTRATION PROJECT—DOWNTOWN CONGESTION RELIEF

SEC. 149. (a) The Secretary of Transportation is authorized to carry out a demonstration project on the Federal-aid urban system for the construction of a high level bridge over a high volume intercoastal waterway segment. The project shall demonstrate the reduced congestion resulting in the downtown area from the construction of such a bridge which serves a major port. Such project shall be subject to the provsions of chapter 1 of title 23, United States Code, applicable to highway projects on the Federal-aid system.

(b) There is authorized to be appropriated to carry out this section, out of the Highway Trust Fund, not to exceed $23,000,000 for the fiscal year ending September 30, 1983. Funds authorized to carry out this section shall be available in the same manner and to the same extent as if such funds were apportioned under Chapter 1 of title 23 U.S. Code, except that such funds shall remain available until expended. Obligations for this project shall not be subject to any obligation limitation for Federal-aid highways.

(c) In carrying out this section, the Secretary shall consult with the Secretary of the Army and the Commandant of the Coast Guard concerning permit procedures which will expedite completion of this bridge.

(d) The Secretary shall report to Congress upon completion of the project the results of this demonstration project, together with any recommendations the Secretary deems necessary.

ORDER FOR RECESS UNTIL 9:45 TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate completes its business this evening, it stand in recess until the hour of 9:45 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

SCHEDULE FOR TOMORROW

Mr. STEVENS. Mr. President, the majority leader has asked me to state that tomorrow we shall possibly consider S. 2411, the Justice Assistance Act; S. 2000, the Bankruptcy Act; H.R. 6211, the highway gas tax bill; and one or more appropriation bills.

ORDER FOR RECOGNITION OF SENATOR ZORINSKY WITH CERTAIN CONDITIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate returns to the Radio Marti bill, Senator ZORINSKY be recognized and that it not count as a second speech under the second-speech rule.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator will be so recognized.

PRINTING OF "GUIDE TO RESEARCH COLLECTIONS OF FORMER UNITED STATES SENATORS, 1789-1982" AS SENATE DOCUMENT

Mr. STEVENS. Mr. President, I send to the desk a resolution in behalf of the distinguished majority and minority leaders and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A Senate resolution (S. Res. 506) authorizing the printing of a compilation of materials entitled "Guide to Research Collections of Former United States Senators, 1789-1982" as a Senate document.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska for consideration of the resolution?

There being no objection, the resolution was considered and agreed to, as follows:

S. RES. 506

Resolved, That a compilation of materials entitled "Guide to Research Collections of Former United States Senators, 1789-1982", prepared by the Senate Historical Office, be printed, with illustrations, as a Senate document, and that five thousand additional copies of such document be printed for the use of the Office of the Secretary of the Senate.

SEC. 2. The document specified in the first section of this resolution shall be printed and bound with a paperback cover of the style, design, and color as the Secretary of the Senate shall direct.

Mr. STEVENS. I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR SECRETARY OF THE SENATE TO RECEIVE MESSAGES FROM THE HOUSE

Mr. STEVENS. Mr. President, I ask unanimous consent that during the recess of the Senate until Thursday, December 9, 1982, messages from the House of Representatives may be received by the Secretary of the Senate and appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

INDIAN MINERAL DEVELOPMENT ACT OF 1982

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1894.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1894) entitled "An Act to permit Indian tribes to enter into certain agreements for the disposition of tribal mineral resources, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Indian Mineral Development Act of 1982".

SEC. 2. For the purposes of this Act, the term—

(1) "Indian" means any individual Indian or Alaska Native who owns land or interests in land title to which is held in trust by the United States or is subject to a restriction against alienation imposed by the United States;

(2) "Indian tribe" means any Indian tribe, band, nation, pueblo, community, rancheria, colony, or other group which owns land or interests in land title to which is held in trust by the United States or is subject to a restriction against alienation imposed by the United States; and

(3) "Secretary" means the Secretary of the Interior.

SEC. 3. (a) Any Indian tribe, subject to the approval of the Secretary and any limitation or provision contained in its constitution or charter, may enter into any joint venture, operating, production sharing, service, managerial, lease or other agreement, or any amendment, supplement or other modification of such agreement (hereinafter referred to as a "Minerals Agreement") providing for the exploration for, or extraction, processing, or other development of, oil, gas, uranium, coal, geothermal, or other energy or nonenergy mineral resources (hereinafter referred to as "mineral resources") in which such Indian tribe owns a trust or restricted interest, or providing for the sale or other disposition of the production or products of such mineral resources.

(b) Any Indian owning a trust or restricted interest in mineral resources may include such resources in a tribal Minerals Agreement subject to the concurrence of the parties and a finding by the Secretary that such participation is in the best interest of the Indian.

SEC. 4. (a) The Secretary shall approve or disapprove any Minerals Agreement submitted to him for approval within (1) one hundred and eighty days after submission or (2) sixty days after compliance, if required, with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C) or any other requirement of law, whichever is later. Any party to such an agreement may enforce the provisions of this subsection pursuant to section 1361 of title 28, United States Code.

(b) Not later than thirty days prior to formal approval or disapproval of any Minerals Agreement, the Secretary shall provide written findings forming the basis of his intent to approve or disapprove such agreement to the affected Indian tribe. Notwithstanding any other law, such findings and all projections, studies, data or other information possessed by the Department of the Interior regarding the terms and conditions of the Minerals Agreement, the financial return to the Indian parties thereto, or the extent, nature, value or disposition of the Indian mineral resources, or the production, products or proceeds thereof, shall be held by the Department of the Interior as privileged proprietary information of the affected Indian or Indian tribe.

(c) The authority to disapprove agreements under this section may only be delegated to the Assistant Secretary of the Interior for Indian Affairs. The decision of the Secretary or, where authority is delegated, of the Assistant Secretary of the Interior for Indian Affairs to disapprove a Minerals Agreement shall be deemed a final agency action.

SEC. 5. In approving or disapproving a Minerals Agreement, the Secretary shall determine if it is in the best interest of the Indian tribe and, in connection therewith, shall consider, among other things—

(1) the economic return provided in the agreement in relation to the economic potential of the mineral resource involved;

(2) the nature of the advice and technical assistance available to the Indian tribe in the negotiation of the agreement;

(3) the potential environmental, socioeconomic, and cultural effects of the implementation of the agreement on the tribe and its members;

(4) any provisions in the agreement for tribal access to management, financial, production and other operating information;

(5) any provisions in the agreement relating to diligent exploration and development or tribal monitoring, review, and amendment; and

(6) any provisions in the agreement for resolving disputes which may arise between the parties over the terms or implementation of the agreement:

Provided, That the Secretary shall not be required to prepare any study regarding environmental, socioeconomic, or cultural effects of the implementation of a Minerals Agreement apart from that which may be required under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C).

SEC. 6. (a) Mineral Agreements, which by their terms do not purport to be leases, entered into by any Indian tribe and approved by the Secretary after January 1, 1975, but prior to the enactment of this Act, shall be processed as provided in this section.

(b) Where an Indian tribe has requested ratification of the Secretary's authority to approve an agreement covered under subsection (a) of this section by notifying the Senate Select Committee on Indian Affairs and the House Committee on Interior and Insular Affairs after July 27, 1982, but prior to enactment of this Act or by notifying the Secretary within thirty days after enactment of this Act, such authority is hereby ratified: *Provided,* That such ratification shall not constitute a congressional determination of the validity or legality of any particular provision of such agreement.

(c) Where an affected Indian tribe does not provide notice as provided in subsection (b) of this section, the Secretary shall review, within one hundred and twenty days after enactment of this Act, any such prior agreement to determine if it complies with the purposes of this Act and other appropriate provisions of law. Where the Secretary fails to act within the alloted time, the previous approval of the Secretary shall be deemed ratified as provided in subsection (b) of this section.

SEC. 7. Nothing in this Act shall affect, nor shall any Minerals Agreement approved pursuant to this Act be subject to or limited by, the Act of May 11, 1938 (52 Stat. 347; 25 U.S.C. 396a et seq.), as amended, or any other law authorizing the development or disposition of the mineral resources of an Indian or Indian tribe.

SEC. 8. Any Indian tribe, subject to the approval of the Secretary, may enter into an agreement to pledge or hypothecate its interest in mineral resources which have been lawfully severed from the land, or their production, products or proceeds, as security for the repayment of funds provided to Indian tribes to finance the cost of development of its mineral resources. The pledge or hypothecation agreement may be enforced only against the specified pledged severed mineral resources, or the pledged production, products or proceeds, and only in accordance with the terms and conditions of the agreement. The United States shall not be deemed a necessary party in any action to enforce such agreement.

SEC. 9. In carrying out the obligations of the United States, the Secretary shall ensure that upon the request of an Indian tribe and to the extent of his available resources, such tribe shall have available advice, assistance, and information during the negotiation of a Minerals Agreement. The Secretary may fulfill this responsibility either directly through the use of Federal officials and resources or indirectly by providing financial assistance to the Indian tribe to secure independent assistance.

SEC. 10. (a) Within one hundred and eighty days of the date of enactment of this Act, the Secretary of the Interior shall promulgate rules and regulations to facilitate implementation of this Act. The Secretary shall, to the extent practicable, consult with national and regional Indian organizations and tribes with expertise in mineral development both in the initial formulation of rules and regulations and any future revision or amendment of such rules and regulations. Where there is pending before the Secretary for his approval a Minerals Agreement of the type authorized by section 3 of this Act which was submitted prior to the enactment of this Act, the Secretary shall evaluate and approve or disapprove such agreement based upon section 4(b) and section 5 of this Act, but shall not withhold or delay such approval or disapproval on the grounds that the rules and regulations im-

plementing this Act have not been promulgated.

(b) Where the Secretary has approved a Minerals Agreement in compliance with the provisions of this Act and any other applicable provision of law, the United States shall not be liable for any losses sustained by a tribe or individual Indian as a result of changes in markets for any minerals subject to such Minerals Agreement or as a result of decisions made by the parties to the agreement in the course of doing business pursuant to the terms of such agreement: *Provided,* That the Secretary shall continue to have a trust obligation to ensure that the legal rights of a tribe or individual Indian are protected in the event of a violation of the terms of any Minerals Agreement by any other party to such agreement.

(c) Nothing contained in this Act shall absolve the United States from any responsibility to the Indians, including those which derive from the trust relationship and from any treaties, Executive orders, or agreements between the United States and any Indian tribe.

SEC. 11. Nothing in this Act shall impair any right of an Indian tribe organized under section 16 or 17 of the Act of June 18, 1934 (48 Stat. 987), as amended, to develop their mineral resources as may be provided in any constitution or charter adopted by such tribe pursuant to that Act.

Mr. STEVENS. Mr. President, I ask that the Senate concur in the amendment of the House, with an amendment by the Senator from Montana.

There is an amendment here to go to the House in behalf of the Senator from Montana. I see that he is here. Perhaps he wishes to submit this in his own behalf.

UP AMENDMENT NO. 1418

Mr. STEVENS. Mr. President, I send an amendment to the desk in behalf of Senator MELCHER.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for the Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 1418.

On page 1, line 5, after the phrase "interests in land" insert the word "the".

On page 2, line 11, delete the word "trust" and insert in lieu thereof the word "beneficial".

On page 2, on line 14, delete the word "trust" and insert in lieu thereof the word "beneficial".

On page 2, on line 24, after the word "of" insert the word "federal".

On page 3, after line 2, insert a new subsection (b):

"(b) In approving or disapproving a Minerals Agreement, the Secretary shall determine if it is in the best interest of the Indian tribe or of any Individual Indian who may be party to such agreement and shall consider, among other things, the potential economic return to the tribe; the potential environmental, social and cultural effects on the tribe; and provisions for resolving disputes that may arise between the parties to the agreement: *Provided,* That the Secretary shall not be required to prepare any study regarding environmental, socioeconomic, or cultural effects of the implementation of a Minerals Agreement apart from that which may be required under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)."

On page 3, line 3, delete "(b)" and insert in lieu thereof "(c)".

On page 3, line 16, delete "(c)" and insert in lieu thereof "(d)".

On page 3, line 20, after the word "Affairs" insert a comma (,).

On page 3, line 21, after the period (.), add the following new sentence and a new subsection (e). "The district courts of the United States shall have jurisdiction to review the Secretary's disapproval action and shall determine the matter de novo. The burden is on the Secretary to sustain his action."

"(e) Where the Secretary has approved a Minerals Agreement in compliance with the provisions of this Act and any other applicable provision of law, the United States shall not be liable for losses sustained by a tribe or individual Indian under such agreement: *Provided,* That the Secretary shall continue to have a trust obligation to ensure that the rights of a tribe or individual Indian are protected in the event of a violation of the term of any Minerals Agreement by any other party to such agreement: *Provided further,* That nothing in this Act shall absolve the United States from any responsibility to Indians, including those which derive from the trust relationship and from any treaties, Executive orders, or agreement between the United States and any Indian tribe."

On page 3, beginning on line 22, strike Sections 5 and 6 (through the end of line 24 on page 5).

On page 5, after line 24, insert the following new Section 5:

"SEC. 5. (a) The Secretary shall review, within ninety days of enactment of this Act, any existing Minerals Agreement, which does not purport to be a lease, entered into by any Indian tribe and approved by the Secretary after January 1, 1975 but prior to enactment of this Act, to determine if such agreement complies with the purposes of this Act. Such review shall be limited to the terms of the agreement and shall not address questions of the parties' compliance therewith. The Secretary shall notify the affected tribe and other parties to the agreement of any modifications necessary to bring an agreement into compliance with the purposes of this Act. The tribe and other parties to such agreement shall within ninety days after notice make such modifications. If such modifications are not made within ninety days, the provisions of this Act may not be used as a defense in any proceeding challenging the validity of the agreement.

"(b) The review required by subsection (a) of this section may be performed prior to the promulgation of regulations required under Section 8 of this Act and shall not be considered a federal action within the meaning of that term in section 102(2)(C) of the National Environmental Protection Act of 1969 (42 U.S.C. 4332 (2)(C))."

On page 6, line 1, delete "SEC. 7" and insert in lieu thereof "SEC. 6".

On page 6, beginning on line 7, strike all of Section 8 (through end of line 18 on page 6).

On page 6, line 19, delete "SEC. 9" and insert in lieu thereof "SEC. 7".

On page 6, line 21, after the word "tribe", insert the following: "or individual Indian".

On page 6, line 22, after the word "tribe", insert the following: "or individual Indian".

On page 7, line 1, after the word "tribe", insert the following: "or individual Indian".

On page 7, line 3, delete "SEC. 10. (a)" and insert in lieu thereof "SEC. 8".

On page 7, line 15, delete "section 4(b) and section 5" and insert in lieu thereof "section 4".

On page 7, delete lines 19 through page 8, line 10.

On page 8, line 11, delete "SEC. 11" and insert in lieu thereof "SEC. 9".

Mr. MELCHER. Mr. President, I am pleased that the Senate is adopting final amendments to the Indian Mineral Development bill, S. 1894. I hope that the House will quickly follow suit so that this important bill can be cleared for the President's signature.

These amendments have been reviewed by House Interior Committee staff. The amendments assure that congressional intent is clear and the bill permits the latitude necessary for Indian tribes to develop agreements with other parties for energy development and production while still insuring a continuing trust oversight and responsibility by the Federal Government.

The legislation will give Indian tribes and, under certain conditions, individual Indians the needed authority to enter into joint venture or other agreements for development of their mineral resources. Under existing law only leases are permitted. The current Indian leasing laws are restrictive and can result in very low monetary returns to Indian Tribes. The bill broadens the opportunity for Indian Tribes to use joint venture contracts or similar agreements whereby tribes can enter into energy development enterprises. Passage of S. 1894 allows that flexibility for Indian tribes. Such development may result in economic benefits for tribes as well as increased job opportunities for Indians. The agreements will be reviewed by the Secretary of Interior to determined if they are in the best interest of the tribe. He must inform the tribe of potential economic risks.

The trust responsibility of the Federal Government with respect to tribal mineral resources remains unaltered by the bill. In fact, the Secretary of the Interior has an obligation to assist tribes from the very inception of agreements and his responsibility to protect their interests will continue for the duration of the agreement. The Secretary will not, however, be held responsible for losses tribes may incur after entering into the agreement.

There has been a great deal of interest in the measure both from Indian tribes and from energy developers who wish to participate with tribes in resource development on their tribal lands.

I am pleased to have had the opportunity to participate in developing this legislation, and look forward to seeing the benefits both to Indian tribes and to the Nation. Development of tribal

resources should help tribes become economically self-sufficient and the rest of the Nation to become less dependent upon foreign energy sources.

Mr. STEVENS. I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendments en bloc.

The amendments were agreed to en bloc.

Mr. STEVENS. I move to reconsider the vote by which the amendments were agreed to en bloc.

Mr. MELCHER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The motion to concur in the amendment of the House with the amendment of the Senate (UP 1418) was agreed to.

CONGRESSIONAL REPORTS ELIMINATION ACT OF 1982

Mr. STEVENS. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be discharged from further consideration of H.R. 6005, the Congressional Reports Elimination Act of 1982, and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the bill by title.

The legislative clerk read as follows:

A bill (H.R. 6005) to discontinue or amend certain requirements for agency reports to Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

USE AND DISTRIBUTION OF THE FUNDS AWARDED TO THE SHAWNEE INDIAN TRIBE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be discharged from further consideration of H.R. 5795, a bill pertaining to the Shawnee Indian Tribe, and ask for its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the consideration of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5795) to provide for the use and distribution of the funds awarded to the Shawnee Tribe of Indians.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5795) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

USE AND DISTRIBUTION OF MIAMI INDIANS JUDGMENT FUNDS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be discharged from further consideration of H.R. 5553, and I ask for its immediate consideration.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the discharge of the bill from the committee, and there is no objection to proceeding to the consideration of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 5553), to provide for the use and disposition of Miami Indians judgment funds.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 5553) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

USE AND DISTRIBUTION OF FUNDS TO THE WYANDOT TRIBE OF INDIANS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Indian Affairs be discharged from further consideration of H.R. 6403, a bill pertaining to funds awarded to the Wyandot Indian Tribe.

Mr. ROBERT C. BYRD. Mr. President, I do not object to the discharge of the committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask for the immediate consideration of the bill.

Mr. ROBERT C. BYRD. Mr. President, there is no objections to the immediate consideration of the bill.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 6403) to provide for the use and distribution of funds to the Wyandot Tribe of Indians.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 6403) was ordered to a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

NATIONAL JAYCEE WEEK

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of Senate Joint Resolution 240, a joint resolution to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as National Jaycee Week, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 240) to authorize and request the President to designate the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week."

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The joint resolution (S.J. Res 240) was orderd to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 240

Whereas the Jaycees idea began with a handful of young men in Saint Louis, Missouri, sixty-three years ago;

Whereas the Jaycees idea embraces today approximately three hundred thousand members in seven thousand five hundred American communities that have chapters in the United States Jaycees;

Whereas the Jaycees idea enriches the lives of communities around the world through affiliation in Jaycees International;

Whereas the Jaycees organization retains a youthful outlook, even in its maturity, and continues to build on the individual member, even with its global scope—first, helping him be the best man he can be, then helping him help his fellow man in need, one to one;

Whereas the Jaycees cares about people, and he shows it;

Whereas the Jaycees cares about progress, and he does something about it;

Whereas the Jaycees lives by the creed that "service to humanity is the best work of life", and throws himself into that work both in his vocation and avocation;

Whereas the Jaycees is the kind of young man this country will need in great numbers to help meet the challenges of our times and the coming century; and

Whereas it is fitting that we should give special recognition and encouragement to the Jaycee and his organization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of January 16, 1983, through January 22, 1983, as "National Jaycee Week", and calling upon all Government agencies and people of the United States to observe the week with appropriate programs, ceremonies, and activities.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COLORADO RIVER BASIN PROJECT AMENDMENTS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Chair lay before the Senate a message from the House on S. 2177, the Colorado River Basin Project Act.

Mr. ROBERT C. BYRD. Mr. President, there is no objection to the immediate consideration of the measure.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2177) entitled "An Act to amend title III of the Colorado River Basin Project Act, Public Law 90-537 (82 Stat. 885), as amended by Public Law 95-578 (92 Stat. 2471), and Public Law 96-375 (94 Stat. 1505)", do pass with the following amendments:

(1) Page 1, line 7, strike out "There," and insert: *"Effective October 1, 1983, there*

(2) Page 2, line 2, after "Act", insert: *: Provided, That the Secretary shall enter into agreements with non-Federal interests to provide not less than 20 per centum of the total cost of such facilities during the construction of such facilities*

UP AMENDMENT NO. 1419

Mr. STEVENS. Mr. President, I move to concur in the House amendment with a further Senate amendment, which I send to the desk on behalf of Senator McCLURE.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS), for Mr. McCLURE proposes an unprinted amendment numbered 1419.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line , insert the following:

Strike "Effective October 1, 1983, there" and insert in lieu thereof, "There".

Mr. McCLURE. Mr. President, the amendment eliminates a technical problem which was inadvertently created when the measure was amended in the House. My amendment has been cleared with the sponsors of the bill and the appropriate members of the House Committee on Interior and Insular Affairs. As my colleagues will note, the House version of S. 2177 would mistakenly reauthorize an already existing program, when what was really intended was a modification of that authorization as contained in the Colorado River Basin Project Act of 1978. I should also point out that adoption of this amendment will restore the affected portion of the bill to the original language as passed by the Senate on May 19, 1982. Other than correcting a technical problem, the amendment has no impact on the intent of the legislation.

Mr. MURKOWSKI. Mr. President, I express my strong support for Senate approval of S. 2177 the so-called central Arizona project indexing bill. As chairman of the Subcommittee on Water and Power of the Committee on Energy and Natural Resources, it was my duty and privilege to preside over the subcommittee hearing on this legislation.

But, I would like to lend my support to the chairman of the Energy and Natural Resources Committee and his remarks expressing concern regarding the requirement in the House-passed version of S. 2177 for non-Federal financing during construction of the facilities. It is my understanding that this requirement is acceptable to most of the would-be project participants, but there are some for which that 20-percent requirement as contained in the House version is just too much and they may not be able to participate. In turn, this will lead to higher costs for those who do remain active in the project and will also lead to continued ground water pumping.

Many of you will recall earlier this year when, on October 1, the Senate passed S. 2443, my bill to authorize feasibility investigations of potential water resource projects by the Bureau of Reclamation. During the debate on the measure, the potential for non-Federal cost sharing of such studies was discussed. At the time, I proposed that my Subcommittee on Water and Power, in cooperation with the Environment and Public Works Committee's Subcommittee on Water Resources, schedule a joint hearing to examine that role that cost sharing could play in future Federal water resource studies. Unfortunately, because of scheduling conflicts that hearing has not been held, but my interest remains strong and I look forward to a hearing in the 98th Congress.

I agree with the chairman that in the case of this project and S. 2177, the non-Federal financing requirement may be desirable. However, I would remind my colleagues that both the Senate and House Appropriations Committees have spoken to the issue of cost sharing or up-front financing in the respective committee reports on H.R. 7145, the Energy and Water Appropriations bill for fiscal year 1983.

Both committees recognize the need to review projects on their individual merits and not on the basis that "if you have money your project will go to the top of the list." Both committees share the concern that there has not been adequate examination by the Congress of the issues involved in cost sharing and so-called up-front financing of water resource projects by non-Federal entities.

I wholeheartedly support the views of the Appropriations Committees and do not believe that we should precipitately initiate a policy which could have extraordinary effects on the future of water resource development. Therefore, I consider this measure to be unique at this time and certainly not a precedent as far as future project authorizations are concerned.

Mr. McCLURE. Mr. President, I urge the passage of S. 2177.

As my colleagues will recall, S. 2177 was initially approved by the Senate on May 19, 1982. The bill was subsequently amended and passed by the House on September 30.

Basically, both the House and Senate versions of S. 2177 would amend section 309(b) of the Colorado River Basin Project Act to allow indexing of the existing authorization for the appropriation of $100 million for construction of distribution and drainage facilities for the central Arizona project to reflect changes in costs due to inflationary trends or normal fluctuations in costs for construction of facilities of a similar nature.

As both the House and Senate reports on the legislation point out, construction of the distribution and drainage systems are crucial to the success of the central Arizona project. They must be constructed to allow the utilization of previously constructed facilities and to help alleviate a serious problem of groundwater mining.

I am strongly in favor of passage of this measure so that we may continue the orderly development of our scarce water resources. However, I must also express a degree of reluctance in accepting the House version of the bill.

During consideration of S. 2177 of the floor of the House, an amendment was adopted which would require non-Federal interests to provide not less than 20 percent of the total cost of such facilities during the construction of such facilities.

It is my understanding that this amendment is agreeable to the project participants and to the members of the Arizona delegation. That is very well as far as the circumstances surrounding this particular project and these particular participants go—in fact, I applaud their willingness and ability to make a major financial contribution toward the costs of the facilities at the time of construction. As I said, this concept may work for a particular project and a certain set of circumstances; but my support of this legislation should in no way be considered as a blanket endorsement of a policy which would require financial contributions as a prerequisite for requirement prior to authorization of all reclamation projects.

Traditionally, the Senate Committee on Energy and Natural Resources and the Congress have examined each reclamation project individually. It is my intention to continue to do so and to craft each project authorization to conform with the physical and economic characteristics that dictate the viability of a given project.

Mr. President, great attention has been given by the press and the water resources community to the President's Cabinet Council on Natural Resources' recommendation for some form of up-front cost sharing as a requirement for the construction of water resource projects. My support for passage of S. 2177 with the House cost requirement is not to be viewed as condoning in any way what is at best a proposal that has neither been approved by the President nor forwarded to Congress with his recommendations.

Throughout the history of the reclamation program, contributions by non-Federal entities toward project costs have been encouraged. Many projects have benefited from non-Federal contributions. Two recent examples would be the contribution by the State of Washington of $15 million toward the construction of the Second Bacon Siphon and Tunnel on the Columbia Basin project in eastern Washington and the expressed intent by the State of Wyoming to contribute substantially for the modification of the Buffalo Bill Dam and Powerhouse as recently authorized in Public Law 97-293. Irrigation water users on reclamation projects already pay operation and maintenance costs under current law and also repay a portion of construction costs. Those capital costs which they are unable to repay are returned to the Federal Government as part of power revenues or charges for municipal and industrial water supplies. As all of us know who were here during the recent debate on the Reclamation Reform Act of 1982, it is estimated that of the $7.3 billion which has been invested in the reclamation program over the past 80 years, 84 percent of the capital costs will be returned to the Treasury. Each year, the reclamation program generates an estimated $3 billion in taxes to the Federal Treasury.

Mr. President, my concerns are for the future of water resource development in the West, and indeed, the entire Nation. The Congress must continue to exercise its authority and responsibility in identifying, authorizing, and funding sound water resource projects. The requirement contained in S. 2177 for a non-Federal contribution should be viewed in the context of the central Arizona project and not as a precedent for projects or policies that have yet to be examined by the Congress.

(By request of Mr. STEVENS, the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, I am delighted that the Senate is today considering S. 2177, to index funds authorized to correct the distribution systems for water to be received from the main central Arizona project canals. This water will be used for irrigation purposes.

Other costs associated with the central Arizona project were indexed in the original 1968 authorization legislation, but for some inexplicable reason, the $100 million for the distribution systems was not indexed to provide for the increased costs caused by inflation. The Bureau of Reclamation had previously estimated that the total cost to construct all of the CAP distribution systems for non-Indian lands will be $552 million in 1982 dollars; $452 million more than was authorized for this purpose in 1968.

However, the Arizona irrigation districts have done an outstanding job in reducing these projected costs by creative thinking and cooperation. Also, the local users currently have plans to raise a portion of the costs by local financing.

The Senate bill adopts a cost sharing feature passed by the House when it considered this bill. The bill now before the Senate retains this provision. Arizonans have waited a long time for the promise of CAP water supplies. That promise is now within sight. Immediate enactment of this legislation is critical and will enable us to move the water from the main canals to the fields where it is needed, otherwise we will have the water with no way to deliver it.●

Mr. JACKSON. Mr. President, I rise in support of S. 2177. I am pleased that the bill corrects an earlier oversight by amending title III of the Colorado River Basin Project Act to provide for cost indexing for the authorization of the non-Indian distribution systems of the Central Arizona project.

I would like to make some brief comments regarding the cost-sharing amendment adopted on the House floor. That amendment requires that non-Federal interests provide not less than 20 percent of the costs of constructing the non-Indian distribution facilities of the CAP.

To my knowledge, this is the first time that Congress has established a specific level of required cost-sharing on a Bureau of Reclamation project. Although it appears that 20 percent is an appropriate amount in the case of the CAP, I want to stress that there is no magic in the 20-percent figure. An equitable level of cost-sharing can only be established on a project-by-project basis after examining the economic circumstances of the particular project. In some cases it may be appropriate to impose cost-sharing at a level greater than 20 percent; in other cases I am sure that it would be appropriate to impose no cost-sharing whatsoever. The essential point is that one cost-sharing formula does not fit all projects.

In my view, S. 2177 is a commendable example of cost-sharing tailored to the economic circumstances of a specific project. The bill is not precedence for establishing a particular level of cost-sharing on a program-wide basis, nor is it precedence for requiring cost-sharing with regard to every project. For these reasons, I urge my colleagues to join me in supporting passage of this measure.

Mr. STEVENS. Mr. President, I now ask for the consideration of the Senate amendment.

The motion to concur in the House amendment with the Senate amendment (UP No. 1419) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO RETURN H.R. 6758 TO THE SENATE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Secretary of the Senate be directed to request the House of Representatives to return to the Senate H.R. 6758.

The PRESIDING OFFICER. Is there objection to the motion?

89-059 O-86-40 (Pt. 21)

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO CORRECT H.R. 6758

Mr. STEVENS. Mr. President, I further ask unanimous consent that if and when the House returns H.R. 6758, the Senate Enrolling Clerk be directed to correct the bill as follows: On page 4, line 14, after the word "available" insert "only from United States Government Sources or are not available."

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. It is my understanding that after that correction is made, the Secretary of the Senate would be directed to return that bill to the House of Representatives, is that correct?

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION AND 55 MPH NATIONAL SPEED LIMIT

Mr. HAYAKAWA. Mr. President, I wish to congratulate the Reagan administration and particularly National Highway Traffic Safety Administration head Raymond Peck on the significant improvement in highway safety of the past 2 years. The NHTSA effort under President Carter and Joan Claybrook sunk huge sums of money into enforcing a national speed limit on our safest roads, the interstates, while forcing States to withdraw critical policing from all other roads, the latter being much more dangerous. In fact, Department of Transportation statistics reveal that in a recent year the interstate system carried 18 percent of U.S. traffic on 1 percent of all highway miles, yet accounted for only 8 percent of traffic fatalities.

The current administration's dedication to getting the drunk driver off our roads is certainly more appropriate than forcing States to spend big bucks on radar traps in order to qualify for highway funds. Despite the current increase in those driving over 55 on the interstates, Mr. Peck's elimination of ineffective regulations and concentration on the most significant components of traffic safety have brought him closer to fulfilling the expectation we should have for the administrator of NHTSA. During his tenure, highway fatality rates have fallen steadily. In stark contrast, fatality rates rose dramatically during Ms. Claybrook's term at NHTSA, despite her emphasis on "drive 55 and stay alive." Surely the myth of increased safety through the national speed limit has been shattered.

I ask that an article by Roger Johnson which appeared in the Washington Times on September 28, 1982, be printed in the RECORD. The article further supports my argument to repeal the 55 national speed limit which would be accomplished by passage of my bill S. 54.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, Sept. 28, 1982]

HIGHWAY SAFETY IMPROVES UNDER REAGAN

(By Roger Johnson)

Question: Whose administration has a better record on highway safety, Jimmy Carter's or Ronald Reagan's?

Answer: Ronald Reagan's.

Surprised? So are Ralph Nader and Joan Claybrook, self-proclaimed auto safety experts. Claybrook, you may recall, was Nader's protege and the head of the National Highway Traffic Safety Administration under President Carter. She was the one whose obsessive preoccupation with enforcement of the 55 mph speed limit led her to equip America's state troopers with millions of dollars' worth of radar units and to direct the majority of the police onto the interstate highways.

It was of little concern to her, of course, that interstates had never accounted for more than 10 percent of the total traffic fatalities in any given year. Meanwhile, deaths and injuries soared on the other, now underprotected, streets and highways. In the year before Claybrook took over the NHTSA, 45,500 people died on the nation's highways; in her last year at NHTSA, 51,100 people died. By the time her tenure at the NHTSA had expired, 5,600 more people were dying on the highways each year than when she started.

In contrast to the shameful legacy of Claybrook's failed policies, the situation is improving substantially under her successor, Raymond Peck. Over 1,500 fewer people died in traffic accidents during Peck's first year than during Claybrook's last year. And if present trends continue, deaths this year will fall to about 43,500, their lowest level in nearly two decades.

Furthermore, the highway fatality rate, a measure of relative safety, is likely to drop below 3 deaths per 100 million vehicle-miles (the common means of expressing the rate) for the first time. This is a magnificent achievement by any standard, especially considering that the rate had risen during each year that Claybrook headed the NHTSA. What all this means is that there will have been about 9,500 fewer traffic deaths during the first two years with Ronald Reagan than there were during the last two years under Jimmy Carter. Highway travel today is significantly safer than it was two years ago.

The reasons for this improvement are as remarkable for what hasn't happened as for what has. Highway travel hasn't decreased; quite the opposite, in fact. There is, as yet, no evidence that seatbelt usage has improved. Airbags are nowhere in evidence, much to the chagrin of Nader and pals. Perhaps most amazing of all, and contrary to what most so-called "experts" would predict, highway speeds have increased dramatically. The number of drivers violating the 55 mph speed limit is now so great that well over half the states may face the imposition of federal funding sanctions.

Ironically, increased highway speeds are indicative of the major reason for the recent decrease in fatalities. One of the first things Ray Peck did when he came to the NHTSA was to moderate his predecessor's fanatical enforcement of the 55 MPH speed limit, thus freeing valuable police resources for more pressing problems such as apprehending drunk drivers.

Peck's NHTSA has gotten serious about drunk drivers while Claybrook's never could. She was much too busy lambasting the auto industry and requiring cars to be equipped with speedometers that highlighted her beloved 55 to worry about such mundane things as drunks on the highways. Alcohol has always been the leading cause of traffic fatalities while excessive speed ranks much lower. Little wonder, then, that traffic deaths are now declining.

The sad thing is that Claybrook knew these facts yet chose to ignore them. Professor Martin Whol of Carnegie-Mellon University and a recognized expert on traffic safety, had warned in June 1977 of the inherent risks of overzealous speed limit enforcement. In 1979 Terry Dawson, a transportation planner with eleven years experience, had noted in a Federal Highway Administration publication that most of the fatality reductions during 1974, when 55 was first imposed, occurred on roads where the speed limit was already under 55 mph.

He also warned against concentrating excessively on speed reductions. State police agencies around the country reacted with growing alarm as their resources were siphoned from more dangerous roads and placed, radar in hand, on the safer interstates. Claybrook scorned them all and the bodies piled up.

Maryland provides a perfect example of what happened. In 1980, Gov. Harry Hughes directed his state police superintendant, Col. Thomas Smith to begin a massive and well-publicized crackdown on speeders. Hughes, a Democrat, launched this drive in the hopes of making Maryland a model for other states. Claybrook, sensing the political advantages of Hughes' support during a presidential election year, poured extra NHTSA funds into Maryland. Unmarked patrol cars, semi-trailers, and airplanes were employed. The "Yellow Jackets" were formed, an elite group of radar-toting state police. The number of citations issued for 55 speed limit violations jumped.

Those who were lucky paid with their money, the unlucky paid with their lives. Traffic deaths for 1980 skyrocketed by 10 percent, the largest absolute increase since 1968. This was not some act of fate. It was the result of stubbborn adherence to official dogma. By contrast, with this year's reduced emphasis on 55 mph violations and a renewed effort against drunk drivers, highway deaths in Maryland are already down by 30 percent. Claybrook's efforts, however, were not totally in vain. Maryland was one of the few states where the majority voted for Carter.

Peck's achievements deserve the gratitude of every person in the country. By eliminating ineffective regulations and redirecting his agency's priorities toward drunk drivers and increased seatbelt usage, he has radically improved the highway safety environment. But don't expect any acclaim for either him or Reagan from the Naderites. That bunch of fractious old malcontents are

too occupied plugging their twin nostrums of airbags and absurdly low speed limits to appreciate that Peck has succeeded where they failed. Trouble is, Peck has not yet publicized his triumphs. Perhaps it's time he does.

END THE VIOLENCE IN NORTHERN IRELAND

Mr. KENNEDY. Mr. President, I join all those who support the cause of peace and an end to the violence in Northern Ireland in condemning the cruel and savage bombing of a disco pub last Monday in Ballykelly, Northern Ireland, in which 11 British soldiers and 5 civilians were killed and over 60 others were injured.

As I have stated many times over the past decade in the course of this tragic conflict in Northern Ireland, there is no justification whatever for resort to violence. I have consistently and repeatedly condemned the killing and the destruction on both sides, and I do so again today.

This latest act of incredible brutality shocks the conscience of all who seek a responsible settlement of the conflict. I extend my deepest sympathy to the families of the victims of this tragedy, and I pray for the quick recovery of those who have been injured.

DR. WOLFGANG PANOFSKY CITES ARMS CONTROL DANGERS OF THE MX/CSB SCHEME

Mr. CRANSTON. Mr. President, one of the Nation's most distinguished nuclear physicists and arms control experts, Dr. Wolfgang Panofsky, director of the Stanford linear accelerator, has written me to express his strong opposition to the Reagan administration plan to deploy MX missiles in the CSB—closely spaced basing—mode.

Dr. Panofsky notes the critical fact that—

> Deployment of the Dense-Pack MX system is in direct contradiction to the provisions of SALT II * * * President Reagan (has) committed himself "not to undercut" the provisions of SALT II unless the Soviets did so first. The MX deployment clearly would contradict this commitment to the world.

Dr. Panofsky also notes that—

> Considering the obvious technical flaws of the Dense Pack proposal, it will generate pressures to abrogate or unilaterally modify the provisions of the ABM Treaty and its Protocol and of the Limited Nuclear Test Ban Treaty.

I commend the full text of Dr. Panofsky's letter to the attention of each of my colleagues. It is a serious analysis of an issue vital to our security as a nation; the urgent need to halt the MX Dense Pack deployment proposed by the Reagan administration.

Mr. President, I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STANFORD LINEAR ACCELERATOR CENTER,
Stanford, Calif., November 23, 1982.

Hon. ALAN CRANSTON,
U.S. Senate,
Russell Senate Office Building,
Washington, D.C.

DEAR ALAN: It is my understanding that discussion and possible action of the President's MX Dense-Pack proposal, delivered in his address of November 22, 1982, will be high on the agenda of the "Lame Duck" session of Congress. I would like to communicate to you my views on the arms control impact of that proposal, hoping you will find them of interest. These views are additional to my evaluation of the military technical effectiveness of the system which, if you so desire, I would be happy to communicate through a separate letter.

MX DENSE-PACK AS ARMS CONTROL "BARGAINING CHIP"

President Reagan proposed deployment of the MX as a "bargaining chip" to aid his quest for equitable arms control. It is my conviction that this approach of "increasing arms in order to reduce them" is counterproductive, and that the MX Dense-Pack deployment in itself is a major threat to arms control. I am making these observations separate from the very serious doubts, which I share, whether the proposed MX basing is even as survivable to attack as is the current Minuteman deployment.

The "bargaining chip" argument which is being advanced by the President as serving the interests of arms control is based on the false premise of current Soviet strategic superiority. I would like to remind you that the very same argument prevailed when by one vote the Senate passed appropriations for the deployment of the Safeguard I ABM System. Only after the expenditure of over $7 billion (much more in today's dollars!) the U.S. Government acknowledged the military uselessness of the system and discontinued it altogether.

SALT II

Notwithstanding statements by members of the Administration, I conclude that deployment of the Dense-Pack MX system is in direct contradiction to the provisions of SALT II. Article IV of the SALT II Treaty, as signed by the Presidents of the United States and the Soviet Union on June 18, 1979, provides that:

(1) Each party undertakes not to start construction of additional fixed ICBM launchers.

(2) Each party undertakes not to relocate fixed ICBM launchers.

During this year's Memorial Day address on May 31, 1982, President Reagan committed himself "not to undercut" the provisions of SALT II unless the Soviets did so first. The MX deployment clearly would contradict this commitment to the world.

THE ABM TREATY

Many Administration spokesmen have agreed that the proposed Dense-Pack deployment would not be survivable for any substantial period of time after its deployment unless it was defended by antiballistic missile defense. Together with most other members of the technical defense community, I am even extremely dubious that it is survivable even at the time of deployment. Therefore, pressure for deploying ABM defenses around the Dense-Pack system will commence immediately as soon as the Congress has taken favorable action on the deployment (which I counsel it shall not do).

Deployment of ABM around a missile site other than the original Grand Forks, North Dakota base is explicitly prohibited by Articles I and II of the Protocol to the ABM Treaty which was signed by the Presidents of the United States and the Soviet Union on July 3, 1974, and entered into force on May 24, 1976, after ratification by both nations.

Article I of the Protocol states: "1. Each party shall be limited at any one time to a single area out of the two provided in Article III of the Treaty for Deployment of Antiballistic Missiles (ABM systems) . . ."

Article II of the Protocol explicitly permits the U.S. to dismantle a deployed ABM system defending a missile site and to redeploy it to defend the national Capitol; however, dismantling an ABM defending one missile site and redeploying it at another missile site is forbidden. Thus the past termination of the ABM Safeguard system at Grand Forks does not lead to permission to defend the proposed Dense-Pack system.

The ABM Treaty Protocol would prohibit deployment of ABM around any new ICBM site, even if only a small number of ABM interceptors were required. Should a number above one hundred interceptors be required, which I believe would be the case, then such a deployment would be in violation of the basic ABM Treaty which was signed on May 26, 1972 by the Presidents and entered into force on October 3, 1972, after due ratification.

This ABM Treaty and its Protocol have served the security needs of the United States well. They have prevented ABM buildup by the Soviet Union and thus have assured penetration of the deterrent missiles of the United States, those of our allies, and of China. Thus abrogating the Treaty and its Protocol in the interest of protecting the ill-conceived Dense-Pack system would be a major loss to U.S. security. There is no basis for the belief that modifications of that Treaty would be negotiable for the Soviet Union without paying a very high price.

THE LIMITED TEST BAN TREATY

The claims for the technical performance of the Dense-Pack system are based on extremely speculative assumptions. One assumption relates to "fratricide" among incoming missiles and the other to the feasibility of attaining extreme silo hardness. Experimental data on fratricide are scanty and derive from a few early atmospheric nuclear tests. Claims for projected silo hardness made in conjunction with the Dense-Pack system by various spokesmen run as high as 100,000 pounds per square inch (!), yet reasonable analysis indicates that hardness beyond 5,000 pounds per square inch is difficult to substantiate.

In view of these uncertainties I strongly surmise that once the Dense-Pack deployment is permitted to proceed, pressures would increase that in the name of national security we must abrogate or modify the Limited Nuclear Test Ban Treaty, signed by the Secretaries of State of the United States, the Soviet Union, and the United Kingdom on August 5, 1963, and entered into force on October 10, 1963, after due ratification process. This Treaty in its Article I explicitly prohibits nuclear test "if such explosion causes radioactive debris to be present outside the territorial limits of the state under whose jurisdiction such explosion is conducted." Nuclear tests de-

signed to examine fratricide phenomena or to verify claimed hardness of silos would be a clear violation of this Treaty. Again, this Treaty has served the security and also the environmental health of this nation well. It has been a factor in limiting proliferation of nuclear weapons and it has reduced the radioactivity levels to which citizens of the United States were exposed from early atmospheric testing by a factor of about one hundred.

SUMMARY

In summary, I consider Dense-Pack deployment to be a direct reversal of the President's earlier commitment "not to undercut" SALT II. Moreover, considering the obvious technical flaws of the Dense Pack proposal, it will generate pressures to abrogate or unilaterally modify the provisions of the ABM Treaty and its Protocol and of the Limited Nuclear Test Ban Treaty. Thus the potential deployment of Dense-Pack poses a grave threat to those arms control efforts this nation has successfully enacted and to those which it intends to pursue in the future. Attainment of increased national security at lower levels of armament through negotiated arms control remains the most prudent course for this nation to pursue to avoid the dangerous extremes of unilateral disarmament on the one hand, and an all-out arms race, on the other.

Please let me know whether I can be of any further help in assisting you in dealing with this complex issue.

With best personal regards,

WOLFGANG K. H. PANOFSKY.

BUREAU OF ALCOHOL, TOBACCO, AND FIREARMS AGENTS RIOS AND D'ATRI—TWO PROFILES IN COURAGE

Mr. DECONCINI. Mr. President, on December 2, 1982, two special agents of the Bureau of Alcohol, Tobacco, and Firearms, assigned to the Miami Drug Task Force in south Florida, were shot during an undercover operation infiltrating a drug and weapons "buy" at a Miami hotel. Special Agent Ariel, 28 years old, married with children, was killed and Special Agent Group Supervisor Alexander D'Atri, 36, married with children, was critically wounded in a gun battle during the attempted arrest of several suspects by a BATF support team that had been waiting outside of the hotel. Agent D'Atri is in critical but stable condition.

Mr. President, as the President embarks on his major initiative to establish organized crime drug enforcement task forces in 12 regions of the country, I believe that the Senate should take a moment to pay tribute to these two brave men, in particular, and to the other heroic men and women who lay their lives on the line day in and day out in the vicious battle against drug traffickers and other criminal elements in every part of this country. Special Agent Rios was on assignment to the Miami Task Force from his post of duty in New Haven, Conn., and had been a part of the task force since July of this year. He had been with the BATF since 1978. He had apparently signaled for the rest of the agents on surveillance to move in to make the arrests when shooting occurred and Mr. Rios was fatally wounded.

Special Agent and Group Supervisor D'Atri was also on assignment to the Miami Task Force from his post of duty in New York City and had been with BATF since 1969. Mr. D'Atri was critically wounded as the other agents attempted to apprehend the suspects in the hotel.

Mr. President, all too often we tend to take it for granted that when we call the police for assistance they will respond and take care of the problem with little thought given to the risk that they incur every day. So, too, do we take for granted the job our Federal law enforcement officers take in the line of duty, often operating undercover where the slightest mistake or blink of an eye could mean instant death. Special Agent Rios and Special Agent D'Atri are heroes in the finest sense of the word. Special Agent Rios is dead and Special Agent D'Atri critically wounded because they had the courage to risk their lives to help us rid this country of the criminals who deal in drugs that are killing our children and weapons that end up in the hands of thieves and terrorists, both in this country and abroad. For their sacrifice, for their courage, we owe them a tremendous debt of gratitude.

Mr. President, the death of Mr. Rios and the injury to Mr. D'Atri should give each and every Member of this body an extra incentive to double his or her efforts to eradicate the incentives that make criminal trafficking so lucrative for organized crime elements and to accelerate our national effort to drive the drug smugglers and weapons peddlers from our shores. My sympathies go out to the families of these brave men and I thank them for the sacrifice they have made so that this country will be a safer place for my children now and in the future.

Mr. President, I ask unanimous consent that a memorandum concerning this matter be printed in the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

To: Assistant Director Criminal Enforcement,

Attention: Chief Investigation, RDI, Southeast Region, SAC, Miami

REGARDING SHOOTING OF TASK GROUP SPECIAL AGENTS

On December 2, 1982, two special agents assigned to the Miami Task Group were shot during an arrest situation at the hurricane motel in Miami, Florida. Special agent Ariel Rios received a fatal gunshot wound to the face. Special agent group supervisor Alexander D'Atri received numerous gunshot wounds and is in critical but stable condition at this time.

The scenario of this investigation unfolded as follows: on December 1, 1982, acting on prior information provided by a task group informant, undercover agents met with two individuals known as Rolando Rios, and Ramon Raymond. Through prior meetings, arrangements had been made to purchase two kilos of cocaine and several automatic weapons. The meeting was held at approximately 6:00 p.m. After a couple of hours delay, the suspects stated that they could not deliver the cocaine or weapons and that contact should be made with them the following day. During negotiations, Raymond contacted an individual known only as Macho by telephone. The special agents were told that Macho could also be contacted the following day as a source of narcotics.

Later that evening, connections were made with another cocaine source and two people were arrested with four kilos of cocaine and a firearm.

On December 2, 1982, contact was made with suspects Raymond, Rios and Macho. They stated they could deliver cocaine that afternoon. Arrangements were made to meet Macho at the Hurricane motel located at 4911 W. Flagler St., Miami, Fla.

It should be noted that earlier in the investigation, after the offer of the cocaine had been made, the DEA/Customs South Florida joint task force had been contacted. They provided the flash roll for the purchase of the cocaine and four of their agents were on the surveillance which was established. It was also believed that the suspects would be in possession of firearms.

Special agents D'Atri and Rios proceeded to the Hurricane Motel at approximately 1:00 PM. They were being covered by a total of ten special agents. It was expected that two to three suspects would be involved in the transaction. As the meeting was underway, it was realized that at least six suspects, including lookouts, were involved. Four more special agents from the task group were sent to the scene, bringing the total number of agents on the scene to sixteen.

At approximately 3:00 PM, special agents D'Atri and Rios departed from the scene and advised surveillance agents that the delivery of cocaine would be made at approximately 4:00 PM.

At approximately 4:00 PM special agents D'Atri and Rios returned to the Hurricane Motel. They entered the building. One of the suspects came out of the building and went to the trunk of his car, obtained a package and re-entered the building. Special agent Rios exited the building, went to his vehicle, lifted the trunk of the car and went back into the building. This was the signal for agents to move in.

Agents got to the door that Rios entered, identified themselves as Federal agents and attempted entry. At that time gunfire broke out from within the building. One of our agents blew the door open with a shotgun. The shooting then continued. Two of the suspects were shot and wounded. Two others were arrested. Two to three other suspects were not at the scene when delivery was made.

A call was made to task group headquarters for ambulances. The Miami police were notified. The SAC of the Miami district office was advised of what little information that was available.

Descriptions of the other persons and vehicles involved in the violation were provided to the Miami Police Department. Approximately one to two hours after the shooting, one of the vehicles was located not far from the scene. Three men were then apprehended. Identifications are being made at this time.

It should be noted that while this incident was taking place, suspects Raymond and Rios were being arrested by task group agents at a separate location. Further arrests are expected.

More details will be forwarded including the names of those arrested shortly.

A WISE WOMAN

Mr. HARRY F. BYRD, JR. Mr. President, it has been said that behind every good man is a good woman. In the case of Ralph Sampson, the immensely talented center of the University of Virginia basketball team, that woman may very well be his mother.

Sampson, as my colleagues may recall, choose education over immediate wealth when he decided earlier this year to stay in college and earn his degree rather than go pro. As a recent editorial in the Catholic Virginian newspaper points out, the values that led him to that very wise decision obviously came from home.

Sampson's mother, recalling that her ancestors had at one time been slaves, notes that education, not wealth, makes a man free. She is indeed a wise woman.

I ask unanimous consent that the Catholic Virginian editorial, entitled "Scales of Value," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Catholic Virginian]

SCALES OF VALUES

As everyone in the solar system is aware, Ralph Sampson is a very tall young man from Harrisonburg who has won justifiable acclaim for his outstanding ability as a basketball player.

What the 7-foot-4 senior at the University of Virginia can do on a basketball court is astonishing. Sampson blocking an opponent's shot at one end of the floor and micro-seconds later scoring with a slam-dunk at the other is, well, awesome.

But there is a lot more to Ralph Sampson than his stupendous athletic ability. It has to do with the values the man has displayed, values that obviously were transmitted from the home.

Throughout his three years at the University of Virginia Sampson has been under enormous pressure to quit school for professional basketball. He resisted the pros and their millions, saying, "There's lots of time to pay the bills." Education came first.

University of Virginia Coach Terry Holland a few days ago recalled something Sampson's mother had said when the pros were trying to entice her son with a ton of money: "She said that years ago her ancestors had been owned by other people and, when you think about it, professional athletics, in which players are bought and sold, come close to being a kind of slavery. 'The only thing that makes a man free is education,' she said."

Awesome.

L. H. FOUNTAIN LEAVES THE CONGRESS: THE NATION IS IN HIS DEBT

Mr. SASSER. Mr. President, Congress is losing, at the end of this year, a courtly southern gentleman named L. H. FOUNTAIN. For the last three decades, Congressman FOUNTAIN represented the Second District of North Carolina. Now, he has chosen to retire from the Congress to devote more time to other pursuits.

I take this moment to pay tribute to Representative FOUNTAIN. He has chaired the House Intergovernmental Relations Subcommittee ever since it was created.

As the ranking Democrat on the Senate Subcommittee on Intergovernmental Relations, I have worked closely with Congressman FOUNTAIN on many issues. We also served together on the Advisory Commission on Intergovernmental Relations, the prestigious research organization that has had an impact on every major decision on Federalism made since it was founded—by L. H. FOUNTAIN and Senator Ed Muskie—22 years ago.

I am sure that the people of North Carolina have benefited from Congressman FOUNTAIN's service in the Congress. But so have the people of the entire country.

The general revenue-sharing program, which has become the model for Federal aid to the Nation's cities, counties, and towns, would not exist except for L. H. FOUNTAIN's work on its behalf in the Congress.

As a recognized congressional leader in the field of intergovernmental relations, L. H. FOUNTAIN has been in the vanguard of other efforts to improve and streamline the Federal assistance system. Representative FOUNTAIN also was instrumental in putting the Inspector General program in place in 17 Federal agencies. This major legislative achievement in the war on fraud, waste, and abuse in the Federal Government has already resulted in substantial savings to the American taxpayer. These independent watchdogs have conducted numerous investigations that have resulted in Federal prosecutions of fradulent practices and resulted in improved administrative procedures and laws.

It has been my pleasure to strive on the Senate side of Capitol Hill on behalf of many measures with which L. H. FOUNTAIN is so closely identified in the House. We share a strong interest in bringing about greater efficiency in Government and restoring the proper balance to the Federal system.

INSURING THE SURVIVAL OF THE WHALE

Mr. CRANSTON. Mr. President, 10 years ago, the United Nations called unanimously for a moratorium on all commercial whaling. This appeal to protect the last of the great whales has been ignored by a handful of nations. Since then, more than 300,000 whales have died by the harpoon. This year the International Whaling Commission adopted a moratorium on all commercial whaling, to begin in 1986.

Unfortunately, Japan, the Soviet Union, Norway, and Peru—the major whaling nations—have announced their defiance of this ban.

Sixty-six Senators, in a letter last August, called for the U.S. Government to use existing fisheries laws to achieve compliance with the IWC regulations. I understand that there is firm agreement now between the Congress and the administration that the fishery allocation process that comes under this legislation will be used to its fullest to insure compliance.

For more than 10 years, the United States has been committed to a policy of ending the slaughter of the magnificent whales. I shall lend my efforts to those of the administration to make this a reality.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry withdrawals which were referred to the appropriate committees.

(The withdrawals received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 10:16 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 1735. An act to provide for the use and distribution of funds awarded the Pembina Chippewa Indians in dockets numbered 113, 191, 221, and 246 of the Court of Claims.

The message also announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 1986. An act to provide for the use and distribution of funds awarded the Blackfeet and Gros Ventre Tribes of Indians and the Assiniboine Tribe of the Fort Belknap Indian Community, and others, in dockets numbered 250-A and 279-C by the United States Court of Claims, and for other purposes.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 6243. An act to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes;

H.R. 7155. An act to settle certain Indian land claims within the State of Florida, and for other purposes; and

H.R. 7377. An act to designate the Lakeview Lake project, Mountain Creek, Tex., as the "Joe Pool Lake."

At 7:19 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 7355. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

HOUSE BILLS REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 6243. An act to provide for the distribution of Warm Springs judgment funds awarded in docket numbered 198 before the Indian Claims Commission, and for other purposes; to the Select Committee on Indian Affairs.

H.R. 7155. An act to settle certain Indian land claims within the State of Florida, and for other purposes; to the Select Committee on Indian Affairs.

HOUSE BILL PLACED ON CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 7355. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-4649. A communication from the Secretary of the Air Force transmitting, pursuant to law, a confidential report on the weapon system HARM exceeding its baseline unit cost by more than 25%; to the Committee on Armed Services.

EC-4650. A communication from the Assistant Secretary of the Army for Installations, Logistics, and Financial Management transmitting, pursuant to law, a report on the intention of the U.S. Army to move certain chemical agents from Newark, Ohio to Rocky Mountain Arsenal for destruction; to the Committee on Armed Services.

EC-4651. A communication from the Assistant Secretary of the Army for Installations, Logistics, and Financial Management transmitting, pursuant to law, a report on the destruction of certain chemical agent munitions at Chemical Systems Laboratory, Aberdeen Proving Ground, Maryland; to the Committee on Armed Services.

EC-4652. A communication from the Principal Deputy Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on a decision to convert the custodial services function at the Naval Air Rework Facility, Almeda, CA to performance under contract; to the Committee on Armed Services.

EC-4653. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Examination of Financial Statements of the Panama Canal Commission for the years ended September 30, 1981 and 1980; to the Committee on Armed Services.

EC-4654. A communication from the Vice President of AMTRAK for Government Affairs transmitting, pursuant to law, a report on itemized revenues and expenses of the Corporation for August 1982; to the Committee on Commerce, Science, and Transportation.

EC-4655. A communication from the Administrator of the Federal Aviation Administration transmitting, pursuant to law, a report entitled "National Airspace System Plan"; to the Committee on Commerce, Science and Transportation.

EC-4656. A communication from the Assistant Secretary of the Interior for Fish and Wildlife and Parks transmitting, pursuant to law, a list of areas on the Registry of Natural Landmarks and of Historical Significance included in the National Register of Historic Places, which exhibit known or anticipated damage or threats to the integrity of their resources; to the Committee on Energy and Natural Resources.

EC-4657. A communication from the Director of the Minerals Management Service transmitting, pursuant to law, a report on a refund of excess royalty payments to Shell Oil Co., Mobil Oil Corp., Union Oil Co. of Calif., and ARCO Oil and Gas Co.; to the Committee on Energy and Natural Resources.

EC-4658. A communication from the Secretary of Health and Human Services transmitting, pursuant to law, a report on research activities of relevance to the Clean Air Act; to the Committee on Environment and Public Works.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 2863: A bill to amend title 28 to provide protection to all jurors in Federal cases to clarify the compensation of attorneys for jurors in protecting their employment rights, and authorizing the service of jury summonses by ordinary mail (Rept. No. 97-674).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

S. 2568: A bill to provide for confirmation of the repayment contract of the Dallas Creek participation project of the Upper Colorado storage project (Rept. No. 97-675).

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

H.R. 2329: A bill conferring jurisidiction on certain courts of the United States to hear and render judgment in connection with certain claims of the Cherokee Nation of Oklahoma.

H.R. 5858: A bill for the relief of Mocatta & Goldsmid, Ltd., Sharps, Pixley & Co., Ltd., and Primary Metal and Mineral Corp.

By Mr. SCHMITT, from the Committee on Appropriations, with amendments:

H.R. 7205: A bill making appropriations for the Department of Labor, Health and Human Services, and Education, and related agencies, for the fiscal year ending September 30, 1983, and for other purposes.

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 484: A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2719.

By Mr. PERCY, from the Committee on Foreign Relations, without amendment and with a preamble:

S. Res. 500: Resolution commending the Government of Zimbabwe.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Res. 504: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2863; referred to the Committee on the Budget.

S. Res. 505: An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5858; referred to the Committee on the Budget.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 3048: A bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. 3073: A bill to provide for the distribution within the United States of the United States Information Agency film entitled "Dumas Malone: A Journey with Mr. Jefferson".

By Mr. PERCY, from the Committee on Foreign Relations, with amendments and an amended preamble:

S. Con. Res. 131. A concurrent resolution to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia.

By Mr. McCLURE, from the Committee on Appropriations, with amendments:

H.R. 7356. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Frank X. Altimari, of New York to be U.S. district judge for the Eastern District of New York;

Frank W. Bullock, Jr., of North Carolina, to be U.S. district judge for the Middle District of North Carolina;

Paul E. Plunkett, of Illinois, to be U.S. district judge for the Northern District of Illinois;

John W. Bissell, of New Jersey, to be U.S. district judge for the District of New Jersey;

Christine Cook Nettesheim, of the District of Columbia, to be a judge of the U.S. Claims Court for a term of 15 years;

Lawrence S. Margolis, of Maryland, to be a judge of the U.S. Claims Court for a term of 15 years.

Reginald W. Gibson, of Illinois, to be a judge of the U.S. Claims Court for a term of 15 years;

Haldane Robert Mayer, of Virginia, to be a judge of the U.S. Claims court for 15 years;

Daniel F. Lopez Romo, of Puerto Rico, to be U.S. attorney for the District of Puerto Rico for the term of 4 years;

Peter K. Nunez, of California, to be U.S. attorney for the Southern District of California;

Anthony Bertoni, of Michigan, to be U.S. marshal for the Eastern District of Michigan for the term of 4 years;

Edward M. Camacho, of Guam, presently U.S. marshal for the District of Guam, to be also U.S. marshal for the Northern Mariana Islands for the term expiring September 14, 1986;

Romolo J. Imundi, of New York, to be U.S. marshal for the Southern District of New York for the term of 4 years;

Charles E. Healey, of New York, to be U.S. marshall for the Eastern District of New York for a term of 4 years;

Daniel B. Wright, of New York, to be U.S. marshal for the Western District of New York for the term of 4 years;

Matthew Chabal, Jr., of Pennsylvania, to be U.S. marshal for the Middle District of Pennsylvania for the term of 4 years;

Dwight G. Williams, of Mississippi, to U.S. marshal for the Northern District of Mississippi for the term of 4 years;

J. Raymond Bell, of the District of Columbia, to be Chairman of the Foreign Claims Settlement Commission for the term expiring September 30, 1985;

James K. Stewart, of California, to be Director of the National Institute of Justice;

Victor M. F. Reyes, of Texas, to be Commissioner of the U.S. Parole Commission for a term of 6 years; and

Katherine D. Ortega, of New Mexico, to be a Commissioner of the Copyright Royalty Tribunal for a term of 7 years from September 27, 1982.

By Mr. HATCH, from the Committee on Labor and Human Resources:

Caroline H. Hume, of California, to be a member of the National Museum Services Board for a term expiring December 6, 1985, to which position she was appointed during the last recess of the Senate;

Liles B. Williams, of Mississippi, to be a member of the National Museum Services Board, for a term expiring December 6, 1985; and

William E. Mayer, to be Senior Surgeon (for personnel action in the regular corps of the Public Health Service subject to qualifications therefor as provided by law and regulations).

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. BAKER (for Mr. PERCY), from the Committee on Foreign Relations:

Manfred Eimer, of Maryland, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency;

Kenneth Y. Tomlinson, of New York, to be an Associate Director of the U.S. Information Agency;

Victor Blanco, of California, to be a member of the Board of Directors of the Inter-American Foundation for a term expiring September 20, 1988;

Jerome W. Van Gorkom, of Illinois, to be Under Secretary of State for Management;

E. Robert Wallach, of California, to be a member of the U.S. Advisory Commission on Public Diplomacy for a term expiring July 1, 1985;

W. Allen Wallis, of New York, to be U.S. Alternate Governor of the International Bank for Reconstruction and Development for a term of 5 years; U.S. Alternate Governor of the Inter-American Development Bank for a term of 5 years; U.S. Alternate Governor of the Asian Development Bank and U.S. Alternate Governor of the African Development Bank;

William G. Simpson, of Illinois, to be a member of the Board of Directors of the Overseas Private Investment Corporation for a term expiring December 17, 1984;

Edward Lionel Peck, of California, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Islamic Republic of Mauritania:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Edward L. Peck.

Post: Mauritania.

Contributions: None.

Lev E. Dobriansky, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Commonwealth of the Bahamas:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Lev E. Dobriansky.

Post: Ambassador.

Contributions, amount, date, and donee:

1. Self only: $15, March 30, 1978, Republican National Committee; $100, November 30, 1978, Flood Reception Committee; $15, December 2, 1978, Republican National Committee; $30, January 11, 1979, Warner for Senate Committee; $15, December 28, 1979, Republican National Committee; $15, January 16, 1980, Alan Mackay for Congress; $25, July 3, 1980, Goldwater for Senate Committee; $25, September 27, 1980, Republican National Committee; $60, April 14, 1981, D.C. Heritage Council; $25, May 11, 1981, Republican National Committee; $25, December 5, 1981, Goldwater for Senate Committee; $25, December 24, 1981, Republican National Committee; $25, January 29, 1982, National Republican Heritage Council; and $100, February 6, 1982, Citizens for Derwinski Committee.

Samuel Friedlander Hart, of Virginia, a Career Member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States to Ecuador:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Samuel F. Hart.

Post: Ecuador.

Contributions, amount, date, and donee:

1. Self: None.

2. Spouse: N/A.

3. Children and spouses names: None.

4. Parents names: None.

5. Grandparents names: None.

6. Brothers and spouses names, (brother): $250 a year to Sears Roebuck PAC. He has no control over contributions to individual candidates.

7. Sisters and spouses names: None.

John Herbert Holdridge, of Maryland, a Career Member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Republic of Indonesia:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: John H. Holdridge.

Post: Indonesia.

Nominated: October 12, 1982.

Contributions: None.

Richard T. Kennedy, of the District of Columbia, to be Ambassador at Large:

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Richard Thomas Kennedy.

Post: Ambassador-at-Large.

Contributions, amount, date, and donee:

1. Self (joint w/wife): $100, February 8, 1982, Republican National Committee; $40, April 22, 1982, Election Committee for Lois DeVecchil.

2. Spouse (joint w/husband): $100, February 12, 1982, Republican National Committee; $100, October 26, 1980, Republican National Committee; $100, January 15, 1980, Republican National Committee; $50, January 16, 1979, Republican National Committee; $25, October 14, 1978, Republican National Committee; and $30, February 4, 1978, Republican National Committee.

3. Children and spouses names: None.

4. Parents names: N/A.

5. Grandparents names: N/A.

6. Brothers and spouses names: None.

7. Sisters and spouses names: Margaret Krizanosky and Andrew Krizanosky: $5, January 1980, Howard Baker Committee; $10, 1980 Florida Tele. Corp.; $10, 1981, Florida Tele. Corp. (Employees Uniting for Better Govt Florida).

(The above nominations were reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. DOLE, from the Committee on Finance:

Manuel H. Johnson, Jr., of Virginia, to be an Assistant Secretary of the Treasury, to which he was appointed during the last recess of the Senate.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first

and second time by unanimous consent, and referred as indicated:

By Mr. DODD:

S. 3087. A bill to amend the Solid Waste Disposal Act to insure protection of public health and environmental safety in the Environmental Protection Agency's regulations for the delisting of hazardous wastes, and to require the Environmental Protection Agency to establish a timetable for determining whether additional wastes are hazardous wastes which should be subject to the requirements of such act; to the Committee on Environment and Public Works.

By Mr. CHAFEE (for himself and Mr. PELL):

S. 3088. A bill to create competitive conditions in natural gas pricing by prohibiting certain anticompetitive clauses in natural gas contracts; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. THURMOND:

S. Res. 504. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 2863; from the Committee on the Judiciary; to the Committee on the Budget.

S. Res. 505. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 5858; from the Committee on the Judiciary; to the Committee on the Budget.

By Mr. BAKER (for himself and Mr. ROBERT C. BYRD):

S. Res. 506. A resolution authorizing the printing of a compilation of materials entitled "Guide to Research Collections of Former United States Senators, 1789-1982," as a Senate Document; considered and agreed to.

By Mr. CRANSTON (for himself, Mr. BAUCUS, Mr. CANNON, Mr. CHAFEE, Mr. CHILES, Mr. DECONCINI, Mr. DODD, Mr. HEINZ, Mr. INOUYE, Mr. KENNEDY, Mr. LEVIN, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES and Mr. SASSER):

S. Con. Res. 132. Concurrent resolution expressing the sense of the Congress that the United States should maintain effective programs to assist in providing disabled persons with opportunities for full, productive lives and to protect such persons from unfair discrimination in Federal and Federal-assisted programs and activities and that disabled persons should receive fair treatment in the administration of disability benefits; to the Committee on Labor and Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DODD:

S. 3087. A bill to amend the Solid Waste Disposal Act to insure protection of public health and environmental safety in the Environmental Protection Agency's regulations for the delisting of hazardous wastes, and to require the Environmental Protection Agency to establish a timetable for determining whether additional wastes are hazardous wastes which should be subject to the requirements of such act; to the Committee on Environment and Public Works.

HAZARDOUS WASTE IDENTIFICATION IMPROVEMENT ACT

● Mr. DODD. Mr. President, today I am introducing the Hazardous Waste Identification and Improvement Act, to amend the Resource Conservation and Recovery Act (RCRA) in an effort to correct serious deficiencies in that act's ability to readily identify hazardous substances and prevent their pollution of the environment.

Hazardous waste is a byproduct of many industrial processes. Today, over 750,000 facilities produce hazardous waste in some form.

In fact, each day American industry produces enough waste to fill the New Orlean's Superdome—floor to ceiling—five times over. Almost 90 percent of this waste is hazardous. From Love Canal to the Valley of the Drums, history has shown us that the safe disposal of hazardous waste is a problem we cannot afford to ignore.

In fact we have not ignored it. In 1976, Congress passed the RCRA with the intention of providing "cradle to grave" guidelines for the treatment and storage of hazardous wastes. But now, 6 years later, the act's original intentions are still not fulfilled by its regulations. Although RCRA's basic regulatory framework is in place, some key final regulations remain unpromulgated. Others contain loopholes that allow dangerous waste to go unchecked.

As pointed out in the House Energy and Commerce Committee report on RCRA, as much hazardous waste escapes proper control today through regulatory loopholes as receives proper attention under RCRA. That amounts to the staggering total of almost 40 million metric tons of wastes which escapes every year—the result of deficiencies in RCRA.

Yet if RCRA is not adequately controlling wastes, then we are only creating new hazardous waste sites which will ultimately require future cleanup. Congress did pass the Superfund, which can finance the cleanup of hazardous waste sites. But we cannot count on one piece of legislation to account for another's deficiencies. If we do not act to strengthen RCRA now, we will only pay—many times over—through Superfund cleanup in the future.

This year's House-passed bill reauthorizing RCRA worked to close many of the loopholes to which I have referred. But at least two major weaknesses remain. My bill addresses them. The first is that EPA regulations do not cover many hazardous wastes: EPA has either not listed them as hazardous or they do not exhibit any of the established hazardous waste characteristics. The second is that due to a regulatory lapse, wastes that still contain hazardous constituents in significant concentrations can become exempt from RCRA regulations through a so-called delisting procedure.

Mr. President, it is my hope that by closing these loopholes we can make RCRA live up to its legislated purpose: "To promote the protection of health and the environment by * * * regulating the treatment, storage, transportation, and disposal of hazardous wastes. * * *"

Under RCRA, it is EPA's responsibility to identify, characterize, test, and ultimately list all wastes that pose a threat to public health or the environment. So far, the EPA has developed four major tests for characterizing a waste as hazardous, and has produced a catalog of several waste types.

This is a good beginning. But the Agency has not gone far enough. Many demonstrably dangerous wastes remain unlisted or unidentified and consequently unaddressed by RCRA regulations, and the characteristics, or tests, developed to identify wastes as hazardous entirely ignore many of our most dangerous industrial products. The result is that many wastes containing, for example, significant levels of dioxins, chlorinated organics, or pesticides, are not even considered hazardous under EPA's regulations.

This lack of adequate coverage has endangered both public health and the environment. This year it was discovered that it was possible—and even legal—for dioxin-laced waste oil to be used for dust control in Missouri. Dioxin, a cancer-linked chemical renowned as a component of agent orange, has since been discovered in at least 15 and as many as 50 additional sites in that State. It has also appeared in fish in the Hudson River and in Lake Ontario. Cleanup costs may approach $30 million, according to one source.

I respect EPA's need to move with scientific caution in determining which wastes are hazardous. But caution should not mean paralysis: EPA has not listed any new wastes since July of 1980, and has missed its own published deadlines for completing determinations for listing some hazardous wastes.

I ask unanimous consent that appendix I of House Report No. 97-570 be printed in the RECORD at this point to make clear the full record of the missed deadlines.

There being no objection, the appendix was ordered to be printed in the RECORD, as follows:

APPENDIX I

Status		Estimated completion date [1]
Organic waste streams under review for possible listing:		
Arylphosphate production residues.	Listing background document in preparation.	September 1982.
Chlorinated dibenzo-p-dioxin and dibenzofuran containing wastes.	Sampling and analysis of chlorophenol production residues for "dioxins" and "furans" being conducted as part of noncarbomate pesticide study. Proposal of listing based on currently available data is contemplated.	Do.
Aliphatic chlorocarbon production residues.	Sampling and analysis almost completed. Preparation of listing background document underway. Preparation of health and environmental effects Profiles on contaminants found in residues just beginning.	October 1982.
Carbamate pesticides and rubber processing chemicals production residues.	Sampling and analysis almost completed.	December 1982.
Coke production wastes.....	Presampling studies now underway.	Do.
Organopbromine production residues.	Sampling and analysis almost complete.	Do.
Generic solvents listing	Listing background document in preparation.	Do.
Dyes and pigments production residues.	Presampling studies now underway. Complexity of both categorization and analysis of residuals makes it impossible to predict study completion date.	
Noncarbamate pesticide production residues.	Sampling studies now underway.	March 1983.
Residues from production of organometallics.	Presampling studies now underway.	September 1983.
Miscellaneous wastes under review for possible expansion of listing:		
Lime sludge from stainless steel finishing.	Sampling and analysis almost completed.	September 1982.
Wastes resulting from the production of paints.	Initial rangefinding studies completed. Selection of wastes and manufacturing locations to be sampled scheduled for April 1982.	

[1] Decision to propose (including support documentation) or that the waste does not need to be listed.

Source: EPA, Office of Solid Waste and Emergency Response.

Mr. DODD. Mr. President, the bill I am introducing requires EPA to develop a 2-year plan for its overall work on the identification and listing of wastes. It requires EPA to include four determinations in this plan, including:

First, any decisions or plans for listing those wastes not as yet listed by the agency as hazardous;

Second, any plans by EPA for expanding or revising existing characteristics, or tests, used to detemine if a waste is hazardous;

Third, a final determination on the listing of dioxin and the organic and inorganic waste streams listed in the appendix listed above; and

Fourth, a determination by EPA as to what concentration levels of known hazardous constituents—to be chosen by the agency—would render a waste hazardous. Progress reports on this plan will be tied to the submission of the EPA budget every year in order to insure adequate budgetary consideration for the relevant EPA programs.

It is my hope that requiring EPA to draft a 2-year plan will aid the agency is setting priorities and allocating resources for its programs on the identification and listing of hazardous wastes. It is also my hope that EPA will include in its report to Congress an indication of reasonable timetables for much of the work which remains to be done in this area.

It is essential that known or suspected hazardous wastes be brought under the scope of RCRA as quickly as possible. With 57 million metric tons of hazardous waste produced by industry each year, we need to make the best use of EPA resources to determine which wastes are hazardous and to bring them under regulation.

The second section of my bill addresses those wastes which are currently regulated by RCRA but which can elude the RCRA regulatory system. It now is possible for a facility to exempt this waste from regulations through a process known as delisting. In many instances, hazardous wastes are slipping through this delisting process and escaping regulations.

As I mentioned earlier, EPA lists wastes as hazardous. Generally, the lsiting process is a general screening to determine that a kind of waste typically can cause harm to human health and the environment if mismanaged. The delisting process allows petitioners, and/or individual hazardous waste generators, the opportunity of showing that their wastes are significantly different—because of treatment, or because they are generated in a different process—from listed wastes of the same type. Consequently, they should be excluded—delisted—from the hazardous waste lists. EPA will delist those wastes which do not, or no longer, meet the criteria for which the waste was listed.

What the regulations do not address is the fact that wastes are frequently composed of numerous hazardous constituents. In some instances, these additional constituents may not have been taken into consideration when the waste was originally listed. Or in some treatment process, these additional wastes may not have been sufficiently rendered nonhazardous, or these wastes contain dangerous elements which have still not been listed by EPA as hazardous. In either case, EPA's regulations do not allow the agency to reject a delisting petition if the petitioner's waste contains hazardous constituents in addition to those for which it was originally listed. This is not merely a potential danger. It historically has resulted in wastes which are still hazardous being exempted from hazardous waste lists, and consequently, from RCRA regulations.

The consequences of this loophole are frightening.

In my own home State of Connecticut, for example, a temporary delisting was granted to a facility for a sludge pile resulting from a treatment process at a facility. Although the temporary delisting was ultimately revoked on technical grounds, it since has been discovered that the sludge contained PCB's and organics. Neither was the reason why the sludge pile was originally listed. If the pile had been given a final delisting, these hazardous wastes possibly could have ended up in a Connecticut sanitary landfill.

In certain stainless steel operations, the resulting waste is listed as hazardous for containing the heavy metals chromium and lead. But this waste also contains nickel—a heavy metal—which would go untreated if this waste were delisted.

Some petroleum industry treatment processes produce an oil-sludge mix which is listed as hazardous for containing heavy metals. Yet the process also contains certain organic compounds. Organics as yet are not covered by RCRA regulations. Even if they were, they are not the factor which caused the waste to be listed as hazardous. Consequently, they are not covered by RCRA regulations, and, if delisted, could be released untreated into the environment at large.

I do not cite these examples to point an accusatory finger at the industries concerned. They are living up to the letter of existing regulations. But the regulations contain a dangerous loophole which must be closed.

Under the legislation I am introducing, we would no longer take the risk that delisting a waste means releasing additional hazardous wastes from regulation. Instead, EPA will have the authority to consider additional constituents or other relevant factors when evaluating a delisting petition. If the agency has reason to believe that there are additional hazardous constituents present in the waste in potentially significant concentrations, they can ask the petitioner to demonstrate that is not the case. After sufficient comment period for the petitioner, EPA has the right to grant or deny a delisting petition based not only on the original constitutent for which the waste was listed, but also on any additional hazardous constituents.

I believe this approach will better protect public health and environment. It may also simplify matters for the industries concerned. If a delisted waste proves to remain hazardous, the responsible industry could still be liable under common law for any damage to health and the environment. In fact, for just that reason, many industries will not even use the delisting procedure. In some States, industries prefer to use the State delisting procedure, as it is frequently stricter than EPA's.

No matter what approach we take to the safe handling of hazardous wastes, there are costs involved. There is cost

for industry, for Government, for individual citizens. Our only choice is when to incur those costs, and how to invest money to insure protection of both health and the environment.

I believe the time for that investment is now, not later. It will be far more cost effective to work to insure that our existing regulations are sound than to postpone their solution—and charge its costs to some future account. If we do not act now to close the loopholes in RCRA, we are only creating future Superfund sites.

The choice is ours. By investing now in a more credible delisting procedure and in a plan to identify and list hazardous wastes, I believe we are making a sound investment for the years ahead.

Mr. President, hazardous waste is the inevitable byproduct of an industrialized society. Protection from its dangers are the concomitant responsibility of a civilized society. I believe our society is both. This bill is an attempt to help us better play that dual role.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3087

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Hazardous Waste Identification Improvement Act".

(b) Section 3001 (b) of the Solid Waste Disposal Act (42 U.S.C. 6921) is amended by adding at the end thereof the following new paragraphs:

"(4) The regulations promulgated under paragraph (1) shall provide that, when evaluating a petition to exclude a waste generated at a particular facility from being listed as a hazardous waste, the Administrator shall consider criteria other than those for which the waste was listed if the Administrator has a reasonable basis to believe that such additional criteria could cause such waste to be listed as a hazardous waste. The Administrator shall grant or deny such petition only after the petitioner and all interested parties have been given notice and opportunity for public hearing with respect to such additional criteria and to demonstrate whether such waste meets such criteria.

"(5) For the purpose of ensuring the timely revision of the characteristics for identifying hazardous waste as required under subsection (a), and the listing of particular hazardous wastes as required under paragraph (1) of this subsection, the Administrator shall develop, and submit to the Congress not later than July 1, 1983, a two-year plan for (A) revising or adding new characteristics for identifying hazardous waste, (B) the listing of those hazardous wastes which are not so listed on the date of the enactment of this paragraph, with a determination with respect to the listing of dioxin and the organic and inorganic waste streams described in Appendix I of House Report 97-570 to be made prior to March 1, 1983, and (C) an evaluation of possible determinations as to the levels of certain hazardous constituents which may cause wastes to be hazardous per se. The Administrator shall submit progress reports on such program on January 1, 1984, and January 1, 1985, in conjunction with the submittal of the proposed budget for the Environmental Protection Agency, to the Committee on Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives.".

(c) The amendment made by subsection (b) shall become effective on the date of the enactment of this Act, and regulations required to be promulgated by reason of such amendment shall be promulgated within 180 days after such date of enactment.●

By Mr. CHAFEE (for himself and Mr. PELL):

S. 3088. A bill to create competitive conditions in natural gas pricing by prohibiting certain anticompetitive clauses in natural gas contracts; to the Committee on Energy and Natural Resources.

NATURAL GAS PRICING

● Mr. CHAFEE. Mr. President, I am pleased today to join my distinguished colleague, the senior Senator from Rhode Island, in introducing a bill that would create competitive conditions in natural gas pricing by prohibiting certain anticompetitive clauses in natural gas contracts.

As we approach the coming winter, we face an extraordinary, perhaps unprecedented, situation. Simultaneously, we are experiencing a surplus of natural gas, a surplus so large that excess supplies are being flared; at the same time, the prices that gas consumers must pay are rising, particularly in the Northeast and the Midwest, at dramatic rates. Clearly market forces in natural gas are not functioning. This situation forces us to confront the cause of such a drastic malfunction.

To find the cause, we look immediately to the 1978 Natural Gas Policy Act. I voted for this act because I believed that phased decontrol of natural gas would lead to greater supplies, and ultimately to an end of Government control of this market. While it stimulated new supplies, the act contained requirements which have again caused a distortion of the gas market.

The first step in the history of Federal Government regulation of gas was in the 1938 Natural Gas Act. It and successive legislation and court interpretations created a growing disincentive to production. Supplies began to grow short. Indications of supply shortfalls began to appear in 1968 when, for the first time in 50 years, more natural gas was consumed in 1 year than was added to inventory. By the end of 1973, the deficit between new inventories and consumption had grown to 16.1 trillion cubic feet. The handwriting was clearly on the wall. But Congress continued to ignore the warnings until in the harsh winter of 1976 and 1977 extreme shortages occurred, forcing the closing throughout the Northeast and Midwest of factories and businesses and resulting in the temporary loss of millions of jobs.

Finally, Congress responded to the crisis in the 1978 act. That act, of course, provided phased decontrol of new gas. Incentives were created which resulted in large new supplies, particularly of so-called deep gas. At the same time, however, the act, by setting ceilings on the prices of certain categories of new gas and by providing that increased prices may be passed through the distribution stream to ultimate consumers, forced a situation in which prices to consumers have risen sharply in the face of oversupply. In part, this effect is achieved through what are called take-or-pay clauses in the pipelines' contracts with producers, and in contract provisions which mandate automatic increases in price.

So-called take-or-pay clauses require natural gas pipeline companies to pay for a large percentage of the gas they have under contract, whether they are able to sell that gas at the mandated price or not.

Price escalator clauses in many contracts provide that, upon decontrol in 1985, the price of natural gas can be linked to the price of imported fuel oil in given markets, and that under so-called area pricing escalator clauses, prices of cheaper gas can be raised to match higher priced gas emanating from wells in related producing areas.

Mr. President, in my view the correct response to this problem is not to attempt now to halt the gradual decontrol of gas. This one element of certainty should be maintained because under decontrol, even limited in nature, there has been a rush of supply. We do not wish to take steps now that would create such uncertainties amongst producers that would cause them to cease exploration and potentially again result in severe supply shortages. It is my strong belief that now that we have set out on the course of decontrol, we should permit the decontrol process to unroll.

Rather, Mr. President, I believe that we should now, as an immediate step, look to the contracts between the pipeline companies and the producers. These contracts, which require that pipelines buy gas at high prices while ignoring lower priced gas which is subsequently wasted or stored, have forced serious hardship. I believe that we should pass emergency legislation that would permit pipeline companies to abrogate their take-or-pay and escalator clauses in their contracts with the producers. This does not mean that the pipelines will simply walk away from the suppliers. It does mean that we would be giving the pipelines the power to renegotiate their contracts with the producers in much more realistic price terms.

This legislation is of an emergency nature. What is really required is a

review of the Natural Gas Policy Act of 1978 which I hope we will begin early next year. Therefore, the bill that the senior Senator from Rhode Island and I are introducing today provides that pipeline companies may abrogate take-or-pay and automatic price escalator clauses in their contracts with producers. This provision applies only to new gas, not to gas produced prior to the enactment of the 1978 Natural Gas Policy Act.

I do not advocate Government sanction of the abrogation of private contracts lightly, Mr. President. It is my understanding, however, that the Emergency Petroleum Allocation Act, the Economic Stabilization Act of 1970, and other laws have permitted such abrogations, and that these have been upheld.

There would also seem to be merit in the argument, well expressed in a recent policy statement by the CATO Institute, that the contracts in question are hardly the product of the operation of an open market. According to this analysis, "these contracts are not the product or manifestation of a free-market system. all of the present contracts were entered into within the framework of pervasive administrative regimentation of the natural gas industry."

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3088

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subtitle B of title III of the Natural Gas Policy Act of 1978 (15 U.S.C. 3371-3375) is amended by inserting after section 315 the following new section:

"SEC. 316. CLAUSES INVOLVING TAKE-OR-PAY AND INDEFINITE PRICE ESCALATORS

"(a) UNENFORCEABLE CLAUSES.—Any provision of any contract for the first sale of natural gas, including any contracts in existence on the day before the date of enactment of this section, is hereby declared against public policy and unenforceable if such provision includes:

"(1) a take-or-pay clause which commits the purchaser to take delivery of a minimum volume of natural gas for a period of more than one year; or

"(2) an indefinite price escalator clause as defined in section 105(b)(3)(B) of this Act.

"(b) EXCLUSION.—Paragraph (a)(1) shall not apply to any contract for the first sale of natural gas committed or dedicated to interstate commerce on November 8, 1978, and for which a just and reasonable rate under the Natural Gas Act was in effect on such date for the first sale of such natural gas.".●

● Mr. PELL. Mr. President, I am pleased to join with my colleague, Senator JOHN CHAFEE, today in introducing legislation to address the problem of the extraordinary rise in natural gas prices for Rhode Island consumers this fall.

Throughout New England and many other States across the Nation, consumers are being forced to pay unreasonably high prices for natural gas due in large part to a provision in the Natural Gas Policy Act of 1978 which requires pipelines having a take-or-pay clause in their contract with natural gas producers to accept the high-priced gas even though lower priced gas may be available from the same gas producers.

In my opinion, the sudden increase in the cost of natural gas for consumers this winter should not exist considering today's depressed natural gas market conditions. As a result of vigorous energy conservation on the part of consumers, general domestic economic conditions and our favorable weather conditions thus far, the nationwide demand for natural gas, along with other fuels, is down dramatically. These factors combined have resulted in a significant surplus of natural gas supplies across the Nation.

Unfortunately, however, these same factors have failed to cause the natural gas market to respond to the current conditions of oversupply. Natural gas prices instead of becoming more competitive have risen to excessive levels for consumers—all primarily as a result of the take-or-pay contracts. These contracts, enacted during a period of supply shortages in the 1970's, required pipelines to purchase a significant percentage of natural gas at a certain rate whether pipelines had a market for the gas at that rate or not. Consequently, pipelines under existing take-or-pay contracts are required to accept the high-priced gas while shutting off the options for available lower cost gas. Without question, this complex contract issue is one which is unfair to consumers and deserves the immediate attention of Congress during the remaining few weeks of the 97th Congress.

Mr. President, the legislation proposed by Senator CHAFEE and me today responds to the natural gas take-or-pay dilemma in a timely and responsible manner. Briefly, the legislation voids existing take-or-pay clauses in producer pipeline contracts thereby freeing the pipelines from the obligation to pay automatically for the high-priced natural gas from producers. In addition, take-or-pay clauses for old gas would be excluded from this provision as they remain in the public interest and would help insure that the most reasonable gas is distributed first to consumers. This bill also repeals the controversial indefinite price escalator clauses which presently tie the price of gas in a particular location to the price of oil or the price of gas in other parts of the country.

Mr. President, I understand that a discussion of only certain provisions of the Natural Gas Policy Act at this time is highly controversial and will not respond to the broader concerns of many of my colleagues troubled over provisions of the act enacted in 1978. I understand very much their desire to review the entire Natural Gas Policy Act legislation as soon as possible in view of the uncertainties facing the natural gas industry.

I support a full and early discussion of these concerns at both the Federal and local levels during the 98th Congress. These discussions should certainly include hearings by the Federal Energy Regulatory Commission (FERC) in the regions most affected by the review of the Natural Gas Policy Act. I hope, however, that prompt attention by Congress on the take-or-pay issue will not be delayed because of the complex issues and concerns over the Natural Gas Policy Act. Consumers across the country should not be penalized any further with high natural gas bills because of congressional inaction. I urge my colleagues to carefully examine this issue and to act promptly to repeal the take-or-pay clause for the benefit of consumers this winter.

I ask unanimous consent, Mr. President, that an article from the Providence Journal on the subject of natural gas pricing be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Providence Journal, Sept. 23, 1982]

NATURAL GAS PRICES RISING TO LEVEL OF FUEL OIL RATES

(By Doug Cumming)

This winter, it will be as expensive to heat your home or business with natural gas as with fuel oil.

The price advantage for natural gas in Rhode Island, which began when oil skyrocketed in 1978 and which drove thousands of homeowners to convert their oil burners to gas burners, is ending abruptly next week for Providence Gas Co.

Providence Gas, which serves 68 percent of the 102,000 homes that heat with gas in the state, will increase its rate on Friday, Oct. 1, by about 21 percent above last year's average rate.

With the new rate, gas customers will pay about $1.22 for the amount of gas that yields the same amount of heat as a gallon of oil. The comparison can very, depending on who does the figuring. Providence Gas officials say their new price is equal to oil priced at $1.20 a gallon. State officials say it's between $1.22 and $1.24.

In any case, the average cost of No. 2 fuel oil, the most widely used home heating fuel in Rhode Island since the 1940s, is now $1.22 a gallon, according to Santo Amato, state fuel allocation officer.

The rates of the three other gas companies in Rhode Island are rising to similar levels this winter, mostly because of the increasing wholesale costs of deregulated gas in the South and Midwest. Valley Gas Co., serving the Blackstone Valley, is also seeking a 9.7 percent rate increase for its own cost of doing business.

Local fuel oil dealers relish being back on an equal footing.

"I feel sorry for the few thousand people who converted, if they thought they would save money," said Robert E. DeBlois president of DeBlois Oil Co. "I think this winter we'll get the advantage back again."

The suddenness of the jump in Providence Gas' rate results from a complicated change in the way the company figures its own costs. In past years, the company used a Purchased Gas Adjustment (PGA) surcharge that would change throughout the year depending on wholesale costs and the higher costs of supplemental fuels used during the winter (liquefied and synthetic natural gas and propane).

This winter, the company is estimating its PGA for the entire coming year and making it a part of the basic rate. The estimate can be adjusted periodically. It is to go into effect Oct. 1 after a routine hearing tomorrow before the state Public Utilities Commission.

Louis R. Hampton, president of Providence Gas, said that the new year-long rate of $9.01 per thousand cubic feet is better for customers because it lessens the impact of high winter bills. Previously, rates were higher in the winter because of the use of supplemental fuels.

The new method of assessing the PGA is part of a rate increase granted last June 23 by the PUC. The increase was for 5.7 percent, or about $54 a year added to an average heating bill.

However, when last winter's average rate from October to April, $7.45 per cubic foot, is compared with the rate from now until next Sept. 30, the increase is 21 percent.

Edward F. Burke, PLUC chairman, said that Providence Gas rates will actually go up 23.5 percent this winter, counting the estimated $4.5 million that is due the company because of a state Supreme Court order.

Providence gas officals say they are not worried about competition from fuel oil.

"We've known what it is to sell against lower prices (for oil)," Hampton said. "We've done it for years."

Natural gas began making inroads as a New England heating fuel in the 1950s, despite the higher cost, because it is a clean, dependable fuel, Hampton said. Today, the supply is extremely good, mainly because of increased production that followed the rising prices of the Natural Gas Deregulation Act of 1978, he said.

He said it is hard to make customers understand that most of the price increases result from rising costs at the wellhead and along the pipeline, far from Rhode Island.

But Hampton said the natural gas will still be able to compete with other heating fuels.

Indeed, Providence Gas Co. advertised in the *Journal-Bulletin* two weeks ago that "now is the best time to switch to gas heat." The ad offered a guarantee to anyone who converts from oil to gas, saying the company would refund the cost of the burner conversion if the customer is dissatisfied before next July. The offer expires Oct. 15.

Two years ago the company was putting more stress on the price advantage, advertising that gas was "the best energy buy in town." In 1981, when fuel oil peaked at an average of $1.31 a gallon, the equivalent for gas was about 82 cents.

Providence Gas added about 4,000 new customers that year, after adding 5,000 new customers the year before, most of them former oil-heating customers. The conversions cost the customers an average of $700 each.

Now, a few homeowners are converting back by restoring their old oil burners, according to DeBlois.

"We've been through a bad period recently," DeBlois said of the fuel oil business. "But people of the United States seem to rely on petroleum for their fuel, particularly in the northeast."

The average cost of No. 2 fuel oil—now at $1.22 a gallon—will probably rise to about $1.25 this winter, DeBlois said. Despite worries expressed by Governor Garrahy several months ago, supplies seem to be plentiful now, according to both DeBlois and Amato.

But meteorologists are predicting a record cold in New England this winter.

"The amount and timing of the cold will determine what happens to the price," DeBlois said, "Our price goes on a supply-and-demand basis."●

ADDITIONAL COSPONSORS

S. 2631

At the request of Mr. KASTEN, the name of the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of S. 2631, A bill to regulate interstate commerce by providing for a uniform product liability law, and for other purposes.

S. 3048

At the request of Mr. THURMOND, the names of the Senator from Nevada (Mr. LAXALT), the Senator from New York (Mr. MOYNIHAN), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Alabama (Mr. HEFLIN), the Senator from Utah (Mr. HATCH), the Senator from Iowa (Mr. GRASSLEY), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Pennsylvania (Mr. SPECTER), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of S. 3048, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic and other products with intent to cause personal injury, death, or other harm.

S. 3060

At the request of Mr. HATFIELD, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 3060, a bill to amend section 7(b) of the Wild and Scenic Rivers Act.

S. 3069

At the request of Mr. EAGLETON, the names of the Senator from Tennessee (Mr. SASSER), the Senator from Maryland (Mr. SARBANES), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 3069, a bill to amend the Natural Gas Policy Act of 1978 to prohibit increases in the wellhead prices of natural gas, and for other purposes.

S. 3077

At the request of Mr. EAGLETON, the name of the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 3077, a bill to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes.

SENATE JOINT RESOLUTION 254

At the request of Mr. JEPSEN, the names of the Senator from Florida (Mrs. HAWKINS), the Senator from Maryland (Mr. SARBANES), and the Senator from Alabama (Mr. DENTON) were added as cosponsors of Senate Joint Resolution 254, joint resolution designating September 22, 1983, as "American Business Women's Day."

SENATE JOINT RESOLUTION 263

At the request of Mr. THURMOND, the name of the Senator from Virginia (Mr. WARNER) was added as a cosponsor of Senate Joint Resolution 263, a joint resolution to authorize the President to issue a proclamation designating the week beginning on March 13, 1983, as "National Surveyors Week."

SENATE JOINT RESOLUTION 265

At the request of Mr. DENTON, the names of the Senator from Michigan (Mr. RIEGLE), the Senator from Indiana (Mr. LUGAR), and the Senator from Nevada (Mr. CANNON) were added as cosponsors of Senate Joint Resolution 265, joint resolution to authorize and request the President to proclaim 1983 as the "National Year of Voluntarism."

SENATE CONCURRENT RESOLUTION 104

At the request of Mr. DODD, the names of the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of Senate Concurrent Resolution 104, a concurrent resolution condemning the use by the Government of the United Kingdom of plastic rubber bullets in Northern Ireland, and for other purposes.

SENATE CONCURRENT RESOLUTION 131

At the request of Mr. HAYAKAWA, the names of the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Wisconsin (Mr. KASTEN), and the Senator from Pennsylvania (Mr. SPECTER) were added as cosponsors of Senate Concurrent Resolution 131, a concurrent resolution to express the sense of the Congress concerning Americans missing and unaccounted for in Southeast Asia.

AMENDEMENT NO. 3637

At the request of Mr. JEPSEN, the name of the Senator from New York (Mr. D'AMATO) was added as a cosponsor of amendment No. 3637 intended to be proposed.

SENATE CONCURRENT RESOLUTION 132—CONCURRENT RESOLUTION RELATING TO DISABLED PERSONS

Mr. CRANSTON (for himself, Mr. BAUCUS, Mr. CANNON, Mr. CHAFEE, Mr. CHILES, Mr. DECONCINI, Mr. DODD, Mr. HEINZ, Mr. INOUYE, Mr. KENNEDY, Mr.

LEVIN, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES, and Mr. SASSER) submitted the following concurrent resolution; which was referred to the Committee on Labor and Human Resources:

S. CON. RES. 132

Whereas during the decade of the Seventies the Congress, with broad bipartisan support and in concert with Republican and Democratic Administrations, established and improved programs to help handicapped Americans to become as productive and independent as possible and have the opportunities for participation in our society that should be each citizen's due;

Whereas these programs have made much progress toward ensuring that handicapped children receive free appropriate public education; toward making adequate vocational rehabilitation services available to meet the needs of handicapped persons; toward eliminating architectural and transportation barriers which exclude handicapped persons from many employment, educational, recreational, social, and other opportunities that other Americans enjoy and from full participation in our society's institutions; and toward protecting handicapped persons from unfair discrimination;

Whereas various proposals have been made to repeal major laws establishing disability programs, to reduce substantially Federal funding for and certain benefits in such programs, and to weaken regulations implementing such laws;

Whereas the social security disability insurance benefits of thousands of disabled persons have been precipitously terminated; and

Whereas these proposals and actions are particularly burdensome for handicapped persons already suffering hardship as a result of cutbacks in major health, nutrition, and social programs: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that:

(1) Federal programs designed to ensure that disabled Americans are provided with the opportunities for the education and rehabilitation services and the access to public facilities and services they need to achieve their full human potential and live as independently and productively as possible should be maintained and funded at not less than current programmatic levels and should be enhanced where cost-effective restoration, growth, or expansion would be achieved.

(2) Changes in permanent regulations implementing Federal laws relating to the education and civil rights of handicapped individuals should be limited to changes that are necessary to conform to authoritative judicial decisions interpreting those laws and to improve program efficiency and effectiveness without diluting the individual rights and protections provided under current regulations.

(3) The reviews of the continued eligibility of disabled recipients of social security disability insurance benefits should be conducted in a manner ensuring that each recipient is apprised of the nature and purpose of the review; that determinations of ineligibility do not occur as the result of erroneous interpretations of law or of failures to give full and fair consideration to all pertinent evidence, including the recipient's medical history and evidence available from the treating physician or other licensed practitioner; and that mentally impaired recipients are provided the assistance needed to respond to the administrative requirements of such reviews and to exercise their rights in connection therewith.

(4) The level of veterans' disability compensation benefits for service-connected conditions should be maintained.

CONGRESSIONAL SUPPORT OF PROGRAMS FOR HANDICAPPED PERSONS

Mr. CRANSTON. Mr. President, I am today submitting S. Con. Res. 132, expressing the sense of the Congress that the Federal Government should maintain effective programs to assist in providing disabled persons with maximum opportunities for fuller, more productive and independent lives. This concurrent resolution is cosponsored by 18 Senators: Mr. BAUCUS, Mr. CANNON, Mr. CHAFEE, Mr. CHILES, Mr. DECONCINI, Mr. DODD, Mr. HEINZ, Mr. INOUYE, Mr. KENNEDY, Mr. LEVIN, Mr. MATSUNAGA, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES, and Mr. SASSER.

Mr. President, I want to emphasize that the preservation of these programs is not a partisan issue. In fact, broad bipartisan support in Congress during Republican and Democratic administrations brought about major advances in these programs during the 1970's to provide disabled persons with the assistance and opportunities they need to participate more fully in our society and to become as productive and self-sufficient as possible.

Moreover, many leaders on both sides of the aisle in both Houses of Congress have worked hard during this, the 97th Congress to preserve programs for handicapped persons and to insure that these individuals receive fair treatment under them.

Nevertheless, the need for this concurrent resolution has arisen because the number and range of proposals and resulting actions in the past 2 years to eliminate or reduce these programs have created hardships for many disabled persons and caused deep concern among all those interested in assuring fair treatment for handicapped Americans.

In a November 24, 1982, letter that I sent to each of my colleagues in the Senate, I outlined some of the major causes of concern. They are as follows:

First, proposals to block grant the Education for All Handicapped Children Act of 1975, to reduce appropriations for education programs for handicapped children by 30 percent in fiscal year 1983, and to weaken substantially the regulations implementing this law.

Second, proposals to block grant the Federal-State vocational rehabilitation program under the Rehabilitation Act of 1973, to reduce appropriations for rehabilitation programs by about one-third in fiscal year 1983, and to eliminate the National Institute for Handicapped Research.

Third, the virtual elimination of the social security beneficiary rehabilitation programs under which State agencies received $124 million in fiscal year 1981 and only $3.5 million in fiscal year 1982 for the rehabilitation of disabled Social Security Act beneficiaries.

Fourth, proposals to repeal the Developmental Disabilities Assistance and Bill of Rights Act and to reduce developmental disabilities services and advocacy funding by more than one-third in fiscal year 1983.

Fifth, proposals to eliminate the Architectural and Transportation Barriers Compliance Board, to rescind the minimum guidelines and requirements that the Board had adopted for public building accessibility, and to dilute these guidelines and requirements.

Sixth, the premature mounting of a massive review of the eligibility of disabled persons for social security disability benefits that has resulted in overworked State agencies conducting unfair, inadequate reviews, causing the Senate Governmental Affairs Subcommittee on Oversight of Government Management to conclude that benefits had been terminated for thousands of severely disabled persons who deserve to remain in the program.

Seventh, proposals under consideration in the executive branch to weaken basic governmentwide regulations for implementing section 504 of the Rehabilitation Act, the civil rights charter for handicapped Americans, which prohibits discrimination against qualified handicapped persons in Federal and federally assisted programs.

Eighth, the July 1981 adoption by the Department of Transportation of an interim final rule—replacing its section 504 regulations—regarding transportation for handicapped persons that provides no assurance of continuing progress toward the provision of adequate, accessible transit services for handicapped persons.

Ninth, proposals to reduce certain veterans' service-connected disability compensation benefits by more than $400 million in fiscal year 1984.

Tenth, the suffering, because of their particular vulnerability, of handicapped persons from cutbacks in a wide range of social programs, such as health care, housing, nutrition, and social and legal services.

Clearly, Mr. President, we have now reached the point where it is essential for the Congress to assert strongly that it stands behind programs that offer handicapped individuals opportunities to overcome or minimize their disabilities and live fuller, more productive, independent lives in our communities and that provide subsistence-level support for those who have no other means of existence. This con-

gressional declaration would help to dispel the great anxiety, frustration, and hopelessness that the cuts and proposed reductions in disability programs have already created and that any proposals for fiscal year 1984 budget cuts in these programs would aggravate.

Thus, I urge my colleagues to support this concurrent resolution and, by its adoption, send a message of hope to those who are despairing—as well as a message, to those who would attempt to erode disability programs, of strong congressional resolve to defeat such efforts.

Mr. President, I intend to offer the provisions of this concurrent resolution as an amendment to the continuing resolution next week.

SENATE RESOLUTION 504—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 504

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of S. 2863. Such waiver is necessary because S. 2863, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This budget waiver will allow Senate consideration of S. 2863 which extends to all Federal jurors eligibility for Federal workers' compensation, provides for the taxing of attorneys fees in certain actions brought by jurors, and authorizes the service of jury summonses by ordinary mail. After hearings in the Agency Administration Subcommittee, S. 2863 was reported favorably by all members of the Subcommittee October 1, 1982.

S. 2863 indirectly authorizes the appropriation of an estimated $100,000 to compensate jurors suffering duty related injuries. However, enactment of the regular mail option for the service of jury summonses is anticipated to save $300,000 to $500,000 a year resulting in an estimated net gain of between $200,000 and $400,000.

S. 2863 was not reported on or before May 15, 1982 because it was not introduced until August 19, 1982.

SENATE RESOLUTION 505—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. THURMOND, from the Committee on the Judiciary, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 505

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to consideration of H.R. 5858. Such waiver is necessary because H.R. 5858, as reported, authorizes the enactment of new budget authority which would first become available in fiscal year 1983, and such bill was not reported on or before May 15, 1982, as required by section 402(a) of the Congressional Budget Act of 1974 for such authorizations.

This budget waiver will allow Senate consideration of H.R. 5858 which is a private relief bill for the relief of Mocatta and Goldsmid, Ltd,. et al. H.R. 5858 was reported by the members of the Subcommittee on Agency Administration on December 2, 1982.

H.R. 5858 authorizes the appropriation of the following amounts to the silver dealers enumerated below:

Mocatta & Goldsmid, Ltd.	$1,502,642
Sharps, Pixley & Co	1,001,641
Primary Metal & Mineral Corp	851,395

These awards compensate dealers for losses they sustained when the United States Treasury failed to honor their telephone orders for silver on May 18, 1967.

H.R. 5858 was not reported on or before May 15, 1982, because the Senate did not receive the bill from the House of Representatives until after September 21, 1982.

SENATE RESOLUTION 506—RESOLUTION AUTHORIZING THE PRINTING OF A BROCHURE ON RESEARCH COLLECTIONS OF FORMER SENATORS

Mr. BAKER (for himself and Mr. ROBERT C. BYRD) submitted the following resolution; which was considered and agreed to:

S. RES. 506

Resolved, That a compilation of materials entitled "Guide to Research Collections of Former United States Senators, 1789-1982", prepared by the Senate Historical Office, be printed, with illustrations, as a Senate document, and that five thousand additional copies of such document be printed for the use of the Office of the Secretary of the Senate.

SEC. 2. The document specified in the first section of this resolution shall be printed and bound with a paperback cover of the style, design, and color as the Secretary of the Senate shall direct.

AMENDMENTS SUBMITTED FOR PRINTING

FEDERAL AID HIGHWAY IMPROVEMENT ACT

AMENDMENT NO. 4978

(Ordered to be printed and to lie on the table.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to the bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

Mr. CRANSTON. Mr. President, I am introducing an amendment to the Federal Aid Highway Improvement Act to provide a 10-percent set-aside for minority business concerns to assure participation of these businesses in this massive public works program being financed from gasoline tax funds.

I share the deep concern of my constituents and others in regard to the astoundingly high-unemployment levels which continue to haunt this Nation. Last week the November unemployment figures were released—10.8 percent of Americans are out of work. This translates to approximately 12 million men and women who have no hope of providing their families with the necessities of life. While 10.8 percent of America are without jobs, the percentage of unemployed black Americans is at 20 percent, and black teenage unemployment is hitting the 40-percent level. These percentages do not reflect the number of men and women who have given up hope and are, thus, no longer seeking employment and women who have not worked who now need employment. These numbers pose dire consequences for the future of our country and we must explore every avenue to reverse this situation.

The measure before us today will create nearly 300,000 jobs, and I am deeply concerned that these funds reach those that are most directly affected by this situation. The set aside is the most direct way to assure that black, Hispanic, women, Asian-Americans, and other disadvantaged business owners participate to the fullest possible extent possible in these benefits. We must make sure that they have an opportunity to help get this Nation going again.

The minority set-aside program has a proven record. In 1977, the Congress passed a similar amendment to the local public works bill, requiring a 10-percent set aside for minority contractors. As a result over $600 million in contracts were awarded to minority businesses, and this resulted in the creation of many jobs where they were most needed. We must assure that tax dollars taken from the people be used in the most efficient manner possible. My amendment, by specifically directing that not less than 10 percent of the amount authorized to be appropriated under this bill shall be expended directly with small business concerns owned and controlled by socially and economically disadvantaged businesses, goes right to the heart of the disproportionate unemployment problem that plagues minority communities around the country and the minority businesses that serve these communities.

The small and minority business sector of our economic system has a

proven track record in creating jobs. This amendment will make sure that the women, black, Hispancies, business owners, and others as defined in the Small Business Act will have the tools to significantly reduce the 20-percent unemployment in their communities and thus in the country as a whole.

I urge my colleagues to support my amendment.

NOTICES OF HEARINGS

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. COHEN. Mr. President, I wish to announce that the Senate Oversight of Government Management Subcommittee will hold oversight hearings on computer matching programs to detect fraud and mismanagement in government programs on Wednesday and Thursday, December 15 and 16, at 9:30 a.m., in room 3302 of the Dirksen Senate Office Building.

The subcommittee's hearings will focus on the recent efforts by the Federal Government to promote computer matching at both the Federal and State levels of government.

SUBSOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Subcommittee on Public Lands and Reserved Water to consider S. 1584, to designate certain public lands in the State of California, and for other purposes; and H.R. 4083, to designate certain public lands in the State of California as wilderness, and for other purposes.

The hearing will be held on Wednesday, December 15, beginning at 9 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Public Lands, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510 or call Mr. Tony Bevinetto of the subcommittee staff at 202-224-5161.

Witnesses are requested to provide the subcommittee with 25 copies of their written testimony 24 hours before the hearing, as required by the rules of the committee. Witnesses may be arranged in panels and are requested to limit their oral testimony to 5 minutes.

For further information regarding this hearing, please contact Mr. Bevinetto at the above listed number.

COMMITTEE AUTHORITY TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to have met during the session of the Senate on Tuesday, December 7, at 2:30 p.m., to consider the nominations of Geoffrey Alprin and Virginia Riley to be associate judges, District of Columbia Superior Court.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON AGRICULTURAL PRODUCTION, MARKETING, AND STABILIZATION OF PRICES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Agricultural Production, Marketing, and Stabilization of Prices of the Committee on Agriculture, Nutrition, and Forestry, be authorized to meet during the session of the Senate on Thursday, December 9, at 9 a.m., to hold a hearing on farm program alternatives.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet in executive session during the session of the Senate on Wednesday, December 8, to consider the gas tax bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENTAL PROCESSES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Energy, Nuclear Proliferation and Governmental Processes of the Committee on Governmental Affairs, be authorized to meet during the session of the Senate on Monday, December 13, at 10 a.m., to hold a hearing on internal controls in Federal agencies.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE MIRAGE OF EFFICIENCY

● Mr. KENNEDY. Mr. President, too often, it seems that the country must learn its lessons of economic policy the hard way. This type of education is often the result of repeated mistakes.

As Prof. Allan J. Lichtman of the American University points out in his essay "The Mirage of Efficiency," which appeared in the Christian Science Monitor on October 6, 1982, the country is learning yet another painful lesson about a kind of fiscal irresponsibility not seen since the early 1950's. As Professor Lichtman suggests, the indiscriminate nature of the reductions in force program is proving in 1982, just as it proved in 1953, to be a severe waste of time, money, and talent.

I commend Professor Lichtman's insightful essay, and I recommend it to my colleagues as necessary reading before we enter yet another debate over fiscal efficiency. I ask that the full text of Professor Lichtman's article be included in the RECORD.

The article follows:

[From the Christian Science Monitor, Oct. 6, 1982]

THE MIRAGE OF EFFICIENCY

(By Allan J. Lichtman)

As the simplest of its simple remedies for the ills of government, the new Republican administration promised to thin the ranks of a swollen bureaucracy. Within a year, however, the mirage of vast savings through a flurry of pink slips had disappeared from the political horizon.

The actual practice of RIFs (reductions-in-force) had shown that they allowed allegedly dismissed workers to "bump" those below them, moving into jobs for which they were overpaid and undertrained. For every worker fired several were reassigned, defying organizational logic and subverting morale by sending tremors of alarm throughout the bureaucracy. Heralded as an austerity measure, the RIF procedure failed even to pay for itself as paper work and separation costs canceled budgetary savings, and agency productivity declines.

Sounds like old news? Perhaps older than one might think: these reports are from 1953 and the new Republican President was Dwight Eisenhower. Yet in the spring of 1982 the Reagan administration confessed the failure of an almost identical program for paring budgets by riffing the federal work force. Replaying the Republican script of 30 years before, Office of Personnel Management (OPM) Director Donald J. Devine admitted that the RIF procedure "is inefficient . . . complex, sometimes inequitable, and cumbersome."

The avowed purpose of RIFs, often lost in the fog of controversy, is not just to pare expenses but to improve the efficiency of government. Yet the evidence suggests that this slash-and-burn method for reorganizing government subverts the goal it is designed to achieve. The OPM confessed as much when it recently balked at thinning the ranks of its own employees. In an internal memo, Michael Sanera, assistant director for planning and evaluation, noted that although a RIF at OPM is supposed "to improve organization efficiency . . . quite the opposite result is a far more likely occurrence." RIFs have contributed to a poisoned atmosphere for federal service, reflected during 1981 in more than a doubling of the rate at which senior career executives resigned from government.

Reductions-in-force have been especially detrimental for women and minority workers, whose recent gains in employment leave them lacking in seniority protection. Despite candidate Reagan's commitment to particular initiatives for women in lieu of the Equal Rights Amendment, his managers have sacked women in professional and administrative positions at a rate more than 60 percent greater than their male counterparts. Minorities in these positions have faced even grimmer prospects, losing their jobs at a rate more than twice that of nonminority employees.

After his belated rediscovery of the inefficiency of the RIF procedure, OPM Director Devine proposed not to halt RIFs, but to explore new procedures "with more emphasis on merit in the separation process and less on seniority." In fact, although the RIF controversy no longer sizzles in the media, a recent survey disclosed that more federal

workers were dismissed during the first half of fiscal 1982 than during all of fiscal 1981.

Devine's new approach, moreover, would spark bitter warfare with the federal employees' unions without eliminating the disruptive effects of reductions-in-force. The lack of a tested, uniform, and objective evaluation tool would also heighten fears of politically motivated sackings. Even Republican congressmen representing substantial numbers of federal workers have sought to dissuade OPM from issuing its new RIF procedures . . . at least until after November.

More promising than Devine's nonsolution is legislation drafted by the Federal Government Service Task Force, a bipartisan, bicameral coalition chaired by Rep. Michael Barnes (D) of Maryland. Following the precedent set in private industry, the bill mandates labor-management bargaining on alternatives to RIFs. Should negotiators fail to reach agreement within 45 days, arbitration procedures would result. Ultimately no RIF program could take place without both a favorable ruling from the arbitrators and certification by the OPM and the GAO that its benefits justify its costs.

Aside from exposing flaws in the RIF procedure, experience during the Eisenhower years also failed to reveal any means for slashing the costs of government without cutting real services and benefits. This despite extensive studies of the federal administration, including the second Hoover Commission Report. As journalist Edwin J. Dale Jr. (now ironically spokesperson for David Stockman's Office of Management and Budget) wrote in a retrospective on the 1950s, "the pragmatists among the conservatives in power discovered that . . . the search for efficiency" was simply "not the road to lower federal spending."

Beyond just disdain for history, administration personnel policies reflect an ideology that stresses minimum constraint for management and maximum control over workers. In addition to RIFs, the record includes financial support for union-busting campaigns, the abrupt transfer of civil servants from one part of the country to another, and opposition to programs of flexible work hours. Like the failure to spend appropriated funds (a practice that has vastly increased since Reagan's inauguration) RIFs are also a useful tool for circumventing statutory mandates without changing the laws themselves. It is not by accident that RIFs have fallen with special force on agencies that enforce federal regulations and those that disseminate information to the public.●

THE BAILOUT OF BIG BANKERS

● Mr. EAST. Mr. President, for over a generation the American taxpayers have paid the bills for extravagant foreign aid to nations all over the world. We have not bought any friends with all those billions of dollars. Now the liberal foreign policy establishment wants the American taxpayers to bail out the big bankers in New York and elsewhere who have made unwise loans to Third World countries. Today's Washington Post contains an excellent article by Rowland Evans and Robert Novak shedding light on this latest raid on the U.S. Treasury. I ask that the article be printed in the RECORD.

The article follows:

[From the Washington Post, Dec. 8, 1982]

BAILING OUT THE BANKERS

(By Rowland Evans and Robert Novak)

The Reagan administration's decision to use tax money to bail out international bankers can be traced to a rare Oct. 28 visit by Paul Volcker, chairman of the Federal Reserve Board, to a meeting of senior officials at the White House.

Normally guarded in revealing his opinions, central banker Volcker was a passionate advocate. To preserve the world financial structure, he said, the United States must radically increase its contribution to the International Monetary Fund to prevent Third World countries from defaulting on reckless loans from the big banks. "Volcker left no doubt that the sky was falling," one administration official told us. His visit terminated rear-guard action by budget director David Stockman to forestall the bailout.

Early in 1981, the State Department's effort to fulfill Jimmy Carter's promises of more U.S. financing were forestalled by an alliance of Stockman's Office of Management and Budget and the Treasury. But those forces were depleted when growth-oriented supply-siders, who consider the IMF's high-tax austerity programs a formula for world depression, left the Treasury.

By last summer's IMF meeting in Toronto, Treasury Undersecretary Beryl Sprinkel had become a special pleader for boosting the IMF quota. He complained to administration colleagues how embarrassing it was to be confronted at international conferences by finance ministry counterparts from other Western countries, angry at U.S. reluctance. Stockman, insisting that bankers should suffer the consequences of their follies, held out.

Enter Volcker. His White House audience was the same group of officials, chaired by Chief of Staff James Baker, that has been making most domestic policy decisions the past year. When Volcker left, it was clear the United States would increase its IMF contribution by $7.5 billion (though officals said it would "bubble up" to $10 billion). With extra add-ons for Mexico and Brazil, never to be repaid, the figure is likely to exceed $15 billion.

Thanks to the wonders of federal accounting, much of this will not be recorded in the budget as government spending. Still, there will be questions from congressmen of both parties, echoing Sen. William Proxmire, a longtime Democratic Fedbaiter. He accused Volcker at a recent hearing of a "double standard." Noting that Volcker had encouraged new loans enabling a foreign country to "service its international debt in an orderly manner," Proxmire commented: "I had not heard you encourage banks to lend to American farmers, home-builders or other small businesses. Are you applying a looser supervisory standard to bank loans to foreigners than to loans for Americans?"

"No, sir," Volcker replied. "I do not think so." But administration officials may be hard-pressed to answer the same question from their own Republican congressmen as unemployment brushes 11 percent.●

PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulated that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD the notifications which have been received. The classified annex referred to in one of the covering letters is available to Senators in the office of the Foreign Relations Committee, room 4229, Dirksen Building.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., December 6, 1982.
In reply refer to I-04592/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-10, concerning the Department of the Army's proposed Letter of Offer to Greece for defense articles and services estimated to cost $26 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C(b) of that statute.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-10

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Greece.

(ii) Total estimated value:

	Millions
Major defense equipment[1]	$21
Other	5
Total	26

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: One hundred ten M113A2 armored personnel carriers with ancillary equipment and concurrent spare parts.

(iv) Military Department: Army (WNP).

(v) Sales Commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: None.

(vii) Section 28 report: Included in report for quarter ending 30 June 1982.

(viii) Date report delivered to Congress: 6 Dec. 1982.

POLICY JUSTIFICATION

GREECE—M113A2 ARMORED PERSONNEL CARRIERS

The Goverment of Greece has requested the purchase of 110 M113A2 armored per-

sonnel carriers with ancillary equipment and concurrent spare parts at an estimated cost of $26 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Greece; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

These vehicles are required by the Government of Greece to further upgrade similar equipment already in existence in the Hellenic Army. The Hellenic Army will have no difficulty in absorbing these vehicles. These defense articles will be furnished in accordance with, and subject to, the limitations on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. The sale would not affect the military balance in the region or our efforts for a peaceful settlement of the Cyprus question.

The prime contractor will be FMC of San Jose, California.

Implementation of this sale will require the assignment of three additional U.S. Government personnel to Greece for five days.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

U.S. DEPARTMENT OF STATE, UNDER SECRETARY OF STATE FOR SECURITY ASSISTANCE, SCIENCE AND TECHNOLOGY,
Washington, D.C., November 30, 1982.

Pursuant to section 620c(d) of the Foreign Assistance Act of 1961, as amended (the Act), and the authority vested in me by Department of State Delegation of Authority No. 145, I hereby certify that the provision to Greece of 110 M113A2 armored personnel carriers is consistent with the principles contained in section 620(b) of the Act.

This certification will be made part of the certification to the Congress under Section 36(b) of the Arms Export Control Act regarding the proposed sale of the abovenamed articles and is based on the justification accompanying said certification, and of which such justification constitutes a full explanation.

WILLIAM SCHNEIDER.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., December 6, 1982.
In reply refer to I-04624/82ct.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 83-11 and under separate cover the classified annex thereto. This transmittal concerns the Department of the Navy's proposed letter of Offer to the Federal Republic of Germany for defense articles and services estimated to cost $23 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the classified portion of this Transmittal.

Sincerely,

PHILIP C. GAST,
Director.

TRANSMITTAL No. 83-11

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b) of the Arms Export Control Act

(i) Prospective purchaser: Federal Republic of Germany.

(ii) Total estimated value:

	Millions
Major defense equipment [1]	$21
Other	2
Total	23

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of articles or services offered: One hundred twenty-six RIM-7M SEASPARROW missiles with associated support and publications.

(iv) Military department: Navy (AGO).

(v) Sales commission, fee, etc., paid, offered, or agreed to be paid: None.

(vi) Sensitivity of technology contained in the defense articles or defense services proposed to be sold: See Annex under separate cover.

(vii) Section 28 report: Included in report for quarter ending 30 September 1982.

(viii) Date report delivered to Congress: 6 Dec. 1982.

POLICY JUSTIFICATION

FEDERAL REPUBLIC OF GERMANY—RIM-7M MISSILES

The Government of the Federal Republic of Germany (FRG) has requested the purchase of 126 RIM-7M SEASPARROW Missiles with associated support and publications at an estimated cost of $23 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of the FRG; furthering NATO rationalization, standardization, and interoperability; and enhancing the defenses of the Western Alliance.

These missiles are being purchased to improve existing short range, sea-based surface-to-air missile capabilities of the German Navy (GN). The GN already has similar missiles in its inventory, and the training and maintenance facilities to support these missiles.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Raytheon Company of Lowell, Massachusetts.

Implementation of this sale will not require the assignment of any additional U.S. Government or contractor personnel to the FRG.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

HENRY G. PARKS

● Mr. SARBANES. Mr. President, the city of Baltimore's deserved recognition for its urban renaissance reflects the vitality and creativity of its citizens. One of those individuals who has been responsible for this great achievement is Henry G. Parks.

Henry Parks has been an influence for decency, commercial innovation, and leadership, not only in Baltimore but nationally as well. His activities span the entire range of public and private endeavor. A former member of the Baltimore City Council, he played a crucial role in bringing the Baltimore community together during a critical period of transition. His breadth of vision and commitment was an important element in forming a coalition of Baltimore citizens united behind municipal progress, public decency, and opportunity for all. His philanthropic endeavors have directly helped many individuals in the community. Henry Parks is indeed a man of great versatility and leadership.

As founder and chairman of the board of H. G. Parks, Inc., Henry Parks has established himself as a major entrepreneur known across the Nation for his innovative and dynamic leadership. From humble beginnings, he built his Parks Sausage Co. into a $15 million business. His products are sold in more than 12,000 stores and have made Parks a national household name.

Mr. President, on December 9, Henry Parks will be honored by the Baltimore Marketing Association, a nonprofit professional association, for his accomplishments and contributions to his community. I ask my colleagues to join me in saluting Henry Parks, a distinguished American whose pioneering and pathbreaking efforts have enormously enhanced the civic and commercial life of Baltimore.●

THE NUCLEAR FREEZE MOVEMENT

● Mr. EAST. Mr. President, while the controversial nuclear freeze movement continues to dominate much of the political debate in our country, it would be wise for us to keep this controversy in proper perspective. To that end, I would like to call my colleagues' attention to the following background paper on the World Peace Council published by the U.S. Department of State in April 1982. The article follows:

WORLD PEACE COUNCIL: INSTRUMENT OF SOVIET FOREIGN POLICY

The World Peace Council (WPC) was founded in 1949 as the World Committee of Partisans for Peace and first adopted its present title in 1950. It was based in Paris until 1951 when it was expelled for what the French Government termed "fifth column activities." It moved to Prague and then in 1954 to Vienna, where it remained until banned in 1957 by the Austrian Interior Minister for "activities directed against the Austrian state." However, it continued to operate in Vienna under the legal cover of the newly established International Institute for Peace until its move to its present location in Helsinki in 1968. The International Institute for Peace subsequently emerged as a separate Soviet front with strong links to the WPC.

In recent years, the WPC has expanded its activities while trying to broaden its appeal and sound less like a cold war propaganda vehicle. It has sought support in the Third World by posing as an independent body identifying with such causes as opposition to U.S. "aggression" in Vietnam, anticolonialism, and assistance to "liberation movements." In NATO countries, it has exploited fears of nuclear war by stimulating and/or sponsoring antinuclear rallies and advocating Soviet-supported disarmament policies.

The WPC and similar fronts periodically have faced internal problems because their

Soviet affiliation cannot always be reconciled with the desired image of independence and nonalignment. In 1949, following the expulsion of Yugoslavia from the Cominform, the WPC expelled its Yugoslav representatives. Similarly, the Sino-Soviet dispute led to the WPC's ostracism of China, which later became a major critic of all Soviet fronts. Nikita Khrushchev's revelations of Stalinist excesses at the 20th Soviet Communist Party Congress in February 1956 and the suppression of the Hungarian uprising by Soviet troops the following November cost the fronts considerable popular support. After the Soviet-led invasion of Czechoslovakia in August 1968, Moscow, in order to restore discipline, replaced nearly all major Communist-front officials. Although opposition to Soviet control occasionally occurs within the WPC, the leaders are usually able to confine dissent to private meetings of commissions or subcommissions. Dissenting views seldom find their way into the large-scale WPC-sponsored public gatherings. When, for example, Soviet human rights activist Andre Sakharov sent a message in 1976 to a WPC-sponsored forum on disarmament in York, Great Britain, it was not read to delegates as Sakharov had requested. At meetings in 1977, non-Communist participants embarrassed WPC leaders by asking questions about human rights violations in the U.S.S.R., but none of this found its way into the official reports. More recently, the December 1979 Soviet invasion of Afghanistan apparently once again generated dissension within the WPC. Two months elapsed before the WPC issued a statement endorsing the Afghan invasion.

MEMBERSHIP AND ORGANIZATION

The WPC has attracted the support of some prestigious non-Communist figures—literary, humanitarian, scientific, religious, and others—who are motivated by a genuine concern for peace and not dissuaded by the preponderance of Soviet and pro-Soviet personnel in key WPC leadership and decision-making positions. Total membership information has never been made public. Most of the members, moreover, do not belong to the WPC itself, but to affiliates at the national level. The WPC claims that 135 national "peace committees"—e.g., the U.S. Peace Committee, the Soviet Peace Committee, the Syrian Peace Committee—make up its network of local chapters.

Historically, it has been the function of the fronts to mobilize those elements of society not normally reached by local, Moscow-linked Communist parties—for example, sympathizers not wishing to commit themselves entirely to party discipline and those interested only in particular issues or moved by certian emotional appeals. Lenin saw the potential of international mass organizations as a means to marshal public support for party directives. In the 1930s during the "popular front" period, Willi Munzenberg, a veteran Communist organizer working for the Comintern, spoke cynically of international front organizations as "innocents' clubs."

The WPC is organized into four principal bodies.

The Council, which meets every 3 years, is the organization's highest authority comprising representatives of cooperating international organizations and national peace committees.

The Presidential Committee, elected by the Council, is nominally responsible for running the WPC between Council sessions. The Presidential Committee has 26 vice presidents (of which 11 are known to be members of pro-Soviet Communist parties) and 146 members. It holds regular annual and occasional emergency meetings. WPC President Romesh Chandra, a member of the Politburo of India's Moscow-line Communist party, chairs the Committee.

A Bureau of the Presidential Committee, consisting of the WPC president, vice presidents, and representatives of selected national peace committees, implements decisions and plans future activities and "programs of action." It meets three to four times a year.

The Secretariat, a full-time executive staff appointed by the Presidential Committee, is responsible for proposing new activities and for implementing Council, Presidential Committee, and Bureau decisions.

FUNDING

The WPC claims to be funded by contributions from national peace committees, donations to its World Peace Fund, and special collections. The evidence, however, strongly suggests that the bulk of its expenses are met by the Soviet Union. In addition, East Germany, Czechoslovakia, Bulgaria, Hungary, Poland, and Cuba provide material and financial support to the WPC, usually in the form of airline service and hotel expenses.[1]

According to the Soviet English-language weekly Moscow News (No. 19, 1981), the Soviet Peace Fund helps to finance "some" of the WPC's "large public initiatives."[2] Writing in 20th Century and Peace (April 1980), Soviet Peace Fund Chairman Boris Polevoi asserted that his clients include "the leaders of the international democratic organizations working for peace: The Fund regularly gives them assistance in organizing their undertakings." Polevoi also revealed that the Fund works closely with the Soviet Peace Committee, which aims "to render financial aid to the organizations, movements and personalities fighting for stronger peace, national independence and freedom." Referring to the October 1973 World Congress of Peace Forces in Moscow, an event organized jointly by the WPC and the Soviet Peace Committee, the November 1973 issue of the WPC's Peace Courier reported that "Soviet public organizations . . . covered all the delegates' maintenance expenses in Moscow. Soviet citizens donated to the Soviet Peace Fund—which covered the delegates' maintenance expenses—about $200,000. Moscow's Patriarchate also donated 3 million rubles."

At a February 9-19, 1981, session of the U.N. Committee of Non-Governmental Organizations, the WPC was forced to withdraw its application for upgrading its consultative status with the U.N. Economic and Social Council (ECOSOC) in the face of adverse criticism from ECOSOC members. WPC President Chandra said in response to questioning that the WPC's accounts were not independently audited but rather were reviewed by the WPC itself. In addition, he reported that the financial statements submitted to ECOSOC represented only a fraction of his organization's actual income and expenditure. Chandra made these statements while avoiding committee questions regarding the source of WPC financial contributions. According to the ECOSOC Report (March 16, 1981), ECOSOC members concluded that the WPC "had received large-scale financial support from government sources, and had gone to great lengths to conceal that fact from the committee."

EXTENT OF SOVIET CONTROL

In June 1981, at a Kremlin ceremony, Soviet President Leonid Brezhnev presented Chandra, WPC president since 1977, with the Order of Lenin. Citing Chandra's service to the "ideals of peace, his selflessness in the bitter struggle against the forces of militarism and aggression," Brezhnev expressed gratification that the Soviet "peace program" for the 1980s met with "full understanding" from such an "authoritative movement as the movement of peace champions" (20th Century and Peace, August 1981). This act symbolizes the importance the Soviets attach to the WPC: The Order of Lenin is one of the most prestigious Soviet awards and is presented personally by Brezhnev only on rare occasions.

Control is exercised over the WPC by the Communist Party of the Soviet Union's (CPSU) Central Committee through its International Department (ID), which is headed by Central Committee Secretary and Politburo candidate member Boris Ponomarev. The ID maintains a special branch, known as the International Social Organizations Sector, which is responsible exclusively for front organizations. The special branch falls under the general responsibility of Vitaliy Shaposhnikov, a deputy ID chief who is at the same time a member of the WPC's Presidential Committee. Georgiy Zhukov, also a member of the WPC's Presidential Committee, is a candidate member of the CPSU Central Committee, a member of the U.S.S.R. Parliamentary Group, a deputy-chairman of the U.S.S.R.-U.S.A. Society, and the chairman of the Soviet Peace Committee—the U.S.S.R.'s national affiliate of the WPC. Through such direct lines to key WPC officials, the CPSU can often control decisions on WPC projects and activities as well as the content of statements, communiques, and resolutions stemming from WPC events.

Since its original "Stockholm Appeal" for "banning the bomb" in 1950, the WPC has consistently advanced Soviet positions on controversial international issues.

For example, in conjunction with other front organizations, it established the "Stockholm Conference on Vietnam," active from 1967-68 until the withdrawal of U.S. troops from Indochina in 1973. It supported the "International Commission of Inquiry into U.S. War Crimes in Vietnam," created in 1970 as a subsidiary of the Stockholm Conference. Throughout the Vietnam war, the WPC sent many "peace" delegations to North Vietnam and regularly issued statements supporting Soviet policy on the war. More recently, in March 1979, the WPC staged an "International Conference on Vietnam" to condemn the Chinese, and in May 1980 it organized a "special conference" in Hanoi to mark the 90th anniversary of the birth of Ho Chi Minh.

[1] In a letter published in the New Statesman (October 17, 1980), a correspondent identified as Ruth Tosek, a "former senior interpreter for several of the Moscow-controlled organizations," stated that "all funds of these organizations, in local and in hard currency, are provided above all by the Soviet Union, but also by other East European satellite countries on the basis of set contribution rates, paid by the governments of these countries through various channels."

[2] The Soviet Peace Fund is a nationwide organization with the representatives scattered throughout most of the U.S.S.R.'s cities, towns, and villages. A common method by which money is collected for the Soviet Peace Fund is for individual factories, plants, and collective farms to hold a 1-day "work shift for peace." According to the Soviet publication 20th Century and Peace (December 1981), the Krasnoyarsk Peace Committee received 2 million rubles in donations for the Soviet Peace Fund in 1981.

The anti-"neutron bomb" campaign initiated by the Soviets in mid-1977 provided the WPC and affiliated fronts with an opportunity to revive ban-the-bomb agitation and to claim that the United States was pursuing military policies which disregarded the interests of its European allies. The WPC proclaimed August 6-13, 1977, a Week of Action against the bomb and organized and helped orchestrate several peace and anti-bomb demonstrations in Europe, Africa, Latin America, and the Near East. President Carter's decision to postpone development of the neutron warhead was then touted as a victory for world "peace forces."

The December 1979 NATO decision to modernize its intermediate-range nuclear forces (INF) in response to the deployment of Soviet SS-20 missiles targeted on Europe now serves the WPC as the focus of a vigorously conducted campaign for "peace, disarmament and detente" designed to influence European public opinion against NATO's plans. At the same time, the WPC avoids criticizing or even discussing Soviet and Warsaw Pact military deployments. Instead, during the past year, it has promoted Brezhnev's proposals for negotiations, organized "peace" rallies, and issued formal condemnations of NATO defense policies.

Some 200 representatives of 85 organizations from 30 European countries, the United States, and Canada, as well as from 13 international organizations, attended a WPC-organized "International Conference Against the Arms Race" in Stockholm, June 6-8, 1981. Discussions focused on the modernization of medium-range U.S. missiles in Europe, the "neutron bomb," and the consequences of nuclear war; Soviet SS-20 missiles were not mentioned. The conferees proposed sending a delegation to the United States to "report the mood of European public opinion" regarding U.S. nuclear policies; a conference communique also condemned NATO's INF plans.

WPC's Chandra and representatives of a number of other Soviet-controlled international fronts staged a September 12-13, 1981, "International Organizations Meeting" in Prague on "ways of averting nuclear war."

Some 60 participants, representing peace committees from 21 European countries, attended an October 2-4, 1981, "European Peace Committees Meeting" in Kosice, Czechoslovakia. Held under the slogan "For a Europe of Peace and Without Nuclear Arms," the meeting was organized by a WPC affiliate, the Czechoslovak Peace Committee, as a continuation of the June 1981 Stockholm Conference on Disarmament and Military Detente in Europe.

Chandra told a press conference in New Delhi on November 30, 1981, that the WPC was seeking a "winter offensive" in support of the "mass movement for disarmament" in Europe.

The current priority of Soviet diplomacy is to prevent INF modernization in Western Europe, and the WPC is expected to concentrate its efforts on this issue. Nevertheless, in line with its past record, the WPC will seek to operate however Soviet foreign policy interests dictate. As Romesh Chandra put it when speaking in Moscow in 1975: "The Soviet Union invariably supports the peace movement. The World Peace Council in its turn positively reacts to all Soviet initiatives in international affairs." [3]●

HOUSE SHOULD ACT ON SOCIAL SECURITY DISABILITY LEGISLATION—H.R. 7093

● Mr. SASSER. Mr. President, I rise today to commend the recent passsage of the Cohen-Levin social security disability legislation, H.R. 7093. This legislation will help to alleviate the needless pain and suffering experienced by a large number of our Nation's disabled due to faults in the disability determination system.

The social security disability determination system is itself severely disabled and in need of major repair. Deficiencies in the process are widespread and affect disabled beneficiaries in every State in the Union. In my own State of Tennessee it has been estimated that as many as 2,500 disability recipients have been erroneously terminated from the disability rolls. Disabled persons are being indiscriminately terminated in many cases without so much as the benefit of a medical examination.

Indeed, it was reported in the October 30, 1982, issue of the Nashville Banner that the administrator of the Tennessee disability determination section indicated that "there is an element of truth" in assertions that State officials disregard pain and do not consider multiple, nonsevere impairments as total disability. It must also be remembered that disabled individuals, once terminated, lose what is often their only source of income, even if they appeal the initial decision.

For a number of those who do appeal the decision to terminate their benefits, the traumatic impact coupled with anxiety, fear, and the loss of income has resulted in heart attacks and even death. A class-action suit recently filed in Memphis alleges that the Social Security Administration and the State agency have established illegal, restrictive standards of eligibility for determination of disability benefits. There are currently numerous lawsuits pending in various States which cite the current disability system in violation of the Social Security Act, Federal regulations, Federal case law, and the 5th and 14th amendments' due process clauses. Clearly the need for major revision of the system is warranted. H.R. 7093 goes a long way in answering this need.

Some may argue that this legislation will substantially alter the disability system by undercutting the original intention of the 1956 disability amendments. This is not so. The intention of this legislation is merely to reaffirm the Congress commitment to protection of the disabled.

Some may argue that H.R. 7093 will signal a retreat from the changes effected by the 1980 disability amendments. This is not so. This legislation merely strengthens the resolve of those amendments, which I wholeheartedly supported.

The 1980 amendments were adopted largely in response to the dramatic growth of the disability program in the decade of the 1970's. Although the exact reasons for this growth were never empirically documented, there was widespread consensus that there were many individuals on the disability rolls who were no longer eligible. Thus, the disability amendments required the Social Security Administration, beginning in January 1982, to review the cases of disabled workers on the disability rolls at least once every 3 years. These so-called continuing disability investigations were logical and made good sense. The provision, however, was never intended to be used as justification for the wholesale and wanton elimination of disability beneficiaries. But this is exactly what has happened.

In March of last year, the Reagan administration decided to accelerate these continuing disability investigations some 9 months ahead of the January 1982 implementation date. This was done despite the lack of appropriate resources with which to handle the large increases in State agency caseloads. To a great extent this has contributed to the inequitable treatment and erroneous treatment of a substantial percentage of the disabled population.

H.R. 7093 attempts to remedy some of the gross inequities which are currently plaguing the social security disability review process. While this bill is not intended as a comprehensive remedy to these problems, and while such comprehensive remedy will be required, the bill does provide for much-needed relief to those who are being adversely affected by an unacceptable number of erroneous terminations which are occurring daily.

In many cases there may be sufficient justification for removing individuals from the disability rolls. If they do not belong on the rolls, then they should be removed. However, it is apparent that the rights of disability beneficiaries are being callously disregarded and abused through the hasty and inefficient administration of unfair and unjust policies. The Reagan administration has just recently reacted to this problem and has made modest attempts to modify the initial phase of the review process by allowing for a face-to-face interview beginning October 1 of this year. This interview, however, will mainly serve an informational function. While this is certainly a move in the right direction, we need to take more positive and concrete action to remedy the injustices in the current administration of the system. H.R. 7093 will do just that.

H.R. 7093 will allow for the continuation of benefits through the administrative law judge level of appeal and

will effectively slow down the number of cases to be reviewed by the State agencies. It also includes a provision requiring the Secretary of the Department of Health and Human Services to report to Congress every 6 months facts and figures as they relate to the disability review process. This provision was included in the social security disability bill I introduced last June.

Currently, it is extremely difficult to determine the scope and depth of the inequities which exist in the disability review process. No one individual or agency is at present charged with the responsibility for collecting and assimilating data on the number of terminations as they occur through the appeals process.

The purpose of H.R. 7093 is to make this data readily available to both Congress and the Secretary of Health and Human Services so that each has the ability to properly judge the performance of the disability review system. It will also make it much easier to identify existing and potential bottlenecks and inequities in the review process. These reports will enable both the Secretary and Congress to assess needed changes in the system as they become necessary.

Mr. President, it is my hope that the House of Representatives will take quick action in passing H.R. 7093 and send it on to the President for his signature.●

A CONNECTICUT COMMUNITY PROGRAM FOR MENTALLY RETARDED ADULTS

● Mr. WEICKER. Mr. President, I want to call my colleagues attention to an outstanding community program for mentally retarded adults in the State of Connecticut that exemplifies what can be achieved when the private sector in conjunction with local and State government coordinate efforts in the development of community living alternatives. On January 1, 1983, a community group home sponsored by Funding Alternatives for Tomorrow will become a reality for six mentally retarded adults in Hamden, Conn. This home began with contributions of seven parents of retarded citizens who strongly believed that these adults should be allowed the opportunity of living and working in a community setting. What is even more important is that the opening of this group home is only the beginning. There are plans to open up to eight additional group homes that will serve a wide range of persons with disabilities.

I commend the people of Funding Alternatives for Tomorrow for their efforts on behalf of the disabled citizens of Connecticut and extend my best wishes for continued success in meeting the needs of the disabled.●

STOPGAP RELIEF FROM NATURAL GAS PRICE INCREASES

● Mr. EAGLETON. Mr. President, before this lameduck session is over, Senator DANFORTH and myself, together with other cosponsors will seek a vote on legislation to provide stopgap relief from natural gas price increases which are crushing millions of family budgets around the country.

I know first hand about the problem in Missouri where increases this winter range from 25 percent in the St. Louis area to 37 percent in the Kansas City area. But, it is a national problem affecting virtually every State in the Union. According to a Department of Commerce report which I will have printed in the RECORD at the end of my remarks, 53 percent of the housing units of this country—some 42 million households—are heated by gas as are millions of commercial establishments. The average price increase between October 1981 and October 1982 for all cities is 20.4 percent. The highest regional increases have not even been in my part of the country, but in the South which has experienced a 27.5-percent increase over the past year. That compares with the 20.3-percent increase in the North Central region of which Missouri is part.

Some cities are worse off than others this winter but no part of the country has been spared a rapid runup of gas prices since passage of the Natural Gas Act in 1978. According to the Congressional Research Service (CRS) the city of Cleveland, Ohio, has had a 28.6-percent increase in the past year alone and a 105.2-percent increase since November 1978. Denver-Boulder, Colo., has seen prices go up 60 percent this year and 146 percent since 1978. Kansas City has experienced a 42-percent increase in the past year and 135 percent since 1978.

Mr. President, these are typical examples. We face a national crisis and I am determined that Congress will face up to the issue before it goes home for the holidays. I hope every Member of this body will read these tables and understand the misery that lies behind them for their constituents and will support a freeze on further increases until Congress can act more substantively on the problem.

Mr. President, I ask that two reports, one based on Commerce Department data concerning gas-heated housing units, and the other, a CRS survey of average gas prices in selected cities and regions, be printed at this point in my remarks.

The reports are as follows:

CONGRESSIONAL RESEARCH SERVICE,
Washington, D.C., December 1, 1982.

To: Hon. Thomas Eagleton. Attention: Kirk Robertson.

From: David J. Cantor, specialist in industry economics, Economics Division.

Subject: Change in average residential price of natural gas in selected urban areas and regions, November 1978–October 1982.

This memorandum responds to your request for data on average residential prices of natural gas and their percentage changes from 1978 to the present. The information requested is in the attached table.

The data cover the period from November 1978 through October 1982. The price data have been compiled by the Bureau of Labor Statisitcs (BLS) for selected urban areas. CRS calculated the percentage changes for two periods: November 1978 to October 1982, and October 1981 to October 1982. We enclose the BLS definitions of the regions and cities in which their surveys were conducted.

We trust this information is responsive to your request. If you have further questions, please call us at 287-7740.

AVERAGE RESIDENTIAL PRICE OF NATURAL GAS IN SELECTED URBAN AREAS AND REGIONS: NOVEMBER 1978–OCTOBER 1982 [1]

Area and region	Average price (cents per therm) [2]		Percentage change	
	November 1978	October 1982	November 1978 to October 1982	October 1981 to October 1982
U.S. city average [3]	30.4	60.2	98.0	20.4
Anchorage, Alaska	16.7	18.0	7.8	−5.8
Atlanta, Ga	34.9	60.2	72.5	6.7
Baltimore, Md	39.7	70.6	77.8	18.7
Boston, Mass	45.0	85.1	89.1	9.7
Buffalo, N.Y	30.4	66.1	117.4	39.5
Chicago, Ill.-northwestern Indiana	27.9	46.0	64.9	8.5
Cincinnati, Ohio, Kentucky, Indiana	28.8	61.2	112.5	33.9

FAULTY IMMIGRATION LAW REFORM

● Mr. HAYAKAWA. Mr. President, the Senate made a terrible mistake last August when we passed the Immigration Reform and Control Act of 1982. Indeed, we need to reform our immigration policies, but our best efforts this year produced a crude, discriminatory law which is punitive and very unrealistic.

The Congress must look beyond the simple rhetoric which exclaims we must get control of our borders. While I agree that something must be done, I cannot sit by and watch us stumble into the creation of a police state for the enforcement of our immigration laws. The failings of the bill which we passed far outweigh the rhetoric which propelled the measure through our Chamber.

The Mexican American community remains opposed to the bill because of its discriminatory employer sanctions. The agricultural community is opposed because it fails to deal realistically with their legitimate reliance on temporary alien workers. And nations all around the globe are looking on in disbelief as we close the door to those who wish to emigrate to this great land of the free. I am ashamed of what we are becoming.

What concerns me most is that if the bill is passed and signed into law, it will not work. The employer sanctions will be circumvented, the identification system will fail, and the immigrants will become the target of vicious racism as America vents her collective frustration over unacceptable unemployment levels.

We need to begin now to organize ourselves for another attempt at reform. Let us learn from our mistakes this year and start over. Next time though, let us take a different approach. We must deal incrementally with the problem and address the separate and independent questions in isolation. It is too simplistic to think that we can lump all of the matters into a single package and do them justice.

I am bitterly disappointed, Mr. President, in the mean approach this body chose to take in the reform of our immigration laws. The House of Representatives must not follow our lead.

I ask unanimous consent that several articles on this subject be printed in the RECORD as I believe they are insightful and interesting.

The articles follow:

[From USA Today, Sept. 29, 1982]

(By Antonia Hernandez)

THIS BILL WON'T HALT IMMIGRATION FLOW

WASHINGTON.—When Hispanic leaders are asked to describe the House version of the new immigration bill, three words come to mind: Contradictory, ineffective and anti-Hispanic.

This bill is very contradictory. Congress says it wants to stop massive illegal immigration and free jobs that aliens take from citizens. Yet legislators say the bill could let 175,000 to 1 million foreign workers into the country.

Like the Mexican workers in the bracero program that began in the 1940s, these laborers have a few legal protections. The braceros lived in unsanitary hovels, worked for low pay and faced numerous abuses in the workplace.

Opening the gates to a new tide of temporary workers will bring on similar abuses. Congress apparently feels the nation needs immigrant workers, but simply doesn't want to treat them like human beings.

The current program known as H-2 allows growers to bring small numbers of temporary workers into the country to gather crops. Employers must go through a long and complex process to apply.

But this legislation simplifies that process and gives employers wide access to temporary workers. Research shows that once temporary workers are let into a country, they are very likely to stay—even without the proper documents.

There are also some glaring civil rights problems:

Restrictions on amnesty. Workers here since 1977 could be permanent legal residents, but would be ineligible for public aid, like food stamps, for three years. Those here since 1980 could be temporary legal residents, but would be denied public benefits for six years. Many undocumented workers won't come forward, and the 1980 cutoff date will leave much of the undocumented population without access to citizenship.

Employer sanctions. The penalties to keep employers from hiring aliens will increase discrimination against Hispanics. Hispanic citizens who don't have the right documents may be denied jobs by employers who claim they thought they were aliens.

Worker ID cards. The bill requires creation of a worker ID system in three years. That poses a great risk of invasion of privacy to all citizens.

Immigration reform is long overdue. The Simpson-Mazzoli bill, however, will create enormous problems for employers, for Hispanic citizens and legal aliens, and for the general public. And it will fail at what it was created to accomplish: curbing the immigration flow.

[From the New York Times, Sept. 30, 1982]

STUDY SEES FLAWS IN LAWS ON ALIENS—20-NATION SURVEY FINDS CURBS ON HIRING ILLEGAL FOREIGNERS HAVEN'T BEEN EFFECTIVE

(By Robert Pear)

WASHINGTON, September 29.—Laws establishing penalties for employers of illegal aliens have generally not been effective in foreign countries, according to a study issued today by the General Accounting Office, an investigative arm of Congress.

The study was requested by Senator Alan K. Simpson, Republican of Wyoming, to give guidance to Congress as it considers enacting such a law for the United States.

The study was based on questionnaires answered by officials of 20 countries, follow-up visits to Canada, France, Switzerland and West Germany, and data provided by United States embassies.

"Although each country had laws penalizing employers of illegal aliens, such laws were not an effective deterrent" to the hiring of illegal workers for two main reasons, the report said.

REASONS FOR PROBLEMS

"First, employers either were able to evade responsibility for illegal employment or once apprehended, were penalized too little to deter such acts," it said. "Second, the laws generally were not being effectively enforced because of strict legal constraints on investigations, noncommunication between government agencies, lack of enforcement resolve and lack of personnel."

The immigration authorities in the United States have said that they faced similar problems, including legal constraints and limits on personnel.

Many countries in the study issue official identification documents to citizens or alien workers or both. In most of the countries, employers hiring illegal aliens are subject to fines or prison terms. Canada, West Germany, France, Switzerland, Greece, Hong Kong and Sweden all reported that they had laws authorizing prison sentences. But the report said it was extremely rare for employers of illegal aliens to be sent to prison in their country.

Richard W. Day, chief counsel of the Senate Judiciary Subcommittee on Immigration, said that neither he nor Senator Simpson, the chairman of the subcommittee, had read the report, which arrived too late to affect the comprehensive immigration bill passed by the Senate last month.

U.S. JOBS ATTRACT ALIENS

The bill would establish fines and prison terms for employers who hire illegal aliens.

Mr. Simpson and many other experts on the subject say that employment is a "magnet" drawing aliens to this country. The bill would also offer an amnesty to several million illegal aliens who entered the United States before Jan. 1, 1980.

Representative Romano L. Mazzoli, Democrat of Kentucky, the sponsor of a similar bill approved by the House Judiciary Committee, said in an interview today that he had not read the Congressional agency's report. "The implementation of any program is always going to be less good than the program designers had intended," he said. But he said that if the bill became law he would do his best to insure that it was enforced "enthusiastically"

Representative Peter W. Rodino Jr., Democratic of New Jersey, the chiarman of the Judiciary Committee, has a "strong desire" to see the immigration bill considered by the full House, according to a spokesman. The spokesman, John M. Russonello, said that the Speaker of the House, Thomas P. O'Neill Jr., in a conversation with Mr. Rodino, had "indicated a willingness to take the bill up in the lame-duck session."

Mr. O'Neill, a Massachusetts Democrat, referred the bill today to four other House committees, with instructions to complete work on it by Nov. 30, the day after Congress is scheduled to reconvene after recessing for the Congressional elections.

In Canada, law enforcement officials told the Congressional agency that laws penalizing employers of illegal aliens had not reduced the size of the illegal worker problem. Only one out of four companies found to be employing illegal workers has been prosecuted, the study said.

West Germany recently doubled the maximum fine for employment of illegal aliens, to about $40,000 for a serious violation. But employers, on appeal, usually obtain a substantial reduction of fines because "judges have not considered the hiring of illegal aliens a serious violation" and so the fines have "little deterrent effect," the study said.

In France, immigration officials said that their agency imposed fines on almost all employers found to have hired illegal aliens. In addition, the Ministry of Justice reportedly prosecutes 85 percent of all employers caught violating the law. However, the study said, judges tend to impose light penalties that are "no deterrent to employers"

[From the Washington Post, Sept. 10, 1982]

THIS BILL WILL CAUSE BIAS AGAINST HISPANICS

(By Joaquin Avila)

The Simpson-Mazzoli immigration bill was rammed through the Senate last month and is now nearing a vote in the House. As the Senate was preparing to act, the Mexican American Legal Defense and Educational Fund, joined by other civil rights groups and lawyers, filed a lawsuit in San Francisco that clearly shows why this bill should not be passed. The bill will encourage discrimination against minorities, chiefly Hispanics.

MALDEF's San Francisco suit, *International Molders* v. *Nelson*, was brought on behalf of factory workers and employers against the Immigration and Naturalization service for violation of rights during "Project Jobs" last April. The suit charges that raiding INS officers violated the Fourth, Fifth and Sixth amendments to the Constitution. Officers entered work places without warrants or consent, and detained workers without probable cause simply because they looked Hispanic. They either failed to advise these detainees of their rights to counsel and to remain silent or forced them, some with threats of physical harm, to give up their rights. The four employers who are plaintiffs in the suit charge that the raids substantially interfered with business operations and resulted in damage to their premises.

By INS's own admission, Project Jobs was very carefully planned, orchestrated and publicized in advance. Yet the actual raids were carried out in a manner that ran roughshod over the rights of Hispanic citizens, aliens and their employers, abuses that are a shockingly common part of INS work place sweeps.

Employers and Hispanics have many things to fear from immigration raids in the work place. Unfortunately, we can expect such raids to continue and even increase if the Simpson-Mazzoli bill is enacted, for several reasons.

The bill calls for sanctions against employers who knowingly hire undocumented aliens, and requires that employers verify the legal status, of their employees. This provision dramatically shifts the burden of enforcement from the INS to the employer, making the employer a "surrogate" INS officer, and making the work place an INS clearance station.

The new immigration law would be enforced, as the current one is, by the INS. The INS has received much blame for the failure of the current law, and will be under great pressure to make a new one work. Therefore, we can expect intensified enforcement activities, including work place raids.

The abuses engendered by work place raids have persisted despite lawsuits and prohibitions imposed by federal courts. It is unlikely that these raids will be reduced under a new law that emphasizes work place enforcement.

Beyond the disruption and lowered productivity associated with work place raids, employers and Hispanics have something else to fear from employer sanctions. As even the most honest taxpayer fears an IRS audit, so an employer is sure to dread a compliance check by the INS. No one willingly chooses to be on the hot seat of governmental inspection. One way to avoid inviting both inspections and raids is not to employ too many Hispanics. Contrary to claims made by the bill's supporters, employer sanctions would be burdensome indeed. Their weight would fall most heavily upon employers and upon Hispanics who already bear an unfair share of this country's 9.8 percent unemployment rate.

In passing the Simpson-Mazzoli bill, the Senate has missed an important opportunity to bring about real, positive immigration reform that addresses the causes of migrant flow rather than just effects and political expediency. Even employer sanctions, even high unemployment here, even the worst that the INS can offer will not deter people who are forced to leave behind their homes and families because they have no option.

Our country's so-called immigration problem is economic at base. Simpson-Mazzoli will fail because it does not address the need for economic development assistance for Mexico and other of our neighbors in this hemisphere. The House still has the opportunity to move responsibly to remedy the glaring faults in the bill now before it. It should do so.

[From the Wall Street Journal, Oct 9, 1982]

EMPLOYER SANCTIONS DON'T WORK

The fundamental premise of the Simpson Mazzoli immigration bill, passed by the Senate, has been shattered. Proponents of the bill argue that the most effective way to clamp down on illegal immigrants is to penalize businesses that hire them. Opponents such as the U.S. Chamber of Commerce and Mexican-American groups, say employer sanctions will only impose an additional regulatory burden on businesses, particularly small businesses, without solving the problem. The skeptics now have backing in a report from the General Accounting Office on the experience of employer sanctions in other countries.

Canadian employers, according to the GAO, are subject to fines of $4,000 and/or two years' imprisonment if they are convicted of "knowingly" employing an illegal alien. And yet officials of the Royal Canadian Mounted Police estimate that between 500,000 and one million aliens are in Canada illegally and that most of them work.

France has an estimated 150,000 to 350,000 illegal alien workers, despite employer sanctions. In West Germany, according to unofficial estimates, between 200,000 and 500,000 illegal aliens work. Even in Switzerland, with perhaps the stiffest immigrantion laws in Europe, officials concede that there are tens of thousands of illegal aliens in a country with less than one twentieth the population of the U.S.

Conversely, Japan has no employer sanctions, and it seems to be the one major industrial country without much illegal immigration—estimates there run from 50,000 to 60,000, with a heavy emphasis on bar hostesses and nightclub dancers, Japan, of course, is surrounded by water, making it harder to sneak into. But one might speculate that the Japanese have been more successful in controlling illegal immigration largely because of their insular traditions.

The reasons given in the GAO report to explain why sanctions haven't worked in Canada are illuminating. In some cases, according to Canadian officials, illegal workers are employed by relatives. Court backlogs and legal delays have forced officials to limit prosecutions. The legal requirement that, to be convicted, an employer must "knowingly" engage an illegal worker, makes enforcement more complicated. Policing aliens in the workplace has not been a high priority among law enforcement agencies. And judges' sentences of convicted employers have been lenient.

All of these factors are likely to work even more strongly in the U.S. where attitudes toward illegal aliens are especially ambivalent. On the one hand, there is a widespread belief that something must be done to curb illegal immigration in general. On the other hand, there is widespread sympathy for individual illegals, and a legal system that offers considerable opportunity to play on those sympathies. In addition, our law enforcement agencies have much more serious problems to worry about employers whose only crime is to hire someone who wants to work. And the large base of immigrants already legally here means that there will be strong community support for relatives and friends who come here illegally.

Employer sanctions, in short, are even less likely to be effective in the U.S. than in Canada, France and Germany. Opponents of the Simpson-Mazzoli bill are right to complain that it will add new costs to busi-

ness without achieving what it is intended to achieve.

AND THEN WE'LL ALL FEEL ALIEN

(By William Safire)

In a well-meaning effort to curb the employment of illegal aliens, and with the hearty good wishes of editorialists who ordinarily pride themselves on guarding against the intrusion of government into private lives. Congress is about to take this generation's longest step toward totalitarianism.

"There is no 'slippery slope' toward loss of liberties," insists Sen. Alan Simpson of Wyoming, author of the latest immigration bill, "only a long staircase where each step downward must be first tolerated by the American people and their leaders."

The first step downward on the Simpson staircase to Big-Brotherdom is the requirement that within three years the federal government come up with a "secure system to determine employment eligibility in the United States."

Despite denials, that means a national identity card. Nobody who is pushing this bill admits that—on the contrary, all sorts of "safeguards" and rhetorical warnings about not having to carry an identity card on one's person at all times are festooned on the bill. Much is made of the use of passports, Social Security cards and driver's licenses as "preferred" forms of identification, but anyone who takes the trouble to read this legislation can see that the disclaimers are intended to help the medicine go down.

Most American citizens are being led to believe that only aliens will be required to show papers. But how can a prospective employer tell who is an alien? If the applicant could say, "I'm an American, I don't have any card," the new control system would immediately break down. The very basis of the proposed law is the notion that individuals must carry verifiable papers—more likely, a card keyed to a new government data bank—to prove eligibility for work.

No big deal, say those who consider illegal immigration more fearsome than the coming of an internal passport, if you're legitimate, you shouldn't object. And shucks, law-enforcement officials won't use it for anything else, nosirree—at least not until the nation is ready for another legislated step down the staircase.

Most Americans see no danger at all in a national identity card. Most people even, like the idea of a piece of plastic that tells the world, and themselves, who they are.

"I'm me," says the little card. "I'm entitled to all the benefits that go with being provably and demonstrably me." Good citizens—the ones who vote regularly, and who don't get into auto accidents—might get a gold card.

Once the down staircase is set in place, the temptation to take each next step will be irresistible. Certainly every business would want to ask customers to insert their identity cards into the whizbang credit checker. Banks, phone companies, schools, hotels would all take advantage of the obvious utility of the document that could not be counterfeited. Law enforcement and tax collection would surely be easier, because the federal government would know at all times exactly where everybody was and what they were spending.

And then you might as well live in the Soviet Union. One of the great differences between free and enslaved societies is the right of the individual to live and work without the government knowing his every move. There can sometimes be privacy without freedom, as those in solitary confinement know, but there can be no freedom without privacy.

When Patty Hearst managed to remain a fugitive for 591 days, that did not mean the FBI was bad at catching fugitives; it meant that America was a free society. In China or the Soviet Union she would have been captured in days, because it is impossible for ordinary citizens to move about without permission. If our values mean anything at all, they mean that it is better to tolerate the illegal movement of aliens and even criminals than to tolerate the constant surveillance of the free.

We are entering the computer age. Combined with a national identity card—an abuse of power that Peter Rodino professes to oppose in the House, as he makes it inevitable—government computers and data banks pose a threat to personal liberty. Though aimed against undocumented workers, the computer tattoo will be pressed on you and me.

[From the Los Angeles Times, Aug. 29, 1982]

RESTRICTIONISTS WIN A BORDER BATTLE, BUT THE WAR IS FAR FROM ENDED

(By Frank Del Olmo)

When the U.S. Senate voted this month to approve the most sweeping revision of this country's immigration laws in the last 30 years, the news was played on the front pages of most newspapers—a reflection of how immigration, especially illegal immigration, has imprinted itself on the public mind in the last few years as a major social problem.

Ironically, on the same day most of those newspapers also carried front-page articles on the current economic crisis in Mexico, where runaway inflation and jolting peso devaluations have exacerbated an already severe unemployment problem. Most of the people who enter this country illegally come from Mexico, and the crisis in that country is expected to stimulate even more illegal entries across our southern border.

Those two stories belonged together. For the Senate's action—which must still be ratified by the House and signed into law by President Reagan—could become an exercise in futility if the worst possibilities of the Mexican crisis come to pass.

The bill (S 2222) approved by the Senate was an amalgam of several proposals that have been suggested in the last 10 years as ways of limiting immigration, both legal and illegal. The Immigration Reform and Control Act of 1982 is also commonly referred to as the Simpson-Mazzoli bill, after its co-authors, Sen. Alan K. Simpson (R-Wyo.) and Rep. Romano L. Mazzoli (D. Ky.), the chairman of the immigration subcommittees in the Senate and House.

The key provision is a law that would prohibit employers from hiring illegal immigrants, laying out a graduated series of civil and criminal penalties for violators. It is generally assumed that jobs are what lure immigrants to this country, and that employer sanctions would end that attraction.

To help employers distinguish between illegal aliens and persons eligible to work, the bill requires that the President set up within three years a secure, nationwide worker-identity system. It appropriates $10 million to study possible systems, which some critics have estimated could cost as much as $1.5 billion.

Although the Reagan Administration supports the idea of employer sanctions, it has opposed the national identity system as too costly. Atty. Gen. William French Smith has said the Justice Department would allow employers to determine employee eligibility on the basis of documents like drivers' licenses, Social Security cards and birth certificates. The bill would permit the use of such commonplace documents only until the new worker-identity system is in place.

The legislation also includes a complex legalization procedure for those illegal immigrants who have been in the United States at least since Jan. 1, 1980, and who are willing to turn themselves in to federal immigration officials. No one is sure how many people this so-called amnesty provision would effect. Estimates of the number of illegal immigrants in this country range from 3.5 million to 6 million. Immigrants who arrived before Jan. 1, 1977, would become permanent resident aliens, eligible to become U.S. citizens after five years. Immigrants who arrived between 1977 and 1980 would be given temporary resident status; they could work but would be ineligible for most forms of public assistance, such as welfare and food stamps. They would become eligible for permanent resident status after three years.

The bill also limits legal immigration to the United States, changing the categories of persons allowed to enter this country and setting a ceiling of 425,000 immigrants per year, excluding refugees. These same provisions set an annual quota of 20,000 immigrants from any one country, with the exception of Mexico and Canada, which share a quota of 80,000 immigrants per year.

Although the Senate approved the wide-ranging bill 81 to 18, the vote was not an accurate reflection of the controversy generated by the debate over immigration. The final vote was preceded by 22 attempts to amend the bill, some of which were only narrowly defeated.

Those wanting to restrict immigration, including organized labor, environmental and population-control groups, tried to have the bill made even more restrictive, arguing for numerical limits on refugees and a 1973 amnesty date. Despite their setbacks, however, spokesmen for groups like the Federation for American Immigration Reform (FAIR), said they were "quite pleased" with the Senate bill.

Opponents tried to water it down. The U.S. Chamber of Commerce objected to employer sanctions as yet another government intrusion on business operations. Latino groups charged that the sanctions could lead employers to discriminate against Latinos and others who might appear to be foreigners. The American Civil Liberties Union warned that a worker identification system could evolve into a national identity card.

Farm groups suffered a setback when an amendment by Sen. John Tower (Tex.) to create a guest-worker program for agriculture was defeated. The final bill does include provisions to streamline the current H-2 visa program under which farmers can import foreign workers for short periods of time.

Proponents and opponents of the bill are now marshaling their forces for another round in the House after the Labor Day recess. Mazzoli will carry his version of the bill before the House Judiciary Committee on Sept. 14.

The chairman of the committee, Rep. Peter W. Rodino Jr. (N.J.), favors employer sanctions, and introduced similar bills in previous sessions of Congress. Although he

is troubled by provisions of the Senate bill that limit the right of legal immigrants to petition for the immigration of family members, Rodino has said he will not block Mazzoli's bill.

It is unclear, however, whether Rodino and other Democratic leaders in the House have any real enthusiasm for the Simpson-Mazzoli bill, according to Capitol Hill observers on both sides of the immigration issue.

That could prove important, because Congress will have only 21 working days to conduct its business before adjourning for good in October. So even assuming that Rodino's committee approves the Simpson-Mazzoli bill, there is no guarantee that he and House Speaker Thomas P. (Tip) O'Neill Jr. will push it rapidly to the House floor for a vote. Congressional leaders may be in no mood for a bitter debate over an emotional issue with the November election so near.

One factor that may work in favor of the Simpson-Mazzoli bill is the fact it appropriates virtually no money for the broad reforms it lays out, other than the $10 million to study worker-identification systems. There is, for example, no additional money for the already overworked U.S. Immigration and Naturalization Service that would have to administer the amnesty program.

Another factor in favor of the bill, in the view of both opponents and proponents, is its momentum. Latino groups in particular, are concerned that there is a restrictionist mood in the country these days, fed by discontent over high U.S. unemployment and the recession. They argue that immigrants have been similarly scapegoated before in U.S. history, usually in times of economic trouble.

As proofs of this restrictionist mood, one top lobbyist for the Mexican-American Legal Defense and Education Fund (MALDEF) cited the 78-to-21 Senate vote in favor of a non-binding amendment to the Simpson-Mazzoli bill introduced by Sen. S. I. Hayakawa (Calif.). The Hayakawa amendment was a resolution expressing the Senate's support for the designation of English as the official language of the United States. Although the resolution had no impact on the bill itself, it was perceived as a gratuitous slap at immigrants and the foreign languages they speak.

"That represents the mood the Senate was in," the MALDEF lobbyist said. "The underlying tone of the debate was anti-immigrant. Keep the Mexicans and their language out. Protect the country from the alien invasion."

But a leading lobbyist in favor of the bill saw the heavy vote in its favor as a sign that a "national consensus" has been reached on the immigration issue.

Both views are correct. A national consenus on immigration reform has indeed evolved during the last few years. And it is a consensus in favor of restrictions.

That consensus is reflected not only in the Senate vote, but in public-opinion polls indicating that the majority of U.S. citizens believe immigration to this country is out of control, and must be severely limited if not totally stopped.

This attitude is not surprising, given the tendency of people in this country to think of immigration, particularly illegal immigration, as a "problem." The reality is much more complicated than that. Immigration is better understood if it is seen as a historic phenomenon, with both attendant problems (the exploitation of illegal alien workers, for example), and attendant benefits (the reduction of political tension in Mexico, cheaper goods and services in the United States).

This phenomenon is the product of economic and even cultural forces that are largely beyond the ability of governments to control. That is why Congress' effort to legalate against illegal immigration may come to naught. The pressures that cause people to migrate from places of economic scarcity like Mexico to places of economic prosperity, like the United States are simply too strong to be legislated away.

And that is why it is especially ironic for Congress to be acting so assertively to stem illegal immigration just as Mexico slips into its most serious economic crisis in 50 years.

One can argue over who is to blame for the current crisis in Mexico—Whether it is Mexican politicians who were selfish, corrupt or shortsighted (choose one or any combination), or the international bankers who lent so much, so willingly, to those politicians and Mexican businessmen. But there is no arguing about the impact when the prices of staple food items like tortillas, beans and milk rise rapidly in a country that already has massive unemployment.

When that happens, ambitious Mexicans will look where they always have for opportunity when their own country does not offer it—*el norte*. And short of a 2,000-mile-long, fortified wall, nothing can completely stop them.

This is not to say that the Simpson-Mazzoli legislation will have no effect at all. It will cause some disruption in this traditional migratory pattern. But it will not stop it, any more than the Volstead Act got people to stop drinking alcoholic beverages in the 1920s and 1930s. The most significant effect of this country's ill-fated experiment with Prohibition was to force a legitimate economic demand underground: providing profitable opportunities for the dishonest entrepreneurs who manufactured and sold bootleg liquor.

In the same way, the most immediate effect of the Simpson-Mazzoli bill, presuming it is enacted into law, will be to provide even more opportunities for the smugglers and other criminals who help people enter the United States by stealth from abroad.

Those who question this pessimistic assessment might consider the experience California had in 1971 with an employer-sanctions law similar to the Simpson-Mazzoli bill.

The Dixon Arnett Act, named after the Republican assemblyman who sponsored it, also prohibited the knowing employment of illegal aliens. It never had a substantial impact in California, and the reasons why are still in dispute.

Proponents claim it was never actively enforced because of various legal challenges and because of Latino pressure on the administration of Gov. Edmund G. Brown Jr. The U.S.-Mexican Studies Center at UC San Diego has recently published an intriguing study by Prof. Kitty Calavita of Vermont's Middlebury College, in which she suggests the Arnett Act was never intended to work—it was a "symbolic law," full of loopholes and with no funding for its implementation.

Whatever the reasons, one definite effect the law had was to prompt smugglers of people—*coyotes* in the Spanish slang of the borderlands—to begin counterfeiting phony immigration documents that illegal entrants could use as proof of legal residency when applying for jobs. Ten years ago I reported that trend for The Times, and even went into Tijuana to purchase a fake resident-alien card. It took me, an inexperienced young Mexican-American, less than two days to find a counterfeiter. The cost was $200.

A similar card would cost a lot more today. But it probably won't be any harder for would-be immigrants to find counterfeiters willing to produce them. They must be smacking their lips in anticipation of the profits they will soon be making, thanks to the well-meaning efforts of the U.S. Congress.

[From the Washington Post, July 18, 1982]

MANY TEXAS EMPLOYERS RAIDED BY INS—REPORT U.S. WORKERS ARE HARD TO FIND

(By Dan Balz)

AUSTIN, TEX., July 17.—Many of the Texas companies raided by the Immigration and Naturalization Service during a massive national roundup of illegal aliens last April called Project Jobs report they have had trouble finding U.S. citizens to fill the positions.

Representatives of these companies say that American citizens appear unwilling to work at these jobs, despite government claims to the contrary at the time of the raids.

According to an internal INS survey, many of these companies reported to INS in mid-May that they were experiencing considerable turnover among new workers hired to fill vacancies created by the raids. Others refused to tell INS whether they had replaced the apprehended workers with citizens or legal immigrants.

INS billed Project Jobs as an operation designed to remove illegal aliens from high paying jobs that would be "attractive to unemployed workers" and reported during the raids that thousands of citizens had showed up to fill them.

But many of those applicants have since decided they did not like the jobs, some of which paid $3.50 to $4.50 an hour, and have quit.

Not all companies raided have had difficulty filling the vacancies, however. Such problems occur most often in Houston and Dallas-Fort Worth, according to the INS memo. Officials of companies in Los Angeles and Chicago reported to INS in May that they had successfully filled the openings with legal immigrants or U.S. citizens, and said this week their turnover rates were no greater than normal.

In addition, the raids have prompted some companies to alter their hiring practices to guard against giving jobs to undocumented workers.

INS officials defended Project Jobs as successful and said they were not surprised that some firms had complained about the difficulty of finding American citizens to fill the vacancies.

"Many of the Companies [in Houston and Dallas] were targets of earlier INS raids," said Richard Norton, national coordinator of Project Jobs. "They would be the ones most likely to point out that it was an ineffective program."

Norton said the apprehensions had opened up many jobs for U.S. citizens. "We were encouraged that these companies went out and hired a large number of lawful citizens," he said.

The 9th U.S. Circuit Court of Appeals ruled Thursday that INS raids on businesses and factories violated the constitutional rights of workers. The INS announced Friday it would suspend such raids in four

states—California, Arizona, Nevada and Hawaii—while it studies the opinion.

The particular case before the 9th Circuit grew out of raids conducted by INS in 1977 in Los Angeles, but it could have a widespread effect on INS operations, because such raids are common throughout the country. Project Jobs differed from normal operations in part because INS referred job openings created by the raids to state employment commissions.

The Project Jobs raids, carried out April 26-30 with great publicity at 560 jobs sites in New York, Newark, Chicago, Detroit, Denver, Los Angeles, Dallas-Fort Worth and Houston, were extremely controversial, especially among Mexican Americans, who criticized INS for attempting to make undocumented workers scapegoats for the high level of unemployment in the country.

INS estimates that 87 percent of the 5,540 persons apprehended during the five days of raids were from Mexico. Within a week after the raids, 4,071 had been returned to their home countries.

On May 14, INS employes surveyed at random some of the firms in Chicago, Los Angeles, Houston and Dallas-Fort Worth—the cities that produced the largest number of undocumented workers—to find out how many of the vacancies had been filled.

A copy of the survey's results was made available to The Washington Post, and many of those firms were contacted independently this week.

Norton said INS does not have updated statistics on what has happened to the workers it apprehended in April or on how the companies that were raided have chosen to fill the vacancies.

But officials of some of the affected firms scoffed this week at the INS raids, calling them a political and publicity stunt that had disrupted their operations. They said the only way to stop many companies from hiring undocumented workers was through employer sanctions, such as fines.

"I would prefer to hire American citizens," said Paul Boyd, president of East-West Pipe Co. in Houston. "I'm a good American, I served in the Army. But for them to think they accomplished anything [in Project Jobs] is naive . . . . I know my competitors did not say, "Gee, we'd better not hire illegal aliens.' "

Boyd said he hired a forge crew of 11 U.S. citizens to replace some of the undocumented workers apprehended. "It's real hot and cruddy work. They lasted one day."

Robin Denke, personnel manager at Trinity Steel in Fort Worth, said the company has hired about 60 new people to fill the vacancies created by the raids, "but only 15 to 20 have stayed, at most."

"We've tried to find people, but when we check references they've got poor attendance records or bad attitudes," she said.

Another Trinity Steel employee said the company was behind in its work because of the problem of finding new workers. "There are a lot of people who don't want to do the work," he said. "It's hot, dirty work. They show up and work for half a day and then quit."

INS records show that 114 illegal aliens were apprehended at Trees Inc., in Houston during Project Jobs. "We hired 200 people after the raids," said Rudy Reyes, vice president of Trees. "Only about seven stayed on the job."

One of the biggest raids took place at Melody Homes in Fort Worth, where, according to INS, about 170 undocumented workers were captured. "Initially, we had a very large turnover rate," said Gordon Trantham. "It was difficult to find people willing to do the work." He said turnover had slowed in recent weeks.

One Houston firm hired 92 people to fill 55 vacancies created by the raids, and 68 had quit by the time INS did a followup survey in May. "They didn't like the pay and they didn't like the work," said Christian Goddard of Krest Mark Inc., a window-assembly company.

Asked if that kind of turnover was normal, Goddard said, "It's not normal when we had the illegals. They're pretty steady."

Several companies reported they had deliberately replaced only a fraction of the number of undocumented workers apprehended because of the recession.

Other firms, however, said the recession had made it easier to find new employees. The personnel mamager of a Los Angeles furniture manufacturing plant said he quickly replaced 120 undocumented workers captured at his plant and said turnover was no higher than normal.

Ralph Bennett, vice president of Marilyn Belts and Bags in Dallas, said his company is just beginning to replace the 81 illegal aliens apprehended during Project Jobs and predicted that rising unemployment in Texas would make it easy to fill the vacancies.

"In normal times, we cannot get people to take a lot of these jobs," Bennett said. "It's hard to find people to work five days a week. The Latin Americans will work five days; the others might not."

Bennett was asked if the raids had made him less likely to hire undocumented workers. "No," replied. "We don't ask anybody what nationality they are. When we need people, we need people, and we hire whoever comes through the door."

Some firms, however, report that Project Jobs had forced them to alter hiring practices.

"We changed our policy," said Bill Ellis of A. Brandt Mfg., in Fort Worth, "After the raid, we met with INS people and told them we would not hire any more undocumented workers." ●

SOCIAL SECURITY TITLE II DISABILITY PROGRAM

● Mr. LEVIN. Mr. President, on Friday, December 3, the Senate passed and sent to the House H.R. 7093, a bill which contains important provisions regarding the social security title II disability program. That bill is urgently needed. Severely disabled persons are being terminated unjustly and at great personal cost from the disability program.

I ask that a letter and the accompanying enclosures I received from Attorney Elena Ackel of Los Angeles, Calif., be included in the RECORD immediately following my remarks. The letter describes two very unfortunate results of the disability review process.

The material follows:

LEGAL AID FOUNDATION
OF LOS ANGELES,
Los Angeles, Calif., November 30, 1982.

Re social security tragedies.

Senator CARL LEVIN,
Washington, D.C.

DEAR SENATOR LEVIN: As you indicated that you are interested in social security cut off examples other than deaths, I am forwarding the following examples and will send more later. The first attachment regards the case of Kimberly Bailey SSN 444-46-5275 who is mentally without any evidence on June 1, 1981. Her disability benefits stopped as of that time. She requested and was denied on reconsideration. Shortly thereafter Ms. Bailey attempted to commit suicide by jumping off a cliff and falling 200 feet. She sustained numerous injuries. A hearing was not held in her case until June 1982. A favorable decision was received on July 13, 1982. Yet despite the favorable decision, Ms. Bailey still has not had her benefits reinstated. She has gone over 18 months without disability benefits and is currently living in a shed in the hills above Santa Barbara in Central California. She doesn't have enough money to complete the shed and has been drenched several times when it has rained. A xerox of the photo of the shed is attached.

The next attachment concerns the ultimate snafu on the part of Social Security. This man was terminated from disability on the basis of someone else's medical records. The injuries that the claimant was alleged to have recovered were ones he never had. Further the disabilities he did have including mental retardation had not changed.

I will send more information about additional information I received about two Fresno, California social security disability cases tomorrow.

Land & Liberty, Jobs & Justice,

ELENA H. ACKEL,
Senior Attorney.

FRANKEL & FINKELBERG,
Los Angeles, Calif., November 19, 1982.

EILEEN SWEENEY,
National Senior Citizen Law Center,
Washington, D.C.

DEAR MS. SWEENEY: Elena Ackel has asked me to write you concerning the following information:

CASE OF KIMERLY BAILEY, SSN 444-46-5275

Kimberly Bailey was awarded Disability Insurance Benefits pursuant to notice of hearing decision dated 10/12/78. This decision was based on well documented medical data confirming severe mental disorder—schizophrenia, paranoia, severe depression, with onset data determined to be 5/15/74.

On 6/1/81, without any medical evidence, the Administration terminated Ms. Bailey's benefits. Ms. Bailey filed a request for Reconsideration on 6/11/81 and subsequent request for hearing on 10/28/81.

Every effort possible was made to obtain a prompt hearing for Ms. Bailey.

While awaiting a hearing, Ms. Bailey was forced to go on General Relief. In addition to having a severe mental impairment, Ms. Bailey suffers from a severe disorder of the immune system which causes her to react adversely to a great many foods and environmental substances. Her reactions are severe and involve extreme weakness, nausea, confusion, stupor, narcolepsy, difficulty breathing, abnormal drooling, difficulty concentrating, migraine headaches, chills, sweats, diarrhea, and painful throat. It was impossible for her on her General Relief income to follow the special diet she required.

In October, 1981, acting on impulse, Ms. Bailey attempted to commit suicide by jumping off a cliff and falling 200 feet. Now, in addition to her other documented illnesses, she suffers painful residuals of bilateral fracture of the mandible, loss of teeth, broken teeth and knee injuries.

Ms. Bailey was finally allowed to have her hearing on June 23, 1982. Pursuant to his decision of July 13, 1982, the administrative law judge found that Ms. Bailey continues to remain disabled since May 15, 1974.

Now, 18 months since Kim Bailey has not received any money from her Disability Insurance Benefits, she continues to wait for reinstatement of her benefits which were wrongfully terminated.

The County where she lives, Santa Barbara County, has threatened to terminate her General Relief. Medi-Cal benefits, especially for psychiatric treatment, have been reduced.

Ms. Bailey is currently living in an unfinished shed in the hills above Santa Barbara. Enclosed is a photocopy of the shed where she lives. She does not have enough money to complete the shed, and she has been drenched several times in the rain.

Although we have made numerous contacts with the Social Security Administration, we are still uninformed as to when Ms. Bailey's benefits will be reinstated. I hope she will start receiving her benefits again, along with her Medi-Care, before it is too late.

Thank you for your attention to this matter.

Sincerely,

ELLEN S. FINKELBERG.

LEGAL AID SOCIETY OF
SANTA CRUZ COUNTY, INC.,
Watsonville, Calif., November 23, 1982.

Re disability cut tragedies.

Attorney ELENA ACKEL,
Legal Aid Foundation of Los Angeles,
Los Angeles, Calif.

DEAR ELENA: Attached is a Notice of Cessation my client, a 32 yr. old retarded man who has been on SSI and ATD since 1972, received. This notice informs my client that he is recovering well from an accident which seems to have injured his left arm and right wrist. My client is retarded, has asthma and allergies, hearing loss and emotional problems, and has never injured his left arm, right wrist, or sustained lacerations and fractures. Clearly, Social Security took my client off benefits by looking at someone else's medical records.

JULIE SILLIMAN,
Paralegal.

SANTA CRUZ, CALIF.,
September 30, 1981.

SUPPLEMENTAL SECURITY INCOME NOTICE OF PLANNED ACTION—MEDICAL

To: Andrew C for Michael C.

From: Department of Health, Education, and Welfare, Social Security Administration.

Your payments (or those of the individual named above) will be changed as follows: Based on the evidence in your case, including review by a physician of an agency of your state, it has been found that your medical condition was not disabling effective with August, 1981. If you meet all other requirements of the law, you can receive Supplemental Security Income payments based on disability for a two month period after disability ends. Therefore October, 1981 is the last month you could be eligible for payments.

Medical evidence reveals that you have regained the functional capacity to perform light work. The lacerations and fractures that you sustained have completely healed and no longer present a severe impairment. Although you do have some residual restrictions of the left arm and right wrist, they are not as severe as to prevent you from engaging in work activity. Your neurological problems have improved significantly since your injury, and although you do have some mild speech difficulty, you are readily understandable and can communicate your thoughts. A recent psychiatric evaluation revealed that you were not severely impaired mentally. You retain the capacity to understand simple direction, follow simple direction, and retain the capacity to relate to others. Disability is therefore being ceased as of August, 1981, the month of medical recovery sufficient enough to permit substantial gainful work activity.

This decision refers only to your claim for Supplemental Security Income payments. Any decision about your benefits under the Social Security Disability Insurance program will be sent to you in a separate notice.

For information about any change in your Medicaid eligibility caused by this action, you should get in touch with your County Welfare Department.

To get Supplemental Security Income payments, you must be found disabled under Federal rules or the rules of your State. We have found that you are not disabled under either the Federal or State rules.●

TRIBUTE TO ROSS DAVIDSON

● Mr. HAYAKAWA. Mr. President, I would like to commend Mr. Ross Davidson of Carmichael, Calif. for his many personal achievements and contributions to his community, State, and Nation. Throughout his life, Mr. Davidson has been a leader and patriot.

Now a retired air force colonel, Mr. Davidson served as a combat pilot in both WW II and Vietnam. He flew a total of 87 combat missions, during which his aircraft was hit by enemy fire on 30 occasions and was six times forced to crash land. In addition, he was an experimental test pilot having flown and tested over 50 different types of aircraft ranging from helicopters to gliders.

Mr. Davidson gained national recognition after successful establishment of a $1 billion early warning radar system stretching 3,000 miles from Alaska to Greenland. In recognition of the 6 years of Arctic exploration it required, Mr. Davidson was made a member of the famed Explorers Club which includes other notables such as Admiral Byrd and Admiral Peary. In 1970, Mr. Davidson retired after having earned 49 United States and foreign awards and decorations including the Legion of Merit and two Presidential Citations.

Even after retirement, Mr. Davidson has continued to serve on governmental and civic boards at the city, county, and State levels. He has been president of two State advisory boards and the Carmichael Chamber of Commerce. He holds many honorary titles including: Mayor emeritus in perpetuity of Carmichael, district Governor of Carmichael, and judge of the California State Court of Appeals. Mr. Davidson is truly a fine American and an asset to both the State of California and our Nation. I encourage my colleages to join me in commending Mr. Davidson for his outstanding accomplishments.

Mr. President, I ask that an article which appeared in the Sacremento Bee on March 18, 1982 by Kathryn Eaker be printed in the RECORD.

The article follows:

[From the Sacramento Bee, Mar. 18, 1982]

DAVIDSON'S LIFE AN ADVENTURE

(By Kathryn Eaker)

When Ross Davidson stepped down as honorary mayor of Carmichael last month, he polished off one more facet of a brilliant life that has propelled him around the world and soon into "Who's Who in America."

For an ol' boy from Springville, Ala., Davidson has done all right.

This internationally recognized arctic explorer, World War II hero, preeminent civic leader, accomplished musician, scholar and successful business man has an itch he can't scratch.

"I get bored easily, have a short attention span, that's why I've led such a varied life," he said, continuing without a trace of false modesty to chronicle the events of his 61 years.

Davidson was attending the University of Alabama on a music scholarship when the United States entered World War II. For him, the war couldn't have come at a better time. He was restless. Dreams of a musical career had paled.

While on tour with several big bands, this promising trombonist sickened of one-night stands in obscure towns.

"The alternative was teaching music and I couldn't see myself as the bandmaster in a small southern town, saying, 'That's nice Orville; that's nice,' " he drawled with pseudo-boredom.

Along came a U.S. Army Air Corp recruiter. "You, too, can wear silver wings and fly bombers," he promised the "immature, naive, innocent" 21-year-old Davidson.

Within months, he was a second lieutenant flying bombers over Germany from a base in England.

"On our first mission, three planes returned out of 18. I sat down and thought, 'A guy could get killed this way. There must be a better way to make a living.' "

Thirty-four missions later—after being blasted out of the sky twice and sustaining direct hits on four other missions—he returned home with a chestful of medals and an attitude that has underpinned his life.

"As I walked out of the hospital (he was wounded in the leg on his second-to-last mission), I thought, 'I'm home alive, with both arms and legs!' I was so happy, I started grinning and haven't stopped since."

Typically, Davidson approached his Air Corps career with a hunger for variety.

He flew and tested every type of aircraft from gliders to jets; served in every major career field in every theater of operation in the world—including Vietnam—and at every level of command from squadron commander to the Pentagon.

But his most significant experience occurred in the early 1950s when he was assigned to establish the Dewline—an early warning radar system that stretched from Alaska to Greenland.

For six years, often flying alone, he explored and surveyed remote portions of the North Polar basin searching for radar sites and checking ice conditions, landing on glaciers and mountain peaks in a plane on skis.

"Looking back it scares me to death," he said. "No navigational aids, no radio and no one knew where I was. And I was might dependent on a little single engine that if it hadn't started, I'd be there yet."

Recalling the emotional impact, Davidson observed, "If you ever want to feel small and insignificant, go some place where no one has ever stood and where there is no human being for 500 miles in any direction."

Subsequently, Davidson was invited to join the exclusive, international Explorers Club, an honor shared by such notables as Sir William Edward Parry, Adm. Richard Byrd, Lowell Thomas, Thor Hyerdahl and Sir Edmond Hillary.

"I don't mean to boast," said Davidson, with a rare straight face, "but when Adm. Byrd and all those ol' boys died, I became recognized as the leading arctic explorer."

Consequently, Davidson's name will be listed in the next editions of "Who's Who in America," and "Who's Who in the West," he noted.

Life is tame today by comparison. Since retiring in 1970, Davidson has immersed himself in civic organizations and real estate ventures. He and his wife, Mickey, travel extensively and spend weekends with friends at a second home near Georgetown.

Recently, in recognition of Davidson's service to the Carmichael Chamber of Commerce and on a plethora of state, county and local commissions, boards and committees, the Sacramento Board of Supervisors granted him the honorary titles of mayor of Carmichael emeritus and governor of the District of Carmichael.

TAXES ON TRUCKS

● Mr. EAST. Mr. President, in the last several days, I have been hearing the views of my constituents about provisions within the "job-creating highway, bridge and mass transit improvements" bill. For the most part, these comments have been in opposition to this bill.

As Congress scurries to forward legislation that would shift $5.5 billion from the private sector to a public sector construction program, I ask my fellow colleagues to share a letter I recently received from Mr. John Fraley, chief executive officer of Carolina Freight Carriers Corp. I ask that Mr. Fraley's letter be placed in the RECORD.

The letter follows:

CAROLINA FREIGHT CARRIERS CORP.,
Cherryville, N.C., December 3, 1982.

Hon. JOHN P. EAST,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR JOHN: We urge that you oppose the shocking, absurd bill approved by the House Ways and Means Committee yesterday to increase unbelievably the taxes on trucks and the people who own and operate trucks!

This bill would increase our Federal truck and fuel taxes by an astounding 143 percent. Our Federal truck and fuel taxes would increase by $3,485,000 per year to $5,929,000 compared with $2,444,000 in 1982. These taxes of course, are in addition to all of the state fuel and truck taxes that we pay for the use of highways.

As a thinking, highly capable Senator, John, you probably only need to look at the 143 percent increase to realize the ridiculousness of this bill! We are not opposed to reasonable tax increases coupled with more realistic truck size and weight limits. The latter will improve transportation productivity and give a boost to our nation's economy.

The timing of this truck and fuel tax bill could not be worse. We are a general commodities motor carrier. Sixteen of the twenty-five largest motor carriers of general commodities lost money in the first half of this year. This bill would put many truckers—ranging from large carriers to individual owner-operators—out of business. It would cause the elimination of many jobs at a crucial time when this is certainly not in our nation's best interests. At the same time, it will push up inflation since transportation is a substantial portion of the costs of goods at a time when we certainly do not need higher inflation rates.

A number of prominent economists have stated that the lost jobs will exceed the new highway construction jobs if this bill passes. It is our sincere hope that our lawmakers are listening to these learned gentlemen.

For the sake of fair play for all segments of the economy and for the best interests of our nation, we strongly request your opposition to this bill.

Sincerely yours,
JOHN L. FRALEY,
Vice Chairman and Chief Executive Officer.
K. G. YOUNGER,
President and Chief Operating Officer.●

INDIANA HIGH SCHOOL BASKETBALL

● Mr. LUGAR. Mr. President, I do not need to tell the Senate that Indiana is famous for basketball. The number of great Indiana athletes in this sport at both the college and high school levels is almost endless. Basketball in Indiana has contributed to the building of many fine young men and women leaders in our State and Nation, and to the enjoyment and community spirit of many Hoosier cities and towns.

One man who knew more about Indiana basketball, and the sport in general, than most others is Bob Williams of the Indianapolis Star. I am proud that the Honorable William Hudnut, the major of Indianapolis, recently made November 22 "Bob Williams Day" in honor of Bob's long service and the publication of his book "Hoosier Hysteria! Indiana High School Basketball."

I know that my colleagues in the Senate will join with me in honoring Bob Williams for his great achievements.●

POLISH SOLIDARITY DAY

● Mr. HAYAKAWA. Mr. President, I am very pleased and proud to have cosponsored Senate Resolution 501 reaffirming our commitment to the people of Poland and designating December 12, the eve of the first anniversary of the imposition of martial law, as a day of solidarity with our friends in Poland. We abhor and condemn the actions of the Polish military and government authorities to repress the dignity, freedom, and basic human rights of the Polish people and, in particular, their attempts to silence the voice of the Solidarity trade union and its leader, Lech Walesa.

While Americans should welcome the recent release from jail of Mr. Walesa, we must continue to strongly express our hopes for the release of all Polish citizens who have been detained and incarcerated for the crime of self-expression. Despite the apparent easing of certain civil restrictions, the Government of Poland must, once again, be made aware of our expectations both for the full restoration of human rights and civil liberties to the people of Poland and for the resumption of discussions with the church and the Solidarity trade union.

Mr. President, the resolution is a reaffirmation of that American commitment to the future of Poland and her people.●

UNFAIR AGRICULTURAL TRADE PRACTICES OF THE EEC

● Mr. EAST. Mr. President, an article pointing out some of the unfair agricultural trade practices of the European Economic Community and recommending steps to challenge these practices appeared in the December 5, 1982, issue of the New York Times. This article was written by Senator JESSE HELMS, who was a recent participant at the Conference of the General Agreement on Tariffs and Trade. I ask that his article be printed in the RECORD.

The article follows:

[From the New York Times, Dec. 5, 1982]

THE EEC CAN'T PLOW US UNDER

(By Jesse Helms)

WASHINGTON.—If the United States achieved anything substantial at the conference of the General Agreement on Tariffs and Trade in Geneva, it probably falls under the category of reminding the European Economic Community that its "right" to swing its agricultural-subsidy fist ends at Uncle Sam's nose.

Nobody in Congress more strongly rejects protectionism than I do. Open and fair trade is essential. But the key word is "fair."

The European Economic Community might as well understand, now, that Congress won't stand idly by in the face of predatory trade practices by the E.E.C.—or anybody else—that undermine the American farmer.

Let's be frank: The situation is intolerable. As a Congressional spokesman on agricultural matters at the GATT conference, I made it clear that Congress is willing to do whatever is necessary to change things.

For a great while, America complained to the European Economic Community about its agricultural-trade practices, but we tolerated the situation because our agriculture was not highly dependent on foreign mar-

kets, and the Community was not a major competitor.

But by the mid-70's, the situation had changed, and today our farmers, now highly dependent on foreign customers, are suffering through their third year of severely depressed commodity prices. America possesses enormous stocks of surplus farm commodities. Yet our farm exports are declining for the second straight year. And, through the use of predatory export subsidies, the E.E.C. has gone from being a net importer to a net exporter of grains, beef, poultry, sugar and other commodities.

America would have no legitimate complaint if the Community had gained these markets fairly. It has not. American farmers are the most productive and most efficient producers of most commodities. They hold a natural comparative advantage on the world market. The Community can export its farm products only with the use of large-scale subsidies that undercut the prices of all competitive countries.

The Congressional delegation's message in Geneva was that these predatory subsidies are unacceptable. We asked for establishment of a panel to undertake a work program aimed at reducing them.

But the European Economic Community's own delegation stubbornly refused even to discuss the question of subsidies or to agree to later discussions aimed at their elimination. GATT's final communique committed the signers only to "resist" application of new protectionist measures. And the Community's delegation annnounced later that the Community would not be bound even by that watered-down statement.

America's Special Trade Representative, Bill Brock, finds some comfort in the fact that the world trade system is still intact, despite overwhelming economic and political pressures. But in the area of agriculture, the communique fell far short of reflecting the basic agreement necessary to preclude Congressional action.

Sadly, the prospect of reaching a fair, rational agreement has gone by the board. Thus, Congress must take decisive steps to counter subsidies and give our farmers a fair shake. We must not, of course, engage in the kind of protectionism that constitutes restraint of trade. But GATT teaches us that action is warranted.

First, the Reagan Administration should fully use the remaining $90 million earmarked to enhance agricultural exports in fiscal 1983 and made available by an amendment to the 1982 budget reconciliation act. The money can provide direct and credit subsidies to offset predatory practices.

Second, Congress should encourage Secretary of Agriculture John Block to consider releasing surplus dairy products into international markets. This would clearly signal our resolve—and also relieve the taxpayer of the cost of carrying these stocks. This should be done, to the greatest extent possible, in a way that protects countries that have supported and encouraged free, fair trade.

Third, Congress should mandate that the proceeds from the sale of these dairy products be used for additional measures to export farm products.

Fourth, it is time to re-evaluate the criteria for dispensing United States Treasury benefits overseas. Perhaps their use of export subsidies should make countries ineligible for International Monetary Fund loans. America should even consider whether to deprive countries engaging in predatory practices of most-favored-nation status.

There are countless other possibilities. Every Senator and many Representatives have agricultural constituencies. Accepting the status quo would signal that America is willing to shrink its agricultural base; this, in turn, would encourage predatory practices in other fields of trade.

Congress mood, as I see it, is to draw the line here and now—and, if necessary, fight fire with fire.

I hope it won't be necessary, because there are no winners in a brawl, economic or otherwise.●

GASOLINE TAX INCREASE

● Mr. EAST. Mr. President, much of America's goods move by truck—90 percent of everything we eat, wear, or use travels by the highways. Yet, H.R. 7360, the gasoline tax increase, would impose a crushing burden on our Nation's trucking industry, just getting back on its feet after deregulation.

I received a mailgram from Mr. Mike Parkhurst, president of the Independent Truckers Association, urging greater study of this proposal. I agree that hasty action could cripple a vital segment of our economy—and increase the cost of almost every product the American people buy. I ask that Mr. Parkhurst's mailgram be placed in the RECORD.

The mailgram follows:

[Mailgram, Dec. 7, 1982]

We are looking to Senate wisdom to stop legislation that would force layoff of tens of thousands in already depressed trucking and truck manufacturing industries. H.R. 7360 is tax burden that exceeds total trucking industry profits for past four years combined. Hardest hit, the independent, simply cannot afford to pay $9,600 sales tax based on $80,000 rig, in addition to 900 percent increase in highway use taxes, plus other severe penalties. Suggest your aides immediately research our posture and potential. We look forward to working with the 98th Congress where meaningful legislation may be passed, but legacy of 97th Congress should not be unaffordable taxes.—Mike Parkhurst; Editor-Publisher, Overdrive magazine and President, Independent Truckers Association, Los Angeles, California.●

SENATE AGENDA

Mr. STEVENS. Mr. President, again I remind the Senate that there will be a busy day tomorrow starting at 9:45 a.m.

Are there any special orders entered?

The PRESIDING OFFICER. No special orders have been entered.

Mr. ROBERT C. BYRD. Mr. President, does the distinguished acting majority leader have any idea as to what time the first rollcall will occur on tomorrow?

Mr. STEVENS. I might say to my good friend that that has not been determined. It is my understanding that the distinguished majority leader will attempt to bring before the Senate one of the bills I mentioned, either S. 2411, S. 2000, or H.R. 6211, the Justice Assistance Act, or the Bankruptcy Act, or the highway gas tax bill.

I have also requested that consideration be given to the defense appropriations bill as soon as possible. It will be received by the Senate this evening. The House of Representatives has passed that bill. We are hopeful that we will be able to proceed with one of those bills, and it is my understanding the majority leader may ask to set aside a bill if one is commenced and it runs into an unseeming delay.

So the time for the first time vote I think will be before noon.

We do anticipate some possibility of votes on the highway bill and I would anticipate that if we do call up the defense bill, we will be seeing amendments before the Senate tomorrow.

I do not know whether we will get to the defense bill tomorrow, but we do not have any agreement as to when the first vote will occur.

Mr. President, there is an important message from the House of Representatives.

(The Senate received a message from the House of Representatives on H.R. 7355, an act making appropriations for the Department of Defense for the fiscal year ending September 30, 1983.)

Mr. STEVENS. Mr. President, it is my understanding that since there is a companion bill on the calendar that still will go immediately to the calendar; is that correct ?

The PRESIDING OFFICER. The Senator is correct.

THE POSSIBLE TRAFFIC PROBLEM TOMORROW

Mr. STEVENS. Mr. President, the distinguished Democratic leader has reminded the Senate, reminded me, and I think we should remind the Senate, that there is a pending problem at the Washington Monument and that traffic may be a little difficult in the morning.

We are hopeful that all Members of the Senate are notified that the convening hour is at 9:45 a.m., and there are no special orders tomorrow. So after the time set aside for the two leaders, it is possible that we will proceed to matters, that could be controversial, immediately. I am sure that matter will be taken into account, but I do think that both of the cloakrooms ought to notify Senators on both sides of the aisle of the problem that exists, and we will take into consideration the problem of traffic should that occur.

Is there any further business to come before the Senate? Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. STEVENS). Without objection, it is so ordered.

THE GASOLINE TAX BILL

Mr. ARMSTRONG. Mr. President, I do not know if other Senators are getting the same general sense of the direction of things that I am, but I just want to make an observation upon the progress of the gas tax bill.

When this notion was first suggested, I greeted it with some enthusiasm because I think the need to do something for the roads and bridges of the country is pretty acute, and I am impressed with the general policy of having the people who benefit from and use the roads and highways pay for it.

So when I began to hear talk that we were going to seriously undertake a highway user fee tax bill in the lame-duck session it seemed like a reasonable idea.

But I would just like to say to my colleagues that the general handling of the bill to date, including the notion that we might begin debate on this tomorrow which, frankly, I doubt very seriously we will, despite what has been said by the distinguished assistant Republican leader, is causing my own appreciation for this legislation, my own willingness to support it, my own expectation that we will finally adopt it, to erode very seriously.

It appears to me that what started out as a very simple matter has become very complex indeed, and as more and more extraneous elements are added on to it the likelihood that I am going to support it gets less and less.

My nose is a long ways out of joint by the fact that we are monkeying around with the allocation formula, that an unnecessary controversy regarding truck taxation has been introduced, and by the possibility that the Senate Finance Committee, which has not yet reported the bill—in fact, so far as I know, is still upstairs in the Dirksen Building working on the markup—may try to report a bill and then take it up tomorrow. I think that would be premature. I think it cuts out of the process the opportunity for comment by those who are well informed about the legislation, which I judge that most Senators as a matter of fact are not.

I think it would be well if we did not rush into the passage of this legislation tomorrow but at least allow a day or two for highway commissioners and highway users and local officials to comment on it before it is taken up.

So at least as one Senator I hope we will not rush to judgment on that matter. We can well occupy our time with the defense appropriations bill and other appropriations bills pending.

I thank the Chair, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

RECESS UNTIL 9:45 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate now stand in recess in accordance with the previous order.

There being no objection, the Senate, at 7:24 p.m. recessed until Thursday, December 9, 1982, at 9:45 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 8, 1982:

EXECUTIVE OFFICE OF THE PRESIDENT

Martin S. Feldstein, of Massachusetts, to be a Member of the Council of Economic Advisers.

DEPARTMENT OF AGRICULTURE

Orville G. Bentley, of Illinois, to be an Assistant Secretary of Agriculture.

DEPARTMENT OF ENERGY

Donald P. Hodel, of Oregon, to be Secretary of Energy.

Martha O. Hesse, of Illinois, to be an Assistant Secretary of Energy (Management and Administration).

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

POSTAL RATE COMMISSION

Henry R. Folsom, of Delaware, to be a Commissioner of the Postal Rate Commission for the term expiring October 14, 1988.

WITHDRAWALS

Executive nominations withdrawn from the Senate December 8, 1982:

The following-named persons to be Members of the Board of Directors of the Legal Services Corporation for the terms indicated:

For terms expiring July 13, 1983, to which positions they were appointed during the last adjournment sine die of the Senate, which were sent to the Senate on March 1, 1982:

Harold R. DeMoss, Jr., of Texas, vice Steven L. Engelberg, term expired.

Clarence V. McKee, of the District of Columbia, vice Hillary Diane Rodham, term expired.

For a term expiring July 13, 1983, to which position she was appointed during the last adjournment sine die of the Senate, which was sent to the Senate on April 19, 1982:

Annie Laurie Slaughter, of Missouri, vice Cecilia Denogean Esquer, term expired.

For terms expiring July 13, 1984, to which positions they were appointed during the last adjournment sine die of the Senate, which were sent to the Senate on March 1, 1982:

Howard H. Dana, Jr., of Maine, vice Robert J. Kutak, term expired.

William F. Harvey, of Indiana, vice Howard R. Sacks, term expired.

William J. Olson, of Virginia, vice F. William McCalpin, term expired.

George E. Paras, of California, vice Michael Kantor, term expired.

Robert Sherwood Stubbs II, of Georgia, vice Ramona Toledo Shump, term expired.

For a term expiring July 13, 1984, which was sent to the Senate on March 1, 1982:

William L. Earl, of Florida, vice David E. Satterfield III.

HOUSE OF REPRESENTATIVES—*Wednesday, December 8, 1982*

The House met at 2 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Teach us, O God, that when we relate to others, we do so with a spirit of respect and concern. Help us to try to understand the motivation of others and seek to be sensitive to their needs. Give us strength to speak as we ought to speak, to act as we ought to act, even as we are open to the voices and actions of colleagues and friends. Bless us this day and keep us always in Your grace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 5121. An act to improve the collection of Federal royalties and lease payments derived from certain natural resources under the jurisdiction of the Secretary of the Interior, and for other purposes; and

H.R. 7144. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 7144) entitled "An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. D'AMATO, Mr. SPECTER, Mr. WEICKER, Mr. HATFIELD, Mr. LEAHY, Mr. BUMPERS, and Mr. PROXMIRE to be the conferees on the part of the Senate.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO SIT DURING CONSIDERATION OF H.R. 7355, DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1983

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that during the consideration of H.R. 7355, the Defense Appropriations Bill, the Committee on Interior and Insular Affairs be permitted to sit.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. WHITTAKER. Mr. Speaker, I object.

The SPEAKER. The rule requires 10 objectors; 10 not being present, permission is granted.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 7357, REVISING AND REFORMING IMMIGRATION AND NATIONALITY ACT

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 97-947) on the resolution (H. Res. 623) providing for the consideration of the bill (H.R. 7357) to revise and reform the Immigration and Nationality Act, and for other purposes, which was referred to the House Calendar and ordered to be printed.

GENERAL LEAVE

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill (H.R. 7355) making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

DEPARTMENT OF DEFENSE APPROPRIATION BILL, 1983

Mr. ADDABBO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7355) making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from New York (Mr. ADDABBO).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 7355, with Mr. BAILEY of Pennsylvania (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, December 7, the remainder of title IV, beginning on line 21 on page 18, was considered as having been read and open to amendment at any point.

Are there any further amendments to title IV?

AMENDMENT OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SHIPBUILDING AND CONVERSION, NAVY

(INCLUDING TRANSFER OF FUNDS)

For expenses necessary for the construction, acquisition, or conversion of vessels as authorized by law, including armor and armament thereof, plant equipment, appliances, and machine tools and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; procurement of critical, long leadtime components and designs for vessels to be constructed or converted in the future; and expansion of public and private plants, including land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title as required by section 355, Revised Statutes, as amended, as follows: for the Trident submarine program, $1,509,900,000; for the CVN aircraft carrier program, $6,559,500,000; for the SSN-688 nuclear attack submarine program, $1,420,200,000; for the reactivation of the U.S.S. Iowa, $300,800,000; for the reactivation of the U.S.S. Missouri, $94,000,000; for the aircraft carrier service life extension program, $680,300,000; for the CG-47 AEGIS cruiser program, $2,901,700,000; for the LSD-41 landing ship dock program, $415,600,000; for the FFG guided missile frigate program, $666,400,000, of which not less than $40,000,000 shall be available only for an X-band phased array radar, and in addition, $35,000,000 shall be derived by transfer from the "FFG guided missile frigate program" of "Shipbuilding and Conversion, Navy, 1982/1986"; for the T-AO fleet oiler ship program, $179,600,000; for the T-AKRX fast logistics ship program, $44,000,000; for the T-AHX hospital ship program, $300,000,000, however, none of these funds may be obligated or expended until such time as the Department of the

Navy provides a budget quality cost estimate, based upon a completed contract design which supports the original hospital ship requirements as presented to the Congress; for craft, outfitting, post delivery, cost growth, and escalation on prior year programs, $878,000,000; and reductions in the amounts, as follows: $5,900,000 for personnel security clearances; $21,000,000 for consultant, studies and analyses; and $5,100,000 for industrial plant equipment; in all: $15,918,000,000, and in addition, $35,000,000 to be derived by transfer, to remain available for obligation until September 30, 1987: *Provided*, That none of the funds herein provided for the construction or conversion of any naval vessel to be constructed in shipyards in the United States shall be expended in foreign shipyards for the construction of major components of the hull or superstructure of such vessel: *Provided further*, That none of the funds herein provided shall be used for the constuction of any naval vessel in foreign shipyards.

The Clerk read as follows:

Amendment offered by Mr. ADDABBO: On page 21 of the bill, line 6, strike out "$6,559,500,000" and insert in lieu thereof, "$3,000,000,000".

On page 22 of the bill, line 6, strike out "$15,918,000,000" and insert in lieu thereof, "$12,358,500,000".

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto end at 2:35, the time to be equally divided between myself and the ranking minority member, the gentleman from Alabama (Mr. EDWARDS).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ADDABBO. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, I offer this amendment to delete one of the two aircraft carriers that are in this appropriation bill for several reasons. One is the cost. The Navy has requested a total of $7,270,300,000 to purchase two nuclear aircraft carriers, which equates to over $3.6 billion for a single carrier. This represents an increase of more than 45 percent over the original cost estimate for the aircraft carrier that was funded just 3 years ago.

According to the Navy's own cost estimates, the funds being requested are just a downpayment. The total investment and life cycle costs to operate for 30 years one nuclear carrier, its combat escorts, its air wing and underway replenishment ships and support ships is nearly $42 billion. This is a conservative Navy estimate and it is based on fiscal year 1982 constant dollars, not then-year dollars. So, my colleagues, it will cost the taxpayers a total of $83.8 billion just to save $750 million if we proceed with the funding of two aircraft carriers in the 1983 Defense appropriation bill.

Mr. Chairman, we saw the fate of the large ships in the recent war in the Falklands. Can we visualize the vulnerability of this aircraft carrier about 8 years from now, because that is as long as it will take to build this aircraft carrier and deliver it to the fleet. In 8 years we will have this big floating target as long as three football fields—will be sitting there ready to be destroyed by a relatively inexpensive missile launched by an enemy.

I mentioned $42 billion as the total cost. Most of the escort and support ships and airplanes aboard an aircraft carrier are simply there to protect that aircraft carrier. I believe the dollars for this carrier can be better used not only on other national defense programs, but for other conventional programs.

We have funded in the continuing resolution one aircraft carrier. I believe this second aircraft carrier, if there ever should be one, and I hope that will not happen, should be left to the decision of the next Congress and not be made by this Congress, particularly at a time when we must spend our defense dollars more wisely and when we face such high deficits.

There has been a lot of publicity with respect to the amount of money and the number of jobs that will go to each State if two carriers are funded. Well my friends, the Pentagon has done it again. I was very skeptical when this information crossed my desk, particularly since the Air Force's lobbying efforts on the C-5 program had raised much suspicion. I asked the Appropriations Committee's investigative staff to look into the propaganda that was distributed by the Navy and determine whether the information was accurate.

The investigative staff found that:

The Navy did prepare an analysis based on many assumptions that represented a "gross approximation."

The information you received was in the Navy's own words, a "seat of the pants calculation" and that none of the assumptions used were totally correct.

The Navy's economic impact package contained the potential employment flowdown. The number of jobs cited were computed by assuming that each job equates to a $15,000 wage/salary per year, and the Navy divided that into the total value of the contracts.

My colleagues, the information provided to you on the number of jobs is grossly misleading. The Navy simply divided the $15,000 assumed salary in the total value of the contract without taking out costs for materials, overhead, et cetera.

In essence, the economic impact was a total fabrication and grossly misleading.

I believe that providing such inaccurate information is a disservice to my congressional colleagues.

We presently have 13 deployable carriers and 1 under construction. With this in mind, one question keeps coming up in my mind. Why do we need 15 carrier battle groups? We have 14 carriers, and we are in the process of establishing 4 battleship battle groups. How much is enough?

What we need is more Navy aircraft, missiles, surface ships, and submarines to adequately threaten the Soviet Navy.

Just the other day, ex-Defense Secretary Laird stated that "the Navy is going wild making all these commitments on ships," and he added that the Navy does not need a large Navy and that we just cannot afford it.

It requires about 5,000 men to operate one nuclear carrier, and 7,800 men are needed to operate one carrier battle group.

The Navy has a shortage of 20,000 petty officers. Nuclear specialists are also in short supply.

These two carriers will not be available for at least 7 years. Soviet satellites today have the ability to locate aircraft carriers in the world's oceans. In an age of fast moving technology, the vulnerability of these carriers will increase dramatically in 7 years.

I believe we need to increase our submarine force instead of building large carriers. Submarines are less costly, require less manpower, and are virtually invulnerable.

I would, therefore, ask for support of my amendment.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 10 minutes to the gentleman from Texas (Mr. WILSON) and I presume the gentleman will yield a little time to some other Members.

Mr. WILSON. Mr. Chairman, I really believe that on this issue everybody's mind is made up and that debate is fairly useless, but I do feel a historical necessity to correct my chairman on some of his more apparent misleading statements.

No. 1, the British have done a complete study of their war in the Falklands and they have determined that if they had had a big-deck carrier, they would have suffered no ship losses, no ship losses whatsoever, because the Argentine airplanes would never have gotten to their fleet.

No. 2, there are not enough Exocet missiles in inventory in the world to sink one of these aircraft carriers because of its vast amount of armor and the fact that it has 2,000 separate compartments.

In addition to that, no airplane can get close enough to fire an Exocet missile at one of these carriers because of our ability to completely dominate the battlefield. These carriers give us the ability to push the scrimmage line way out away from our forces, not like the case in the Falklands where the battle was fought over the naval forces of the British.

We have the ability to push the battle out hundreds of miles from the carrier.

We have the F-14, which is in my opinion the world's best fighter plane. It is to be reengined to make it a better fighter plane.

We have the Aegis missile, which has a 100-mile range.

We have the SM-2, which is the mid-range antiaircraft missile.

We have the Sea Sparrow, which is the close-in-range antiaircraft missile, and if by any chance an airplane were to penetrate those defenses, and the chances are absolutely none that they would do that, then we have the Phalanx system, which is, of course, the Gatling gun. This is an extremely defensible weapon.

Second, it is an extremely useful weapon. All of us know the problems that some of our Arab friends have with American protection being too evident. The carrier task force is the only way that we can provide an over-the-horizon force to protect our friends in the Middle East that we must protect.

Also, I would like to remind the Members in the Chamber that we have never had an aircraft carrier captured. We have never put a large investment into an aircraft carrier and then had it used by enemy forces.

I am speaking, of course, of Wheeling Air Force Base, in which we had an enormous investment, that is now being used by the Soviet Union in Libya.

I am speaking of Camrank Bay, in which we had an intense investment, that is now being used by the enemy in Vietnam.

There has never been an aircraft carrier used by the enemy and there never will be.

We need 15 carrier battle groups. There is nobody in the Navy, nobody in the retired Navy, except Admiral LaRoche that I know of that does not believe that we need 15 active carrier battle groups in order to fulfill our treaty obligation, and according to everybody in the Navy which will fulfill our war fighting requirements and the commanders in the field.

I think there is very little more to say on this issue, so I yield to my good friend, the gentleman from Arizona.

Mr. RUDD. Mr. Chairman, I thank the gentleman for yielding.

May I ask just one question?

Mr. WILSON. Yes.

Mr. RUDD. Is there not a savings by building this carrier?

Mr. WILSON. I am glad that my good friend pointed out my carelessness in not mentioning the most important point.

The Navy saves $754 million by building two carriers at once on these two carriers and the Navy saves $150 million on the *Theodore Roosevelt,* which is presently under construction.

Mr. RUDD. Mr. Chairman, I thank the gentleman for yielding.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. WILSON. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, let me commend the gentleman for the statement that he is making and for his opposition to this amendment.

I am beginning to wonder what is happening around this place. Apparently some people think that we can defend ourselves with a slingshot and a rowboat. We cannot do that. We are living in a different age.

I think it is time that we take stock of what we are attempting to do. I commend the gentleman for the statement that he has made, particularly since I want to save a buck and I need not tell the people of this House that I want to do that.

The statement the gentleman just made about saving three-quarters of a billion dollars—three-quarters of a billion dollars by going forward with this project to build two instead of one carrier is absolutely correct.

Now, I do not think we have three-quarters of a billion dollars to waste, and certainly we might lose more than that if we delay the time for building this carrier, because with inflation you are going to see the cost go up.

Certainly we are talking also about jobs. We need jobs in America today.

□ 1415

And by building two carriers instead of one, we are going to produce more jobs at a time when we need those jobs.

Mr. WILSON. Mr. Chairman, I would like to add that most of those jobs are not in Virginia. These jobs are scattered throughout the country with some contractors.

Mr. LATTA. Let me just direct my statement now particularly to the Members from Ohio who might be thinking of voting for the Addabbo amendment: There are about 61,000 jobs involved in the State of Ohio, 61,000 jobs and $915 million.

Let me repeat that to my friends from Ohio: $915 million worth of contracts going to the State of Ohio by building this carrier, and 61,030 jobs are involved.

Mr. WILSON. I thank the gentleman for his statement.

Mr. Chairman, I would also like to remind the Committee that this is really not two carriers, this in one carrier plus the one that President Carter vetoed.

Mr. BADHAM. Mr. Chairman, will the gentleman yield to me?

Mr. WILSON. I yield to the gentleman from California.

Mr. BADHAM. I thank the gentleman for yielding.

Mr. Chairman, I commend the gentleman on his statement and associate myself with his remarks.

I would just like to add that, as the gentleman pointed out, I would like to stress that had the United Kingdom been aware of the true situation and the value of a big-deck carrier and had had one in the Falklands incident, that that war or incident would have been over practically before it started.

Mr. WILSON. It perhaps never would have started.

Mr. BADHAM. I think the gentleman is correct in that. The big-deck carrier is a force projection that is absolutely essential to the conventional defense and protection and security of the United States of America.

When we, at the request of the balance of the free world, took on the responsibility for nonproliferation and the nuclear security for the world, we took on a global responsibility.

Either now, in this kind of amendment, or the kind of amendment that we had yesterday, it is here that we freely acknowledge the responsibility that we took upon ourselves at the request of others and one that we have met soundly and fully for the past 40 years, whether or not we will continue to be the bastion of freedom in this world.

The British found that out in the Falkland Islands and depend on us now for seapower. Either we will have seapower or we will be a second-rate Nation.

As the gentleman says, this has a savings of three-quarters of a billion dollars while providing defense and security for the United States in a way that will project air defense to any corner of this globe.

Mr. WILSON. I thank the gentleman for his comments.

The CHAIRMAN pro tempore. Does the gentleman yield back the balance of his time?

Mr. WILSON. Mr. Chairman, I reserve the balance of my time.

Mr. ADDABBO. Mr. Chairman, at this time I yield 5 minutes to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, I do have a few comments I would like to make, but first I want to comment on a couple of statements made by those who oppose this amendment.

My distinguished colleague from Texas said we need 15 carriers, as if in some way that is rooted in stone, as if in some way 14 carriers or 13 carriers or 12 carriers would render us vulnerable, and in some way the Soviet Union would magically come to attack the United States because we did not have 15 carriers.

That is a gross overstatement and in one sense it is an insult to our intelligence.

My colleague on the other side of the aisle suggests there are 61,000 jobs involved in building 1 carrier. I would suggest that if it takes 61,000 people to

build 1 carrier, that is an incredible level of inefficiency and ineffectiveness that we ought to look into.

Mr. WILSON. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I will yield in just a moment, because I do have a few other comments I would like to make.

First of all, large carriers are literally sitting ducks on the high seas. In the event of a nuclear war, a nuclear aircraft carrier would draw early and heavy fire from the Soviet Union. They are really only effective for two reasons: To show the flag on the high seas, a political show of force, and fighting against lightly armed opponents; namely, Third World adventurisms, which I think we ought to reject.

Carriers require an incredible amount of ships to protect them. In fact, my distinguished colleague has a chart that, if shown, would dramatically draw your support to the amendment of my distinguished colleague from New York.

This armada of ships costs money and they certainly can be used in some other more effective way than protecting and defending this floating battlefield.

Mr. Chairman, while the procurement price of a nuclear carrier may be somewhere between $3 and $4 billion, when you replenish it with planes, when you have ships that supply it, when you have ships to defend it, that figure dramatically rises at a level of at least 10 times, to roughly $30 billion.

So this $3.8 billion expenditure rapidly increases to well over $30 billion.

Mr. Chairman, we have always been a seapower due to our geography. We all understand that. We understand that our Navy at one level is important, but there is no way that surface ships can defend the sealanes in a nuclear war. We do not need all these ships in a nuclear exchange with the Soviet Union, if that is the scenario you are anticipating. If you are not anticipating that, then why do we need a nuclear carrier to beat up on Third World countries? It is not necessary.

It is a travesty to spend taxpayers' money on such expensive and exotic and unnecessary ships at a time of incredible human misery in this country and human misery throughout the world.

For all these reasons, Mr. Chairman, I urge my colleagues to support the amendment on the floor.

Mr. WILSON. Mr. Chairman, will the gentleman yield to me?

Mr. DELLUMS. I yield to the gentleman from Texas.

Mr. WILSON. I thank the gentleman for yielding.

Mr. Chairman, I would like to point out a mistake that I am sure the gentleman did not realize he made. But the gentleman from Ohio was saying 65,000 jobs in Ohio alone. It is more than 300,000 jobs nationwide.

Mr. DELLUMS. As I understand it, the gentleman said 60,000-some-odd jobs are involved in building 1 additional carrier. If that was not what the gentleman said, I will yield to the gentleman from Ohio and he can make his own statement, but as I understood the gentleman, he said there were over 61,000 jobs in building 1 additional carrier.

I am saying if it takes 61,000 people to build 1 ship, that is a level of ineffectiveness and inefficiency that speaks to the detriment of the American economy.

Mr. LATTA. Mr. Chairman, will the gentleman yield to me?

Mr. DELLUMS. I certainly will yield to the gentleman from Ohio. I do not want to misrepresent the gentleman.

Mr. LATTA. I thank the gentleman for yielding.

Mr. Chairman, we are talking about all of the subcontractors that are involved. I will be happy to insert in the RECORD all the amounts to subcontractors involved in the State of Ohio and by congressional district.

CONTRACTOR AND NAVY PURCHASED MATERIAL FOR CVN 72 AND 73 FROM OHIO BY DISTRICT

	Ohio CFE and GFE by district		Total value
	CFE	GFE	
District:			
1,2	$2,106,877	$150,000,000	$152,106,877

20 to 23	13,006,151	318,334,000	331,340,151
Total			915,451,600

Mr. DELLUMS. I appreciate that.

Mr. Chairman, in conclusion, I would simply suggest that to speak about jobs as we build a monument to military madness is an absurdity. There are many cities throughout this country in the last election that said, "We ought to have jobs for peace. We do not need to continue to build more weapons of destruction as a way of providing jobs."

Numerous studies have been done that point out that for every dollar we spend in the military budget we lose jobs; we do not increase jobs.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The gentleman from Texas (Mr. WILSON) has 1½ minutes remaining.

Mr. WILSON. Mr. Chairman, I yield 1½ minutes to the gentlewoman from Louisiana (Mrs. BOGGS).

The CHAIRMAN pro tempore. Without objection, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 1½ minutes.

There was no objection.

Mrs. BOGGS. I thank the gentleman for yielding this time to me.

Mr. Chairman, I support the committee's recommendation with regard to procurement of the two nuclear-powered aircraft carriers.

I have worked on a number of issues relating to American shipbuilding, both civilian and naval. Our shipyards and the support industries are in serious trouble. I would like to urge everyone to give some attention to the support industries: The steel manufacturers, the reactor and boiler manufacturers, the wire and tubing manufacturers, et cetera. These key suppliers in the manufacturing sector will receive a large amount of work as a result of the construction of these two ships.

The Navy says it will cost $6.8 billion to build these two carriers. It is estimated that some $4.5 billion of the procurement costs of these two ships will be subcontracted nationwide. I am informed that among this procurement costs are some $2.8 billion or 62 percent will be spent in the Northeast, to the very manufacturing industries that are bearing the brunt of the current recession. Building these carriers will mean jobs for many workers in the industrial heartland of our country.

According to Navy projections, which are estimates based on past procurement patterns on other ship contracts, as Mr. LATTA has pointed out—$915 million would be spent in Ohio; $830 million would be spent in Pennsylvania; $401 million would go to New York; $202 million would be used to buy equipment in Indiana; $182 million would be spent on goods and services in Maryland; $142 million would go to Massachusetts; $100 million would be spent in New Jersey; and Connecticut would see some $56 million in purchases.

This is a jobs bill. This is money badly needed in the industrial Northeast to help keep people working in our industrial sector.

In addition, after the decision by this House to defer on the production of the MX missile, I think it would be unwise to send a signal that we are uncertain about our commitment to preparedness for conventional warfare in the future.

I urge defeat of the amendment.

Mr. WILSON. I thank the gentlewoman.

The CHAIRMAN pro tempore. The time of the gentleman from Texas (Mr. WILSON) has expired.

The gentleman from New York (Mr. ADDABBO) has 6 minutes remaining.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, I appreciate this opportunity.

Mr. Chairman, I am chairman of the Subcommittee on Sea Power and Strategic and Critical Materials of the Committee on Armed Services and, therefore, have studied these ships in some detail.

I rise in opposition to the amendment.

The reasons for appropriating funds for two *Nimitz*-class nuclear-powered aircraft carriers in this budget are, in my opinion, compelling. These reasons include:

Two World War II-era carriers, *Midway* and *Coral Sea*, will reach end of service life—45 years—by the end of the decade. Replacements must be ordered now to avoid dropping below the current 13 deployable carrier battle groups.

Appropriations for two ships in fiscal year 1983 offers a cost savings of three quarters of a billion dollars as compared to buying the ships one at a time.

Nimitz-class carriers are the most cost effective alternative: More cost effective than smaller carriers.

Nimitz carriers can carry very capable aircraft that cannot be carried on small carriers: early warning aircraft (E-2C); F-14 aircraft with the capability to engage attacking aircraft hundreds of miles from the task force.

Nimitz carriers, by virtue of their size, can incorporate passive defense techniques in construction that make them much less vulnerable to disabling damage than smaller ships.

The events in the Falkland Islands have caused many Members to question whether the U.S. Navy is prepared to fight and win against the new and sophisticated weapons of war and to question the survivability of large ships.

Let me point out that the weapons used in the Falklands were no surprise. Navy forces have been changing in response to the threat of cruise missiles for more than a decade. The *Nimitz*-class nuclear-powered aircraft carriers with long range aircraft, the Aegis cruiser, and missile defense systems have been developed and built to provide the defense in depth that is necessary to provide high confidence that attacking forces can be defeated and that U.S. naval forces will be able to carry out their assigned missions.

The damage done to British ships in the Falklands was not unexpected. The ships were small and vulnerable to devastating damage if hit by a single missile. Because the British Fleet could not maintain an adequate defense in depth, the likelihood of being hit was increased.

But the destruction of a small escort ship by a missile, as happened in the Falklands, does not mean that an aircraft carrier will be incapacitated or destroyed by a single missile. Logic and experience tell us that the carrier can withstand far greater damage and still survive and fight.

I also want to point out to my colleagues that there is no practical alternative to surface ships. The vast majority of goods and materials in both peace and war, that travel between the United States and our trading partners and allies, moves in ships. Neither aircraft nor submarines can be used for this function. Surface ships are the only way that it can be done, and the surface ships of the Navy are essential to protect these ships in time of war.

Mr. Chairman, to those in the House who might be tempted to vote for this amendment solely to further reduce the defense budget, I would point out that the bill before us has reduced the President's request for ships by $2.7 billion, or about 15 percent. In my view further reductions should not be made.

The continued modernization of the Navy, to achieve a fully capable and modern fleet of about 600 ships, will require appropriations equal or greater than those contained in this bill before us.

The other body, in committee action, has deleted funds for reactivation of the third battleship and funds for the fleet oiler. The reactivation of the *New Jersey*, funded in fiscal year 1982, is now nearing completion with delivery of the ship scheduled for the 17th of this month. This is ahead of schedule. Sea trials on the ship have been successfully completed. The most recent cost estimates indicate that reactivation will be completed within the congressionally approved funding. The fleet oiler is essential to support the worldwide operations of the fleet. The committee bill before us would fund both of these urgently needed programs. I would hope that in defeating this amendment today a strong message of support for the shipbuilding program will occur.

Most people who analyze the military strength of the United States come to the conclusion that one of the things we greatly need to do is move to a stronger Navy posture. And they say we ought to do this promptly and efficiently. I agree.

Mr. Chairman, I again urge my colleagues to defeat the amendment and to support the committee bill.

● Mrs. BOUQUARD. Mr. Chairman, in preparing for my membership on the Armed Services Committee, I visited the naval facilities at Norfolk several months ago. During that visit I had a great opportunity to understand the principle of the large carrier role in the battle group concept and the need for force projection by the U.S. Fleet around the globe. Certainly, the recent experience in the Falklands has reinforced the critical need for the large carrier in conflict far from home. These CVN's are complex structural marvels and require long lead times for procurement of fabrication materials and hardware. The funding in this appropriations bill provides this money up front so that hundreds of millions of dollars can be saved in the long run on these procurements.

Mr. Chairman, I urge defeat of the amendment. This bill assures our future maritime presence around the globe at a genuine cost savings.●

The CHAIRMAN pro tempore. The gentleman from Alabama (Mr. EDWARDS) has 4 minutes remaining.

Mr. EDWARDS of Alabama. Four minutes? I only yielded 10 minutes.

The CHAIRMAN pro tempore. The time has been equally divided between the gentleman from New York (Mr. ADDABBO) and the gentleman from Alabama (Mr. EDWARDS). We had 28 minutes. The gentleman from Alabama was recognized for 14 minutes. The gentleman has 4 minutes remaining.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman from Alabama yield to me?

Mr. EDWARDS of Alabama. I yield such time as he may consume to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Chairman, I rise in opposition to the amendment to strike one of the two *Nimitz*-class nuclear-powered aircraft carriers.

The construction of a carrier is a complex and time-consuming task—taking 8 or more years from authorization. Funding two carriers this year will permit investment in improved construction techniques and more efficient use of men and facilities resulting in an estimated savings of three-quarters of a billion dollars and a reduction of the usual building period. With the benefit of this reduced building period, the first of the two carriers could be delivered in this decade and the second about 2 years later.

These carriers are the most cost effective alternative for the sea-based projection of air power. The aircraft carrier has been consistently demonstrated to be one of the most flexible and most effective instruments of U.S. military power in peace and in war. There is no alternative available that can offer the capabilities of the carrier.

The amendment, if adopted, would result in an unacceptable gap in naval forces. There are currently 13 deployable carriers in the Navy, including two World War II carriers—the *Midway* and the *Coral Sea*—that will reach the end of their service life by the end of the decade. By 1990 both of these ships will be 45 years old.

The *Nimitz*-class carrier can carry aircraft that cannot be carried on small carriers like those operated by the British that some would have the

Navy buy. For example, the early warning aircraft, such as the E-2C that can provide radar coverage at a range of 1,000 miles and the F-14 which can interrupt attacking aircraft at ranges of hundreds of miles, can only be carried on large carriers.

Nimitz carriers, by virtue of their size, incorporate construction features, so-called passive defense features, that make them much less vulnerable to disabling damage than a smaller ship.

Mr. Chairman, funding for both of these ships is necessary to maintain existing naval force levels and can save three-quarters of a billion dollars. I urge my colleagues to reject the amendment and support an orderly replacement of aging World War II carriers.

Mr. REGULA. Mr. Chairman, will the gentleman yield to me?

Mr. EDWARDS of Alabama. I yield 1 minute to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Mr. Chairman, I would point out, as a member of the Military Construction Subcommittee, that the stability of our bases around the world is very tenuous at best. Most of our bases on foreign soil are on short-term leases or agreements. Therefore, the knowledge that the United States has alternate platforms for our aircraft in the form of a carrier force helps us in negotiations to continue access to these land bases. It certainly gives stability to our basing in the hot spots of the world.

I would urge that we support funding for the second carrier. It is the most cost-effective way to get the needed facility in terms of equipment and to provide the air support that we need in many areas.

It is also vital for the protection of the sealanes, necessary for support of our forces in Europe and the Pacific.

□ 1430

Mr. EDWARDS of Alabama. Mr. Chairman, I yield such time as he may consume to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Chairman, I rise in opposition to this amendment.

Mr. Chairman, I rise in support of the proposed funding to initiate procurement of two additional nuclear aircraft carriers for the Navy, not one as this amendment would suggest.

My conviction is that it is essential that we go forward on such procurement. Our Navy is not adequate to the challenges of the time. I regret that these challenges are so dangerous and costly, but these are the realities with which we now must contend.

Very few Members of this House, by my inquiry and estimate, oppose the maintenance of an aircraft carrier force competent to deal with present and prospective threats. The only question of consequence before us at this time is whether we should initiate the building of two additional top-rank carriers or only one.

The easy answer is to say, "Let us build one, and let us think about another in the next Congress."

First, we should look at the rationale for the two-carrier request. Even if we settle on a carrier force of 13, and do not go to the very defensible 15-carrier battle group concept, we will need two new carriers to replace the *Coral Sea* and the *Midway,* built during World War II. Let us keep this in mind: These two carriers, now with the fleet, will be 45 years old when the new carriers we are now proposing to fund join the fleet in 1989 and 1991.

I hope and pray that we may not be required to fight a war in 1989 or 1991—or, for that matter, in any other year. But I submit to those who may be thinking in this House today that they are disinclined to support funds to construct two new aircraft carriers this question: "Are you prepared to tell the American people that you are satisfied to send 45-year-old World War II carriers to war?"

As I indicated at the outset, it may be easy to say, "Let's compromise; let's order up one new carrier now and think about the other one later."

What we do, if we go in that direction, is to forgo not only carrier strength preparedness at the earliest practical date, but also considerations of economy—something that all of us in this House have been made conscious of, I think, by the temper of the taxpayers.

It should be clear to anyone in this House who has had any exposure to the buying process for Government programs, or for private sector programs, that a series production produces economies of scale, in contrast to unique procurement of a single item, whether it be an aircraft carrier, another weapons system or a very simple item.

In this regard strongly supported argument suggests that a multiple procurement decision at this time could insure us a savings of at least three-quarters of a billion dollars—perhaps very substantially more.

I urge the rejection of the amendment, and support of funding for the commitment to two new CVN's.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. CLINGER).

Mr. CLINGER. Mr. Chairman, I thank the gentleman for yielding to me.

Mr. Chairman, I am not competent to really speak about the military justification for this augmenting the carriers, but I would like to talk briefly about what I see as a very serious problem which this program will accommodate. That is the shrinkage of the defense industrial base which is reaching a very perilous condition.

This program, with a cost of over $7 billion, is going to help the shipbuilding industry, clearly, but it is going to have much broader ramifications than that. It is going to do a great deal to repair this shrinking industrial base not only in the shipbuilding industry, but also in the heavy industry of this country.

About $4.4 billion of it is going to be subcontracted to heavy industries throughout the country. Substantial amounts of that will be in the heavily industrialized Northeast, but I think this should be taken into account in the debate. We are not just talking about shipbuilding, but we are also talking about repairing the industrial base, which is in bad shape.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 30 seconds to the gentleman from Ohio (Mr. LATTA).

Mr. LATTA. Mr. Chairman, as I mentioned earlier, there is going to be $915 million spent by subcontractors in the State of Ohio under these two contracts. Let me say that in the 1st and 2d Districts, $152 million; in the 3d District, $68 million; in the 8th District, $51 million; in the 13th and 14th Districts, $307 million; and in the 20th and 23d Districts, $331 million—a third of a billion dollars to go into the Cleveland area under these contracts.

Mr. ADDABBO. Mr. Chairman, I yield such time as he may consume to the gentleman from Florida (Mr. CHAPPELL).

Mr. CHAPPELL. Mr. Chairman, I rise in opposition to the amendment.

Mr. ADDABBO. Mr. Chairman, I yield 30 seconds to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, let me just say that the vote on the MX system on yesterday made it clear that this House is electing not to go the nuclear route to protect our interests. Therefore, we have got to go even harder on the conventional route, and there is no better way to protect U.S. interests conventionally than on the high seas with the kind of nuclear carriers the British did not have in the Falkland Islands, and which in the U.S. Navy's hands have done such valuable deterrent services.

Moreover we can buy two for a much cheaper price. We can order them together, just like a Christmas sale.

I oppose the pending amendment.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield such time as he may consume to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, part of the Defense Department appropriations bill that we are considering for fiscal year 1983 covers procurement of naval vessels.

Contained in this bill is a revolutionary proposal by the administration to procure two *Nimitz*-class carriers at the same time.

The advantages of this revolutionary procurement proposal are many: First, it will reduce the overall cost of acquiring this necessary fleet strength by over $750 million; it will allow the Navy to receive the services of these two ships a total of 2 years ahead of normal delivery schedules; and will speed up delivery of the *Nimitz*-class carrier *Theodore Roosevelt* now under construction by 14 months. Most importantly, delivery of the two carriers will give the Navy what it has declared its needs to fulfill its missions of sea control and power projection—a 15-battle group Navy with the large deck carrier as the centerpiece of the battle group.

The threat we face is enormous and grows almost daily. The Soviet fleet, which just 20 years ago was largely a coastal patrol navy, is now a blue ocean navy supporting Soviet adventurism all over the globe.

The use of Soviet fleet components at Cienfuegos Bay in Cuba and Cam Rahn Bay indicate the Soviets understand that the oceans of the world are the routes of our trade, commerce; in short our lifelines. Their concentration in strategic "choke points" along our lifelines dramatically underscores the need for a strong Navy capable of protecting American interests on a global scale.

The large deck and particularly, the *Nimitz*-class carrier is the most potent and survivable force structure for dealing with our ocean threat. The recent battle in the South Atlantic would have had quite a different tone had the British had the *Nimitz*-class capability of a defensive zone of 450 miles and the offensive punch to project force on enemy territory.

I urge my colleagues to carefully consider not just the cost of the two carriers, their cost in terms of the security that they will buy.

Admiral Rickover is fond of relating an old chinese proverb: "The more you sweat in peace, the less you bleed in war." I think it is imperative that we sweat this revolutionary proposal to insure our survival.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself the balance of my time.

Mr. Chairman, I think it comes right down to this: Are we going to have two new carriers, or are we not? I am convinced that we will in fact start to procure two new carriers either this year or in the next year or two or so.

It seems to me to make good sense, if in fact that is true, to buy the two new carriers at one time and save some $750 million in procurement costs in the process, because we can buy them cheaper that way and move on.

If I had any question in my mind that we were not going to go forward with the new carriers I would not be proposing this, but I think that is in fact what we are going to do. We have a commitment from the Secretary of the Navy, and so long as I am here I am looking to hold his feet to the fire, that these will be the last carriers he needs to buy for the next 10 years or so.

So, I think that is the wise thing to do, get them both at the same time and save some $750 million in the process.

Mr. ADDABBO. Mr. Chairman, I know the mood in the House and I know that I do not have the votes to carry this amendment, but I feel that we have to develop legislative history today so that the next Congress can determine whether these alleged savings will actually become a reality. As I listened to the claim that we will save $750 million, I kept thinking of my wife every time she goes shopping. She says, "I got a bargain. I can save $5."

I keep looking for that $5. Many families go broke on those types of reported savings.

As I stated before, when we look at $750 million in proposed savings, it is going to cost the taxpayer nearly $84 billion for the Navy to realize that $750 million savings.

We hear about 61,000 jobs. As I stated earlier, let me show you just how misleading the Navy's information was with respect to the jobs that will be created by funding two carriers. The Navy assumed that each job equates to a $15,000 wage/salary per year. The Navy then simply divided the $15,000 assumed salary in the total value of the contract without subtracting the cost of the materials, overhead, and so forth. In essence, the economic impact was a total fabrication.

Another thing, my colleagues, we talk about this carrier as if it is going to be here tomorrow, or within the year. We are speaking of a carrier that will be funded in fiscal year 1983, but will not be delivered for at least 8 years, and that is what concerns me. What will be the nature of our enemies' technological advancements in 8 years?

There was a graphic display circulated here for some time which was produced by the Navy. This picture showed all the ships, planes, armaments and all other weapons systems which are necessary to protect the carrier and the carrier was sitting right there out in the middle of it all. That picture suddenly disappeared, my colleagues, do you know why? It disappeared because it showed just how vulnerable a carrier could be. That is all I am saying, why waste money on such a vulnerable weapon?

The CHAIRMAN pro tempore. All time has expired.

The question is on the amendment offered by the gentleman from New York (Mr. ADDABBO).

The amendment was rejected.

AMENDMENT OFFERED BY MR. EDWARDS OF ALABAMA

Mr. EDWARDS of Alabama. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

AIRCRAFT PROCUREMENT, AIR FORCE

(INCLUDING TRANSFER OF FUNDS)

For construction, procurement, and modification of aircraft and equipment, including armor and armament, specialized ground handling equipment, and training devices, spare parts and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land without regard to section 9774 of title 10, United States Code, for the foregoing purposes, and such lands and interest therein, may be acquired, and construction prosecuted thereon prior to the approval of title as required by section 355, Revised Statutes, as amended; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $17,588,600,000, of which $186,100,000 shall be available for contribution of the United States share of the cost of the acquisition by the North Atlantic Treaty Organization of an Airborne Early Warning and Control System (AWACS) and, in addition, the Department of Defense may make a commitment to the North Atlantic Treaty Organization to assume the United States share of contingent liability in connection with the NATO E-3A Cooperative Programme; $1,934,900,000 shall be available only for purchase of F-16 aircraft under a multiyear contract; $795,000,000 shall be available only for purchase of KC-10 aircraft under a multiyear contract; and in addition $50,000,000 shall be derived by transfer from the "wide bodied aircraft" program in "Aircraft Procurement, Air Force, 1982/1984" to be applied to the "C-5B" program; and in addition, $84,800,000, of which $37,100,000 shall be derived by transfer from the "CRAF" program in "Aircraft Procurement, Air Force, 1981/1983" and $47,700,000 shall be derived by transfer from the "CRAF" program in "Aircraft Procurement, Air Force, 1982/1984" to be applied to the wide bodied aircraft program; and in addition, $120,000,000 shall be derived by transfer from "Aircraft Procurement, Air Force, 1982/1984", and shall be available only for the purchase of KC-10 aircraft under a multiyear contract, notwithstanding the provisions of the language contained in the Supplemental Appropriations Act, 1982; to remain available for obligation until September 30, 1985.

The Clerk read as follows:

Amendment offered by Mr. EDWARDS of Alabama: On page 21, on line 25, after Congress; insert for the LHD-1 amphibious assault ship program, "$55,000,000".

On page 22, on line 6, strike "$15,918,000,000" and insert in lieu thereof "$15,973,000,000".

The CHAIRMAN pro tempore. The gentleman from Alabama (Mr. EDWARDS) is recognized for 5 minutes in support of his amendment.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Alabama. I yield.

Mr. ADDABBO. Mr. Chairman, I thank the gentleman for yielding. When the issue of funding advance procurement for the LHD-1 was before the committee in markup, we did not have a full accounting of LHD-1 unobligated balances. We now have the necessary information. I have been notified that funds are now being obligated, so I will now accept the amendment on behalf of the committee.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Alabama (Mr. EDWARDS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ADDABBO: On page 24 of the bill, line 20, strike out "$17,588,600,000" and insert in lieu thereof "$13,555,100,000".

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all debate on this amendment and amendments thereto end at 3:10, the time to be equally divided and controlled by myself and the gentleman from Alabama (Mr. EDWARDS).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN pro tempore. The gentleman from New York (Mr. ADDABBO) will be recognized for 15 minutes, and the gentleman from Alabama (Mr. EDWARDS) will be recognized for 15 minutes.

The Chair recognizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, my amendment would delete just over $4 billion for the procurement of the B-1B bomber; $3.4 billion for procurement of the B-1; $475 million for advance procurement; and $165 million for initial spares.

Mr. Chairman, we are at that point in time where we must decide whether we are going to actually fund weapons which will give us the defenses we need in the outyears in the most cost-effective manner. The B-1B bomber may be a good weapon today. The B-1B bomber has many differences from the original B-1A. However, the earliest we can expect to see it in the Air Force inventory in numbers is maybe 1986. Some 34 will be delivered after 1987. We have received testimony that it might be good for another year or so as a penetrating bomber. That penetrating capability can be easily done by the B-52 with cruise missiles well into the 1990's.

By about 1988, it will become the most expensive cruise missile carrier in the world, because that is what it would be relegated to—a cruise missile carrier.

The Air Force has estimated the cost of this program as 100 B-1B bombers at $20.5 billion in fiscal year 1981 constant dollars—$205 million a plane. The cost estimate by the Cost Analysis Independent Group of the Office of the Secretary of Defense, states the B-1B will cost $26 billion for 100 planes in fiscal year 1981 constant dollars, or $260 million for each bomber. In our hearings, we found that millions of dollars are not being attributed to the B-1B just to try to keep its cost down to that $20.5 billion figure.

But, even if we take that $26 billion, or $260 million a copy, and express that estimate in "then years" dollars, we will see that this plane will cost $41 billion for 100 planes, or $410 million per copy—just for a cruise missile carrier. We have B-52; we continue to enhance the B-52. That is good into the 1990's. If we stop this foolish "toy" of the Air Force and bring the Pentagon back to their senses and properly fund the next generation bomber, we will then be funding a weapon which will give us the proper defense well past the year 2000.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Chairman, we are here again debating the future and the fate of the B-1. It has been ready to go into production since 1972. It has been delayed, it has been canceled, it has been revived, and we have it again before us in production mode. Metal is being bent at this time in California for the production of this bomber.

This is a bomber that is well needed because I think it is obvious to even the most casual observer that the B-52, which is the next thing to shot, they are dropping out of the skies one-by-one as if by accident, but literally by old age.

So, we need a new penetrating bomber and we have one. It is the B-1 bomber which is ready to go into production, and indeed is in production at the present time. It is not as if this 1960, 1970 design is one that has remained static. It is now a state-of-the-art airplane, and is the finest penetrating strategic weapon carrier anywhere in the world.

It will be available for penetration, if necessary, well into the 1990's, but I would say as a word of caution to those who would delay our carriers, to those who would delay our missile systems, and to those who would delay the B-1 bomber some more, I could say without threat of being called wrong, I am sure, that those who would delay the B-1 bomber now, if we canceled it, the minute we had an advanced technology bomber, they would delay that because indeed some day that would be also vulnerable. But indeed, either we are going to strip our defenses upon which the free world and the free peoples of the world depend, or we are going to proceed with the construction of this needed weapons system.

I ask that the amendment be defeated.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Chairman, I thank the Chairman for yielding this time to me. I think it is important for all of us to remember that this is not a new issue for this Congress; I remember in 1971, I voted for the B-1 bomber. In 1971, I voted for the B-1 bomber. This is 1982, and I would not vote for the B-1 bomber this year. We have passed the time for the B-1 bomber.

□ 1445

I think we could nickname this the "bum bomber" because its time has passed. Ten years ago it might have made sense. Today it makes no sense.

I think it is also important that we remember what we did in this Congress just yesterday. The President said that this Congress was "sleepwalking into the future." I do not think that is the case at all. I think in truth what this Congress did yesterday was to give the world a chance for a future. It said by its action in halting the MX missile that the world can look forward to having a realistic future.

This Congress certainly defends in every way it can the right to freedom of all Americans. I am convinced that we would fight for it and we would die for it, but the way we have been going with proposals such as the MX missile, today, the B-1 bomber is not the way of guaranteeing our freedom. It is certainly not the course of action we should take.

Mr. Chairman, I hope that when this vote comes up today, we will show the same courage and the same determination to stop this program as we did yesterday in bringing about a halt to the MX missile.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. CHAPPELL).

Mr. CHAPPELL. Mr. Chairman, as we listen to this debate today I am reminded that there are those Members of the House who would avoid buying weapons ready for production by supporting concepts still on the drawing board. That statement was made by another—but how true.

There are those of us who want to carry on with the old B-52, an airplane older than the pilots flying them. I do not know of any person in this House who would want his son to fly the B-

52 bomber on a penetrating mission in the Soviet Union.

There are those who would stop the B-1 bomber program and go to the Stealth. The Stealth is a paper airplane; the B-1 bomber is a real airplane with the most up-to-date technology. It has the capacity to fly faster and farther than the paper claims for the Stealth and carry a bigger payload. It has the capacity to carry both conventional and strategic weapons. It is a weapon we need now. We can keep talking on and on forever in trying to bring everything right to the last moment of perfection and we will never have hardware in the inventory.

Mr. Chairman, it is time we go forward with this bomber. It is needed in the inventory; it is needed to carry out the policies and missions of our Nation. I hope we will again vote down this amendment to stop the B-1.

Mr. ADDABBO. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, the gentleman from New York (Mr. ADDABBO), the chairman of the subcommittee and the author of the amendment that is presently before the body, has with eloquence, magnificence, and specificity laid out the arguments in opposition to the B-1 bomber. I would simply like to focus on another area. A few short moments ago a number of our colleagues attempted to justify the expenditure of several hundred millions of dollars on the notion that it would produce jobs. I am sure many of my colleagues have rationalized their vote on the B-1 bomber on the ground that it has produced jobs.

Let me tell the Members a brief story. Back several years ago, when the B-1 bomber was a very live and controversial issue, a number of contractors from California came to the California delegation, the Democratic Caucus of the California delegation, to make a very sophisticated presentation with respect to the merits of the B-1 bomber.

I happened to be the only "minority" representative at that time at that particular meeting, and so when they came to the flip chart heading "jobs," the lobbyist said, "Mr. Dellums, I am sure you would be personally very interested in this because it deals with jobs." He said that as if in some way I had no interest in the tactical or strategic questions or whatever but was just interested in jobs.

He said, "this is going to be a $20.5 billion program, and it is going to generate 138,000 jobs."

So I did some rather quick calculations and I indicated to the gentleman that if we employed people at $10,000 a year, we could hire 2 million human beings, and if we employed them at $20,000 a year, to work at myriad projects around the country; we could hire a million people and even have a half a billion dollars to administer the program. I asked, "how do you justify 138,000 jobs on the one hand as against 1 million or 2 million jobs on the other?"

The gentleman said, "the gentleman from California makes a very good point. We should never attempt to justify a weapon system on the basis of how many jobs it produces, but whether or not we need that weapons system."

The bottom line of my discussion is that we do not need this weapons system. This is an absurd, obsolete weapon. It makes no sense whatsoever.

As I said, my distinguished colleague, the gentleman from New York (Mr. ADDABBO), has very eloquently laid it out. The decision to build 100 B-1 bombers is not a tactical issue, it is not a military consideration. It was a political consideration on the part of the White House. It has no military value whatsoever. This is a political decision, and depending on what analysis one makes, it is, rather, a $40 billion or a $45 billion "turkey" to build 100 planes that will be obsolete by the year 1990. We cannot build them before 1989 or 1990, so we are going to spend $40 billion to $45 billion of American taxpayers' funds for a program that may be effective for 1 year or a maximum of 2 years.

As the gentleman pointed out, after 1990 they said it can be a cruise missile carrier. This is the most expensive, overly designed, extraordinary missile carrier that one can have. We can buy L-1011's or 747's as cheap as 10 times the price. The B-1 bomber to carry cruise missile is an absurdity.

For all these reasons, Mr. Chairman, I urge my colleagues to support the amendment to delete the funds for the B-1 bomber. If there is in the madness of someone's mind a scenario where we ever end up in a nuclear war, perhaps the most protective cover one can be in is a B-1 bomber because the whole damned thing will be over by the time it gets to where it is supposed to be.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. DORNAN).

Mr. DORNAN of California. Mr. Chairman, here is the harsh economic impact study on the State of California if this house is to foolishly once again cancel the B-1 "Peacemaker" strategic bomber. However, I agree with one point and only one point that the preceding speaker from California made, and that is: that we should never justify this defense system of any defense system as though it were a public works project.

I have always said throughout my 6 years here that the B-1 stands on its merits as a magnificent defense system to help keep our fragile peace.

Let us reflect on one of President Jimmy Carter's major blunders. Here are the opening lines from the Los Angeles Herald Examiner lead editorial of July 1, 1977:

> President Carter's decision to scrap production of the B-1 bomber is a grave mistake that endangers the free world.
>
> He made his shocking announcement at a time when the Soviet Union has been building its strategic arsenal at a rate which confounds the West.

Well, since I was last in the well on the B-1, we, thank God, have had a small part of the superb John T. Hughes briefing on the Soviet threat, that is, "Soviet Military Trends and Capabilities." declassified. Now, as I can say, "RAM-P." The Soviets are flying the RAM-P, a huge mach-II strategic bomber. It is their B-2 and it is flying in a research and development program. It now has a NATO code name the Blackjack. They get a B-1 "Backfire" and a B-2 "Blackjack" and we get "jack-crapout". Is that the gamble you want here today. They get the Backfire at the production rate of 3½ aircraft per month and you want to kill the B-1 replacement for our oldest B-52's.

Well, I tell my distinguished friend, the gentleman from New York, Mr. ADDABBO, that I do not think you could do this if you ever went to a U.S. Air Force SAC base and looked into the faces of the young crews of our B-52's and told them they cannot have this new aircraft when we know they will be expected to defend our country if, God forbid, they are called upon to fight and die in that former "queen of the skies," the B-52.

The B-52 has been referred to, in front of me, by the aircrews, as a "kamikaze mission aircraft" because it is more than obsolete, it is a museum piece. It has seen its day, and as those of us most knowledgeable in military aviation have said over and over in this well, it is older than most of the crewmembers that fly it.

Mr. Chairman, here is the old B-1A production schedule. It is very sad indeed. This production schedule shows that by this very month, if President Carter had not made his blunder of cancellation we would be receiving four B-1's per month for 51 great months.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DORNAN) has expired.

Mr. ADDABBO. Mr. Chairman, I yield 30 additional seconds to the gentleman from California (Mr. DORNAN).

Mr. DORNAN of California. Mr. Chairman, I appreciate the fairness on the part of the gentleman.

Mr. Chairman, we would be receiving as of April past of this year, 1982, four "Peacemaker II" B-1's a month to strengthen that part of the Triad that is air breathing. We would have had in place 240 B-1A's by mid-1986. The

very first of 100 B-B1's, of which we will be taking initial delivery will not come on line until mid-1986. This better B-1B with much Stealth technology incorporated will still have the capacity to defend the free world and to justify its principal obligation: deterring war so that it never will have to be used, as the B-36 "Peacemaker I" was never used, in anger, at any time during its long life of service in SAC.

I have here a list of Members that I will be checking at the doors, if this comes to a vote, to remind those who in prior votes supported a new aircraft for our SAC combat crews. Do not desert at the 11th hour. I recommend a no vote on the Addabbo amendment, Mr. Chairman, and again, I thank the subcommittee chairman for his courtesy in yielding me additional time.

Mr. Chairman, the full Herald Examiner editorial to which I have referred follows. It is even more relevant today if that is possible:

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Chairman, why is it realistic to be looking at this situation as we do today when we are talking about both the ATB and the B-1B in one package? I will tell the Members why.

It is because we are going to need the B-1B when the ATB comes online. No one can tell me the Russians are in the habit of fielding a vehicle or a weapons system that is already obsolete. The previous speaker has just mentioned the RAM-P bomber that they are proceeding to deploy at the present time. If that is so obsolete, why are they willing to spend billions of dollars building it? Because the Soviets know they must have a modern, conventional, long-range manned bomber and so do we. We need a weapons system, a delivery vehicle, that will do more than just deliver strategic weapons, which is all the ATB is going to do. That is all it is prepared to do. It will not carry the bomb load, it will not fly far enough and it will not fly fast enough or high enough. That is the reason we need a weapon that will take over for the B-52 and fill the conventional role into the future, way after the 1990's, as the B-52 has done for us until this present time.

Further than that, why can we not go to the ATB right now? It is because the technology with regard to the ATB is changing everyday. We are not prepared to start into production on the ATB. We are finding out new things about how to handle that technology everyday, and we need to have the best ATB we know how to build. The longer we wait to build it, the better off we are going to be.

Mr. Chairman, that is why it makes sense to go ahead now with the B-1B and let the ATB come along in its own time when it, too, will be the best aircraft of its kind in the world.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, this is another one of these issues we have been debating here in this well on a number of occasions. I cannot recall exactly the last time we had the B-1 amendment before us. I think it was when we were on the authorization bill.

But I remember that those who were taking the same position as our distinguished chairman of the Appropriations Subcommittee is taking today asked why do we need the B-1? We have got the Stealth bomber coming along; we have got the B-52's. We can fix those up. So why do we not just scrap the B-1 and wait until Stealth is available?

But it turns out, as was demonstrated in a front page story in the Albany Times Union last Sunday, December 5, based on the Hearst Bureau report here in the city of Washington, that the Stealth program is now alleged to be a phony, there is not really any Stealth bomber. There is only a small Stealth airplane, so the story went; and besides, it does not actually hide from the latest Soviet radar. Even Dr. Edward Teller of nuclear fame has said that the Stealth aircraft is not invisible.

□ 1500

Well, this is exactly the reply we used the last time. I recall pointing out that the Stealth airplane was still just a paper plane. Nobody really knows how well it will work. Nobody knows how big or how fast it will be.

The gentleman from Virginia (Mr. ROBINSON) has already indicated that the Stealth aircraft is not exactly in a class with the B-1.

What we need therefore is not a paper plane but a weapon that will support the bomber leg of the Triad.

We have already destroyed, in the vote yesterday, our land-based leg. That means we have to make the other two legs that much stronger. The only way to do that is with a modern jet airplane.

The Soviets are entranced with the B-1; they are building a copy of the B-1. So let us reject this latest Addabbo amendment once again.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. It is hard to get excited about the B-1 bomber. It is simply too expensive a weapon system. It is not a first-strike weapon, so we need not worry about it being provocative.

The question is what will be its mission.

There are those here who suggest that we will take this airplane and use it in a conventional mode once we get the advanced technology bomber, the Stealth. Just think about that for a minute. This airplane is going to cost anywhere between $265 million a copy to $410 million a copy depending on whose figures you want to believe, the administration's or the Congressional Budget Office. Is anyone seriously suggesting that we are going to use this expensive an asset over a conventional battlefield where it could be shot down by a $50,000 missile?

You could fire a lot of $50,000 missiles at one B-1 before you start losing money. So we are not going to risk this airplane in a conventional mode. That would be folly.

As for the mission of the air breathing leg of the triad, the B-52's, you have heard over and over again how the crews are younger than the plane. So what? If the plane can do its job, if it can fly over the Soviet border, if it can penetrate, shoot its SRAM missiles, I can assure you the Russians are not going to care how old the airplane is that is blowing them to smithereens. It can do its job and it can do its job into the early 1990's when the Stealth technology, the next generation of technology, will be available.

I suggest that the B-1 has seen its day, that we can save an enormous amount of money by just scrapping it and finding another system, other conventional systems, as a place to put this money.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. White).

Mr. WHITE. Mr. Chairman, this debate somewhat appalls me because I think we have been over this ground many, many times.

Just yesterday we had arguments on both sides espousing the principle of the triad, how important the triad is, because each leg of the triad requires a different time lapse and therefore any would-be attacker could not knock out all aspects of our defense.

Yet, the House yesterday put aside the procurement of the MX missile, thereby affecting one leg of our triad.

The Carter administration made the mistake of stopping the procurement of the B-1 bomber and thereby escalated the eventual costs, at a time when we needed a manned penetrating supersonic bomber.

The B-1 is a supersonic bomber and the B-52 is subsonic. The B-1 bomber is the only manned supersonic plane we have that can penetrate Soviet air defenses.

If we are fearful of a mistake in launching an attack, this is the only weapons system that can be recalled. We cannot recall missiles once they are fired. We can only explode them.

The B-52's are older than the pilots that man them. Would you want to send your sons to battle in the B-52, a sitting duck that cannot even go over the land mass of the Soviet Union and would be a coffin to those who are flying it?

I think it is important that we continue what I think is a very important and essential defense system that we have in the triad. The only way that we can maintain a viable triad and not have it strictly on paper, as we have done for so many weapons systems, is to go forward with the B-1 bomber at this time.

Let us not make this mistake again, on again, off again, on again, off again. This is not the proper signal to our allies. This is not the proper signal to our would-be adversaries.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. SOLOMON).

Mr. SOLOMON. I thank the gentleman for yielding.

My colleagues, in listening to this debate the last couple of days I decided to review the CONGRESSIONAL RECORD of the debate on the defense appropriation bill that took place 41 years ago just 3 days before the sneak attack on Pearl Harbor because it was mentioned so much in this debate.

I want to read to my colleagues a little excerpt that took place on December 4, 1941, 3 days before Pearl Harbor. I am reminded of this because what I am about to read is what I have been hearing from the Democrats all day long, particularly from the gentleman from California and the gentleman from New York and all of you people that want to cut the legs out from under our national defense in this country.

This debate 41 years ago went on, and this was a Republican making this statement. I want my colleagues to listen, a Republican from Kansas made this statement.

He said, "I am not going to support the defense budget before us today because it is not our defense. There is not anybody worrying about Hitler coming over here and attacking us. There is not anybody worrying about Japan coming over here and attacking us."

That was December 4, 1941.

Fortunately, as my colleagues know, we won that war. Fortunately that Republican Congressman from Kansas was defeated in the next election as were a lot of others who opposed the defense appropriation bill that day.

But, unfortunately, there may not be another time if we do not have an MX missile, if we do not have a B-1 bomber, if we do not have a triad system that will provide guaranteed protection from our enemies. Listen to this statement by someone we all know and respect, Adm. Thomas H. Moorer:

At the end of World War II, I was in Japan and since I was present during the Japanese attack on Pearl Harbor on December 7, 1941, I was assigned to a group that was given the task, among other things, of developing the full answer to the question "Why did the Japanese attack Pearl Harbor?" We interviewed the Prime Minister, General Tojo, and most of the senior officers involved in the planning and execution of this operation. Without fail they all said the following:

a. The United States Congress passed the draft law by only one vote;

b. The Congress refused to fortify Wake and Guam Islands, and

c. The support of the military forces was at such a low level that they noted that the U.S. Army was training in Louisiana with wooden guns.

Consequently, said all of the Japanese, their perception of the United States was a nation who did not have the means or the will to protect their areas of interest.

Never mind that the Japanese made a terrible mistake, as evidenced by the total destruction the United States levied upon them, the point is that wars are begun by weakness, and if a potential enemy perceives in his own mind that a nation is weak deterrence—which in fact is a state of mind—breaks down and military actions are likely.

Mr. Chairman, I believe this statement tells the real story. The best and only way to guarantee the continued freedom of the American people is to maintain a strong national defense. The only thing the Russians understand or respect is strength. Peace through strength is the only answer. Do not cut the legs out from under our national defense. Do not wreck our triad defense system.

Mr. DELLUMS. Mr. Chairman, I think that it is a violation of the House rules to impugn the motives of any of our colleagues. If we are going to engage in a colloquy and a debate here then let us argue on the merits of the issue.

But my integrity has been impugned and I move that the gentleman's words be taken down.

Mr. SOLOMON. I do not think I referred to any gentleman.

Mr. DELLUMS. You said the gentleman from California and the gentleman from New York, whose motives have been impugned, and you have no right to do that.

The CHAIRMAN. The gentleman will suspend.

Does the gentleman from California ask that the words be taken down?

Would the gentleman from New York ask unanimous consent to modify his remarks for the RECORD?

Mr. SOLOMON. If the gentleman had asked me to yield I would have yielded because I was not impugning any Member of Congress nor would I do so. I have the greatest respect for the gentleman and he and I have discussed this on many occasions.

Mr. DELLUMS. I thank the gentleman and I am satisfied, Mr. Chairman.

The CHAIRMAN. The Chair thanks the gentleman from California (Mr. DELLUMS) and the gentleman from New York (Mr. SOLOMON).

The Chair recognizes the gentleman from Alabama (Mr. EDWARDS) for 1 minute to conclude his time.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. MILLER).

Mr. MILLER of Ohio. Mr. Chairman, I rise in opposition to the amendment to delete funding for the B1-B bomber.

In all the debate about various weapons systems and their costs, we sometimes stand in danger of losing sight of the fact that "providing for the common defense" and "securing the blessings of liberty to ourselves and our posterity" constitute one of our major responsibilities as Members of Congress.

I suggest to my colleagues that we will be failing in our constitutional responsibility to provide adequately for our defense against the forces that threaten liberty in the world today if we put our Nation in the position of facing the years ahead with no penetrating bomber other than the outdated B-52's and a paper bomber still on the drawing board. This simply is not good enough in these dangerous times.

We are all familiar with the phrase "A bird in the hand is worth two in the bush." Well, a bomber in our defense arsenal is worth two on the drawing board. The fact of the matter is that the advanced technology bomber (ATB) is not yet a reality. The concepts of the ATB show promising potential, but we would be seriously misleading the American people if we led them to believe that this potential aircraft could meet our needs in the immediate future. Meanwhile, the B1-B is proceeding ahead of schedule. This is a good bomber that we can—and must—add to our defense arsenal now.

Opponents of the B1-B say that we should not proceed with procurement of this bomber—even though all the R&D has been done on it—because the ATB technology when it is finally completed will be more advanced. I would point out that this line of reasoning could be used to prevent us from ever acquiring any military hardware. There is always more advanced technology awaiting us in the future. We cannot shirk our responsibility to provide for our immediate and near-term national defense needs, simply because more advanced technology lies in the long-term future.

But that is not the only reason to oppose this amendment to delete funding for the B1-B. The fact of the matter is, that there will still be a need for the B1-B even if we do eventually develop a satisfactory ATB. The

two aircraft are not mutually exclusive, but rather complimentary. The B1-B will be our replacement bomber for the B-52, and will be able to penetrate Soviet defenses well into the 1990's. Over its 30 years of service life, it will be able to perform as an effective cruise missile carrier and conventional carrier. So we are talking about an aircraft that has a vital place in our defense arsenal well into the next century.

Again, I urge my colleagues to oppose this amendment.

Mr. EDWARDS of Alabama. Mr. Chairman, this is another one of those weapons systems that I guess you would like to try to avoid if you could. I would like to jump over the B-1 and go to the ATB but I have studied this thing from every way I can look at it and I am convinced that there is no way we can fill that gap.

I think we must go forward with the B-1 and I therefore oppose the amendment and urge Members to oppose the amendment.

Mr. ADDABBO. Mr. Chairman, the contractor on this B-1 "bummer" has done his job well. He has spread out the subcontracting through, I would say, three quarters of the States of this Nation.

With unemployment as it is, and in taking nose counts of the House, I know I do not have the votes today to stop this wasteful expenditure of buying a bomber which will be nothing but a cruise missile carrier at $410 million a copy when it becomes operational in the late 1980's

□ 1510

It is an expensive price to pay. The American people know that.

A recent Harris poll showed stronger opposition to the B-1 bomber than to the MX. The poll showed 65 percent against the B-1 to 27 percent for it. This is what the American people are telling us.

I know Congress is not listening to them on this issue today. Therefore, I have to make this legislative history. When the next Congress comes forward it should not be said that we permitted the contract to be awarded without any opposition. This program should be canceled today by this Congress. This money should be put into the next generation bomber, which will give us the needed capability that we hear about today for national defense.

The B-1 is not available today. It is years from now. We have to look at this time in forming our national defense and decide whether we are buying a useful weapon for defense in this period of time or whether we are buying another toy for the Air Force generals.

● Mr. OTTINGER. Mr. Chairman, I rise in support of the amendment to delete $3.9 billion in procurement funds for the B-1B bomber. Once again, the Reagan administration is seeking to spend vast sums of money on a weapons system which will not enhance our security at all, and, in fact, may retard the progress of other, more reliable and less expensive weapons systems.

The Congressional Budget Office has estimated that the B-1 program will cost $40 billion for 100 planes, or $410 million for each aircraft. At the same time, the Department of Defense itself admits that the B-1 will be operational for only a few years before it is replaced with an advanced technology bomber, such as the Stealth.

It is incredible to me that we would spend massive amounts of money on the B-1 and ignore a more effective use of our funds for more practical bombers. I believe that we can better maintain this essential leg of our strategic force with higher confidence and at lower cost by using a combination of current technology cruise missiles and bombers, while proceeding with a full-scale research and development program for the advanced technology bomber. We can also consider deployment of the FB-111 aircraft—155 of which would have a payload and target coverage similar to 100 B-1's, but at much lower cost.

I urge my colleagues to reject the expensive and impractical B-1 bomber, and support this measure to delete its procurement funds.●

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. ADDABBO).

The amendment was rejected.

The CHAIRMAN pro tempore. Are there further amendments to title IV?

The Clerk will read.

The Clerk proceeded to read title V.

Mr. ADDABBO (during the reading). Mr. Chairman, I ask unanimous consent that title V be considered as read and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN pro tempore. Are there any points of order against title V?

AMENDMENT OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $10,246,361,000, of which $600,000,000 may not be obligated or expended for research, development, test, and evaluation of basing modes for the MX missile until March 15, 1983, to remain available for obligation until September 30, 1984.

The Clerk read as follows:

Amendment offered by Mr. ADDABBO: On page 29 of the bill, strike out lines 24 and 25, and on page 30 of the bill, strike out lines 1, 2, and 3, and insert in lieu thereof the following: "equipment, as authorized by law; $8,737,029,000, of which not more than $500,000,000 may be available for research, development, test, and evaluation of the MX missile and not more than $500,000,000 may be available for research, development, test, and evaluation of MX basing modes, to remain available for obligation until September 30, 1984: *Provided*, That $450,000,000 of the amount made available for research, development, test, and evaluation of MX basing modes may not be obligated or expended until March 15, 1983.".

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all time on this amendment and all amendments thereto end at 3:40 p.m. and that the time be equally divided between myself and the gentleman from Alabama (Mr. EDWARDS).

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN pro tempore. The gentleman from New York (Mr. ADDABBO) will be recognized for 13 minutes, and the gentleman from Alabama (Mr. EDWARDS) will be recognized for 13 minutes.

The Chair recognizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, this amendment reduces the funding for the MX research and development from $1.73 billion on the missile to $500 million, and on the basing modes from $775 million to $500 million.

This does not kill the program. It will give the Congress more time to examine the so-called Dense Pack, and the need for and the use of the MX missile.

The recent Townes panel report on the Dense Pack, of September 1982, which was written by a team of independent experts, was just released by the Pentagon to the committee last Friday, December 3. There was a disturbing conclusion which stated:

The CSB (that is, Dense Pack) concept is in an early stage of development. Consequently, cost, time, and effectiveness estimates are still not firm as this report is being written. In particular, several of the key parameters of the concept are still changing.

In addition, a letter from Dr. Townes to Secretary Weinberger of September 22, which was released to the committee just this past Monday, reveals that Dr. Townes has strong reservations about the two theories, fratricide and superhardening, on which Dense Pack is based.

Mr. Chairman, the $1 billion that I am leaving for MX research and devel-

opment will, as far as I am concerned, give the President and our negotiators their bargaining chip. I think that is an expensive enough bargaining chip to be given. Is shows the Russians that if they persist in their attitude that we are looking at next generation basing modes. I do not believe that the Dense Pack or the MX missile, as presently designed to fit into Dense Pack deployment, should go ahead at $1.73 billion for R&D on the missile of the $775 million on the R&D on the basing modes. Therefore, I ask my colleagues to accept this amendment.

AMENDMENT OFFERED BY MR. EDWARDS OF ALABAMA AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. ADDABBO

Mr. EDWARDS of Alabama. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. EDWARDS of Alabama as a substitute for the amendment offered by Mr. ADDABBO: On page 29 of the bill strike out lines 24 and 25 and on page 30 of the bill strike out lines 1, 2, and 3, and insert in lieu thereof: "equipment, as authorized by law: $10,246,361,000 of which not more than $775,000,000 may be available for research, development, testing and evaluation of MX basing modes to remain available for obligation until September 30, 1984: *Provided*, That $560,000,000 of the amount made available herein for research, development, testing, and evaluation of MX basing modes may not be obligated or expended until April 30, 1983.".

Mr. EDWARDS of Alabama. Mr. Chairman, before I discuss the amendment, this may be an appropriate time to say to this body that the gentleman from New York (Mr. ADDABBO), I think, had a great personal victory yesterday in his battle to knock out the MX procurement. The gentleman is my very good friend. We disagree very much on that issue. But I think it would be inappropriate to let the day go by without at least commending him for the hard work he put into his cause, what he believed in, for the way he went about it, and I think all Members have great appreciation for the gentleman from New York. Certainly this Member from Alabama does.

Mr. Chairman, the truth is that the MX procurement was knocked out yesterday. And in a sense, I think what the House was saying to the Pentagon is, "You fellows better go back to the drawing board and do a little more work."

I think what the House was saying to the Pentagon yesterday was, "At this point, Dense Pack will not fly."

I think what the House was saying to the Pentagon yesterday was, "We want to know more about Dense Pack, we want to know a lot more about basing, we want to know a lot more about what you are going to do with this missile before we go forward with it."

And it is in that sense and in that attitude that I present this substitute today. What this substitute does, Mr. Chairman, is to restore the MX money to R&D that the chairman would cut out in his amendment. At the same time, it would recognize that there are $775 million in the budget for basing. It would allow $215 million of that money to go forward in R&D on basing. It would fence $560 million until April 30 of next year for the purpose of allowing the Congress to take a good look at the Dense Pack proposal, to perhaps expand its views into other basing modes; it would give the Pentagon time to go back to the drawing board, to come to the Congress with further support for Dense Pack or for other proposals that it may care to carry out.

I would remind the House that the President did in fact meet the requirements of the Congress by submitting the plan on or before December 1. That plan is now before us, and the time is here, I think, for the Congress to take a good look at it.

And so it is in that sense, Mr. Chairman, that I offer this substitute, and I ask that it be adopted.

Mr. ADDABBO. Mr. Chairman, I yield myself 3 minutes.

□ 1520

Mr. Chairman, I thank my colleague from Alabama for his kind words. I felt yesterday's victory was not a personal victory, but actually a victory for the people of the United States, expressing the voice they raised on November 2 when they spoke to Congress loud and clear.

With all due respect to the President, I am sorry to say that with respect to the MX vote yesterday, the sleepwalkers are in the Pentagon, and not in this House. A majority of the Congress is wide awake, as shown by the MX vote of yesterday of 195 Democrats and 50 Republicans.

Mr. Chairman, I have discussed with the gentleman the amendment offered by my colleague from Alabama. For the purposes of legislative history, I would ask my colleague, does he feel that if we do accept the substitute amendment as offered by the gentleman from Alabama, that this will give the Congress time to look at all the information, rather than just rely only on the brief testimony we have received so far on MX basing modes? If so, we can look at all the various types of basing modes and proposed uses in connection with the MX. Unfortunately, we cannot put sufficient language in the amendment to cover everything because it would be considered legislation on an appropriations bill, and the amendment would not be acceptable? It appears that this amendment would give the various committees an opportunity to carefully analyze all the information and receive testimony and act on the spending of these funds in the next Congress.

Mr. EDWARDS of Alabama. I agree with the gentleman. And that is the reason that I proposed April 30 as opposed to March 15. I think that if Congress is going to do an adequate job of looking at this proposal, the basing proposal, that it needs more time than just to March 15.

It would be my hope that both the Armed Services Committees of this body and the other body and the Defense Appropriations Committees of this body and the other body would take the time to look into these basing proposals, both the Dense Pack and any other that the Pentagon may care to send forward, give careful scrutiny to them, and to work with the Pentagon and with the White House to try to find the right approach.

And I think that is the inherent value in moving the date to April 30.

Mr. ADDABBO. With that legislative history, Mr. Chairman, I for myself will be accepting the substitute.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Chairman, I want to compliment the gentleman on the amendment. In the committee I had offered an amendment to make it March 15. I think April 30 is a better date. It provides more time. And also I would point out that the Dense Packing issue will be before the Military Construction Subcommittee of the Committee on Appropriations. I am confident that there will be extensive hearings on that subject. It does involve construction and therefore will require that our committee take an extensive look at the whole proposal.

For this reason, the April 30 date does provide time for the subcommittee to address the problem of whether or not we should recommend to the full committee and to the House funding for the beginning of the Dense Pack construction.

I am pleased that the gentleman from New York has indicated that he would accept this amendment. I think that the language provided and the time element is a welcome addition to the bill, to give all of us, including the Members of the 98th Congress, an additional time to evaluate the basing proposal that we have only received recently from the President.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, the gentleman from Ohio makes a valid point. I regret that I omitted to comment on the fact that the Military Construction Subcommittee should be looking at this as well as the others.

Second, Mr. Chairman, I think that the Members should know that it was the gentleman from Ohio (Mr. REGULA) who basically crafted the fencing provision which we now are

enlarging upon. We are indebted to him for his work in the full committee, as we tried to bring this bill to the floor.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Chairman, I would like to ask a couple of questions of the gentleman from Alabama so I understand his substitute.

How much money is the gentleman proposing that we spend on the missile R&D program? Is he cutting that? According to the gentleman's amendment, would the gentleman cut it at all?

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. I thank the gentleman for yielding.

I am not cutting the missile R&D program at all.

Mr. ASPIN. The gentleman from New York would spend only $500 million on missile R&D, but the gentleman from Alabama would spend the full amount, the $1.7 billion; is that correct?

Mr. EDWARDS of Alabama. That is correct.

Mr. ASPIN. Second, the gentleman would spend the full amount of the basing R&D, except that the gentleman would fence off $560 million of that to be spent only after April 30. Is my understanding correct?

Mr. EDWARDS of Alabama. That is correct.

Mr. ASPIN. So in fact in the amendment of the gentleman from New York, we are cutting total R&D from $2.5 billion to $1 billion, and under the substitute amendment of the gentleman from Alabama we would still be spending the full $2.5 billion on missile R&D and basing R&D except that the gentleman from Alabama would fence off $560 million for basing until after April 30.

Mr. EDWARDS of Alabama. The gentleman is correct.

Mr. ASPIN. What would have to be decided by April 30 in order for the $560 million to be spent?

Mr. EDWARDS of Alabama. Well, I cannot tell the gentleman that anything more would have to be decided than would have had to have been decided under the amendment of the gentleman from New York. What we hope is and what we have tried to make clear in our colloquy is that we would fully expect all relevant committees of both bodies to delve into this subject at great length.

The CHAIRMAN pro tempore. The time of the gentleman from Wisconsin (Mr. ASPIN) has expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 1 additional minute to the gentleman from Wiconsin.

If the gentleman will continue to yield, it is obviously a matter of great importance. It is obviously something that has got to be resolved. And so it is in that context that we have gone beyond in my proposal what the gentleman proposed as far as fencing time is concerned.

It would be our hope that as a result of all of this, we could in concert, with the Pentagon, with the White House, start to resolve the question of basing.

Mr. ASPIN. I would like to ask one more question.

Do I understand at the end of all of this, having voted against the procurement money in the bill yesterday on the motion of the gentleman from New York, and even accepting the Edwards amendment to the R&D bill here, what we have done to the whole MX program is to say we are not going to go ahead with production now, but we are keeping all our options open; is that correct?

The CHAIRMAN pro tempore. The time of the gentleman from Wisconsin (Mr. ASPIN) has again expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 1 additional minute to the gentleman from Wisconsin.

Mr. Chairman, the gentleman is correct. We not only knocked out yesterday in procurement money for missiles, we also knocked out $158 million in money for basing procurement. All of that is gone now. And so we are back at the R&D level.

We are trying to find the best way to go. And it is this gentleman's view that if we are going to do that properly, we cannot do it by cutting back on the R&D effort. We need to go forward. I would hope the Members would agree.

Mr. ASPIN. If one were for the MX missile, if one were for Dense Pack, those options are all still alive now as we complete the bill; am I correct?

Mr. EDWARDS of Alabama. They are alive today as they would be under the chairman's original amendment or as they would be under the bill without either one of our amendments.

Mr. ASPIN. That is what I wanted to make clear.

I thank the gentleman.

Mr. ADDABBO. Mr. Chairman, I yield 2 minutes to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Chairman, what this substitute would do would be to allow for a complete review of the viability of Dense Pack and all other possible basing options. Hopefully by April 30 we will be in a better position to make a judgment. The President's decision was not made until November 22. Many of us feel that because of the scientific concerns about the survivability of Dense Pack that we ought to take some time and continue to examine the various options including Dense Pack.

I think the gentleman's amendment is very constructive. I intend to support it as a substitute. It also gives us a chance to continue R&D on the missile. Hopefully early next year we can make a judgment on whether this system can in fact be a credible part of our strategic force.

□ 1530

Mr. EDWARDS of Alabama. Mr. Chairman, if the gentleman will yield further, I may be just a little facetious, but I would say that it will give us all something to do while we are waiting on the Budget Committee to get on with its work; so we will have some time there to do our work.

Finally, I think the point should be made, as I tried to make yesterday, that in complying with the requirement of the Congress the President met the deadline of December 1 on submitting his basing proposal.

The obvious problem with that, and it was evident yesterday, is that most Members of Congress have not the foggiest notion what Dense Pack is all about. It may be the greatest thing in the world or it may be the lousiest thing in the world, but most Members here have no way of making that judgment.

The CHAIRMAN pro tempore. The time of the gentleman from Washington (Mr. DICKS) has expired.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself 1 minute.

Because most of us did not get a chance to study it in any great depth. The Appropriations Subcommittee was briefed on it because we were getting ready to mark it up. I cannot say even all the subcommittee members were briefed.

The Armed Services Committee basically never really saw Dense Pack.

The Military Construction Subcommittee basically never saw Dense Pack.

So I think it is important that we understand what it is we are about to approve or disapprove. It is in that sense that I offer this substitute amendment.

Mr. ADDABBO. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. DELLUMS).

Mr. DELLUMS. Mr. Chairman, I think it is terribly important to reiterate how we got here. Dense Pack is only the latest proposal on developing some kind of a survivable basing mode.

I would like to assert, Mr. Chairman, No. 1, that we have studied this matter for 10 years.

No. 2, that the greatest scientific and engineering minds in this country have dedicated themselves to trying to develop a "survivable" basing mode for the MX missile.

Yesterday I read you what I referred to as the litany of lunacy. I love to read it. It is incredibly comical, but I would not do it today.

Dense Pack is only the last of 34 different efforts—34, not 3, not 10, not 20, but 34 in 10 years with the most

brilliant, scientific, and engineering minds in the country.

The bottom line of my argument is this. There is no such animal as a survivable basing mode. We are kidding ourselves. We ought to cut all this money out and stop this madness. We are engaging in political game-playing here. For anyone to think that in the 11th year we are going to find some magical 35th survivable mode is an absurdity. Thirty-four different efforts, 10 years, brilliant scientific minds—you are not going to find a survivable basing mode.

Let us get rid of the MX missile, get rid of the MX basing mode and let us take those multibillions of dollars and build a quality of life that is worthy of human beings.

We do not need the MX missile. You are not going to find a basing mode, so let us stop playing these political games.

I wish that this amendment were a clean amendment that simply said, let us knock all the RDT&E out of this bill because we are never going to find it. If brilliant minds have not done it in 10 years, we are certainly not going to do it in the next 10 weeks or the next 10 months.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to my colleague, the gentleman from Washington.

Mr. DICKS. Mr. Chairman, the only point I was going to make to the gentleman is that the other night I was on a radio show. I used the gentleman's figure of 32 or 33 basing modes and a gentleman called in from California, the gentleman's State, and corrected me. He said at Rand they had studied 242 different basing modes and wanted me to be aware of that fact.

Mr. DELLUMS. Usually the Members of Congress are the last people to get full information. We just have the 34 and I imagine the gentleman is absolutely correct.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. DELLUMS. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, I would like to associate myself with the remarks of the gentleman from California.

We just ought to stop wasting time and money discussing working on this missile and start worrying about the quality of life for the people of this Nation.

Mr. DELLUMS. Mr. Chairman, I yield briefly to my colleague, the gentleman from Wisconsin.

Mr. ASPIN. Mr. Chairman, let me say that I agree with the judgment of the gentleman from New York that we ought to accept the substitute amendment offerred by the gentleman from Alabama. I think that is the best thing we can possibly do.

I hope the Members of this Congress understand what we are doing by all this, that we are leaving all the options open in the future.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I would like to be the first to invite the gentleman from California (Mr. DELLUMS) to appear before our subcommittee and tell us all he knows about the Dense Pack and why it should not be the basing mode that we use.

Mr. DELLUMS. I accept the gentleman's invitation. I deeply appreciate it. It makes me feel that I am becoming a mainstream Member of the Congress.

Mr. EDWARDS of Alabama. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Chairman, yesterday I supported the gentleman from New York (Mr. ADDABBO) on his amendment to stop or halt the procurement of the MX missile. I have great misgivings about both the MX missile and the basing mode; but the gentleman from Alabama has now made a motion that we at least keep research and development alive. A year ago I had supported making an across-the-board reduction in research and development in the military expenditures because I thought we ought to spend more money in certain economic recovery programs of this country; but today this missile question is still very much in doubt. It seems to me the reasonable and fair thing to do, in view of our action yesterday, is to at least keep R&D alive. I think the gentleman has come up with a reasonable substitute at this time. Next March that may be open for review again; but at this time I think in fairness to all the people who are concerned about this very serious question, we ought to at least go ahead with the research and development as offered by the gentleman's substitute.

Mr. NELSON. Mr. Chairman, the future of this country may very well rest upon the decisions we make today regarding our commitment to a strong national defense. The most controversial aspect of this commitment is the development of an adequate deterrent to the Soviet first-strike capability. I am convinced that the development and production of the MX missile is the best way we can provide for an adequate deterrent to the Soviets. After extensive briefings by experts both inside and outside of the Defense Department, I have concluded it is worth proceeding with Dense Pack as a potential basing mode for the MX. New technological breakthroughs can make the Dense Pack work. Deployment of the MX in a survivable basing mode would thus enhance deterrence while providing an incentive for the Soviets to pursue negotiations for a genuine mutual arms reduction. Postponement of MX production and deployment can only exacerbate our present lessened ability to deter a Soviet first strike and to convince the Soviets that they must join us in an arms reduction treaty.

We cannot hesitate any longer

● Mrs. BOUQUARD. Mr. Chairman, as the least senior member of the Armed Services Committee, I have made a diligent effort to acquaint myself with both the specifics and the general issues that we are debating in the legislation. I supported my friend from New York on the procurement amendment. The Dense Pack basing system simply leaves far too many unresolved questions. Some of them highly technical and virtually speculative, others more mundane. Under these circumstances, a decision to move to production of the MX missile while the basing system remains in doubt poses an unacceptable level of risk to the design, engineering and capability of the entire weapon system.

Having said this, I must respectfully oppose my friend from New York in this second amendment. Technological development is moving forward at an unprecedented pace. If we fail to retain a strong RDT&E effort on the MX missile, we run precisely the same risks as we would with an unsound deployment system.

Others have argued that doubts and questions over the MX configured in the Dense Pack basing mode should be dismissed since MX itself is a bargaining chip to be bartered away in the START or some follow-on arms limitation discussions. I do not accept this argument: The MX deployed in a strategically sound mode is a valuable addition to our deterrent capability. But, I would say to those who would argue that MX is an important bargaining chip, you will retain, and even improve its value by maintaining the RDT&E support program.

Technology does not stand still, and in today's environment technology determines strategy. If we fail to maintain the solid RDT&E foundation for the MX, we will weaken not only our direct security, but also our ability to negotiate a meaningful arms limitation agreement.●

Mr. EDWARDS of Alabama. Mr. Chairman, I yield back my time.

The CHAIRMAN pro tempore. All time has expired.

The question is on the amendment offered by the gentleman from Alabama (Mr. EDWARDS) as a substitute for the amendment offered by the gentleman from New York (Mr. ADDABBO).

The amendment offered as a substitute for the amendment was agreed to.

The CHAIRMAN pro tempore. The question is on the amendment offered

by the gentleman from New York (Mr. ADDABBO), as amended.

The amendment, as amended, was agreed to.

Mr. REGULA. Mr. Chairman, I move to strike the last word.

(By unanimous consent, Mr. REGULA was allowed to proceed for an additional 5 minutes.)

The CHAIRMAN pro tempore The gentleman from Ohio is recognized for 10 minutes.

Mr. REGULA. Mr. Chairman, I think the debate that we have just completed points out very clearly that the Congress is confronted with some difficult policy decisions and that we need the best information possible. Certainly the issues surrounding the MX debate concern not only the missile system, but our entire land based nuclear force. This logically extends to questions concerning our triad and whether we really need to maintain this three-legged defense concept. In order to fully examine the question before us, it is essential that some basic facts be made available today as part of the RECORD. Obviously, the 98th Congress will be faced with these issues, therefore it is my desire that the information which follows in a colloquy that I will request with the gentleman from Alabama be made available to all Members so that a careful consideration of these issues is possible between now and April 30, as provided in the amendment.

I would like to address some questions of an informational nature on the MX system to the gentleman from Alabama.

The first question is, What do we currently have in terms of Minuteman silos and missiles?

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. REGULA. I yield.

Mr. EDWARDS of Alabama. There are 1,000 Minuteman silos; 450 Minuteman II's, and 550 Minuteman III's.

Mr. REGULA. What cost savings would be reflected in putting the MX missiles in Minuteman silos, rather than proceeding with the Dense Pack basing mode for MX?

I yield to the gentleman.

Mr. EDWARDS of Alabama. The savings would be approximately $9 billion in fiscal year 1982 dollars over the next 6 years.

□ 1540

Mr. REGULA. What are the advantages of developing the MX over improving the Minuteman (and calling it Minuteman IV)?

I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. The MX missile is a modern, inherently more capable and cost-effective missile than the Minuteman. The MX can deliver 10 warheads rather than 3. The MX has been developed to be twice as accurate as Minuteman. The MX is more capable of withstanding nuclear effects in flight than the Minuteman. Taken together, these characteristics modernize the current ICBM force.

While it is possible to improve the Minuteman force to be as accurate as MX and to be as survivable to nuclear effects, the Minuteman would have to be developed anew and would be both costly and take additional time to develop. The resulting system would be less capable than MX and less cost effective.

Mr. REGULA. Why is a missile with the accuracy of MX necessary for the U.S. strategic force if we are committed to no first strike?

I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. It is necessary to threaten Soviet hardened targets—that is, missile silos and command and control facilities—so that the United States will have a credible retaliatory capability against these highly valued sanctuaries. Without such capability, the Soviets will remain immune from attack and command substantial leverage in a crisis or bargaining situation. I yield.

Mr. REGULA. At what test phase is the MX?

Mr. EDWARDS of Alabama. The MX missile has undergone 41 component tests and will be test flown in early 1983 for the first time.

Mr. REGULA. Why can we not rely on Trident II for leverage in Geneva? I yield.

Mr. EDWARDS of Alabama. The Trident II does not restore land based missile capability, nor is it to be deployed in the near term. Arms control negotiating leverage stems from developing a position of strength. While Trident II adds to that position, it cannot make up for current ICBM deficiencies and does not by itself restore a strategic balance. MX is needed to insure that position.

Mr. REGULA. The main advantage of ICBM's over Trident is the communication factor. The MX's command and control faculties are seriously weak with Dense Pack. How can the communications problems for this basing mode be combated? I yield.

Mr. EDWARDS of Alabama. MX Dense Pack command and control is a multilayer redundant system. The most survivable element is the airborne launch control system with low-frequency radios that can transmit through high density material (ground) and through nuclear effects. The antennas will be embedded in the superhard silos.

Mr. REGULA. We heard BMD discussed yesterday. What are the plans for BMD with regard to MX? I yield.

Mr. EDWARDS of Alabama. BMD is to be maintained as an option for long-term deployment, with a low level R&D program, and no decision on full-scale development will be made until observation of Soviet threat developments is made.

I must say that BMD is continuing to be carried in our bill at generally what we call a level of effort, research and development. It is an ongoing thing, hoping to keep it current, but it is certainly not at a stage where it is about to be used in anyway.

Mr. REGULA. How survivable is MX without BMD? I yield.

Mr. EDWARDS of Alabama. MX is closely spaced basing is highly survivable—75 to 80 percent—in all cases against the Soviet current and projected threat, and the near-term responsive threat, without BMD. In the far term—mid to late 1990's—MX could be enhanced to retain its high survivability using BMD or other features such as deceptive basing or simple countermeasures.

Mr. REGULA. How does the MX program meet the limitations of SALT I and II? I yield.

Mr. EDWARDS of Alabama. SALT did not envision an ICBM deployment with the characteristics of Dense Pack. MX in Dense Pack is neither a purely fixed nor a purely mobile system, and, therefore, is not precisely covered in existing agreements.

Mr. REGULA. Mr. Chairman, I thank the gentleman from Alabama for putting these answers and this information into the RECORD.

I think it is going to be very important, as this body debates the whole policy question of whether we still want to maintain the triad and, if so, what form our land-based leg of the triad should take. We presently have a thousand ICBM's as pointed out by the gentleman from Alabama. Certainly it is a serious policy question as to maintaining the triad as well as to what we will do by way of modernization of our land-based deterrent system.

Mr. DICKS. Mr. Chairman, will the gentleman yield to me?

Mr. REGULA. I yield to the gentleman from Washington.

Mr. DICKS. I thank the gentleman for yielding.

Mr. Chairman, I understand the colloquy and I just want to make the observation that many of us would raise serious questions about this basing mode's compliance with the the SALT agreements. There is a very distinct difference of opinion amongst Members of this body on that issue.

So I would not want anyone reading the RECORD to get the impression that all of us agree that MX does not have a SALT implication of a SALT problem.

Mr. REGULA. I thank the gentleman for his contribution. I think that is a legistimate issue that will be debated at great length as we deal with

the whole question of basing in the months ahead.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. Are there further amendments to title V?

The Clerk will read.

The Clerk read as follows:

TITLE VII

GENERAL PROVISIONS

Mrs. BOGGS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to enter into a little colloquy with the Chairman of the Subcommittee on Defense of the Committee on Appropriations.

I was contacted by the adjutant general of the State of Louisiana and he is very concerned about the committee's recommendation regarding the conversion of vacant National Guard technical positions to full-time military positions. Could the gentleman please explain the committee's action and the reason for this recommendation?

Mr. ADDABBO. Mr. Chairman, will the gentlewoman from Louisiana yield to me?

Mrs. BOGGS. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentlewoman for yielding.

Mr. Chairman, in fiscal year 1982 the committee directed the Department to let each reserve component be free to determine the appropriate mix of full-time military and civilian technicians. Since then we have heard nothing but complaints about the manner in which the committee directives were being implemented.

First, it came to our attention that this language has been interpreted to mean that cost should not be a principal factor in the determination of the appropriate mix. That, of course, is contrary to Public Law 93-365 (DOD Appropriation Authorization Act of 1975), which directed DOD to "use the least costly form of manpower that is consistent with military requirements and other needs of the Department of Defense." This is particularly the case since: First, the quality of cost comparisons previously presented to the Congress has been called into question by the General Accounting Office; and second, Congress has approved significant pay increases for the military since the last comprehensive comparative cost assessment of conversions.

The committee has also learned that a substantial number of the conversions that occurred in the fiscal year 1983 budget came about as a result of the pressure downward of civilian personnel ceilings, not on the basis of relative cost and relative effect on readiness.

Furthermore, under current regulations the Active Guard/Reserve (AGR) personnel involved with conversions are not assets that are deployable with their units. And that is also in contradiction to congressional report directives.

What did we do about these problems? In summary, the committee's actions establish a floor for the number of civilian technicians for each component at fiscal year 1982 strength levels, and direct the Secretary to use available authority to exceed personnel ceilings and hire the civilian positions the committee is funding.

For the future, the committee requires each component to develop a plan for managing its full-time support personnel, and directs the Department to take the necessary steps to insure that future growth of full-time support personnel is determined on the basis of cost-effectiveness consistent with readiness requirements. Pages 29 through 31 of the committee report explains the committee's position in greater detail. I shall place them in the RECORD at this point:

The Continuing Resolution for Fiscal Year 1983 included a section prohibiting further conversions of military technicians, and it included the following explanation of the conferees' action in the Statement of the Managers:

In fiscal year 1982, congressional report language directed the Department of Defense to let each reserve component be free to determine the appropriate mix of full time military and military technicians. It has come to the managers' attention that this language has been interpreted to mean that cost should not be a principal factor in the determination of the appropriate mix. The managers wish to reaffirm that cost is clearly intended to remain a principal factor in this determination as set forth in Public Law 93-365 (DOD Appropriation Authorization Act of 1975), which directed DOD to "use the least costly form of manpower that is consistent with military requirements and other needs of the Department of Defense." This is particularly the case since (1) the quality of cost comparisons previously presented to the Congress has been called into question by the General Accounting Office; and (2) Congress has approved significant pay increases for the military since the last comprehensive comparative cost assessment of conversions. Furthermore, the managers understand that a significant portion of the conversions planned for fiscal year 1983 are principally responsive to the requirement to reduce the number of civilian personnel to achieve personnel ceiling objectives, rather than considerations of relative cost and relative effect on readiness. Finally, the managers understand that in some components the Active Guard/Reserve personnel involved in these conversions are not deployable assets, which is also in contradiction to congressional report directives.

"The language in the joint resolution is intended to put a stop to conversion of military technicians, by whatever means that may be accomplished administratively. It, therefore, is intended specifically to cover the 43 military technician Senior Staff Administrative Assistant positions in the Army Reserve now scheduled to be eliminated by October 1, 1982."

The Department has advised the Committee that the revised language included in this bill will better accomplish its purpose, which is to establish a floor for the strength of military technicians for each component at the September 30, 1982 levels. Those levels are as follows:

Army Reserve	6,753
Air Force Reserve	7,283
Army National Guard	22,557
Air National Guard	21,834

Setting the floor at these strength levels means that the 1,200 conversions planned for fiscal year 1983 cannot take place. Accordingly, the Committee has reduced military personnel accounts to reflect the lower requirement for Active Guard/Reserve (AGR) personnel. Furthermore, it has increased the operations and maintenance accounts to reflect a comparable increase in military technician personnel. The net effect is to approve the same total strength as was budgeted for fiscal year 1983.

Growth in the full-time support personnel required by National Guard and Reserve units is to be provided by the least costly form of manpower, which is consistent with readiness requirements. Each component is directed to submit a cost-benefit analysis in support of future budget submissions, justifying the mix of (AGR) personnel and military technicians proposed by that component. These analyses should cover at least full life cycle costs to the government, including insurance and retirement programs, fringe benefits, medical care costs, and other relevant items, as well as direct pay. Each analysis should also describe in detail how readiness is best improved through the mix of personnel proposed. To assist the Committee in its deliberations, the General Accounting Office will report its views on these analyses submitted to the Committee by the components.

The Committee directs the Secretary to use authority available to him to exceed the civilian personnel ceilings of the Department and hire the additional Army and Air National Guard civilians funded by the Committee. For future years the Committee urges the Department to submit legislation streamlining the programming and budgeting process for all components of both the AGR and military technicians of the full-time support. Presently the AGR have specific limitations, but are not counted against overall active end strength. Military technicians are also subject to specific ceiling limitations, but more importantly fall under overall civilian ceilings of the Department. Earlier studies of the military technician conversion program and recent GAO reports indicate that overall personnel ceilings are a major factor affecting proposals to convert military technicians to AGR status. This conversion program provides, at least, an administrative path of least resistance by permitting reductions in civilian personnel ceilings, while at the same time acquiring strength to meet requirements through alternative sources. The Committee's concern is that this situation denies prominence to cost effectiveness and readiness in manpower decisionmaking. It seems that a streamlined approach would remove military technicians from overall ceilings to permit the determination of appropriate mix for each component on the basis of cost effectiveness and combat readiness.

The Committee believes that cost effectiveness and combat readiness also will be enhanced if each component develops a plan for the management of its full time support personnel. These management plans must insure at a minimum that:

Military technicians may change to AGR status only voluntarily. No involuntary conversion or change of status is allowed.

No military technician or civilian position will be abolished while incumbered for the purpose of reestablishing it as an AGR position.

Military technicians and AGR personnel are employed in approved, validated full-time positions.

Every position incumbered by AGR personnel has a maximum authorized military grade that is consistent with the day-to-day responsibilities and skill level required for the position.

The annual AGR grade ceilings authorized for each component are not exceeded.

□ 1550

Mrs. BOGGS. I thank the gentleman for his reply. Does he expect this conversion effort to eventually go forward without adversely affecting Guard strength?

Mr. ADDABBO. The position of the committee is that we are establishing a floor on civilian technician strength at the September 30, 1982 levels. The committee is anticipating that full-time support for the Army National Guard and U.S. Army Reserves is on a rapid growth plane. The full time manning program alone illustrates this point.

The program was authorized in 1977. By 1980 it grew to about 3,000 personnel. In 1981, it was about 5,000. For fiscal year 1983 it would grow to over 16,000, and by 1988 to 28,000. So, it is quite important that we straighten out management problems early if we are to get readiness in exchange for the dollars we will be paying these personnel.

I wish to make it clear that the committee is not opposed to the growth of full-time support. We do, however, want readiness to be improved when it is promised. And we do want it delivered in a cost-effective way. That is our concern. The committee wants cost effective and readiness analysis to be a part of the decision as to what type of full time personnel will best enhance the Guard's strength as the full-time support program grows over the years.

Mrs. BOGGS. I thank the gentleman for his usual attention.

The CHAIRMAN pro tempore. The Clerk will resume reading of title VII.

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

POINT OF ORDER

Mr. AKAKA. Mr. Chairman, a point of order.

The portion of the bill to which the point of order relates is as follows:

SEC. 781. None of the funds appropriated by this Act shall be available for paying civilian employees in non-foreign areas outside the continental United States a cost-of-living allowance in excess of that based upon spendable income.

The CHAIRMAN pro tempore. The gentleman will state his point of order.

Mr. AKAKA. Mr. Chairman, I would like to present this point of order on behalf of myself and my colleague from Hawaii (Mr. HEFTEL).

Mr. Chairman, section 5941 of title 5 authorizes the payment of a cost-of-living allowance to Federal employees in non-Federal areas that are subject to abnormally high prices. Section 781 is clearly legislation on an appropriations bill since it redefines the method by which the cost-of-living allowance is calculated. It also requires affirmative duties on the part of the Secretary of Defense since he must prepare information on spendable income for DOD employees which is neither easily available nor prepared by them pursuant to law. Moreover, the Office of Personnel Management is responsible for such matters—not the Department of Defense.

Mr. Chairman, I make a point of order against section 781 since it is obviously legislation on an appropriations bill.

The CHAIRMAN pro tempore. The gentleman from Hawaii has made a point of order against section 781, title 7.

Is there discussion on the point of order?

Mr. ADDABBO. Mr. Chairman, I must reluctantly agree with my colleague from Hawaii.

The congressional budgetary constraints placed on the committee dictated that we look at many issues not properly under our jurisdiction in order to meet the section 302 allocation for Defense. While section 781 retrenches expenditures, it places additional responsibilities on the Secretary of Defense and legislates a new definition for cost-of-living allowances based on spendable income, not gross income as is permitted in section 5941 of title 5.

Mr. Chairman, I concede the gentleman's point of order striking section 781.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield.

Ms. OAKAR. Mr. Chairman, I thank the gentleman for his opinion about the point of order, and I just wanted to assure the gentleman, since I believe our subcommittee and full committee has jurisdiction over the matter, that we would be happy to cooperate with him at any time.

I thank my colleague for raising the point of order.

The CHAIRMAN pro tempore. The gentleman from New York has conceded the point of order.

The Chair sustains the point of order for the reasons stated.

Are there further points of order raised against the remainder of the bill?

POINT OF ORDER

Mr. NICHOLS. Mr. Chairman, I have a point of order.

The portion of the bill to which the point of order relates is as follows:

SEC. 793. Of the funds available to the Department of Defense, $200,000 shall be transferred to the Department of Education which shall grant such sum to the Board of Education of the Highland Falls-Fort Montgomery, New York, central school district. The funds transferred by this section shall be in addition to any assistance to which the Board may be entitled under subchapter 1, chapter 13 of Title 20 United States Code.

The CHAIRMAN pro tempore. The gentleman will state his point of order.

Mr. NICHOLS. Mr. Chairman, I make a point of order against section 793, which provides appropriations without authorization, and constitutes legislation on an appropriation bill, which I believe to be in violation of clause 2 of rule XXI.

The CHAIRMAN pro tempore. The point of order has been raised. Is there further discussion on the point of order?

Mr. ADDABBO. Mr. Chairman, I would like to speak on the point of order.

Mr. Chairman, the section is subject to a point of order, but this is a special case. These are children of men and women at West Point who are attending the public schools. If these funds are not allocated, the school will close and there will be no school for these young people to attend.

What we would have to probably do is go to the Military Construction Committee and have a school built for them at a greater cost to the Government than this item. This is a particular case. It has been cleared with the Committee on Education and Labor, and it is not setting any type of precedent. So, I would respectfully request that the gentleman, although the point of order would lie, request that the gentleman withdraw his point of order.

The CHAIRMAN pro tempore. The gentleman from Alabama has raised a point of order against section 793. The gentleman from New York was recognized by the Chair and requested a response from the gentleman from Alabama.

Would the gentleman from Alabama care to respond?

Mr. NICHOLS. Mr. Chairman, let me say to my distinguished chairman that I am certainly moved by the situtation he brings to my attention, but I would have to say to the gentleman that similar conditions would seem to exist in other places throughout the country, including in my own State, in Montgomery, Ala., where we have a situation there that has been brought to my attention.

I regretfully must advise that I would have to keep my point of order, Mr. Chairman.

The CHAIRMAN pro tempore. The Chair controls the time. The gentleman from Massachusetts (Mr. CONTE) will be recognized, and then the Chair will recognize the gentleman from New York (Mr. STRATTON).

Mr. CONTE. Mr. Chairman, I join with the gentleman from New York and hope my good friend, Mr. NICHOLS, would withdraw the point of order. This is an amendment accepted in full committee without any dissenting votes. It is a very, very unique situation and a unique problem. As a result of the Gramm-Latta budgetary restraints and cutting back on the impact aid areas, this little hamlet, which is right outside West Point, was cut back on impact aid. They educate about 150 West Point children out there. It is almost like a private school—it is a private school.

If this money is not in here, then they are going to have to build a school right on the grounds at West Point, which will cost the taxpayers a tremendous amount of money for construction, teachers, and the whole thing.

I hope the gentleman will withdraw his point of order, and then work with Congressman FISH of New York, who represents that district, and with others in trying to reach a solution.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from New York (Mr. STRATTON).

Mr. STRATTON. Mr. Chairman, I thank the Chair. I just wanted to join in the colloquy with my good friend from Alabama. I happen to have in my district the attorney for the school district involved, the Highland Falls school district. In fact, last Saturday I met with the attorney so that he could explain this problem to me. I told him that I would look into it, and when I walked out and picked up a copy of the New York Times, I found that the House Committee on Appropriations had already passed out this section of the bill.

As the gentleman from New York (Mr. ADDABBO) and the gentleman from Massachusetts (Mr. CONTE) have already indicated, this is a very unique situation. Virtually every piece of ground of this town of Highland Falls is controlled by the Federal Government, and I think the only piece that has not been taken over by the military was recently taken over to build a girls' school.

□ 1600

So that there is no possible source of revenue except from what might come from the Academy, and while it is true that there are other situations similar to this, nothing is at least quite as bad or as impossible to solve in any other way than the one at Highland Falls.

But it was my understanding that this was going to be kind of test, with the expectation that in the meantime we look over other situations where the numbers of personnel whose families actually live on the base represent a serious charge against the school districts.

Mr. NICHOLS. Mr. Chairman, may I be heard further?

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Alabama (Mr. NICHOLS).

Mr. NICHOLS. Mr. Chairman, let me say again that I appreciate what my friend, the gentleman from Massachusetts (Mr. CONTE), and my friend, the gentleman from New York (Mr. STRATTON) have had to say. Perhaps it is a unique situation, but I again say that I think we would be establishing a precedent and I do not know just where this would stop.

I again say, with a great deal of reluctance, that I must insist on my point of order. I hate to be put in this position, Mr. Chairman. I will try to assist the Members in any way I can.

The CHAIRMAN pro tempore (Mr. BAILEY of Pennsylvania). The gentleman insists on his point of order, and the Chair is ready to rule.

The Chair will have to rule that, for the reasons conceded, the point of order to section 793 as stated by the gentleman from Alabama (Mr. NICHOLS) is sustained.

The Chair will inquire, are there other points of order to the remainder of the bill?

The Chair hears none.

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto conclude at 5 p.m.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

Mr. KAZEN. Reserving the right to objection, Mr. Chairman, may I inquire, How many amendments do we have remaining?

Mr. ADDABBO. Mr. Chairman, if the gentleman will yield, I believe there are three amendments at the desk.

Mr. KAZEN. Then I believe 1 hour will be enough.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

Mr. COURTER. Mr. Chairman, reserving the right to object, I would just ask the Chair, what would happen, for example, if we debate one of those three amendments—and perhaps there might be another that the gentleman is not aware of—for an hour and it might develop that we have only 5 or 10 minutes to debate the balance of the two amendments; is there any way to apportion the time between those two amendments?

The CHAIRMAN pro tempore. The Chair will state that all the amendments that have been printed in the RECORD are protected under the 5-minute rule, so they would be added to that time.

Mr. COURTER. Mr. Chairman, I know that, but there might be some that were not printed in the RECORD, and I wonder if it is fair to take a great deal of time on one amendment and find we have very little time left to debate two or three others that are not printed in the RECORD.

Mr. ADDABBO. Mr. Chairman, if the gentleman will yield, we know of none. The committee has not received any notice other than those amendments that are at the desk.

Mr. COURTER. Reserving the right to object, Mr. Chairman, the gentleman is saying that he knows of only three amendments?

Mr. ADDABBO. At the present time, that is correct.

Mr. COURTER. Were those amendments printed in the RECORD or not?

Mr. ADDABBO. Yes; they were, those on which we have received notice.

Mr. COURTER. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all debate on this bill and all the amendments thereto conclude at 5:30 p.m.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

Mr. KAZEN. Reserving the right to object, let me ask the subcommittee chairman if he would not take this amendment by amendment. I understand that there may be an amendment on troop reductions, and if that is the last amendment to be offered and we have only about 10 minutes left, it will not be debated sufficiently and it has tremendous consequences.

I would go along with the gentleman on limiting time amendment by amendment as they come up. I would agree to limit the time on them individually.

Mr. ADDABBO. Mr. Chairman, I withdraw my unanimous-consent request. We will be here all night, then.

The CHAIRMAN pro tempore. The gentleman from New York (Mr. ADDABBO) withdraws his unanimous-consent request.

AMENDMENT OFFERED BY MR. ADDABBO

Mr. ADDABBO. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 741. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services under the provisions of section 1079(a) of title 10, United States Code, shall be available for (a) services of pastoral counselors, or family and child counselors, or marital counselors unless the patient has been referred to such counselor by a medical doctor for treatment of a specific problem

with results of that treatment to be communicated back to the physician who made such referral; (b) special education, except when provided as secondary to the active psychiatric treatment on an institutional inpatient basis; (c) therapy or counseling for sexual dysfunctions or sexual inadequacies; (d) treatment of obesity when obesity is the sole or major condition treated; (e) surgery which improves physical appearance but which is not expected to significantly restore functions including, but not limited to, mammary augmentation, face lifts and sex gender changes except that breast reconstructive surgery to correct serious deformities caused by congenital anomalies, accidental injuries and neoplastic surgery are not excluded; (f) reimbursement of any physician or other authorized individual provider of medical care in excess of the eightieth percentile of the customary charges made for similar services in the same locality where the medical care was furnished, as determined for physicians in accordance with section 1079(h) of title 10, United States Code; or (g) any service or supply which is not medically or psychologically necessary to prevent, diagnose, or treat a mental or physical illness, injury, or bodily malfunction as assessed or diagnosed by a physician, dentist, clinical psychologist, optometrist, podiatrist, certified nurse-midwife, certified nurse practitioner, as appropriate, except as authorized by section 1079(a)(4) of title 10, United States Code: *Provided*, That any changes in availability of funds for the Program made in this Act from those in effect prior to its enactment shall be effective for care received following enactment of this Act.

The Clerk read as follows:

Amendment offered by Mr. ADDABBO: On page 54, on line 6, after the word "practitioner," insert the following: "or certified clinical social worker,".

Mr. ADDABBO. Based on the successful pilot program during fiscal years 1981 and 1982, my amendment would provide for the direct reimbursement of certified clinical social workers who provide mental health care. CHAMPUS reports demonstrate that in the majority of States the comparative prevailing fee profiles for social workers' psychotherapy sessions are lower than those for psychiatrists. DOD reports that no quality of care problems have arisen.

My language is identical to that carried in the previous appropriation acts. I urge the adoption of the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New York (Mr. ADDABBO).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. ROUKEMA

Mrs. ROUKEMA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. ROUKEMA: At the end of title VII (page 73, after line 16), add the following new section:

SEC. 794. Notwithstanding the total of the amounts appropriated under title IV, the total amount obligated under that title may not exceed $77,090,233,000. In making reductions in order to comply with this section, no reduction may be made in amounts available for spare parts, repair parts, or ammunition.

Mrs. ROUKEMA. Mr. Chairman, my amendment would impose a $77 billion cap on spending for procurement in fiscal year 1983—a 3.3-percent or $2.7 billion reduction from the committee bill. The amendment would effectively limit overall real growth within the defense bill to 5 percent for fiscal year 1983, in contrast to the 6.2-percent growth contained in the bill.

Even with the proposed reduction, procurement will still grow by 10.3 percent between fiscal year 1982 and fiscal year 1983. It protects our readiness capability by prohibiting reductions in funding for spare parts, repair parts, or ammunition. In addition, the amendment includes no reductions in operations and maintenance, military pay, military personnel, or military training.

My colleagues, we are facing a ticking time bomb ready to explode with the growth of a new set of defense entitlement costs—the bills for which will come due throughout the decade. Thus, we have reached a critical point in determining not only how much to increase defense spending but also how we can best plan for an improved military capability. I would suggest that current plans for a 7-percent real growth in defense spending are unrealistic and irresponsible in light of projected budget deficits in excess of $150 billion.

To bring real growth down to a 5-percent level may very well sound arbitrary. However, it is no more arbitrary than a 7-percent growth level. The key difference between the two numbers is that when the 7-percent level was established, assumptions were made about the economy and inflation which have since been disproven. We are not even close to the balanced budget we assumed 2 years ago.

Furthermore, since the 7-percent growth level was established, we have witnessed a notable lack of coherence, discipline or realism in defense strategy at the Pentagon. Murray Weidenbaum has described the situation well:

Official projections of future military outlays, in real terms, have risen successively during the last 2 years from 5 percent to 7 percent to 9 percent or more per annum. There seems to be little justification offered of the economic feasibility of this sharply upward movement . . . intensive analysis should be given to the military budget, comparable to the tough-minded attitude quite properly taken toward many civilian spending activities of the Federal Government.

Therefore, I propose that, as a compromise, we now face economic reality and establish a 5-percent real growth rate, which still exceeds the 3-percent level that had been operative 3 years ago. Furthermore, we must not lose sight of the fact that, over the past 2 years, we have already achieved a real growth of 11 to 12 percent each year.

In making the necessary reductions in the bill, procurement is the most logical place to start. First, it has been cited on numerous occasions for wasteful and excessive spending. Countless GAO reports provide compelling evidence of major cost overruns on weapons systems. This has also been confirmed by the 1981 Selected Acquisition Report from the Department of Defense; second, procurement has already received more than half of the increase in defense spending in the past 2 years—a 25.1 percent average real growth per year compared to a mere 7.5 percent for operations and maintenance and 11.8 percent for research and development; and third, looking further down the road, the Congressional Budget Office has recently estimated that the procurement account will grow from 26 percent in fiscal year 1981 to 38 percent of the defense budget by 1987. In other words, the procurement account will total more than $150 billion in budget authority by fiscal year 1987—almost double the amount in the current year—largely because of what has been referred to as a "bow wave" or "procurement bulge." This means that, as a result of commitments we have made for weapons in the procurement account in the past 2 or 3 years, the bills will really start coming due in the next few years after production gets underway. By that time, it will be too late to effectively put a stop to the explosive growth in the procurement account.

What all of this means is that, if we are to affect future year budget deficits, we must reduce the growth in procurement now and we must continue year after year until we have a budget that is under control.

My amendment is not an across-the-board reduction per se. Rather, it is targeted at those areas where wasteful and unnecessary spending exist by saying to DOD:

Face up to this responsibility now. Set out a coherent strategy and set priorities or the consequence will be confiscatory high taxes, unacceptably large deficits—or both.

While some would suggest that a $2.7 billion reduction in an overall defense bill of $230 billion is a small amount, I would compare it with some of the important domestic programs whose funding levels are under constant scrutiny. For example, the Older Americans Act costs about $1 billion; Guaranteed Student Loans are funded at $3.1 billion, and Education for the Handicapped receives about $1 billion annually. Compare the $3.7 billion to the $5.5 billion transportation bill recently adopted by the House. Anyway you look at it, we must slow down the runaway growth of the procurement budget or pay the price in the rest of our Federal budget.

In addition to the damage to the economy of uncontrolled defense spending, we must not lose sight of the fact that the American people have become increasingly wary of huge defense increases combined with out-of-control deficits. If quick action is not taken, the resulting backlash could bring in dangerously sharp reductions in defense spending at the expense of manpower, training, ammunition, and other essential components of our readiness capability.

If my amendment is adopted, overall defense spending will still grow by $22.1 billion or 5 percent after inflation. In addition, we will be providing substantial increases for weapons procurement, which should assure our adversaries of our firm resolve for a strong national defense posture.

I urge my colleagues to support this amendment. It is a small, but necessary, step designed to help defuse a ticking time bomb.

□ 1610

Mr. EDWARDS of Alabama. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, first I want to commend the gentlewoman from New Jersey for her genuine interest in what is in the defense bill, her genuine interest in the level of defense spending. It was evident last year that she was greatly concerned about this.

While I may disagree with her final result and the way she has come out, I think the work she has done and the interest she has shown is highly commendable.

Mr. Chairman, when we brought this bill to the floor it had in it cuts of some $18 billion from the President's budget. We cut another billion during the debate on MX procurement.

When we came here we had a bill that cut 9.8 percent in procurement from the President's budget. After the MX was cut the procurement cut is now some 10.6 percent.

My point is, and I would say to the gentlewoman that we have made some substantial progress in the direction in which she would have us go, we are now in the overall bill at a point of less than 6 percent real growth from a point when we had the bill presented to us of some 13 percent real growth.

So while I would not stand here and argue that the committee has done the perfect job, I would argue that as defense subcommittees go we have cut more than any subcommittee has cut from a President's budget in the last 22 years.

So it seems to me that with the work of the committee, supplemented by the work of this Committee of the Whole and the cuts it has made, we have cut an ample amount from the President's budget.

Let me say this to the gentlewoman and to my colleagues: It has been my concern for some time, and I do not mean with this President and this Secretary of Defense, but with Presidents and Secretaries of Defense generally, that too often the Congress ends up trying to make defense policy because we, in our committee, have to try to make serious cuts from time to time in the way we operate.

For example, if we were going to cut out the A-18, as was suggested here yesterday, we do not have the ability in our subcommittee then to substitute some other plane for the 18. The most we can really do is cut, send it back to the Pentagon ultimately, and they may finally make some correction after we act.

My point is that I would hope that the Pentagon in years to come would take a good look at what we have done in this bill, would take a good look at the approach of the gentlewoman from New Jersey, and would try to deal with priorities in a better way, would try to cut out duplication, would try to go about paring down the defense budget in an appropriate way without reducing defense.

This Congress then could do a much better job, I would argue, in dealing with the defense budget.

I think a lot should be done there and I hope that over the next year or so I can maybe take the floor a few days and talk about some of the things that need to be done in the Pentagon.

Again I commend that gentlewoman for her effort but I do believe that the committee has done a yeoman's job in the cause of cutting. I would urge the House to not vote for the gentlewoman's amendment.

Mr. DICKS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as much respect as I have for the gentlewoman from New Jersey, and I think she is a valued Member of the House and someone whom I have enjoyed working with, I really believe that this year our committee has very carefully scrutinized the defense budget. We have cut about $17.5 billion in budget authority, a very substantial cut.

We have made adjustments in outlays and we have taken a very careful look at procurement.

If we give the Defense Department the kind of leeway this amendment provides, what they will do is go back and cut whatever adjustments have been made by the Armed Services Committee and our committee so the actual input from the Congress will be substantially reduced.

What I would suggest to the gentlewoman is that next year she might come to our committee and present us with some areas in procurement that she thinks ought to be considered for reduction and give us the specific rationale rather than calling for an across-the-board cut.

The reason I think that is so important is because I honestly believe that our committee this year has given this bill real scrutiny and I think we have done a good job and it should be supported here on the floor.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. DICKS. I will be delighted to yield.

Mrs. ROUKEMA. I concede the point that the committee has done a commendable job and, as the gentleman knows, I had originally expected to include R&D, but decided against inclusion because of the excellent craftsmanship of the committee in reducing the Pentagon requests.

I would suggest to the gentleman that I recognize this proposal for reduction in procurement is one of last resort. I must emphasize despite the job that has been done by the committee, which is commendable, we must recognize the time-bomb effect of future growth in spending that the committee should take up beginning with its initial discussions with the Pentagon. I cannot stress strongly enough that it is the bow-wave effect or procurement bulge, if you will, that is going to cause us not only to lose credibility with the American people but, beyond that, is going to put us in a position of deficits that will require either drastic cuts in other areas of the budget, drastic cuts in defense, or living with confiscatory taxes, because there will be no way to pay for the bills in 1985 and 1987 in the absence of a very lean budget from the Defense Department.

Mr. DICKS. I would just say to the gentlewoman that I think the way those kinds of decisions are going to be made in the procurement area is to go in and make reductions in certain weapons systems because if you get a cut like this it will be administered across the board and it will mean that we will be able to procure even fewer of each weapon and that would drive the unit cost up and in a way will be self-defeating.

□ 1620

So I think if you are going to make the kind of tough judgments, you are going to have to select those marginal systems in procurement and eliminate them, not do an across-the-board kind of cut that makes our procurement problem even worse.

The CHAIRMAN pro tempore. The time of the gentleman from Washington (Mr. DICKS) has expired.

(By unanimous consent, Mr. DICKS was allowed to proceed for 1 additional minute.)

Mr. DICKS. That is what happens when you do an across-the-board cut; it means that they will just divide it across all of these major systems, and we will have less money for each, and

that drives up the unit cost. So we wind up getting less and paying more.

Again, so what I would recommend is that the gentlewoman come to our committee next year and make some suggestions about other areas in procurement that we ought to eliminate, and we will give the gentlewoman every consideration. But to do an across-the-board amendment I think is a mistake at this point.

Mr. ASPIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, let me get into a little bit of colloquy, if I might, with the author of the amendment, and also the chairman of the committee and the ranking minority member.

As I understand it, the committee has already cut this bill by a significant amount of money. And I think that is very clear. I think everybody ought to understand that the Congress treatment of this 1983 budget is very different from the treatment given the 1981 and 1982 budgets.

Mrs. ROUKEMA. Yes; and that is commendable.

Mr. ASPIN. In 1982, we had a 12.7-percent real increase in defense budget authority over 1981. In 1981 we had a 10.9-percent real increase over 1980. So, 2 years, 10.9-percent growth, 12.7-percent growth. The request for this year was a 13.3-percent real increase, all in real terms, above the rate of inflation. For 1983 this would have meant an appropriation bill of $249.6 billion.

Now, as the gentleman from Alabama pointed out, the subcommittee and the committee cut that amount by $18 billion. That is not counting the amendment of the gentleman from New York, which cut almost another billion dollars yesterday. More than $18 billion was cut out of this bill. In terms of real growth, what are we left with? The original request would have been, had it passed, a 13.3-percent real increase in defense spending over 1982. But that was cut by the committee by $18 billion.

I will ask the chairman or the ranking minority member, what does that leave in the rate of a real growth?

Mr. EDWARDS of Alabama. It leaves a little bit less than 6 percent real growth.

Mr. ASPIN. A little bit less than 6 percent real growth. And the amendment of the gentlewoman from New Jersey would cite it further, to leave a 5-percent real growth; is that correct?

Mrs. ROUKEMA. That is correct.

Mr. ASPIN. In dollar terms, yours would be a cut of $2.5 billion?

Mrs. ROUKEMA. 2.7.

Mr. ASPIN. And it would or would not count the amendment from yesterday?

Mrs. ROUKEMA. Counting the amendment that passed yesterday.

Mr. ASPIN. So it is in addition? Including it?

Mrs. ROUKEMA. Yes, 2.7 in addition.

Mr. ASPIN. In addition. On top of the cut that the committee has made.

Mrs. ROUKEMA. Correct.

Mr. ASPIN. And the $900-plus billion cut by the amendment of the gentleman from New York, it would be additional to the cut of 2.7.

Basically, I think it is a judgment call. I think you can argue it both ways. Clearly the committee has done a much, much better job of overseeing this bill than has been done in other recent years, and the mood is different. I think the gentlewoman would like to go to a 5-percent real growth. The committee is something a little less than 6 percent real growth. I guess that is the issue that faces the committee.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Washington.

Mr. DICKS. I think we have even cut more than the Armed Services Committee; is that not correct?

Mr. ASPIN. Oh, there is no question, you cut more than the Armed Services Committee. But that is not hard. I point out to the gentleman from Washington that if he cannot cut more than the Armed Services Committee, he is blind.

Mr. Chairman, I think you can make a good argument for an amendment like this. I think the issue this amendment raises is an issue we have to address, and that is: What is the rate of real growth that we ought to have in defense spending? What is the proper level of real growth of defense spending that we ought to have that is consistent with getting as strong a defense as we can but also consistent with the other demands for the money and the economic situation the country faces?

I think the gentlewoman has raised a very, very important issue with this amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentlewoman from New Jersey (Mrs. ROUKEMA).

The amendment was rejected.

Mr. ADDABBO. Mr. Chairman, I ask unanimous consent that all debate on the bill and all amendments thereto end at 6 p.m.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: At the end of title VII (page 73, after line 16), insert the following new section:

SEC. . None of the funds appropriated by this Act may be used—

(1) to operate, maintain, or provide personnel support services for the dining room of the Secretary of Defense in the Pentagon;

(2) for the pay of enlisted members of the Armed Forces assigned to duty as personal aides to general and flag officers; or

(3) for the provision of veterinary care for pets of members of the Armed Forces or their dependents.

Mr. GARCIA. Mr. Chairman, this amendment is one that I also offered when we were discussing the armed services bill, H.R. 629, which was cosponsored by about 18 Members of the House. What the bill is primarily aimed at is reducing the flagrant spending practices of the military.

It is interesting that yesterday we talked about close to $1 billion for the MX, and today we talked about the B-1 and several other very high priced pieces of hardware for our Armed Forces. The fact is that there are other parts of the defense budget which I believe we should look at very closely.

No. 1, there is no question in my mind that presently we are subsidizing the Secretary of Defense Caspar Weinberger's private dining room, and what this bill would do would eliminate the subsidizing of personal aides to about 300 senior officers in the armed services and eliminate subsidizing veterinary care for pets of military personnel.

Based on the Congressional Budget Office estimate, this amendment, which is small in comparison, but I think it is symbolic, because we are talking about those services dealing with meals, dealing with pets, dealing with personal valets, we have asked Americans across this country, the poor, the low- and middle-income person to accept cuts in education, to accept cuts in health, to accept cuts in social services. And here we have generals, and admirals, spending taxpayers money to the tune of $6.4 million in 1983 and about $7.7 million in 1987.

Many of my colleagues may think I am nitpicking, I represent one of the poorest areas in the country, and they have been brutalized by budget cuts over the last 2 years. At the same time, we have constantly spent more on defense, defense and more defense. What I am trying to do is to bring some justification into this madness.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I would ask the gentleman from New York, my colleague who I admire greatly and who has done a great job in representing his people, to withdraw his amendment, because I would not like to see action taken on this amendment. It might very likely be voted down.

I would assure the gentleman that this committee has been very interested in this problem. We have carefully

watched it, have held hearings on it, and if there are still abuses, I assure the gentleman today that I will advise my committee and my staff right now to ask that GAO immediately reinstitute an investigation of all of these allegations, if any abuse is found, I will assure the gentleman from New York that this committee will take proper action—as soon as we can—and stamp out any abuses.

□ 1630

Mr. GARCIA. Mr. Chairman, let me say to my colleague and the chairman of the subcommittee, because of my tremendous respect for him and because these days that have been very long and difficult for him, the pressures that have been brought upon him by many forces, I will accept his recommendation. But in doing so, I think what we have done, when we offered the amendment to the original armed services bill, H.R. 6229, in that amendment I had a section dealing with the teletype service and the electronic connections between military bases around the world which were being abused.

I am delighted to say that from that point to where we are today, some of those abuses have already been corrected. And so in deference to my colleague from the State of New York, and knowing that he will look into it, and knowing that he has been diligent, I will withdraw the amendment. And I will say that I, too, will be monitoring it as well. Myself and my staff have looked into this. We put many hours in this issue because we feel if we are asking the poor to pay the price, the military should also pay their dues as well.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield?

Mr. GARCIA. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Chairman, I would ask the gentleman and recommend that his staff meet with our staff and we will jointly monitor this matter.

Mr. GARCIA. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. COURTER

Mr. COURTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COURTER. At the end of the bill (page 73, after line 16), add the following new section:

SEC. 794. Notwithstanding the total amount appropriated under title V for research, development, test, and evaluation for the Army, not more than $3,705,275,000 of such amount may be obligated or expended, of which not more than $259,000,000 is available for the ballistic missile defense (BMD) system technology program.

PARLIAMENTARY INQUIRY

Mr. ADDABBO. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state his parliamentary inquiry.

Mr. ADDABBO. Mr. Chairman, which section is this?

Mr. COURTER. Mr. Chairman, will the gentleman yield?

Mr. ADDABBO. I yield to the gentleman from New Jersey.

Mr. COURTER. This is the amendment on title VII, relative to the ABM system.

Mr. Chairman, the amendment is an easy one to understand. Basically it has to do with a line item in the original budget having to do with the ballistic missile defense system. It is interesting to note that the Armed Services Committee, during its deliberations and as part of its report, recommended that $117,543,000 be deleted in the line item that I am mentioning today.

The reason that ballistic missile defense money was recommended to be deleted by the Armed Services Committee was because at that particular time we were unsure of the basing mode for the MX missile.

Today we are not only unsure of the exact basing mode of the MX missile, but I suppose in a greater sense we are unsure of the missile itself.

It seems to me that if in the wisdom of the Armed Services Committee it was appropriate to reduce by over $100 million the ballistic missile defense system, then in light of the amendment on MX that was adopted yesterday in this body, there is greater logic to embodying that particular wish of the Armed Services Committee today.

Mr. EDWARDS of Alabama. Mr. Chairman, will the gentleman yield?

Mr. COURTER. I yield to the gentleman from Alabama.

Mr. EDWARDS of Alabama. I thank the gentleman for yielding.

Would the gentleman explain to me how much he would leave in the bill for ballistic missile defense?

Mr. COURTER. Yes; I do not have my notes in front of me but I believe I leave approximately $260 million for ballistic missile defense, and I believe as well the ballistic missile advanced technology funds of $143 million. That is untouched.

There are two line items directed to ballistic missile defense moneys. One has to do with advanced technology, which I do not touch, and which the Armed Services Committee did not want to touch. The funds that I touch have to do with systems technology. Basically what we are talking about is a savings of substantial sums of money, because we do not know exactly what type of basing mode the MX will have at this particular juncture.

As I suggested before, the Armed Services Committee requested that money be reduced by exactly the sum that I mentioned, and I know that the other body requested a reduction as well.

The conference, however, came out with a figure between what was suggested by the House Armed Services Committee and what the other body wanted. My amendment places this back to what was originally requested by the House Armed Services Committee.

Unless there is further inquiry from me, I yield back the balance of my time.

Mr. EDWARDS of Alabama. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, we are all furiously trying to find the numbers that are involved here. I have tried to look back through my notes. In looking at my notes, it appears that the President budgeted $727,311,000 for BMD. The authorization committee cut out $350 million. Is that correct?

Mr. COURTER. If the gentleman will yield, that is correct.

Mr. EDWARDS of Alabama. Then we therefore appropriated $377,311,000. I notice staff saying yes.

Now, then, the difference is between $377 million and $259 million.

Mr. COURTER. I think that really means, and I misstated it before—what I am asking for is a reduction of $117.543 million. I think that is the correct figure.

Mr. EDWARDS of Alabama. Would the gentleman kindly advise me again where the $117 million comes from? Why is the gentleman proposing to cut $117 million?

Mr. COURTER. If the gentleman will continue to yield, that figure comes from a line item in the report under ballistic missile defense systems. There are two line items in the budget with regard to ballistic missile defenses. I am taking money from the second one only that deals with systems.

Mr. EDWARDS of Alabama. Well, Mr. Chairman, the committee looked at this thing very carefully. We understood, we thought, why the authorization committee cut $350 million. We believed that what we were doing was going forward with what has generally been called a level of effort for ballistic missile defense being stepped up to the extent that it might in fact be ready somewhere down the road.

But it seems to me that cutting the President's request in half certainly has been sufficient. Unless the gentleman can suggest some more basic reason for proposing the cut, I simply have to oppose it. The subcommittee worked its will on this number. I do not know anybody who has any real argument with it.

Mr. Chairman, may I just read from the notes on the authorization conference which perhaps the gentleman was a member of.

The conferees approved $377.311 million. They also requested a report detailing the BMD role in the selected basing system, the technologies to be utilized and a plan for their deployment. The conferees expect the Army and Air Force to cooperate in the analysis for the requested report.

That certainly does not suggest the need to cut anything further. I would again oppose the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from New Jersey (Mr. COURTER).

The amendment was rejected.

□ 1640

Mr. ASPIN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I just rise to address the committee for a moment to talk about an amendment that I was going to offer to the bill, but will not offer partly because the hour is late and partly because the amendment itself would have some problems against a point of order should one be raised against it; but I think the point raised by my amendment is a very important one.

We have, as our discussion on the Roukema amendment earlier indicated, done a very, very credible job. We—I say we, the members of the committee have done a credible job. We have changed this bill very little on the floor during these last 2 days. The members of the committee have done a very credible job of dealing with the defense bill this year.

The real increase in defense spending over last year is something on the order of a little less than 6 percent, as the gentleman from Alabama has pointed out previously.

However, there is a problem that we have in the defense budget process. That is the massive increases in procurement that went into the budget in 1981 and 1982. What we did was to increase defense spending, particularly in the procurement areas, by very large amounts in those 2 years, such that the real growth of total defense spending was higher in those 2 years than the President's original plan. The President's original plan was for a 7-percent real increase in defense spending every year in the 5 years of his plan; but because inflation was lower than anticipated when those plans were drawn up, we, in fact, had a real increase in defense spending of 10.9 percent in 1981 and 12.7 percent in 1982; very, very large increases. Almost all of that was in procurement, in the area of modernization, modernizing the forces, replacing older equipment with newer equipment, planes, tanks, ships, and whatnot.

There are several difficulties created by doing that this way. One of those is systems' overload. We have under development a whole bunch of systems, which means they are getting less scrutiny by the Pentagon and by the armed services than they otherwise would. A typical case is the problem in the Army. The Army has a major screwup with almost all its procurement programs, the tanks, the helicopters, the armored personnel carriers, et cetera.

When you have so many systems coming down the line, you have cost overruns and problems just because of systems' overload.

The second problem created by jamming so much procurement in those first 2 years is that we are likely to set off sporadic increases in inflation because of bottlenecks created by procurement. You are likely to offset any advantages, such as the reduction in unit costs, by additional inflation. That is the second problem.

The third problem is that 3 years from now, when the production starts on these things, outlays are going to go up.

We have got a time bomb built into these budget authority numbers which is going to mean big increases in outlays in 1984, 1985, and 1986. When that happens, we are really going to have a crunch because unless we have done something about the deficit, we will be desperately looking around for places to cut the budget. At that point we will be faced with these big outlay figures that will stem from these procurement budgets we approved in 1981 and 1982 and, to a certain extent, in 1983.

What that means is that we are likely, in future years, to cut defense in exactly the places where we cut it, unfortunately, in the past, which is in the readiness, the O&M area, the training, ammunition, spare parts, all of the things that can spend budget authority fast. I see really big problems with that.

I rise to draw the attention of the committee to that because, unfortunately, we did not do with the defense budget in 1981 and 1982 what we did this year. I commend the committee.

The CHAIRMAN pro tempore (Mr. PANETTA). The time of the gentleman from Wisconsin has expired.

(By unanimous consent, Mr. ASPIN was allowed to proceed for an additional 5 minutes.)

Mr. ASPIN. Mr. Chairman, I will be happy to yield to other Members; but I just point out that had we done in 1981 and 1982 what we did with the budget this year, we would not be facing this problem; but having not done that, we face a serious problem.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Chairman, I think the gentleman has raised a very important point, because I believe we do face an affordability problem in procurement.

I might suggest to the gentleman that it might be a subject that the Armed Forces Committee could spend a little more time on.

This year alone the cost of the 47 major weapons systems we are procuring jumped from $318 billion to $455 billion according to the Selected Acquisition Report, the SAR. What that indicates to me is that we do have a tremendous problem. We are going to have major increases in these programs and what is going to happen, as we know, is that we are going to cut back on the number of units that we are going to buy and what that does is drive up the cost even higher.

So I believe we are going to have to make some tough hard decisions in procurement—not across-the-board cuts, by the way, but making tough decisions on individual weapons systems or we are never going to get this affordability problem under control.

Now, I have talked to a large number of contractors about the inflation issue that the gentleman has raised. They tell me that they are not seeing a dramatic decrease in the prices that they are getting from subcontractors, but they do tell me that there are a lot more subcontractors available today to compete on the various major systems.

So one of the problems that we have been worried about in the past, the industrial base issue, may be partially resolved.

I think the gentleman is correct. I think this is an area that deserves attention.

I think that when you see over the decades how we used to get 20 or 30 or 40,000 tanks; then it was 20,000 in the sixties and seventies and now in the eighties all we can buy is 8,000 or 9,000. That is because the unit cost has risen so dramatically.

The same thing is true of planes and ships; but I think it is a problem that the Armed Services Committee, quite honestly, is going to have to spend a lot of time addressing and looking at whether the Carlucci initiatives have had any impact at all.

Now, another point is that 60 percent of the procurement today is still done sole source without competition and that is something that the gentleman's committee has jurisdiction over as well. I think having competition in procurement, even competition through procurement can be a valid way of reducing expenditures.

Look, for example, at the example of the F-100. The Congress went ahead and certified going ahead with the F-101X and that created real competition through procurement.

Now we see that Pratt-Whitney has fixes on the F-100. They have come in

with a multiyear program which is going to save us a billion dollars.

So competition, I think, is an important part of the answer. When we have 60 percent of the budget being sole source, we are not going to get competition. We are going to get escalated administered prices.

Now, I would say to the gentleman with respect to the Army, and I spent some time on this, that I think Secretary Ambrose has done a commendable job in trying to get a handle on the three programs that the gentleman mentioned; but clearly, reform of procurement processes, multiyear procurement, competition through procurement, all these things I think deserve consideration in order to get a handle on this, or we are going to wind up just having a few weapons that are very, very expensive and we are going to wind up with a self-defeating situation.

Mr. ASPIN. Mr. Chairman, I appreciate the comments of the gentleman from Washington. I agree with what he said.

The amendment that I was thinking about offering was one that would go back and recapture some of the unobligated balances, some of the money that we had appropriated in previous years but had not yet been obligated in the form of contracts. These unobligated balances have gone up dramatically. It is a subject that I know is near and dear to the hearts of the chairmen of the Appropriations Committees and the person who chairs the Defense Subcommittee of the Appropriations Committee.

It is a problem that is shown in a bulge there. That bulge in unobligated balances is, of course, eventually going to result in a bulge in the outlays that are coming down the line.

I appreciate the comments of the gentleman. I agree with what the gentleman from Washington has said.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. ASPIN. I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Chairman, I want to commend the gentleman from Wisconsin and my colleague, the gentleman from Washington (Mr. DICKS) for everything these gentlemen have said, and wholeheartedly endorse their statements.

I would also like to ask a question of my colleague, the gentleman from Wisconsin. Is it not also true in addition to what has thus far been said that there is a very fundamental problem here and that is a question of making choices at the most basic level on behalf of the Defense Department, choices between some new exotic weapons systems that may have great appeal.

The CHAIRMAN pro tempore. The time of the gentleman from Wisconsin has again expired.

(By unanimous consent, Mr. ASPIN was allowed to proceed for 2 additional minutes.)

□ 1650

Mrs. ROUKEMA. I ask this question because I do not think that we can get to the point that the gentleman has correctly directed us to unless the questions on strategic and conventional new weapons are resolved. Unless those questions are answered, and they can only be answered by the Defense Department.

Some of the critics of my amendment, the gentleman from Wisconsin (Mr. ASPIN) not included, but some of the critics of my amendment have said that we will have to make those choices and target the weapons for deletion.

That is very easily said, but unfortunately the reality of the situation is that when we come on the floor it is rare that we can get a consensus without the approval of the Defense Department and the Committee on Armed Services for any one particular defense system to be deleted.

Therefore, if we are not going to have the backlash that is predicted because of the deficit crunch that we are inevitably facing in 1985 and 1987, we are going to have a very crude kind of cut here on the floor of the House that may be detrimental to the defense posture of this Nation and to our national security, and we are going to find that the American people are not willing to vote into office those people who stand up for a strong national defense.

The gentleman from Wisconsin (Mr. ASPIN) has correctly outlined the problem, but the Defense Department, shows no willingness to make the choices. Therefore we will have to make the choices for them on the floor.

Mr. ASPIN. Mr. Chairman, I say to the gentlewoman if the Defense Department does not make the choices, it certainly makes it a lot more difficult.

Mr. ADDABBO. Mr. Chairman, will the gentleman yield to me?

Mr. ASPIN. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding, and I thank the gentleman and the gentlewoman for bringing these points out.

I agree with the gentlewoman, with my colleague from Washington, and with the gentleman from Wisconsin.

The Pentagon should have gotten the message yesterday on the MX vote that defense spending must be curtailed. The bureaucrats at the Pentagon have almost abrogated their entire responsibility on spending oversight to the military, and if they cannot properly carry out this responsibility the Congress will do it for them on individual programs.

Mr. WRIGHT. Mr. Chairman, the discussions we have had in the last few minutes concerning costs and affordability of weapons systems is very interesting. Nothing could be more relevant to all that we do today.

I want to commend the committee. I believe we have spent 2 days wisely and very well.

Let us see if we can get some of these figures in perspective. Then, having done that, let us see if we can reach any conclusions.

This bill, as it presently stands, appropriates some $230 billion for fiscal year 1983 for military purposes. That amounts to a reduction of some $19 billion below the total amount requested by the administration. The administration requested $249 billion, just almost a quarter of a trillion dollars, for the fiscal year. This bill represents some $5 billion less than the amount contained in the bill approved by the Senate committee and reported to the floor of the Senate.

Yet it represents approximately $25 billion more than the amount that was appropriated last year. This increase of some $25 billion amounts to an increase of approximately 11 percent over last year's defense budget.

We could quarrel about what that means in real terms. I do not know precisely how we attribute the cost factors of inflation. I think this bill may represent an 8-percent increase in real terms.

What can we conclude from these figures? I think the first thing we have to conclude is that this is an adequate figure. Obviously, the Nation needs an adequate defense. Obviously, we cannot afford to place ourselves at the mercy of those who would have no mercy. In a world in which only the strong may stay free, we have the responsibility to be strong.

It should be adequate certainly to increase last year's figure in real terms by some 8 percent—particularly when other expenditures are being rather severely cut.

The second thing I think we have to conclude is that this is just about all we can afford under the present circumstances. I think what was done by this committee yesterday was wisely done. The reductions are prudent reductions. Yesterday I talked with the President and he asked me to do what I could to see that he was not embarrassed. I told him that I felt sure the House could not embarrass him; that I did not believe we were going to leave him bereft in his negotiations with the Soviet Union for mutual arms reductions, and I do not believe that we have done that.

I do think that what we are spending is about all we can afford as a Nation. When we are spending close to a quarter of a trillion dollars for defense, with only 67 or 68 percent of

our industrial capacity operating, when almost a third of our productive capacity lies idle, when one family out of four has someone who is either unemployed or who is underemployed, it would be difficult to justify a larger increase for military spending.

If you put into perspective what we are doing increasing defense by 11 percent at a time when we have had two successive reductions in educational programs amounting to some 28 percent, it takes on some meaning. We need to recognize that we are not going to be preeminent in defense in the world if we ignore the long-term needs of education.

Last year our American colleges graduated some 54,000 students in engineering, scientific, and mathematical disciplines. At the same time, the colleges in Japan, with only about half of our population, were graduating some 77,000, and the Soviet Union was graduating some 300,000.

We are not going to be first in defense, I do not care how sophisticated our weapons systems are, if we do not have the trained and skilled manpower and womanpower to design those systems, to operate and maintain those systems. The strongest thing we have ever had going for us is the human equation, the human resource. So we dare not ignore that.

Then I think the third thing that has to be said is that these ever-escalating costs in this newly escalating arms race emphasize once again, and they should emphasize with a clarity that none of us can fail to recognize, the need for us to negotiate verifiable mutual reductions in this balance of terror.

The world cannot afford it. The world teeters on the brink of economic crisis. There is a worldwide depression, not confined only to this country. It makes no sense at all for the people of the Soviet Union and the people of the United States together to be spending half a trillion dollars on the implements of destruction when people in both of our countries go hungry. That is insanity.

The CHAIRMAN pro tempore. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

(By unanimous consent, Mr. WRIGHT was allowed to proceed for 3 additional minutes.)

Mr. WRIGHT. Mr. Chairman, in an enlightened age such as ours, it seems to me the President should be able to take what we have done here and castigate neither the Congress nor our adversaries across the world but use it instead as an inducement to sincere negotiations. He should say to the Russians, "Look, we are demonstrating two things to you. We are demonstrating first that we have the capacity for war if necessary; but second, we are demonstrating that we have the will for peace. Yes, we are continuing with the research and development on this new weapon, but, no, we are not deploying that weapon immediately because we do not want to do something today that menaces you at the moment we are asking you to reduce your arms in exchange for our reductions."

Just think what untold good could be accomplished for the whole world in the entire vast, yawning future if the President of the United States were able to say to the Soviet Union, "Look, together we are spending half a trillion dollars this year on nonproductive military power because we are afraid of what you would do to us if we did not, and presumably you are afraid of what we would do to you if you did not. Would it not make a lot more sense if each of us were to reduce our defense expenditures by, let us say, 10 percent, and put it into a common fund to be administered not by us and not by you, but by some impartial international agency to feed the hungry, clothe the naked, educate the illiterate, care for the sick of the world?"

If we were to do that and if they were to do it for a decade, no two nations in the history of mankind would ever have made the contribution to the human race that theirs and ours jointly could make.

Do you know what that amount of money contributed for a decade to the good and ennobling things that elevate the human race could create? It could pay for a potable water supply, a sanitary sewage disposal system, a first-class hospital and a first-class school in every town in the world of 10,000 people and more. How much good could be achieved if we, the United States, who believe in peace and in freedon and never believe in menacing anyone else on Earth, might use this occasion to set in motion a peace initiative! We could say to the Soviet Union, "We really do not need any more weapons. We both have enough to kill each other 3 or 4 times over. We do not want to kill your children; we do not think you want to kill our children. Why do we not sit down and reason together like rational human beings, admitting that we disagree on economic systems, but that we do agree that the future of humanity would be better served by our working together than by our continuing in beligerent confrontation and hostile rhetoric against one another."

□ 1700

AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN: Page 73, immediately after line 16, insert the following new section:

SEC. 793. None of the funds provided in this Act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equipment, military training or advice, or other support for military activities, to any group or individual, not part of a country's armed forces, for the purpose of assisting that group or individual in carrying out military activities in or against Nicaragua.

Mr. HARKIN. Mr. Chairman, members of the Committee, news reports of late coming out of Central America and widely distributed in the U.S. press and the press abroad clearly indicate that we are becoming ever more mired into the jungles and swamps of Latin America, and in a way that behooves us here to call a halt at this time to what we have been doing in Central America. In Honduras, we are arming the old Somocista national guardsmen who have encamped along the Nicaraguan border and now, with our aid and support and with the support of the Central Intelligence Agency and our Department of Defense through the CIA, these Somocistas are armed incursions into Nicaragua and already destablizing further a very tenuous situation in that Central American region. The fact that we are involved is no longer even open to question. The New York Times today in their editorial headlined their editorial by stating it is, "The worst kept secret war."

The Newsweek magazine, in their cover story, on November 8, 1982, called it, "America's secret war target—Nicaragua."

Let me just quote both from the Newsweek article and from another source as to the linkage involved in our supporting the old Somocista guardsmen. The Newsweek article starts off by talking about several men standing at a bar in Tegucigalpa, and I quote:

> The smoky bar in Tegucigalpa was a cousin to Rick's Café in "Casablanca," a nightly gathering place for the dangerous and the desperate in Honduras. Squeezed into a corner one evening last week were four Argentine military advisers, speaking machine-gun Spanish and occasionally stealing furtive glances around the room. A half-dozen Americans stood in a loose line at the bar, drinking beer and talking too loudly about guns. In the center of the room, grouped around a table that listed far right, were seven men drinking rum. One of them wore a gold earring. He explained that the seven men were Nicaraguan exiles who belonged to various factions of la contra, a band of counterrevolutionaries trying to topple the leftist Sandinista regime. They were ready to move toward Managua, one of the men said. "We just need to hear from The Boss that it's time to go." Who was The Boss? The man with the earring was impatient with stupid questions. "He's the man you call 'Mr. Ambassador'."
>
> The envoy in question was John D. Negroponte, the American ambassador in Honduras. Official sources told Newsweek last week that Negroponte is overseeing an ambitious covert campaign to arm, train and direct Nicaraguan exiles.

Earlier this fall a camera crew, a film crew from the Canadian Broadcasting Corp., was in Honduras, tramping around the hills. They were captured by some counterrevolutionaries and taken into one of the Somocista camps. It was the first time that a group of newspeople had ever entered one of the Somocista camps in Honduras. They were held overnight and released the next day. They wanted to film, but they were not allowed to do so.

The person who filed the story with the Canadian Broadcasting Corp., Gavin Hewitt, said that he observed that "the camps were efficient, most of the men carried American-made M-16 rifles, they had radio communication with other camps, an indication of the degree of organization." Then, they stayed overnight, and the next day they met the commander of the base. "He introduced himself as Commander Lopez. He said the decision regarding the filming would be communicated through the usual channels, which, to our surprise, he identified as John Negroponte, the American Ambassador. We were later to be introduced to a German businessman called Gunther Havig who confirmed the embassy link. Mr. Havig was clearly of some seniority. He indicated over lunch that they had plenty of money which he said everyone knew was coming from the CIA. It also became apparent that we would never be allowed to film."

Time magazine, also in a separate story again talked about what was going on in Honduras in our arming the old Somocista guards. I quote again from the Time magazine article of December 6:

> But at some point, according to a U.S. intelligence source in Honduras, the U.S. started to lose its grip on the entire effort and its goals. The F.D.N., for one thing, is interested not just in intimidating the Sandinistas but in starting a real war against Nicaragua. "We will start to pick up the tempo before December," predicted an F.D.N. official. "We will be in Managua by spring."
>
> War or no war, the operation has already had unfortunate side effects on Honduras' fragile democracy. After years of military rule, the Hondurans elected Roberto Suazo Córdova last January as their first civilian President since 1971. The troubles in neighboring countries have given Chief of the Armed Forces Gustavo Alvarez Martinez an excuse to extend his authority.

The CHAIRMAN pro tempore. The time of the gentleman from Iowa has expired.

(By unanimous consent, Mr. HARKIN was allowed to proceed for 5 additional minutes.)

Mr. HARKIN. So, we find that the elected civilian government in Honduras has given way to the military once again. But, I guess the real mistake that we are making is not only in doing something that is clearly illegal, but in siding with perhaps the most hated group of Nicaraguans that could exist outside of the borders of Nicaragua, and I talk about the Somocistas. Again, I quote from Time magazine:

> In spite of all its efforts, Washington, ironically enough, may be backing the wrong contras. "They are making the biggest possible mistake," observed a leading opposition figure of the Sandinistas in Managua. "The Nicaraguan people are first anti-Somocista, and only secondly anti-Communist."

Again, I would quote from the Newsweek article in showing that the people that we are supporting are the ones that, on the one hand unify more than anything else the Sandinista directorate in Nicaragua; and second, that are those that are really antithetical to our own beliefs and what we want in Central America.

As a result, according to this article, Mr. Negroponte is supporting a group of vicious, cutthroat murderers: "There is no question that Nicaragua is ripe for a change," said one European observer in the region, "but the United States is supporting the only wrong, the only truly evil alternative."

Let me just quote then, last, from the New York Times editorial of today, "The Worst Kept Secret War."

In the Times editorial, it correctly points out that:

> These are, to begin with, illegal activities. The Neutrality Act expressly forbids the raising of secret armies to unseat a regime that the United States recognizes as lawful. Flouting that law is no way to rally the hemisphere against meddling by Cuba and Nicaragua in other nations' conflicts.
>
> Even if these secret armies were never meant to be used in a big way, they are a dangerous instrument of diplomacy.

What the Times is getting to here is quite possibly that the Contras, the Somocista Guards, were armed by the CIA in order to interdict the alleged flow of arms, from Nicaragua to El Salvador. What the Times has pointed out is, even if you do that, if you give people with a political grudge a gun and the means to fire it, if they do they are impossible to disown once they start. Even if they do not, they are extremely difficult to disband.

□ 1710

What has happened is that perhaps on one pretext of interdicting the supposed arms shipments from Nicaragua to El Salvador, we have armed the old Somocista Guards. They now have at least 10 camps. They have somewhere between 5,000 and 10,000 people. The magazine reports differ, but we are told that between 50 and 200 CIA advisers in Honduras are working with them.

What they are doing is nothing more or nothing less than provoking a conflict with Nicaragua. They have crossed the border into Nicaragua. They have committed atrocities in the small town of San Francisco del Norte. They invaded the town and took some of the town's people down to the local square and slashed their throats, and after they withdrew, they identified themselves proudly as counterrevolutionaries, members of the old Somocista Guard, and they swore that they would be back to topple the Sandinista regime.

Let me just conclude by saying that regardless how one may feel about the Sandinistas and how one may feel about the direction the Nicaraguan Government has been going, what we are doing, in arming and supporting the old Somocista Guard along the Honduras border is, No. 1, clearly illegal. No. 2, if you do not like the Nicaraguan Government, there probably would be nothing you could do to strengthen their hand better than supporting the very hated Somocista Guards along the Honduran border. And, third, if nothing else, what my amendment does is it says that we have to stop all of the arms and all of the money used to arm and support these people who are not part of the legitimate armed forces, but are truly the remnants of the evil, murderous National Guard.

In the name of all that is right and just and decent, we should end our involvement with this group.

My amendment does not speak to the Honduran military, not at all. It only speaks to arming those individuals who are not part of the country's regular armed forces and who use those arms to invade, to go into Nicaragua to seek to disrupt the Nicaraguan Government.

So, Mr. Chairman, I ask support for this amendment to prevent our becoming further intertwined in the jungles and swamps of Central America.

Mr. LEACH of Iowa. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I am pleased to join my distinguished colleague from Iowa (Mr. HARKIN) along with the distinguished gentleman from Minnesota (Mr. OBERSTAR) in offering this amendment to prohibit U.S. support for offensive military or paramilitary operations against the people and territory of Nicaragua.

The legislative record should be clear at the outset that this amendment is not intended to interfere with standard U.S. intelligence gathering operations in Central America nor is it intended to prevent U.S. support to countries in the region if confronted by a military attack from Nicaragua. It is important, as well, to point out that the amendment is not directed against U.S. support for efforts by the Honduran Government to interdict any illegal arms traffic flowing from Nicaragua to other countries through Honduras.

The amendment is, however, specifically directed against the type of activity which has been widely reported in

the U.S. press and on which the administration refuses to comment. Those activities, which allegedly include the arming, training, and advising of Nicaraguan exiles by American personnel, reach far beyond any reasonable mandate of intelligence gathering or defense. Instead, much of the publicly available evidence appears to suggest that this administration, weary of its consistently unproductive bilateral diplomatic efforts, is now flirting dangerously with an overt—and arguably illegal—interventionist policy toward Nicaragua, albeit by covert means. Great power interventionism, as international law and the lessons of history for both East and West demonstrate, is an idea whose time on the clock of history has passed.

Interventionist activities are in direct contravention of international law and the legally binding treaty obligations of the United States under both the Charter of the United Nations as well as the Charter of the Organization of American States.

For example, Article 2 of the United Nations Charter states:

All Members shall settle their international disputes by peaceful means in such a manner that international peace and security, and justice are not endangered. All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any State * * *

Article 18 of the OAS Charter sets forth similar obligations:

No State or group of States has the right to intervene, directly or indirectly, for any reason whatever, in the internal or external affairs of any other State. The foregoing principle prohibits not only armed force but also any other form of interference or attempted threat against the personality of the State or against its political, economic, and cultural elements.

Legality aside, it would appear hypocritical for the United States to charge the Nicaraguan Government with the export of subversion and terrorism if, in fact, the United States is engaged in much the same type of activity against other nations, such as Nicaragua. Such actions, when undertaken by a superpower such as the United States, are no less illegal under international law than when undertaken by a much smaller and poorer nation like Nicaragua.

The arguments against interventionist policies are not only philosophical and legal; they are deeply practical. Great power interventionism as the last two decades have taught us, is simply counterproductive. This was the final lesson of the Vietnam war and the lesson the Soviets are learning for themselves in Afghanistan today. The desire of peoples to make their own mistakes, to preserve and advance their own culture and way of life is unquenchable.

The administration is erring profoundly in seeking to apply military solutions to the political and economic problems of Central America. American military intervention is exactly what the leftists in Central America want in their own efforts to more broadly popularize their own causes of violence in the name of Marxism. U.S. military interventionism—either covert or overt—offers extremist elements the opportunity to turn a largely Marxist oriented campaign into a nationalist crusade against "yankee imperialism."

U.S. military interventionism not only broadens the popular base of leftist groups but, by example, helps legitimize the use of violence and armed force to accomplish political objectives. In addition, U.S. support for insurgent activities against the Government of Nicaragua undermines the moral underpinning of U.S. policy against the use of force by armed insurgents elsewhere in Central America. Violence simply begets more violence.

The apparent decision by the administration to resolve through force what it is unable to accomplish through diplomatic channels bodes ill for the future of U.S. foreign policy. It strikes many of us that long-term American interests in Latin America are better served by an increased emphasis on economic aid instead of military assistance; by increased reliance on Peace Corps volunteers distributing food surpluses rather than the CIA training secret armies.

Ironically, just as the Cubans are providing weapons with destabilizing intent to insurgent groups in Central America, so they are sending doctors, nurses, teachers, and technicians to countries like Nicaragua. It appears as most graphically demonstrated in these latest developments involving covert action, that the United States is responding to the Cuban-Nicaraguan challenge too exclusively with the sword. The administration risks making a grave mistake if it fails to recognize the error of "staying the course" of military involvement in Central America and continues to overlook our own Peace Corps as perhaps our most potent tool for protecting and advancing U.S. interests in the region.

Sadly, U.S. support for covert military operations appears to have provided a convenient pretext for the Nicaraguan Government to impose heavy restrictions internally on the free exercise of political and civil rights by the democratic elements remaining in Nicaragua, both in the business as well as the political community. Ironically, the administration has jeopardized the prospect for achieving its ultimate objective in Nicaragua of replacing the current Marxist regime with an authentically democratic one by its choice of covert military means to that end. By engaging in confrontational action and rhetoric, the United States is actively contributing to the disappearance of the last democratic hope for that country.

Finally, U.S. covert military involvement in Central America raises again troubling questions related to the authorities of the executive branch under the War Powers Act. The War Powers Act may not precisely have been intended to apply to situations where retired U.S. military or intelligence officers are used in paramilitary or military operations. But the legislative history of the War Powers Act documents the concern that the law be

* * * to prevent secret, unauthorized military support activities and to prevent a repetition of many of the most controversial and regrettable actions in Indochina. The ever deepening ground combat involvement of the United States in South Vietnam began with the assignment of U.S. "advisers" to accompany South Vietnamese units on combat patrols; and in Laos, secretly and without Congressional authorization, U.S. "advisers" were deeply engaged in the war in northern Laos. (Senate Report 93-220)

Clearly the situation confronting the Congress today raises the question as to whether the administration is committed to a policy in Central America which may lead to a violation of the spirit if not the letter of the War Powers Act. Just as the assignment of official U.S. military personnel to places of foreign combat carries significant risks, so does the conduct of secret wars by secret armies. We can hope that the convert activities of our CIA or Defense Department do not provoke a full blown military response from the Nicaraguan Armed Forces. But hope under the circumstances is not enough.

Congress should act today to hold the administration accountable for its activities under the War Powers Act as well as under the formal treaty obligations of the United States.

Mr. OBERSTAR. Mr. Chairman, I am proud to be associated with this responsible effort to prevent the prolongation of a serious foreign policy blunder by our country.

Commonsense demands that we reject a policy of destabilization directed against the Government of Nicaragua.

That policy will result in diplomatic disaster for the United States, and worse, potential war and further suffering for the people of Central America.

A war between Honduras and Nicaragua will mean tragedy for the people, and the likely end of the developing democracy in Honduras.

A policy of destabilization offers no goal beyond the end of Sandinista Nicaragua. I can see no benefit in these operations for the people of the

United States or furthering their democratic principles.

It is absurdly inconsistent that, as the United States continues to support militarily a regime in El Salvador responsible for gross human rights violations, we would spend taxpayer dollars to fund operations directed at destabilizing a government with whom we have diplomatic relations.

The Sandinista government is far from perfect. It is not the government which I would choose, nor is it one under which I would like to live. However, the Sandinista government is totally lacking in the bloodthirstiness characteristic of the military regime in El Salvador.

A mindless insistence upon unquestioning support for rightwing politicial causes in Latin America has undercut American interests in that region. Covert operations directed against Nicaragua will destroy the remnants of pro-American elements within that country. It will strengthen hard line, anti-American elements.

An option of the Harkin amendment will place us on record as opposing the absurdity of current administration policy.

Peace is the proper objective. Covert destabilization is not the means. The key is negotiations—a dialog with the intent to terminate hostilities with a negotiated settlement.

Clearly that is what is needed between Honduras and Nicaragua today. Their border skirmishes threaten to launch a regional war. There must also be larger regional discussion involving those countries and El Salvador to agree on ending all acts of subversion by one country against another.

None of these negotiations, however, will lead to a lasting settlement in my judgment unless there are internal negotiations in each of El Salvador, Guatemala, and Nicaragua.

In El Salvador, a negotiating process must include at least elements from the present government, including the army, and the FDR-FMLN. In Guatemala, they must include the government, political parties not presently associated with the government but still in Guatemala on the one hand, and the guerillas (URNG) and allied political groups on the other. In Nicaragua, a similar process would have to include the Sandinista, led government and both exiled and in country democratic opposition groups. It is unreasonable to expect the people of Nicaragua at this time to accept the reemergence into politics of forces associated with former President Somoza.

These are the players and yet in each of the countries, one side or another will not sit down and even begin to talk. In El Salvador, the Government backed by the Reagan administration will only discuss how to allow the parties tied to the FDR-FMLN to participate in elections if their forces lay down their guns. No mention is made of the army and the security forces which would keep their guns and who over the course of 3 years have killed tens of thousands of the supporters of these groups, the precinct workers of these parties.

In Guatelama, the Government offered dialog. It is now silent. The guerrillas there and their associated political groups have always rejected the offer.

In Nicaragua, the Government has on and off dialog with political parties still inside the country, but routinely announces it will not negotiate with Eden Pastora, the leading symbol of resistance. Pastora has yet to propose negotiation.

The reason for resistance to negotiate is clear. In Latin America today, a negotiated settlement will receive widespread international support only if the solution includes elections. The holding of free and genuinely open elections and establishing an interim neutral government to preside over them would involve in every case some surrender of power or the prospect of holding total power.

The Army of El Salvador has ruled that country for 50 years. It has shared some little power with some civilians. But it does not want to risk a government coming to power with the left having real authority. The guerrillas in Guatemala apparently desire total victory and are not willing to give up that dream. The Sandinista leadership apparently has decided that although the moderates were useful in achieving victory, there is no reason to let them truly compete for power in a democratic manner.

Those are unacceptable positions. Those who hold them are the obstacles to peace in Central America. They are the ones who are opposing political solutions and democracy.

To promote negotiations leading to elections should be the policy of the United States. To encourage others to risk their power or their dreams of power in the democratic process is what our diplomats should do.

And we too should be willing to lose some of our influence by negotiating with the Cubans an agreement on both our sides to limit, if not eliminate, advisers and military aid going to the region.

That is how to achieve peace, not covert operations.

Mr. Chairman, I can think of nothing more mindless or insensitive to international relations than a policy of the United States of giving military support for a band of warriors to invade another country with which we have diplomatic relations.

How can the administration profess on the one hand to be advocating peace through this Caribbean Basin Initiative, and on the other hand, be instigating war by arming and training a group of people committed to the violent overthrow of a government? In this country we would call them revolutionaries and criminals, but when it is a matter of invading Nicaragua, the Reagan administration, provides support and says that this is in the interest of democracy. What I see is a dangerous policy leading us toward military confrontation in a region of the world that is already explosive, that is torn with internal conflict, and where we are surely perpetrating war among countries which need not war but peace, which need to feed the hungry and need to rebuild their domestic economies.

A war between Honduras and Nicaragua will surely be the result of our policy of arming and training the Somocistas and encouraging them to a violent return to their native land, and it will also mean the likely end of developing democracy in Honduras. There is no benefit to the United States in that policy. Surely there is no benefit to the people of Nicaragua or to the people of Honduras.

The gentleman from Iowa (Mr. HARKIN) and I visited El Salvador and Nicaragua earlier this year. Businessmen, some of whom were not in support of the Sandinistas, said to us: "When your government talks about arming Somocistas for an invasion of our country, we believe them. You invaded us three times. We take that threat seriously. But if that should occur, remember that we will fight for our homeland whether we agree with this government or not."

I can only recall a parallel in 1948 in Yugoslavia. When Stalin wanted to crush Tito, the Yugoslav people resisted and they said, "We may dislike Tito 100 percent, but we hate the Russians 105 percent and we will fight them to the last."

We have not endeavored ourselves to the peoples of Central America and of the Caribbean. We should have, but we have not, and we will engender greater resistance by following this madness of a policy. There is no benefit in it for us.

We should be putting this $17 million, or however other millions are to be committed to military intervention in Nicaragua, to a peaceful purpose. We could build up the developing cooperatives that we visited. We could build up the rural areas of that country that need to grow crops and provide food and income for their people. We could build up the rural health clinics. But let us not arm others for an invasion of that country. It will be a worse mark on the honor and record of America in Central America than anything we have done thus far.

Mr. Chairman, I urge support of the Harkin amendment.

Mr. DELLUMS. Mr. Chairman, I rise in support of the amendment to prohibit the use of funds to wage clandestine warfare against the Government of Nicaragua.

Following the widespread publicity of the CIA's involvement in the overthrow of democratically elected Salvador Allende in 1973, the Congress empowered committees to investigate U.S. intelligence activities. In analyzing CIA covert operations, the committees asked the following questions: Are covert operations important to the national security of the United States? Are covert activities antithetical to our principles and ideas as a nation? Has the Executive resorted to covert actions to avoid bureaucratic, congressional, and public debate? If revealed, will covert activities damage the reputation of the United States throughout the world, and limit our capacity for ethical and moral leadership?

I believe that if these questions are asked about President Reagan's covert project to destabilize or overthrow the Government of Nicaragua, the American people and the Congress would overwhelmingly reject it.

Covert operations against the Government of Nicaragua cannot be justified by strict national security criteria. The Sandanista government has never committed a hostile act against the United States or U.S. citizens. Our intelligence sources have not identified a single Nicarauguan fighting in El Salvador, and the evidence of major material support for the insurgents is not compelling. Furthermore, the Government of Nicaragua has repeatedly expressed its willingness to negotiate with the United States and the Government of Honduras to reduce regional tensions and cooperate in patrolling its borders to stop further arms which may flow through Nicaragua.

Indeed, covert operations themselves may endanger U.S. national security. The militarization of the Honduran border and the involvement of the Honduran military in cross-border raids threatens to engulf the entire region in warfare. Covert operations have undercut the position of pro-American moderates in Nicaragua, and strengthened antidemocratic elements in Honduras as well.

In addition to being unjustified in terms of national security, the techniques and methods of the present covert operation against Nicaragua are incompatible with our principles and ideals as a nation. Arming, training, and supporting the degenerate and hated remnants of Somoza's National Guard is a fundamental perversion of everything our country stands for.

Finally, it seems clear that covert operations were undertaken to avoid the democratic process in our own country. Public opinion polls, newspaper editorials, and grassroots activities indicate overwhelming opposition to President Reagan's Central American policies. The Congress is increasingly reluctant to appropriate additional funds for military aid to El Salvador's armed forces. The Congress and the American people favor a mediated settlement to Salvador's bloody struggle, and have no desire to extend that struggle to other countries in the region.

The Church committee report in the other body concluded that:

> Given the open and democratic assumptions on which our government is based, the Committee gave serious thought to proposing a total ban on all forms of covert action . . . The most basic conclusion reached by the Committee is that covert action must be seen as an exceptional act to be undertaken only when national security requires it.

I believe that there is no justification for the CIA's exceptional act against the Government of Nicaragua, and urge your support for an amendment to prohibit it.

□ 1720

Ms. MIKULSKI. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the amendment for several reasons. I have been to Honduras and I have been to Nicaragua and feel that I have some understanding of this issue.

However, the first reason that I want to support the amendment is that our covert activity in the Honduran-Nicaraguan area violates an international agreement; it violates the OAS Charter, article 18, that clearly states that—

> No state or group of states has the right to intervene directly or indirectly for any reason whatever in the internal or external affairs of any other state. The foregoing principle prohibits not only armed force but any other force of interference or attempted threat against the state.

So we, in my estimation, are in violation of that international agreement.

Second, because of our activity, Honduras is being destabilized. Honduras has finally had the first democratic government in over 10 years.

While Honduras has many problems and they are struggling to deal with those problems, we need to identify with the aspirations and needs of the Honduran people and follow the program suggested by the gentleman from Minnesota (Mr. OBERSTAR). We need to talk about land reform. We need to talk about health care, helping in education and the development of business. Yet, instead, the biggest business we are funding is military interventionism.

The military, strengthened by escalating American assistance, has used regional turmoil as an excuse to extend its authority.

The Chief of the Armed Services, General Alvarez, has obtained constitutional changes that would broaden his power. Honduran politics has been polarized and there has been increasing reports of human rights violations and rightwing death squad activity.

At the same time the Honduran Foreign Minister was speaking of peaceful accommodation with Nicaragua, General Alvarez, thanks to our encouragement, has declared that Honduras is locked in a war to the death with Nicaragua and called for a military alliance grouping Honduras with El Salvador, Guatemala against Nicaragua.

Now we are about to precipitate a regional war in Central America. I do not want to see that and I do not want to see us cause another Vietnam.

At the same time I would like to speak about Nicaragua. I visited Nicaragua and my concerns there are not that the Sandinistas are some type of saints, that we should overlook some of the problems that they have had and the problems that they have caused, nor is the junta some group of people on a religious mission or crusade.

However, one thing we do know about Nicaragua is that Somoza was a bully and that he was a crook and that he was a thug and that we supported him. As a result, the only way the Nicaraguan people could have an opportunity to have a chance for life in their own country was to launch a national liberation effort, and that they did.

When the war was over, what did we offer to the Sandinista government to stabilize itself and grow? I asked the Nicaraguans what we offered in the area of health care, something that I have a special expertise in. I found out that while the Cubans brought in vaccinations and immunizations and sent in nurses-midwives and physicians to help people in the barrios, there is only a small band of Maryknoll nuns doing that from the American side with any American identification.

What we were going to send in is military medical personnel from Panama to run their hospitals.

Well, would that not just be swell, our military guys running the Nicaraguan hospitals. Maybe they could have told them how to order a CAT scanner and get third-party reimbursements. But it certainly did not help the Nicaraguan people where one-third of the children under 5 die because of polio, diarrhea, and other problems.

What we should be doing again is identifying with the struggles of the people. The reason there are national liberation movements is because we support the bullies and we support the bullies because they say they are anti-Communist.

The reason you have national liberation movements that are to the left is because they are the only ones identifying with the needs of the people.

We made this mistake in China 40 years ago. We made this mistake in Vietnam and we made it throughout Asia. For God's sake, let us not make this same mistake in Central and Latin America.

I urge the adoption of the Harkin amendment and yield back the balance of my time.

Mr. JOHN L. BURTON. Mr. Chairman, I move to strike the requisite number of words and I rise to speak in support of the amendment.

This really I hope will not be read as an historic day. It will be read as an historic day if we vote down the Harkin amendment because we will be opening up ourselves to another Vietnam.

This will not happen next year and it will not happen the year after, but sooner or later, as we arm Somoza's friends—and he was a thief and he was a thug and he was a fascist and he was corrupt. He took out of that country with a lot of American taxpayers' dollars that were given in aid to the people of that country and not to him personally, but he took them unto himself personally.

We will have American advisers in there. I would remind my colleagues that the war in Vietnam started in 1954 with 36 airplane mechanics.

JOHN STENNIS stood on the floor of the U.S. Senate and said when you send these mechanics you will send the American flag. When you send the American flag you send an American commitment and you send our honor and certain things will happen.

If my colleagues read the speech by the distinguished Senator from Mississippi, it looks like a history of Vietnam except it was written in advance.

If we do not stop the CIA now from engaging in covert activities to overthrow a government of another country we will be involved not just only in Nicaragua but throughout Central America because we do not somehow understand that they are no longer banana republics owned by the United Fruit Co., but they are sovereign nations that are run by the people of that country.

They may not be run in a way that we would like but then this administration is not run in a way that people in this country like. The Carter administration, Democratic administrations are always not run in a manner that the Republicans like. But that is just the way of life.

But it is their country and it is their government and we have no business screwing around over there, causing trouble that is going to lead this country into military adventurism. It will start with a covert activity and it will progress to a paramilitary adventure. We will end up in a full-blown military adventure because you cannot defeat another people in their own country and that is something we should have learned.

I strongly urge the people of this body of this committee to support the Harkin amendment. All that it really says is that the CIA, that rogue elephant, has to obey the law. They are taking your constituents' tax dollars and my constituents' tax dollars and starting trouble down in Central America. I did not give them that authority and you did not give them that authority and the people of this country, everyone is worried about deficits in spending and balanced budgets.

Let us chop off $17 million or $20 million here and save it. It is the wrong thing for this country of ours to be doing, to be messing in the affairs of another sovereign nation.

I would strongly urge my colleagues to support the Harkin amendment.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I am happy to yield to my friend from Iowa.

Mr. BEDELL. Mr. Chairman, I join my colleagues in support of this amendment.

When will we learn from our past mistakes of military intervention?

When will we learn that the people of the world are not stupid?

I object to Castro's effort to bring down governments through military means.

I believe it is a legitimate objection.

But will someone please tell me how we can possibly say that it is wrong for Castro to do something, which is perfectly all right if it is done by the United States of America.

I commend my colleague TOM HARKIN for this amendment.

Mr. JOHN L. BURTON. I thank the gentleman and yield back the balance of my time.

□ 1730

Mr. DORGAN of North Dakota. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is a very important issue, and I do not pretend to be an expert in foreign affairs. But I have watched the proceedings in Congress for many, many years on foreign affairs issues and I have become rather distressed with what goes on. I want to speak on this issue because I think it is critical to the direction of our foreign affairs in the years ahead.

I spoke to a high school class a while back, and a young high school senior said to me, "The Soviets are really involved in a lot of adventures all across the globe, aren't they?"

I said, "You bet they are. And they do not just leave their fingerprints; they leave truck tracks, they leave uniforms. The fact is, they are involved in adventures all across the globe, and they do meddle all across this globe, and that is wrong. But the fact is, young man, so does America meddle far too much all around this globe. The fingerprints of this country on internal affairs of other nations are all over the history of American foreign policy, and that is wrong as well."

About a year ago we had a meeting up in the Longworth Building, for Members who wanted to attend, and the former Ambassador to El Salvador, Ambassador White, said to a number of us who attended: "You know, I cannot prove it, but you listen to the news, your read the things that are written about what is going on down in Central America, and those of us who are diplomats, those of us who have been involved in the foreign service learn to pick up hints about what is happening." He, said, "I cannot prove it, but all of the things that I see and read tell me that there is a destabilization effort going on down in Nicaragua sponsored by the U.S. Government."

Well, about 6 or 8 months later, reports started creeping up in the newspapers, in the magazines, that yes, indeed, there are destabilization efforts, there are covert actions down in that region of the country by the CIA of the United States. And I think it is wrong.

I am not suggesting that we do not have vital interests around this globe. We do. But I support the Harkin amendment. I think the Harkin amendment makes good sense. The Harkin amendment does not prohibit legitimate intelligence gathering by this country.

We do have vital interests in Central America. I do not think anybody questions that. And our interests in Central America are not always in concert with the interests of those who now govern Nicaragua. I do not think anybody questions that, either. But the fact that our interests are not in concert with those who now govern Nicaragua does not justify attempts by our Government, covert attempts or overt attempts, to overthrow the Government of Nicaragua, and I think that is what this question is all about.

I support the Harkin amendment. It makes good sense. It puts this country back on a course of foreign policy that makes sense for our future and the future of the world.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Chairman, I commend the gentleman for his comments, and I just want to say to the gentleman that I appreciate his statement. I think that the important issue is whether or not the United States should be involved in covert or overt actions toward the nation of Nicaragua, and I think the Harkin amendment addresses this in a positive way. I

thank the gentleman for his statement.

Mr. DORGAN of North Dakota. I appreciate that. And let me just say, in conclusion, that there are those who will stand up and say, "Well, my God, we do have vital interests down there and we ought to protect those vital interests."

I am not suggesting that we ought not protect our vital interests around this globe. I am saying that the fact that the other governments do not believe in the same things that our Government does, does not justify the U.S. Government to be involved in covert actions to destabilize or overthrow foreign governments. I think that the record of the 1960's and the 1970's shows us that we have got foreign policies, covert foreign policies, that we ought to be ashamed of. I think this body is starting to recognize that, and I think this body is going to steer us on a course of a better foreign policy by telling us that we should not be involved in that kind of activity, particularly now in Central America and particularly with respect to Nicaragua.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, I would like to commend the gentleman for his statement, and I would like to associate myself with the remarks of those who have spoken thus far in support of the amendment.

Let me just say that the operations in question are not covert. They are on the front page of the papers of this Nation. They are politically inept. They will backfire. They will be what the State Department calls, in its unique language, counterproductive. They are, as has been pointed out, a clear violation of international law, and they will not work. They are doomed to failure. Otherwise, they are a perfectly fine idea.

If I may impose upon the gentleman's time for about 30 seconds to read a statement made by Walter Lippmann 21 years ago, immediately after the failure of the Bay of Pigs invasion, Lippmann pointed out at that time that the failure of the CIA involvement in fomenting that invasion was inevitable because it was inconsistent with the character of the American people and it was in conflict with every notion that we as a nation have about the proper method of achieving political change. Lippmann wrote:

> The ultimate reason why the Cuban affair was incompetent is that it was out of character, like a cow that tried to fly or a fish that tried to walk. It follows that in the great struggle with communism, we must find our strength by developing and applying our own principles, not in abandoning them. I am very certain that we shall have the answer to Mr. Khrushchev if, but only if, we stop being fascinated by the cloak and dagger business and, being true to ourselves, take our own principles seriously.

Mr. Chairman I rise in support of the Harkin-Oberstar amendment to prohibit U.S. support for covert operations directed against Nicaragua.

These operations are:

First, not covert; one of the burdens of a free society is that the people have both the right and, often, the ability to keep their government from carrying out foolish and destructive activities in their name, and with their money.

Second, politically inept, for they have generated a propaganda bonanza for the radical left, an excuse for a military buildup in Managua, and a growing threat of regional war. They have shifted the focus of world attention from Nicaragua's errors in policy to ours and contributed to a political atmosphere inside that country within which moderate and democratic elements cannot long survive.

Third, a clear violation of international law; they violate fundamental provisions of the U.N. Charter, the OAS Charter, and numerous other international agreements. In supporting covert military action against Nicaragua, we are guilty of precisely what we have accused the Nicaraguans of doing with respect to El Salvador; and we are demonstrating the same attitude toward international law for which we strongly—and justly—criticize the Soviet Union.

Fourth, doomed to fail; the United States is grievously in error if it believes it can place a group of thugs and murderers—for this is what the ex-National Guardsmen and their allies are—back in power in Managua. The world is not that simple any more. The question of who should hold power in Nicaragua is a question for Nicaraguans themselves to decide.

Back in 1961, following the Bay of Pigs, Walter Lippmann wrote a column in which he stated that the failure of that expedition was inevitable, because it was inconsistent with the character of the American people. He wrote that we should not attempt such things, for the simple reason that undermining foreign governments through secret military operations is not something at which we are very good. We cannot keep them secret; and, as a people, we know they are wrong. They conflict with every notion we have about the proper method of achieving political change.

There are Americans who might argue that Lippmann was wrong, and that actions such as those we are now supporting in Nicaragua are consistent with U.S. values and interests, but I suggest that those holding that cynical view—and I suspect most of them have spent far too much of their lives in Washington—have lost touch with the people in whose name this Government is supposed to act.

I commend the gentleman, and I thank him for yielding.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I, too, would like to commend the gentleman for his statements and join him in his efforts.

Mr. Chairman, as one who set up the Peace Corps in South and Central America, I can tell you that this kind of effort appearing on the front page revives all of the specter of American imperialism in the Americas and will indeed redound to the great benefit of the Communists who feed off of the kind of instability that is created.

I think the Harkin amendment, of which the gentleman is one of the cosponsors, is an absolutely correct response, and I hope it will receive the support of this body.

Mr. Chairman, I want to commend the authors of this amendment, Congressmen HARKIN, LEACH and OBERSTAR, for their efforts to help forge a sound U.S. policy toward Nicaragua and Central America.

Recent press reports have confirmed that up to 200 CIA personnel are arming, advising and training Nicaraguan exiles (including members of former President Somoza's National Guard) in a concerted and costly effort to destabilize the Nicaraguan Government. The Washington Post has estimated the cost of this project to be $19 million.

These covert activities are the heart of Reagan administration policies toward Central America which are shortsighted, reckless, illegal and counter to our Nation's interests in every respect.

This policy contradicts President Reagan's stated goal of thwarting Soviet expansionism in Central America. In Nicaragua, we are driving Nicaragua into the hands of the communists. Other Latin American countries will eschew United States association for fear of interference in their internal affairs.

Far from promoting stability in Central America, this covert operation fuels the chaos that has gripped the region. It creates border skirmishes, exacerbates hostilities and further militarizes Central America. Indeed, no policy could more increase the possibility of regional conflagration.

Our present involvement against Nicaragua makes a mockery of the President's desire to weaken the hardline anti-American elements in the Sandinist government. If anything, the administration's support of covert maneuvers has strengthened these forces, undermined the efforts of the democratic opposition in Nicaragua, and diminished the prospects of any

potential political reconciliation between political groups in Nicaragua.

The Reagan administration's policies will also weaken a fragile democratic ally in Central America: Honduras. We have polarized Honduran politics and locked that nation into a war footing with Nicaragua, resulting in an increased authoritarian climate, greater poverty, and instability. The long-range effects of our covert operations may include rising dissent and anti-American sentiments in Honduras. In short, we are forcing that nation down the same path traveled by Iran, and Nicaragua itself, and may soon find ourselves opposing a new Honduran Government alined with Moscow.

The administration seeks to enhance U.S. prestige and influence in Central America, yet our covert maneuvers have discredited our Government and dismayed our allies. It has bolstered anti-American elements throughout the region and validated Soviet claims that we are willing to violate international law—specifically the Charters of the United Nations and the Organization of American States—in our efforts to topple governments.

Instead of pursuing this dangerous and illegal course, we should formulate policies which stress peace, democracy, development and conciliation among opposing forces in Central America. Nicaragua has indicated its willingness to negotiate, yet incredibly the Reagan administration has rejected those overtures, opting instead for destablizing military solutions. I urge my colleagues to support this amendment to prohibit U.S. backing for covert military and paramilitary operations in Nicaragua.

Mr. MILLER of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, for all of the reasons that my colleagues have cited, I, too, rise in support of the Harkin amendment.

I think it is most important that the Congress of the United States makes its feelings known about whether or not we are to engage in covert action in Honduras, Nicaragua, and elsewhere in Latin America.

For some months now it has been a matter of speculation whether or not the United States has been engaged directly or indirectly, whether or not we have been hiring Argentinians to train individuals in Honduras, whether or not runways were being extended or not being extended for the purposes of action in Nicaragua, whether or not we have been supplying arms, or whether or not we have been supplying third party arms so that they could then give their arms to the Somoza allies.

I think what is clear now is that no longer can you as a Member of the Congress of the United States fail to respond to the demands of the Harkin amendment because you do or do not know whether or not activity, covert activity, by the United States of America against the Government of Nicaragua is taking place.

The fact of the matter is, this Congress had better go on record in getting control of those agencies who have convinced the White House to substitute covert action for policy, to substitute covert action for diplomacy, and take an action that without the express consent of this Congress is in fact illegal, unethical and against the best interests of this country.

It is no longer speculation about the use, direct and indirect use, of American personnel and money for this effort. And for that reason, it is most important that the Harkin amendment be supported.

Very often Members get up here and they suggest that we are approaching another Vietnam, that if we do not do something, we will all look back in horror. Well, I will suggest to you that perhaps today is that day when you can vote, perhaps today—in fact, today is the day—when you can vote either to continue covert action, to continue the indirect action of this country in the affairs of Nicaragua, on the border of Honduras and Nicaragua, or you can vote to terminate that action. The fact that this action is taking place is no longer speculation. I assure you it is. And I assure you that today is the vote, if you seek not to apologize for what is already taking place at a future date, if you seek to go back to your constituents and tell them that in fact you discharged your job as a duly elected Member of this body, because unlike the congressional pay raise, where some people were able to go home and say, "I did not know what was in the legislation," we know what is in this legislation now, we know that there is money in here to disrupt the duly formed government of a sovereign country that this administration does not happen to agree with, but nevertheless it is illegal to engage in armed action against those individuals and against that government, but the money is in this legislation, the activities are taking place, the press knows about it, the world community knows about it, the American Government knows about it, the Congress of the United States knows about it.

Now, the issue is: Do you want to let it continue? Or do you want to stop it?

□ 1750

You are now on notice. This is not speculation about another Vietnam. This is a first step of our Vietnam. Some of us came here to stop Vietnam. And here is a chance to stop the new one. The action is taking place, the money is being spent, the advisers are being sent, payments to third parties are taking place, sales to one government, military sales to one government are taking place so those arms can be sent to the Sandanistas, and our hands are supposedly clean.

Our hands are not clean, they can never be clean until you recognize the Harkin amendment for what it is. It is an opportunity for those of us who time and again have expressed that concern about this country drifting into war, about this country drifting into a position a whole generation died for, that a country found untenable, that chased a President of the United States from office, I think now there is a decision.

This is not just some other amendment dealing with somebody's concerns about our intervention in the Third World. This is the last opportunity you will have of this Congress to cut off an unacceptable and illegal and an immoral action. And I would hope that the Members would all support the Harkin amendment.

Mr. DORNAN of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, the debate so far is rife with repeated references to the past horrors of the Vietnam war. We just heard from a forceful speaker from California the word "immoral" applied to our efforts in Vietnam. Immoral my assets.

First, before I address myself specifically to this terribly flawed amendment, which I vigorously oppose, let me address myself to a weird and tragic phenomenon in this House, without impugning anybody's motives, but taking notice of and analyzing the deafening silence that I have noticed for 6 years coming from the more liberal Members on the other side about the gut-ripping atrocities being committed in Laos, Cambodia, and Vietnam now and for the last 7 years since we pulled out. Certainly not all the Members on the other side are silent, only the most liberal, our most highly decorated Vietnam veteran sits on the majority side, Mr. DON BAILEY, and he regularly reminds this body of the current agony of Vietnam. Yesterday he spoke passionately of the rioting this month in Saigon, now sadly called Ho Chi Minh City, and about how this rioting for freedom went almost without reference in American prestige media. DON told this House how the story was buried in the back of the Washington Post.

Now, why is it that I have never heard a speech—one may have been made but I have never heard it—from Mr. HARKIN, Mr. MILLER, Mr. DELLUMS, some of the more committed liberal speakers on the other side, about, for example, the vicious and brutal genocide of 2 million innocent men, women, and children in Cambodia. How is it that only George McGovern, a former liberal Member of the other

body was the only Member or former Member who midway throughout that awful genocide of almost 2 million people, condemned it. He was so distraught, that he urged the United States of America to invade Cambodia to stop the massive killing. He, of course, was condemned by the Tom Haydens and Jane Fondas of the world.

Only Joan Baez, of antiwar fame, seemed to be equally upset about that genocide.

How is it that we hear nothing from House liberals about inhumanity to mankind that is going on in Vietnam today. Nightmares such as Soviet poison gas, "Red Rain and" "Yellow Rain" being used on civilians in Laos and Kampuchea. This is a war crime. The red rain poison gas and the blue rain nerve gas being used against freedom fighters in Afghanistan, how is it that we hear nothing from you liberal moralists on the other side. How about you fast-speaking liberals, just once, talking about the 600,000 boat people who did not make it, who died on the South China Sea by drowning, shark attack, dehydration, and rape-murder.

The boat people survivors in those wretched refugee camps have a motto, more a prayer, "Some of us are here and free, the rest are with God and free forever." How about just once, just once, a liberal making a 1-minute speech for "the wretched refuse of those teeming shores, the tempest tossed."

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. DORNAN of California. I will yield briefly and then I will yield more extensively, if you desire.

Mr. JOHN L. BURTON. Mr. Chairman, it is not our Government that is doing it. It is not our Congress that ratifies that. It is not our taxpayers that are paying for it. That is why.

Mr. DORNAN of California. Interesting point. Except that does not preclude you or any other liberal getting up on your feet in righteous indignation to condemn the genocide or the war between Vietnam, one Communist conquerer against their former ally Communist China who invaded them. It does not prevent you from condemning the brutality to the boat people and the unnecessary deaths of hundreds of thousands of women and children.

Mr. JOHN L. BURTON. If the gentleman will yield further, I will introduce an amendment to prohibit funds from this bill going for that purpose.

Mr. DORNAN of California. What is that supposed to mean nonsensical. I do not yield.

Mr. JOHN L. BURTON. Would you accept that amendment?

Mr. DORNAN of California. No; I do not accept nonsensical amendments and I will tell you why. What in hell or heaven precludes anybody from your side ending this damnable deafening silence, your refusal to condemn the human rights violations by Communist regimes or the Soviet poison gas atrocities taking place now in four countries across the globe. All the speeches and continuing references about the illegality and immorality of U.S. involvement in Vietnam rings hollow and foul as long as you maintain your silence about Communist brutality.

I support Mr. BAILEY's and President Reagan's remarks about our Vietnam efforts, that whatever we did wrong, it was a noble cause, and at least we tried. We tried to keep freedom alive in one more remote corner of the globe. That noble effort has been vindicated by the worst predictions of a bloodbath coming true. The unbelievable brutality that exists in Southeastern Asia at this very moment screams out for condemnation, and for humble apologies to our fighting men of the Vietnam war, living and dead, who tried and tried to prevent the holocaust of the 1970's, of the 1980's.

Now, let us analyze the Harkin amendment and why I am against it.

Without trying to twist its intent or meaning, for clarity let me leave out a few key phrases such as "the Central Intelligence Agency" and just read several phrases to show the mischief that could be reaped from this amendment.

None of the funds provided in this act may be used by the Department of Defense to furnish advice to any individual for the purpose of assisting that individual to carry out military activities inside a country.

Now, since the Mujadeen freedom fighters, who are operating out of Pakistan, are not part of the military puppet forces of the phony Communist government in Kabul in the once sovereign country of Afghanistan, does the intent of the Harkin amendment mean that if someone at the Defense Department gives advice to a Mujadeen freedom fighter about how to blow up some Soviet Mil-8 "Hind" helicopters that are flying poison gas missions against the humble tribes people in the Afghanistan hills, that we can expect another Harkin amendment against those freedom fighters next week?

If we are going to write foreign policy in this Chamber for our Nation, I suggest that Mr. HARKIN, since he has traveled several times to Nicaragua, traveled to Afghanistan and Pakistan as I have done to see if there is any type of anti-Communist freedom fighter on the face of the planet that he would not try to block from receiving our advice or aid.

I cannot believe since the capital city of San Salvador is closer to southern California, than is Washington, D.C., to southern California, that only a handful of Members have ever been down to Central America, and only one of us has been down there more than twice, me. I have been there four times. Some of you have furtively tiptoed up to the Honduran border with El Salvador, sponsored in your journey by groups with an obvious bias, but refused to go to El Salvador, to be briefed first hand on Nicaraguan involvement with the terrorist killing in that country. Why? I have taken my son and later my wife down to El Salvador. It is not dangerous if you obey our Embassy's security rules.

The CHAIRMAN pro tempore. The time of the gentleman from California (Mr. DORNAN) has expired.

(By unanimous consent, Mr. DORNAN of California was allowed to proceed for 3 additional minutes.)

Mr. DORNAN of California. Now, I ask you, Are there Members in either party that would like to disenfranchise here in Washington, D.C., the governments in exile of Latvia, Estonia, or Lithuania? How about a Harkin amendment denying Defense or CIA advice to them? I would hate to pull a Senator BIDEN type quiz on some of the more intelligent Members of this House to find out if they even know that we allow and recognize governments in exile for those three small captive nation Baltic States.

Suppose some Ukranian freedom fighter (the Ukraine has a vote in the U.N. as though it is a separate sovereign nation apart from the U.S.S.R.) came to the Defense Department to ask advice about running a gutty in-country operation to fight for freedom from the Soviet Union for the Ukraine. Do we tell the Ukranian fighter that TOM HARKIN wants him to get lost? Do we cut off his legs as we did the Alpha-66 people from Cuba, while Castro sends us his rapists, terrorists, and murderers, the kind of vicious criminals that even Lenin called the lumpen proletariat? Now we have a Cuban crime wave on the east coast and starting up in Los Angeles costing the U.S. taxpayers millions of dollars and costing the lives of hundreds of innocent citizens because we gave up trying to destabilize Castro. Should we have told the freedom fighters who fought with Castro to overthrow the pig dictator Batista, that when they found their revolution betrayed to communism and came to us for advice and assistance to get lost, the Harkins of the world do not mind betrayed revolutions.

One gentleman from California forcefully referred to Nicaragua as "the duly formed government of sovereign Nicaragua." What utter bull. The Sandinistas gave up rightful sovereignty and any claim to a "duly formed government" when they put off any elections for 5 years, which means to the Marxists down there for your lifetime, Mr. MILLER. There has never been an election in Cuba not in 22

years, there will never be an election in the lifetime of any of you liberals in a Communist run Vietnam, and there will never be an election in a Marxist Nicaragua because there is not a duly formed government of the people, by the people, or for any people except those who accept Marxist subjugation.

And since there are heroes who fought against the pig dictator Somoza, who are now in exile in Costa Rica and/or in exile in Honduras, who feel their revolution was betrayed into a Communist Marxist puppet state under Cuban influence, what do we tell these true revolutionaries under a Harkin amendment?

I think that if we take an objective look at Chile, the regime under Allende bankrupting that democracy was far worse than the economic mess there today. And there is hope for democracy there someday. Elections would have disappeared forever under Allende. When we look back at Castro bringing nuclear weapons into the Carribean—and he may yet do it again—and when we look at his nuclear weapon capable Mig-27's, not just Mig-23's, but Mig-27 nuclear weapon capable fighter bombers sitting down there right now, plus a brigade of Soviet combat troops that Jimmy Carter said he would not tolerate—but he did—if you look at the Cuban troops in Africa in spite of the mess in Cuba, why should not we have destabilized Castro. Look at the countries around the world where there are freedom fighters on their own with no assistance from us such as leader Son San of Cambodia, I say for shame. I just say simply this. One man's terrorist is another man's freedom fighter.

When I overheard Mr. HARKIN in Communist China as he put on a Mao hat say, and he did not realize I could hear him, "It is an honor to wear a worker's hat"; that is the hat of Mao who killed 30, 40, maybe 50 million people, I realized what is Mr. HARKIN's terrorist is my freedom fighter, and what is my freedom fighter is his terrorist.

I implore the Members to vote down this mischievous amendment.

Mr. JOHN L. BURTON. Mr. Chairman, I demand that the gentleman's words be taken down.

Mr. DORNAN of California. I hope some day he and I can debate Central America at length on an equal-time basis.

□ 1750

Mr. JOHN L. BURTON. Mr. Chairman, I demand the gentleman's words be taken down about our colleague, Mr. HARKIN supporting terrorists.

The CHAIRMAN pro tempore. Does the gentleman from California (Mr BURTON) withdraw his request?

Mr. JOHN L. BURTON. No, Mr. Chairman.

The CHAIRMAN pro tempore. Is the gentleman from California (Mr. DORNAN) willing to request that his remarks be modified in any way?

Mr. DORNAN of California. Did you ask, Would I modify my remarks, Mr. Chairman?

The CHAIRMAN pro tempore. Yes.

Mr. DORNAN of California. No; it is a matter of personal perception. I repeat, what is Mr. HARKIN's terrorist is my freedom fighter. What is my freedom fighter is obviously his terrorist. I may be wrong. He may be wrong. That is up to the judgment of the Members, but my perception about his misperceptions stands.

Mr. JOHN L. BURTON. I have seen people crawfish. That is good enough for me.

Mr. Chairman, I withdraw my request.

Mr. DORNAN of California. I repeated the same words, however, I point out to the great mystic from the bay area.

After the gentleman has traveled some in his newly found spare time maybe we will debate this issue some more. I say to the gentleman from California (Mr. BURTON), please just one little speech, before we depart, against current Communist atrocities—anywhere—pick your terror. "Red Rain" would be fine for openers.

Mr. BOLAND. Mr. Chairman, I move to strike the requisite number of words.

First of all, I appreciate the fact that the gentleman from California (Mr. JOHN L. BURTON) has withdrawn his objection and having the words taken down. It gives me my time.

Those who are supporting the Harkin amendment had a field day here and I do not blame them. I would like to direct my comments to the gentleman from Iowa.

I can say to my friend and all of those who have made these magnificent appeals that I share their concern for the news stories, the spate of news stories emanating from Central America that have been in Newsweek and Time, the Post, the New York Times, and about every newspaper in America.

Further, I can say to the gentleman that these concerns are shared by the Permanent Select Committee on Intelligence, make no mistake about it.

As chairman of that committee, I have made it a rule not to confirm or to deny reports of alleged intelligence activities that come within the purview of that committee. I think most Members here will agree that that is a sound position. It is a good one. It is a good rule and I will stick with it today.

What I have to say can be said without addressing the truth or falseness of all those reports.

What I can say is that your Intelligence Committee is as concerned about the substances of the allegations concerning paramilitary activities in Nicaragua and Central America as all of you who have spoken here this afternoon who have spoken so well.

That concern led to the language in the classified annex that accompanies Public Law 97-269, the Intelligence Authorization Act for fiscal year 1983. That language—and listen to it—that language expresses the sense of the conferees that no funds authorized by the act should be used "to overthrow the Government of Nicaragua or to provoke a military exchange between Nicaragua and Honduras."

Mr. Chairman, I believe that this restriction ought to go a long way towards allaying the concerns of the gentleman from Iowa and others who have spoken here today, and I say this for three reasons.

First, it is the agreed-upon position of the two Intelligence Committees in the House and in the Senate.

Second, it is agreeable to the executive branch. They do not like it, but it is agreeable to them.

Third, the Permanent Select Committee on Intelligence takes very seriously its duty of overseeing all covert action operations, and I must say that that is a position that I think must be agreed upon, or at least it is the consensus of the Members of this House that it agrees with what the Intelligence Committee has done and I think perhaps we have won the respect of the membership of this House and others with the way that we review these actions regularly.

I can assure the House that in the case of any activity that would involve the use of lethal force, the review process is continuous and it occurs about every month.

I make this statement and offer these assurances for a reason. I believe the gentleman's amendment is not necessary.

I further believe that it sets a bad precedent.

We ought not to legislate in an area such as this without the benefit of all the facts. That is why the Intelligence Committee was established and its effectiveness depends on its ability to keep the Nation's secrets and exercise sensible and prudent oversight. At times that can really be a tightrope act.

I can say that the committee certainly does understand its obligations to rein in activities which can get out of control or which could threaten to involve this Nation or its allies in a war.

For all these reasons, I urge the gentleman to withdraw his amendment. I believe that the Intelligence Committee's oversight is such that the assurances I have given can be relied upon.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. I am delighted to yield to the gentleman from Iowa.

Let me say, I commend the gentleman for the action he has taken. As I told the gentleman in conversations we had in the last couple of days, that the gentleman is driving this Government to the point where all of us agree it ought to be and we are making some progress here. I would hope that in view of that, the gentleman would consider the request and withdraw his amendment and I will offer a substitute to it if the gentleman does not.

Mr. HARKIN. I understand and I appreciate what the gentleman has said. I have always tried to be open and aboveboard with the gentleman from Massachusetts and it goes without saying that there is no one for whom I have a higher respect than the gentleman from Massachusetts and greater faith and confidence in; but there are things that bother me. As I said in our private conversations, "Yes, I have faith in you; yes, I have faith in our Intelligence Committees to exercise their proper function."

The CHAIRMAN pro tempore. The time of the gentlemen from Massachusetts has expired.

Mr. HARKIN. Mr. Chairman, I ask unanimous consent that the gentlemen be allowed 3 additional minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Iowa?

Mr. KAZEN. Mr. Chairman, reserving the right to object, let me make an inquiry under my reservation.

If I am correct, all time will expire in 4 minutes on this amendment and on all amendments to the bill.

The CHAIRMAN pro tempore. The gentlemen is correct. All time expires on the bill and all amendments thereto.

Mr. KAZEN. Further reserving the right to object, Mr. Chairman, I want to bring this to the attention of the House.

I objected or held a reservation to object to the ending of debate at 5 o'clock for fear that the rest of the amendments would not be adequately debated and I am, therefore, under my reservation giving notice that at 6 o'clock I will object to the extention of time any further.

Mr. BOLAND. Mr. Chairman, in that event then, I have the 3 minutes. I appreciate the time the gentleman has given me.

The CHAIRMAN pro tempore. Without objection, the gentleman from Massachusetts (Mr. BOLAND) is recognized for 3 additional minutes.

There was no objection.

Mr. BOLAND. Mr. Chairman, let me ask whether the gentleman from Iowa would withdraw his amendment, and if the gentleman does not, I want the opportunity to offer the substitute.

Mr. HARKIN. Mr. Chairman, I would like the gentleman to offer the substitute to mine.

Mr. Chairman, I would like, if I could, ask unanimous consent that this committee continue on debate on this amendment and all amendments to this bill until 6:45.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Arkansas?

Mr. KAZEN. Mr. Chairman, I object.

Mr. CHAIRMAN pro tempore. Objection is heard.

Mr. HARKIN. Mr. Chairman, I ask unanimous consent that the committee be allowed to continue until 6:30.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Iowa?

Mr. McDONALD. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. HARKIN. Mr. Chairman, I ask unanimous consent that the Committee be allowed to go to at least 6:15.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Iowa?

Mr. HUNTER. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. BARNES. Mr. Chairman, will the distinguished gentleman yield?

Mr. BOLAND. I will be delighted to yield, but just give me about 30 seconds so I can get the substitute in.

I yield to the gentleman from Maryland.

Mr. BARNES. Mr. Chairman, I thank the distinguished chairman of the Intelligence Committee for yielding and I will be very, very brief.

I just want to say, as chairman of the Subcommittee on InterAmerican Affairs, that the Intelligence Committee has been very careful on this issue and has worked diligently and those of us on the Foreign Affairs Committee have great respect for the work particularly that the chairman has done.

I feel it is terribly important that this House go on record with respect to our concern on this issue. I will support the substitute that will be offered, if it is the one that I saw earlier by the chairman of the Intelligence Committee, in the hopes that our colleagues will also support it so that we can go on record, that if we do not pass the substitute offered by the chairman of the Intelligence Committee that we will not pass anything, I fear, and I will support the chairman's substitute, and I thank the chairman for yielding.

Mr. ROBINSON. Mr. Chairman, will the gentleman yield?

Mr. BOLAND. Yes, I yield to the distinguished minority member of the Committee on Intelligence, the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the gentleman from Massachusetts and the comments that he has made and the amendment in the form of a substitute that the gentleman is about to offer.

● Mr. LELAND. Mr. Chairman, I rise in support of the Harkin-Leach amendment to delete any funds related to covert military activity directed against Nicaragua. This is not the first time we have had this debate.

Only a few months ago, we debated the merits of using military construction funds for building and expanding military landing strips in Honduras. It was clear from prior debate in the other body that these landing strips were intended for use by the United States—and more specifically, for "up to a squadron of U.S. tactical fighter aircraft." One hundred and nine Members of the House objected to the appropriation of those funds. It was our fear that this action would not strengthen but rather gravely endanger the fragile Honduran democracy, born only 1 year ago after years of military rule. It was our fear also, that this military commitment would feed the fires which are dragging Honduras into a war with its Nicaraguan neighbor.

Today, several months later, it appears that our worst fears are being borne out. On November 8, Newsweek ran as its cover story an article entitled "America's Secret War; Target: Nicaragua." Informed by U.S. intelligence sources, that article made it pointedly clear that the much-cited administration covert destabilization plan against Nicaragua is now more than a plan: It is already in place and in action. More worrisome, the article claims the covert military action is now out of control.

Mr. Chairman, it is clear to me that the President's Central American policies have gone beyond the limits of what this body and this Nation can tolerate. The House should not tolerate this Nation's being associated with common criminals who are attempting to unseat the Managua Government, but who never once attempted to improve the lot of the majority of their own impoverished countrymen. We should not tolerate a policy which will surely lead to the fatal debilitation of Honduran democracy. And we should not tolerate a covert action plan which could easily be the spark to ignite a Honduran-Nicaraguan war which could eventually engulf the entire region. Lastly, we should not tolerate actions of our administration which violate the spirit and the letter of treaties to which we are bound.

I reiterate my support for this amendment, and hope that the House will approve it.●

● Mr. MATSUI. Mr. Chairman, I would like to express my support for the amendment offered to H.R. 7355, the Department of Defense appropriations bill, by Representatives HARKIN, LEACH, and OBERSTAR. Passage of this amendment, which would prohibit U.S. assistance for military or paramilitary action against Nicaragua, is crucial if we are to maintain a positive U.S. influence in Latin America and foster peace in Central America. Congress must act decisively to cut off U.S. covert action that can only lead toward further bloodshed and instability in the region.

Current covert activities sponsored by the United States against Nicaragua have been well documented in the press. It is clear that the CIA and other U.S. operatives have armed, trained, and directed Nicaraguan exiles based in Honduras. The ostensible purpose is to stop the flow of arms from Nicaragua through Honduras to leftist forces in El Salvador. Numerous sources indicate, however, that the operation is also aimed at overthrowing the Government of Nicaragua.

This course is both ill advised and doomed to failure. Instead of assisting the moderate forces within Nicaragua to speak out against the Government, U.S. action has united the country against the external danger and enabled the Sandinista Government to adopt new, more repressive measures. Moreover, the fact that Nicaraguan insurgents are based in Honduras has created a genuine threat of war between Nicaragua and Honduras, and threatens the stability of the democratically elected government of Honduras. Thus, U.S. covert actions could spark a major regional war in Central America and lead to the downfall of a friendly, democratic government.

In addition, the covert policy is damaging U.S. relations with the nations of Latin America at a time when it is to our best interest and theirs to establish closer ties. Nations such as Mexico and Costa Rica may well question our good intentions in offering economic and security assistance when we are simultaneously setting the stage for a regional war that would damage their political and economic stability.

I believe that passage of this amendment will provide a vitally needed signal to the administration and to the Latin American community that Congress will not support this type of CIA activity in Central America. The action will also reaffirm the authority and responsibility of Congress and the American people to participate in foreign policy decisions. Only in this way can we prevent the reoccurrence of such debacles as the Bay of Pigs and Vietnam.

As we assert our responsibility, we must also emphasize our Nation's support for working closely with other countries of the hemisphere in finding a negotiated solution to the conflicts in Central America. We must affirm America's willingness to assist in developing a dialog and bona fide negotations with all parties in order to achieve peace.●

● Mr. BONIOR of Michigan. Mr. Chairman, evidence has been accumulating for nearly a year that the United States is involved in an escalating, covert campaign, a secret war aimed at Nicaragua. Earlier this year, the Washington Post reported that President Reagan authorized $19 million so the CIA could advise, train, and arm paramilitary forces along the Honduran/Nicaragua border. At a minimum, and without going beyond what the administration has conceded, the purpose of this operation was to stop the flow of arms across that border, and to engage in hit and run raids and sabotage to harass the Nicaraguan Government.

There is reason to fear that the operation has gone far beyond that. It has brought the United States into a working arrangement with former members of President Somoza's national guard, who are committed to the violent overthrow of the Nicaraguan Government. This is a sordid alliance, with people who promise "a massacre in Nicaragua" and who boast that when they return to power "there will be bodies from the border to Managua."

The uprooted, the wounded, and the dead in Nicaragua bear painful witness to the thrust of this campaign. Scores of Nicaraguans have been killed, and others have fled the region as guerilla bands sweep down on isolated villages. Although still abetted by the United States, the actions of these paramilitary forces have gained momentum beyond U.S. control.

Let us be clear. U.S. support for covert activities against Nicaragua endangers not just the security of Nicaragua, but of the United States. It poses issues with respect to the United States actual interest in Central America and with respect to the process of forming United States foreign policy.

To oppose United States support for those covert activities is not to proclaim that the Nicaraguan Government is without problems. It is merely to proclaim that United States policy in the region should not be formed through the implications of covert activities. These activities commit us to a specific foreign policy that has never been openly defended and supported, and whose outcome cannot be guided by our own democratic institutions.●

AMENDMENT OFFERED BY MR. BOLAND AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. HARKIN

Mr. BOLAND. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. BOLAND as a substitute for the amendment offered by Mr. HARKIN. Strike the matter proposed by the Harkin amendment and insert in lieu thereof the following:

"SEC. 793. None of the funds provided in this Act may be used by the Central Intelligence Agency or the Department of Defense to furnish military equipment, military training or advice, or other support for military activities, to any group or individual, not part of a country's armed forces, for the purpose of overthrowing the Government of Nicaragua or provoking a military exchange between Nicaragua and Honduras."

□ 1800

The CHAIRMAN pro tempore. The gentleman from Massachusetts (Mr. BOLAND) is recognized for 1 minute on his substitute.

Mr. BOLAND. Mr. Chairman, the amendment speaks for itself. I do not want to foreclose the gentleman from Iowa either, but the amendment speaks for itself.

None of the moneys provided in this bill will be used for the purpose of overthrowing the Government of Nicaragua or provoking a war between Nicaragua and Honduras.

It is plain, it is simple, it is a great step to take, and I would urge all the Members of this Committee to take that step.

Mr. DICKS. Mr. Chairman, I think we ought to give the gentleman from Massachusetts 5 minutes to explain his substitute amendment, and I would ask unanimous consent that he be allowed to do that.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. COURTER. I object, Mr. Chairman.

Mr. BOLAND. Mr. Chairman, I really do not want the 5 minutes. I am wondering whether or not the chairman of the subcommittee would accept this amendment.

The CHAIRMAN pro tempore. The time of the gentleman from Massachusetts (Mr. BOLAND) has expired.

All time has expired on the bill and amendments thereto.

AMENDMENT OFFERED BY MR. HARKIN TO THE AMENDMENT OFFERED BY MR. BOLAND AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. HARKIN

Mr. HARKIN. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. HARKIN to the amendment offered by Mr. BOLAND as a substitute for the amendment offered by Mr. HARKIN: Strike out all that follows the section number of the section proposed to be added to the bill by the substitute and insert in lieu thereof the following:

None of the funds provided in this Act may be used by the Central Intelligence Agency or any agency of the Department of Defense to furnish military equipment, military training or advice, or other support for

military activities, to any individual or group which is not part of a country's armed forces and which is already known by that agency to have the intent of overthrowing the Government of Nicaragua or of provoking a military conflict between Nicaragua and Hondurus.

The CHAIRMAN pro tempore. The question is on the amendment offered by Mr. HARKIN to the amendment offered by Mr. BOLAND as a substitute for the amendment offered by Mr. HARKIN.

The question was taken; and on a division (demanded by Mr. HARKIN) there were—ayes 13, noes 27.

Mr. HARKIN. Mr. Chairman, I demand a recorded vote, and pending that I make a point of order that a quorum is not present.

The CHAIRMAN pro tempore. The Chair will count.

Mr. HARKIN. Mr. Chairman, I withdraw my point of order.

So the amendment to the amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by Mr. BOLAND as a substitute for the amendment offered by Mr. HARKIN.

RECORDED VOTE

Mr. BOLAND. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 411, noes 0, not voting 22, as follows:

[Roll No. 424]

□ 1820

So the amendment offered as a substitute for the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. HARKIN), as amended.

The amendment, as amended, was agreed to.

● Mr. STOKES. Mr. Chairman, I rise in strong support of the Addabbo amendment to delete funding for the production of the first MX missiles. The time has come for this Congress to reject once and for all this unaffordable and unwarranted weapon. President Reagan proclaims that we need the MX missile system to deter the Soviet threat. In my judgment, however, spending $40 billion on an unproven threat and an untested theory is ludicrous.

This administration has a habit of distorting statistics, and the statistics it uses to justify the MX missile and its Dense Pack basing plan are no exception. The President, in his November 22 speech, tried to paint a grim picture of overwhelming Soviet military superiority contrasted with a stagnant and outdated American nuclear deterrent. Nothing could be further from the truth. In fact, in real-year dollars this country is currently spending more on its defense than at any time since the height of World War II. Further, the United States still, as it always has, maintains an absolute superiority in the number and accuracy of nuclear warheads. To imply that this Nation's security is at imminent risk is not only seriously irresponsible but blatantly false. The President has told the American people that we are weak when in fact we are strong. The President has told us to fear when we should be unafraid. He tells us we need more arms to promote peace and more nuclear weapons to insure stability when they do neither. Mr. Chairman, where and when does this doubletalk stop? I say here and today on the floor of House.

The real danger that the American people should be aware of is that the President is jeopardizing our first real hope for lasting peace and survival in this world—a nuclear freeze. His proposals run directly counter to any hopes Americans might have for moderating or stopping the production of nuclear arms.

Mr. Chairman, rather than offering Americans an arms reduction, the President; proposes this MX missile system, a dramatic escalation. Further, the Dense Pack may easily violate the Strategic Arms Limitation Treaty. We are taking two steps backward without taking even one step forward.

The President has blindly turned from a nuclear freeze and its path to peace. In so doing the administration dangerously flaunts world peace as well as this country's economic well being. Every dollar increase in the defense budget equates to a dollar increase in the deficit. DOD estimates indicate that the Dense Pack plan and its accouterments will cost $40 billion. With 11 million Americans out of work and the economy crumbling under the weight of ever increasing deficits we simply cannot afford it.

This administration must recognize, as a majority of Americans do, that a bilateral nuclear weapons freeze is the only hope for peace throughout the United States. Citizens have again and again in the last year voted in favor of such a freeze. If we are to avoid the unthinkable consequences of a nuclear confrontation then we must take the lead and show the world that rational minds still prevail in this land.

Mr. Chairman, I beseech the House to reject the MX and its Dense Pack basing plan.

Thank you.●

● Mr. FRENZEL. Mr. Chairman, yesterday this body considered funding for the MX nuclear missile, which was the focus of much sincere, informed, and heartfelt debate, not only in this chamber but also across the United States. After careful reflection, I felt I had to support the Addabbo amendment to delete funds for procurement of the MX missile.

It has been pointed out that the appropriations bill contained funds only for purchase of five missiles, and would not have committed us to the Dense Pack basing. Moreover, funds could not have been spent until March 15, 1983, allowing additional deliberations about basing. I have great concerns, however, about the burden we would have had to undertake had the Addabbo amendment failed. The bill would have committed us to purchase of missiles, and, by necessity, the requirement to install, eventually, the missiles in some form of basing mode.

I remain unconvinced of the viability of Dense Pack, and have questions as to whether an alternative presently exists which can meet the survivability standards that any new land-based missile will have to attain.

I was not willing to make a commitment to a program when I could not know its eventual design or cost, especially when the cost will most certainly range in the tens of billions of dollars. It would have been like voting for a water project before the engineering studies had been done.

I do not, however, support the amendment to delete research and development funds for an MX missile. I am committed, as I am convinced the President is as well, to sharp reductions in the world's stock of nuclear arms. As the United States continues to press forward in the START talks with the Soviet Union, I believe it would be unwise to cease all R&D work on the MX. I believe that continued MX research and development is a signal of our resolve, and hope that continuing, diligent START negotiations will be swift and successful.

Because of the decision made yesterday to halt production on the MX, however, I find myself a reluctant opponent of the amendment to eliminate the B-1B strategic bomber program. I do not believe that we can eliminate both the MX and the B1 bomber. The obsolescence of our B-52's as a penetrating bomber, even considering the standoff potential offered by long-range air-launched cruise missiles, makes a replacement bomber inevitable. In addition, because of the radically lower radar profile of the new B1-B, I believe the B1 is functionally very similar to any aircraft we might see in the next decade embodying Stealth technology.

Although an amendment may be offerred today, Mr. Chairman, which would suspend deployment of Pershing II missiles in Europe pending resolution of technical concerns, I believe the Appropriations Committee's deletion of Pershing II funds for the same reasons makes the question moot. The committee has decided that the Pershing II is not now technically successful, and not be deployed. However, Soviet SS-20 missiles have, by all accounts, dramatically altered the balance of power in Europe. I believe deployment of U.S. tactical nuclear weapons in those European nations that want them is necessary. The Pershing II is intended to replace the Pershing I, a missile that has a shorter range, but is also less precise, less flexible, and carries a larger warhead. The Pershing II, I believe is much better suited to stopping or deterring a Warsaw Pact armored invasion, the role for which it is intended. I also believe that the Pershing II is a less dangerous weapon, since it has better accuracy and smaller warhead means than the Pershing I.

I also support the amendment that would delete funding of one of two nuclear aircraft carriers, at a savings of approximately $3.6 billion. I am unconvinced of the strategic necessity of carrier task forces, and am concerned that they would be easy targets to a potential enemy. Most of all, Mr. Chairman, I am opposed to the expenditure which an additional carrier would require, plus the funds that would be necessary for the accompanying task force, expecially when the difference is between 14 and 15 carrier task forces.

Finally, Mr. Chairman, I wanted to support the Roukema amendment which would have deleted $3.7 billion in budget authority for procurement in fiscal year 1983. This bill would have limited total defense spending to 5 percent in real growth between fiscal year 1982 and 1983. In my position on the Budget Committee, I have supported efforts in the past to reduce all spending across the board. I intend to continue to do my best to insure that defense spending is adequate but restrained.

I do not step back from our national commitment to an adequate defense, and deterrence of aggression against ourselves or our allies. Nonetheless, setting priorities is the essential business of democratic government. Our expenditures for defense, except those which are essential and urgent must compete with other priorities, and the vital need to reduce the Federal deficit. I believe the Roukema amendment represents sound fiscal policy and balancing of defense priorities, and deserved our support. Because earlier amendments had almost achieved the 5-percent cut embodied in the Roukema amendment, it was almost rendered moot, but it still represents good policy.

I did not vote for the military authorization, but because of the reduction made in this appropriation bill, I will vote for it.●

● Mr. WEISS. Mr. Chairman, I fully support Armed Forces that are adequately equipped, well trained, and thoroughly prepared. And I would support a defense budget that so provided. But H.R. 7355, the defense appropriations bill we are considering recklessly and unnecessarily exceeds what is needed to maintain such a force.

Funding for personnel and operation and maintenance is increased moderately while procurement receives a very substantial increase. These priorities are wrong, beefing up increasingly dangerous nuclear weapons programs and other costly projects while weakening our conventional forces and systems operability. Moreover, that vast sums poured into the Pentagon far exceed what is reasonable.

The defense budget contained in H.R. 7355 is $93.5 billion more than fiscal 1980, a 70-percent increase. At this rapid rate of spending close to $2 trillion will be spent on the military between the current fiscal year and fiscal 1987. Equally disturbing is the fact that the $231.1 billion in this bill deprives vital social programs of their funding. This bill is an affront to the 12 million Americans who are out of work, the 3.2 million children who

have been dropped from the school lunch program, and others who have been hurt by the Reagan budget cuts.

The sound rejection to the President's budget priorities in the recent elections is perhaps the most convincing reason for opposing passage of H.R. 7355. The elections reflected the widespread opposition to President Reagan's rate of defense spending. This was a primary issue in many House and Senate campaigns and has contributed to a significant shift in the makeup of the newly elected Congress and the disposition we can anticipate among that Congress toward out-of-control military funding. Decisions on this spending measure appropriately should be postponed until the 98th Congress convenes.

Yet the reckless devotion to a massive military buildup that was solidly rejected at the polls is continued in this appropriations measure. Members of the 98th Congress are likely to bring a heightened level of scrutiny to Pentagon funding requests. Controversial programs will be carefully examined and cost overruns will be challenged. In short, large gains seem likely in bringing the defense budget under control by holding off on further action on defense spending measures until the new Congress convenes.

The premise behind this bill is that increased military spending translates into enhanced military strength which, in turn, provides better national security. This approach is wrong and can only lead toward war. The $231.1 billion provided in this bill will go in large part to supporting fault-ridden weapons systems, saber-rattling policy proposals, and military planning that justifies our worst fears about the nuclear threat.

This bill would: continue the controversial MX missile system, which barely survived committee action, and which we know would violate existing arms accords; which has only recently been assigned a basing mode that is itself highly questionable, wholly untested, and a dangerous risk for world peace; and which is certain to cost taxpayers tens of billions of dollars above and beyond the billions already wasted.

I strongly support the Addabbo amendment to delete funding for procurement of the MX. In my opinion the bulk of research and development funds should also be deleted.

Authorize another year of waste with the M-1 tank, which cannot run in the desert, does not start in cold weather, and remains years behind schedule and billions of dollars over budget; and with the B-1 bomber which will be rendered useless soon after it is deployed by the Stealth bomber currently under development.

Push the arms race to new heights with space weapons in conflict with several international agreements on the use of space solely for peaceful purposes. These programs also should be deleted.

Economic recovery will remain an illusion until we reverse the priorities of the current administration and stop our ever-growing reliance on military expenditures for economic stability and growth. Domestic strength, maintained by full employment, independent industries, and an end to rising inflation rates, will forever elude our grasp so long as our capital, human, and natural resources are siphoned off to military-related activities.

The strangling effects of the defense build-up now underway were succinctly summarized in a study done by the Joint Economic Committee's Subcommittee on Economic Goals and Intergovernmental Policy, chaired by the distinguished gentleman from Indiana (Mr. HAMILTON). I want to briefly present those findings, which are comprehensive and reveal the major problems we face:

First, the rapid pace of the defense buildup will add slightly to inflation in the short term and could add greatly to inflation in the longer term;

Second, the buildup may worsen the problem of procurement cost overruns;

Third, the buildup is exacerbating regional imbalances in the national economy;

Fourth, limited bottlenecks now exist in the defense industries, especially among smaller prime contractors and subcontractors, due to shortages of some critical components, production equipment, materials, and skilled workers;

Fifth, inflation in the defense sector could increase the real costs of defense by as much as $80 billion by 1987 over official estimates;

Sixth, the bottleneck problem could become widespread in the next several years unless the supply of scarce resources, including skilled workers, is greatly increased;

Seventh, if the supply of scarce resources is not greatly increased, the shift of resources from the civilian to the defense sector will worsen and reduce U.S. competitiveness in the world market;

Eighth, if the bottleneck problem becomes widespread, price and wage increases could spill over to the civilian sector; and

Ninth, the lack of adequate information and statistics about defense and nondefense industries on a disaggregated basis concerning capacity utilization, skilled labor, and the availability and requirements for other resources is hampering the Government's ability to monitor and forecast the effects of the defense buildup.

Claims that the defense buildup generates jobs and thus will help alleviate record 10.8 percent unemployment are grossly exaggerated. Indeed, defense outlays are a notoriously poor source of job creation. A report prepared by the Congressional Research Service found that nonmilitary spending creates, on the average, between 150 and 200 percent the number of jobs per billion dollars spent as does military related spending. The advantages of nonmilitary spending in this category are significant, particularly with unemployment at a record level and the economy mired in a deep recession.

Our military strategy historically has been to seek to implement cooperative defense strategies with our allies. Currently the United States is involved in 29 such agreements, the NATO alliance most prominent among them. This alliance is responsible for a significant margin of international security for the democratic world both in the number of strategic weapons and in strategic planning capability.

NATO nations outspent Warsaw Pact countries in the 1970's by $207 billion on military goods and possess 3,200 more strategic nuclear weapons. A renewed commitment to NATO-provided security, backed by a clear and consistent foreign policy, would provide a more stable world situation and be much less costly than a continued arms race. For this reason the plan to put a new generation of American-provided nuclear missiles in Europe makes little sense. European opposition to being made battlefield targets has led to growing problems in Europe and increasing distance between our allies and the United States. The Euromissiles should not be deployed.

Foremost among our concerns in all aspects of military spending must be arms control and disarmament efforts. A nuclear freeze that is multilateral and immediate should be initiated. SALT II should be ratified. Neutron weapons should be stopped before they are deployed, and all nations possessing nuclear weapons should be urged to adopt a policy of "no first use" of their weapons.

We do not need further refinement and modernization of our already redundant nuclear arsenal, we need a clear cut commitment to avoid using them so long as others do. Instead of a new 5-year program for fighting nuclear war, such as that put forth by Defense Secretary Caspar Weinberger, we must channel our efforts toward methods of reducing and ultimately eliminating nuclear weapons.

This defense appropriations legislation is bloated with evidence of lack of concern for Americans and for a stable world environment. It is long past time to end our obsession with bigger and better military toys and focus instead on peace. Our great and unending stream of knowledge and talent must be concentrated on avoiding war, not generating ways in which to fight it.●

The CHAIRMAN. If there are no other amendments, the Chair recog-

nizes the gentleman from New York (Mr. ADDABBO).

Mr. ADDABBO. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker, having assumed the chair, Mr. ROSTENKOWSKI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7355), making appropriations for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. FORSYTHE

Mr. FORSYTHE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FORSYTHE. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FORSYTHE moves to recommit the bill, H.R. 7355, to the Committee on Appropriations.

The SPEAKER. Without objection the previous question is offered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. EDWARDS of Alabama. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to make the following announcement:

Following the vote on this bill, the House will take up the rule on the State, Justice, Commerce, judiciary appropriation bill. Upon the completion of the rule, we will be finished for the evening.

The vote was taken by electronic device, and there were—yeas 346, nays 68, not voting 19 as follows:

[Roll No. 425]

□ 1840

Mrs. SCHROEDER changed her vote from "yea" to "nay."

Mr. HUGHES changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. STRATTON. Mr. Speaker, in my enthusiasm and excitement over the successful completion of the defense appropriation bill, I had a slight oversight. I neglected to cast my vote.

As dean of the New York delegation, I was passing out plaques to our retiring Members.

I would have voted "yea" on passage of the bill.

AMENDING THE PUBLIC HEALTH SERVICE ACT

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce be discharged from further consideration of the bill (H.R. 7338) to amend the Public Health Service Act to extend through March 31, 1983, the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. BROYHILL. Reserving the right to object, Mr. Speaker, I am sorry I was not able to hear the bill that was being brought up.

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL. I yield to the gentleman from California.

Mr. WAXMAN. Mr. Speaker, H.R. 7338 is not the Clean Air Act. It is a noncontroversial bill which will extend for 3 months the President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research. The Commission is scheduled to expire on December 31, 1982. We have discussed this with the ranking Republican member of our subcommittee who has no objection.

Mr. BROYHILL. As I understand, this is to permit this Commission to issue their final report.

Mr. WAXMAN. That is correct.

Mr. BROYHILL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

H.R. 7338

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1804 of the Public Health Service Act (42 U.S.C. 300b-3) is amended—

(1) by striking out "for the fiscal year ending September 30, 1982" in subsection (a) and inserting in lieu thereof "for the period beginning October 1, 1981, and ending March 31, 1983"; and

(2) by striking out "December 31, 1982" in subsection (b) and inserting in lieu thereof "March 31, 1983".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HOUR OF MEETING TOMORROW

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns tonight, it adjourn to meet at 2 p.m. tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 6957, DEPARTMENT OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS ACT, 1983

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 617 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 617

Resolved, That upon the adoption of this resolution it shall be in order, section 311(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 6957) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1983, and for other purposes. During the consideration of said bill, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI are hereby waived: beginning on page 3, line 5 through page 4, line 14; beginning on page 5, line 18 through page 8, line 2; beginning on page 8, lines 14 through 20; beginning on page 10, lines 1 through 6; beginning on page 11, line 2 through page 12, line 4; beginning on page 14, lines 20 through 24; beginning on page 15, lines 6 through 13; beginning on page 15, line 20 through page 16, line 6; beginning on page 17, line 13 through page 24, line 17; beginning on page 26, lines 2 through 6; beginning on page 26, line 18 through page 27, line 2; and all points of order against the following provisions in said bill for failure to comply with the provisions of clause 6, rule XXI are hereby waived: beginning on page 3, line 6 through page 4, line 14; beginning on page 7, line 1 through page 8, line 2; and beginning on page 15, line 20 through page 20 through page 16, line 6.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to advise the Members that history has just been made. That is the first time that we have had a woman act in the capacity of reading clerk.

The young lady's name is Meg Goetz. She is on the Clerk's staff, in the office of the Journal clerk.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. FRENZEL. Mr. Speaker, this is a historic occasion, of course. I was wondering how the Speaker was going to assure us that the new reading clerk would be paid at the proper rate—since I am not aware that there are any vacancies or any retirements.

Can the Speaker tell us how he has accomplished this without structuring a new job or passing it in the normal manner?

The SPEAKER. The Chair would advise the gentleman that he has not stated a parliamentary inquiry, but for the information of the House, Miss Goetz is an employee in the Clerk's Office, and as such she will be used as a reading clerk as well as a Journal clerk in the future as needed.

□ 1850

The SPEAKER. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, I yield the usual 30 minutes for the purpose of debate only to the distinguished gentleman from Tennessee (Mr. QUILLEN), and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 617 provides waivers of points of order permitting the consideration of H.R. 6957, the Commerce, Justice, State appropriations bill for fiscal year 1983. This appropriations bill provides necessary new funding for a number of departments and related agencies, totaling $9,069,567,000. The bill provides new authority in the amount of $1,734,725,000 for the Department of Commerce; $2,704,352,000 for the Department of Justice; $1,867,378,000 for the Department of State; and $799,340,000 for the judiciary. Various lesser amounts are provided for related agencies.

The rule waives section 311(a) of the Budget Act against consideration of the bill. This waiver is necessary because the overall ceiling set by the budget resolution has been breached. The bill before us is in compliance with the section 302 allocations, however, and in fact is $248,000 under the instant subcommittee 302(b) allocation of $9,070,000,000.

The rule also waives clause 2 of rule XXI prohibiting unauthorized appropriations and legislation in appropriations bills against specified portions of the bill. This waiver offers protection against lack of authority for the appropriations for the Economic Development Administration, the Minority Business Development Agency, the U.S. Travel and Tourism Administration, the National Oceanic and Atmospheric Administration, and several fishing-related programs administered by the Department of Commerce.

The clause 2, rule XXI waiver also applies to the Maritime Administration in the Department of Transportation, the International Trade Commission, the Office of the U.S. Trade Representative, and the Small Business Administration. Funding for the Justice Department also required a waiver of clause 2, rule XXI, with the exception of that for the Office of Justice Assistance, Research and Statistics

and for official representation. Finally the clause 2, rule XXI waiver applies also to the Commission on Civil Rights and the Legal Services Corporation.

The third type of waiver granted by this rule protects specified portions of the bill against points of order under clause 6 of rule XXI, which prohibits reappropriations. Reappropriations were recommended for the Economic Development Administration, the National Oceanic and Atmospheric Administration, and the Small Business Administration, thus necessitating this waiver.

Mr. Speaker, the House considered a rule for H.R. 6957, the Commerce, Justice, State appropriations bill on August 13. The matter was unresolved because of controversies related to the Federal Trade Commission, whose authorization bill had not yet come to the floor. On December 1, the House passed H.R. 6995, to extend the FTC authorization and limiting the authority of the FTC according to the will of the House.

I hope that we will all keep in mind the purpose of this so-called "lame-duck" session, which has been called in order to pass appropriations bills. Let us adopt this rule which provides for the consideration of the Commerce, Justice, State appropriations bill and move toward our sine die adjournment target date.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, the resolution and the bill itself have been ably explained.

We all know that it is time to get down to the business of passing these appropriation bills. I have heard a lot of debate on some of them which I thought was unnecessary. I hope with the adjournment date scheduled for the 17th of this month that we can act quickly on this rule and adopt it.

Mr. Speaker, I would like to point out that the bill as reported represents an increase of $539 million in budget authority over the 302(a) allocation for discretionary programs consistent with the budget resolution.

There is some controvesy. The FTC funds are not protected in the measure and if a point of order is raised, they will be stricken. The rule does provide certain other waivers.

Mr. Speaker, we need to get down to business.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Speaker, I thank the gentleman for yielding.

If I could, I would like to inquire of the gentleman from Louisiana with respect to a couple of waivers that are permitted in this particular bill.

I notice that in a couple places where the waivers are permitted, there is a phrase within the bill under the waivers that says, "including the hire of passenger motor vehicles."

Now, that is a rather new phrase to me. I do not see any description of it in the report. Was there discussion of this in the Rules Committee of what we are authorizing and for what purpose?

Mr. LONG of Louisiana. Mr. Speaker, if the gentleman will yield, I could not hear. I would ask the gentleman which page he is referring to?

Mr. WALKER. I would be glad to tell the gentleman. On page 14 under the International Trade Commission of the bill and also on page 26 under the Commission on Civil Rights, the phraseology shows up, "including the hire of passenger motor vehicles," and that phase is something I do not remember seeing previously. It appears to me to be an authorization of some kind.

I would like to know what the purpose of this authorization is in the bill that we are waiving a point of order on.

Mr. LONG of Louisiana. May I yield to the distinguished chairman of the Appropriations Committee?

Mr. WALKER. I will be glad to yield to the gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Under our procedure, we do not permit the hire of automobiles unless it is provided in an authorization bill. It is not a new authorization. It has been carried for years for those agencies or departments that want to hire motor vehicles. Otherwise, we would not permit them to do it.

Mr. WALKER. This is included under the authorization legislation?

Mr. SMITH of Iowa. Right; it is not in violation of anything.

Mr. WALKER. Mr. Speaker, I thank the gentleman.

If I could further inquire of the gentleman from Louisiana, another waiver in the bill is for the Legal Services Corporation. Is the Legal Services Corporation properly authorized or is this a case where we are waiving points of order against a program which does not have proper authorization?

Mr. LONG of Louisiana. Mr. Speaker, if the gentleman will yield, the gentleman is correct in his assumption. It is a rule XXI waiver because of lack of authorization.

Mr. WALKER. There is no appropriate authorization then; so as I understand, the only protection we have in here is the language in the bill that would assure that all protections built in by the House in H.R. 3880 would apply; is that correct,

Mr. LONG of Louisiana. That is my understanding.

Mr. WALKER. I thank the gentleman very much.

Mr. QUILLEN. Mr. Speaker, I urge the adoption of the rule. Let us get down to business and pass it in a very speedy way.

Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

Mr. LONG of Louisiana. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. STRATTON).

□ 1900

Mr. LONG of Louisiana. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. I thank the gentleman from Louisiana for yielding.

Mr. Speaker, I asked for this time in order to make inquiry of the gentleman from Louisiana.

It is my understanding from reading the rule that has been presented that the waiver of the point of order against rule XXI with respect to the Federal Trade Commission authorization is not contained in the rule. In other words, the appropriation for the Federal Trade Commission is not protected from a point of order on the basis that it has not been authorized. Is that correct?

Mr. LONG of Louisiana. The gentleman is correct.

Mr. LEVITAS. Mr. Speaker, I thank my good friend, the gentleman from Louisiana, for this information.

I would hope and expect that during the course of consideration of the bill that the appropriate point of order will be made against that portion of the bill so that the matter can be more properly handled as we take up the continuing appropriations resolution.

Mr. LONG of Louisiana. Mr. Speaker, I have no further requests for time and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

TRIBUTE TO HON. CLAIR W. BURGENER, HON. DON H. CLAUSEN, HON. ROBERT K. DORNAN (CALIFORNIA), HON. BARRY GOLDWATER, JR., HON. WAYNE GRISHAM, HON. PAUL N. (PETE) McCLOSKEY, JR., AND HON. JOHN H. ROUSSELOT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. MOORHEAD) is recognized for 60 minutes.

Mr. MOORHEAD. Mr. Speaker, I and other members of the California Republican delegation have taken this special order to honor the seven retiring Republican members of our California delegation. These seven retiring Members are among the most outstanding Members of the House. They have had many years of distinguished service to our country and to our party.

DON CLAUSEN is now completing 20 years as a Member of the House of Representatives. He has served as dean of the California Republican delegation and has been our leader these past two Congresses. He has served on the Committee on Interior and Insular Affairs and on the Committee on Public Works and Transportation and has done outstanding legislative work for this Congress in that particular position.

I know he has acquired many friends here in the House of Representatives and they have recognized his tremendous work as the minority leader of the Committee on Public Works and Transportation.

He has been effective in meeting the needs of Californians and his constituents and has been a valuable and major contributor to our delegation. We will miss DON very much in his retirement.

One of my closest friends in the Congress has been JOHN ROUSSELOT. He is my neighbor in southern California and when I announced that I was going to be a candidate for Congress in 1972, he called me on the telephone and told me that he wanted to come to me and talk to me at my home.

Here is a capable, trained Member of the House of Representatives willing to put himself out for other candidates wherever they may be.

As our representative on the Congressional Campaign Committee, JOHN ROUSSELOT has traveled throughout the State of California and has sacrificed time that he needed for himself in his own area to work for others.

On the floor, very few people would not recognize his tremendous ability as a legislative leader in following legislation of all kinds that came before the House of Representatives. He has always been ready and available when many of the rest of his fellow Congressmen have been elsewhere.

On the Ways and Means Committee, he has given his skill to the guidance of legislation for the benefit of our State and our Nation.

JOHN ROUSSELOT has been a tremendous Congressman. He is one who we all hate to see go and who we expect to welcome back in some important position of public service in the very, very near future.

JOHN, we all love you and we hate to see you leave our numbers, but we wish you the very best in the years ahead. We know that we will be with you on many, many occasions.

BARRY GOLDWATER, JR., has been a valued Member of the House of Representatives for the past 14 years. He is, of course, the son of the patron saint of the Republican Party, BARRY GOLDWATER, SR. He has become highly respected in his own right during the years that he has been here in the House of Representatives.

He has served on the Committee on Science and Technology and on the Committee on Public Works and Transportation, and has become an expert in matters dealing with aviation, and has been of tremendous service to the entire aviation industry of this country.

We are going to miss BARRY. We know that he has put up a tremendous fight for the U.S. Senate this last year, and we hope also he will be back in some position of leadership.

We are going to miss, also, the conscience of the Republican Party of the Congress, PETE MCCLOSKEY.

PETE has not always been with us on every issue, but I have noticed in the years that I have been in the Congress that when PETE has taken a stand on a bill, when he was on our side, he has been the person who led this House and was able to get that legislation swung in the direction that he was working for.

I have seen him personally on this floor be the person who determined the outcome of legislation by his persuasive capabilities.

We will miss PETE in the House in the years to come. We will also miss his insistence on occasion to get us going perhaps in a little different direction than we might have wanted to go ourselves.

One of the men that I will miss the most is my good friend, CLAIR BURGENER, with whom I served in the State legislature, who has become respected by every Member of this House as the secretary of the Republican Conference and as a very trusted and honored member of the Appropriations Committee and as a man who we can always count on for guidance in our caucuses and wherever we were gathered.

□ 1910

CLAIR BURGENER is a person who had tragedy in his own home, and I think his attention to the needs of those who were handicapped or less fortunate than he was himself has been one of the things that has brought attention to CLAIR, and respect and honor to him, because he has believed in others. While he has been a very strong fiscal leader, many times he has been the one that stepped in and saw that those that were unable to take care of themselves were properly taken care of by the U.S. Government. In every respect I can think of, he and Marvia will be missed. His happy face, his great humor, his leadership in conversations wherever he would go—CLAIR, we are going to miss you.

I think that we have all appreciated the tremendous memory and speaking ability of ROBERT K. DORNAN. BOB DORNAN is one of those people that attracts attention wherever he goes. As a great television commentator in the early days, and as a Member of Congress, he has been controversial but he has been willing to fight for those things that he believes in. He has really been a person who brought many problems to the attention of this House that others were afraid to attack, and certainly his attention to the plight of our prisoners of war and others who were prisoners throughout the world has certainly brought honor to him and to his career. ROBERT is a true patriot, one who believes in his country, one who believes in America, who is a very, very strong believer in the Christian faith in his own Catholic Church, and one who has been willing to stand for that which he believed in regardless of where it took him or regardless of what the sacrifices might be.

We have been proud of the job that he has done in the Foreign Affairs Committee these past 2 years. ROBERT, we are going to really miss you, and we hope you are back.

One of our youngest Members is WAYNE GRISHAM. WAYNE has only been with us for 4 years, but WAYNE has brought attention to himself as a fighter for southern California, as a strong conservative who stood for fiscal responsibility, believed in his country, and was willing to give his time and effort for anyone who needed his assistance. I had a chance to get to know WAYNE pretty well through a social group that we belong to, in which we tried to educate each other on occasion. WAYNE is really a fine American. He is one who has given a great contribution to the Congress, and one whom we will miss very, very much.

Mr. Speaker, at this time I would like to yield to those who wish to join me in this special order.

Ms. FIEDLER. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentlewoman from California.

Ms. FIEDLER. Mr. Speaker, I join with my colleagues today in saying an official farewell to seven good and close friends—the retiring Members of our California Republican delegation. Some I knew for a number of years before coming to Congress. Others I met upon my arrival. But, all of them have been good and kind friends.

I know by mentioning something about each of them, I will undoubtedly forget something. But, I would like to try anyway.

CLAIR BURGENER, you were the first Member of the delegation to call me the morning after I won. Without your help, my first term in Congress would not have been nearly as happy or productive.

DON CLAUSEN, you have been a constant source of help to me and my district. Whenever I have asked, you have never said no.

BOB DORNAN, what can a person possibly say about you that would be adequate. From my early days of public life in Los Angeles, you have been there and I am glad to call you my friend.

BARRY GOLDWATER, JR., you were also there in the very beginning of our struggles in Los Angeles. You helped every step of the way. You deserve a large portion of the credit for our victory over forced busing. And, you get a lot of the credit for the friendship you have shown over the years.

WAYNE GRISHAM, your help over the past 2 years has been invaluable. I wish you well back in California.

PETE MCCLOSKEY, you have been a friend and you were especially helpful to me in the days following my first election.

And, finally, JOHN ROUSSELOT, you were a big part of my decision to run for Congress and your early support was extremely important to me and I thank you for it.

So, to all seven of you, I wish you Godspeed and good luck and I know I speak for all of my colleagues when I say, we will miss you.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I want to thank the gentleman in the well for bringing to the attention of our colleagues the departure of some of our colleagues from the State of California.

I just read the list: BURGENER, CLAUSEN, DORNAN, GOLDWATER, GRISHAM, MCCLOSKEY, and ROUSSELOT—the names evidencing the diversity of opinion, the diversity of ability, the diversity of specialty, the diversity of personality that I think marks the California delegation. In a very true fashion I think it can be said that our loss in California is the Nation's loss. A number of those people are leaving because they sought another office—the U.S. Senate—from California. Some are leaving for other reasons, but I think we can say confidently that all have made their mark; all have given of themselves; all have made a real contribution to the U.S. Congress in the time that they served.

It is unfortunate that we are losing so many of them. It is unfortunate that we are losing so many of them all at one time. They have done a service for our State, and they have performed a service for this Nation. The fact, I guess, that they are leaving is just an indication of how this body is a body that changes continually, that remains the same, but yet has different faces year after year.

They have helped all of us at one time or another. They have been extremely helpful to me in my first two terms here. They have always been there when we needed to ask them for support, when we needed a contribution from them, when we needed assistance on a particular bill. They have worked very hard for our State.

Our State should offer its thanks to them as those of us who remember as Representatives from the State of California offer our thanks to them today.

Mr. THOMAS. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from California.

Mr. THOMAS. Mr. Speaker, I want to commend our soon-to-be dean, although that means that we have lost a dean if we are to acquire a new dean in the California delegation.

As the gentleman read down and described the seven gentleman who will no longer be with us, one of my immediate reactions was the number of years of experience represented in the seven gentleman—over 80 years' experience. And then, the fact that there are seven from California who are retiring.

When we look at Republican Members from other States, that is more Members than all but four other States in this Union, excluding California—Members leaving from one State. That kind of experience, that kind of number, cannot be replaced.

These are Members from the Oregon border to the Mexican border who are leaving us. They are Members from my own class—WAYNE GRISHAM, a classmate, is leaving us. My big brother when I was a freshman, BOB DORNAN, who can only be described as unique, is leaving us. Then, we reach those Members who have more than 10 years' experience, those Members whom I consider among the most talented in the House of Representatives—CLAIR BURGENER, BARRY GOLDWATER, JR., PETE MCCLOSKEY, JOHN ROUSSELOT, and our dean DON CLAUSEN. They were very good to me, very helpful, and I shall miss them very much.

Mr. DANNEMEYER. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from California.

□ 1920

Mr. DANNEMEYER. Mr. Speaker, I would like to express my personal thanks to the seven Members of our delegation who happen to be Republicans and who are retiring at the end of this 97th Congress. They have been most helpful to this new Member from the beginning of my first year of service in the House from the great State of California.

Those Members represent a diversity of views, as we all know. In our two great parties, we do have differences of opinion on the major issues of our day. These gentleman have been able to articulate those differences very well.

On an occasion such as this, it is only appropriate to observe that, as to the seven Republicans from California who are leaving at the end of the 97th Congress, three of the seven are what I would categorize or classify as voluntary departures. The other four are leaving involuntarily, in that they sought or would have sought reelection, but for the presence of an activity that goes on once every 10 years in the country called reapportionment. Four of our brethren are not returning to the U.S. Congress, not because they did not want to but because the vagaries of reapportionment put them in a position where, as a practical matter, it was impossible for them to return, this at a time when the voters in the State of California in 1982 elected a Republican at the top of the ticket to the U.S. Senate and elected a Republican as Governor.

What I am suggesting is that the gerrymandering, as it took place in California in 1982, should be used by the publishers and editors of future textbooks on the subject of gerrymandering as exhibit A in terms of how to decimate one party or the other. In this instance, our Democratic colleagues, who engineered the reapportionment in the State of California, did a magnificent job from their standpoint of stacking districts in the State of California to assure the probability that they would increase their numbers in this body. I do not find that particularly a pleasant statement to make, but I think it is appropriate to make that statement on this occasion when we are honoring our colleagues on their retirement.

Mr. Speaker, I would like to thank each one of these gentlemen for the assistance they have given me in my 4 years in this body. I wish them well in whatever line of work they wish to pursue, and I know that they have many years of service left to the people of this Nation. I thank our dean, Congressman MOORHEAD, for his leadership in presenting this opportunity for the Members of the House to pay tribute to our colleagues this evening.

Mr. DREIER. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from California.

Mr. DREIER. Mr. Speaker, I thank very much the new dean of our delegation for taking out this special order.

As my other colleagues from California have said, the impact of redistricting is devastating, and for me, it will be a terrible personal loss to lose all of the seven colleagues in our delegation who are going to be departing.

Let me speak first of our dean, DON CLAUSEN.

DON CLAUSEN's unflagging leadership has helped the California delegation through difficult and trying times. DON is a man of compromise who is able to lead by balancing opposing views in a fair and judicious manner. But above all, DON has led by example. His consistent and intelligent guidance of the delegation, his years of service to the Interior and Public Works Committees, and his personal dedication and expertise will not easily be forgotten.

DON's guidance and advice were indispensible in my first term in Congress and I am grateful for the attention and consideration he has shown me.

In fact, I was telling him earlier that I am one of the few Members who have been able to look to DON CLAUSEN as dean, because he has been the only dean since I have been a member of the California delegation. He will be sorely missed. I am grateful to him, and I will miss him. He has been in this Congress for 30 years. I have known him for years by reputation and have been very fortunate to have had this opportunity over the past 2 years to serve under him as a member of the California delegation.

PETE MCCLOSKEY is another colleague who will be greatly missed. I have not always agreed with PETE, but in one word he can best be described as a man of principle.

In his 15 years in office, PETE has held by his convictions, no matter how difficult that might be.

His work on the Merchant Marine and Fisheries Committee has been outstanding. And his service to the 12th District has likewise been exceptional. PETE has been an important voice in this Congress for free market principles, and we have all benefited from his experience and insight. Last, I would like to thank him for his consistent support in my first term in office. I am grateful for his friendship and wish him the best of luck.

I had the opportunity to serve with PETE on the subcommittee on which he was the ranking member. He was the ranking member of the Manpower and Housing Subcommittee of the Government Operations Committee, and PETE gave me a great opportunity on several occasions to fill in for him and I was able to grill a number of witnesses when he was not able to be there because he was out in California campaigning.

In fact, PETE surprised me when I first joined that subcommittee. I had heard a lot of things about PETE before I came to the Congress, and in one of our first meetings on the Manpower and Housing Subcommittee, he leaned over to me and said, "Dave, watch this. We are going to close down the Department of Housing and Urban Development." He has not been successful in doing that yet, but I certainly laud him for his efforts, and I was pleasantly surprised to hear that coming from PETE. He has been a tremendous supporter of me, and I will miss him greatly and I appreciate his friendship.

BARRY GOLDWATER, JR., is another member of this delegation who has played a major role in the fact that I am a member of this delegation. Over the last 13 years, BARRY GOLDWATER has compiled an impressive record of service to this Congress. He is long overdue for our thanks and appreciation.

My personal experience with BARRY—first as an intern and now as a colleague and friend—taught me that BARRY is an exceptional individual. He is open and accessible. In the years spent in Washington, he has never lost touch with his friends and constituents back in California, as he regularly has commuted back to California. That certainly has shown up well, as he received 80 percent of the vote in his district. This sensitivity is an obvious part of his relationship with his staff. Half of them have been with BARRY since he was first elected in 1969. This loyalty is only possible because BARRY treats the members of his staff with an uncommon respect and dignity.

As a legislator, BARRY has balanced his ambition and determination with a good sense of perspective. BARRY has argued persistently and eloquently for limiting the role of Government in our lives. But few men have matched BARRY's quiet determination to accomplish these goals.

For 7 years, he has fought with the Office of Management and Budget to cut the wasteful use of audiovisual equipment by Government agencies. This may seem like a trivial cause, but over $2 billion was being consumed by this practice, and it took years of excruciating work before the redtape could finally be removed. As a result of BARRY's work, audiovisual services are now contracted out at significant savings to the American taxpayers. BARRY's determination in this seemingly inconsequential issue is typical of his entire career. He championed the rights of the deaf and blind from his first term in office, long before national and media attention focused on these issues. For his long years of service to the handicapped, the National Federation of the Blind has presented BARRY with the prestigious Newel Perry Award. His work in this area will be sorely missed in this Congress.

BARRY will probably be best remembered for his efforts to protect the privacy of individuals. He is undoubtedly the House's foremost advocate on privacy issues, and in 1974, he secured passage of the landmark Privacy Protection Act. Thanks to his efforts, citizens are protected from the computerized lists that have proliferated with the growth of sophisticated communications technology.

I know that BARRY has done much more in his long tenure in office. He is a man of principle who has tackled issues no one else was willing to pursue. He is a man of determination who was willing to see his convinctions through to the end. I will miss him greatly and I hope we can all learn from his fine example. The experience I had as an intern in his office will never be forgotten, and I look forward to a continuing friendship with him in the years to come.

Another great member of our delegation, one who has been a real inspiration to me, is my colleague who has the district adjacent to mine, my senior colleague, JOHN ROUSSELOT. I doubt if there are many Members of this Congress who will not miss JOHN ROUSSELOT on both sides of the aisle. He is a man of exceptional drive, determination, and goodwill who has won the respect and admiration of the men and women with whom he has worked. JOHN has served his constituents and this Congress with exceptional skill for over 12 years. He has been the driving force behind the balanced budget amendment which at long last may become a reality. I hope it will.

□ 1930

JOHN ROUSSELOT has been, without a doubt, one of the most dynamic leaders in this body and I think the best example of that was shown when a columnist whom I often do not agree with—Jack Anderson—based on a survey he took of Members of this body, found that JOHN was one of the five most effective Members of the Congress and among the most popular Members of this body. He will be greatly missed.

CLAIR BURGENER is another Member who chose to retire after years of service.

His dedication and expertise have been a valued asset during the 5 terms of his tenure. His work on the Appropriations Committee, particularly the Energy and Water Development Subcommittee, has been especially important in the past 2 years, as we have all worked to control Government spending and bring fiscal restraint to this Congress.

He gave me a tremendous opportunity. I had been a Member of this body for a short period of time and was faced with a problem that existed in my district. I had an opportunity to testify before his subcommittee and he was very gracious and helpful to me as I prepared my testimony as we faced the extension of the Cucamonga Creek project in my district.

CLAIR's work on behalf of his constituents will also be missed. He is particularly sensitive to the problems of the illegal immigration and has

worked diligently on behalf of the mentally retarded

His leadership within the House Republican conference and his commitment to the California delegation will be sorely missed. I am grateful for the friendship he has shown in my first 2 years in Congress and wish him well in years to come.

I look forward to his continued friendship in the years to come.

That dynamo, BOB DORNAN, whom we have spoken of before, certainly has unmatched energy and enthusiasm and will be sorely missed. I have had a change already to speak to BOB today about his speeches yesterday on behalf of the Peacekeeper, the MX, and he has provided us with some tremendous arguments there which we will be able to use in the future. Unfortunately they were not successful yesterday.

BOB has been a forceful and consistent advocate of a number of issues, and he pursued each with the same drive and determination, no matter how unpopular his position.

BOB will best be remembered for his efforts on behalf of the thousands of Americans who remain unaccounted for in Southeast Asia. His unselfish devotion to these men and their families has helped focus national attention on this tragedy and has assured that these men will not be forgotten.

I know that BOB's commitment to our missing in action will not end and that he will continue to pursue this cause with the zeal and determination that has characterized his 6 years in the House.

I want to wish BOB and his wife, Sallie, all the best in the years to come.

Mr. Speaker, I would like to talk for a moment about a friend and colleague. This is a very difficult situation for me as I went through without a doubt one of the most awkward and distasteful situations that could possibly exist. This goes back to the issue of redistricting. I had to run against a very good friend and senior colleague who is of the same party. I am referring to my senior colleague, WAYNE GRISHAM.

I would like to join WAYNE's many friends in congratulating and thanking him for his outstanding service not only to his community but to our Nation and to this body.

Since he first was elected in 1978 to the Congress he has been a conscientious and high principled legislator. He is an effective and tireless worker who has become a highly respected and knowledgeable member on the Committees of Public Works and Transportation and Post Office and Civil Service. His expertise on his committee assignments will be sorely missed.

As just one example of his effectiveness on the Public Works and Transportation Committee he was instrumental in negotiating the arrangement which allows the Century Freeway in Los Angeles County, a roadway which when completed will go right through the heart of Los Angeles County, connecting the east and the west side.

His political life started in 1970 when he was elected as a La Mirada City councilman where he actively served for 8 years.

WAYNE was twice chosen by his peers in La Mirada, and in 1978 WAYNE was asked by his civic leaders to run for the U.S. Congress. He was elected handily in 1980 and defeated his opponent by gaining over 70 percent of the vote.

Perhaps even more important than his legislative accomplishments is the help and counsel WAYNE has provided to his colleagues. For those of us who have worked with him, he has provided an invaluable source of friendship and counsel.

His warm and friendly personality has been a comfort to all of us in the most awkward of situations.

During his extremely difficult political life WAYNE GRISHAM has been gracious and sincere in his efforts to serve the people of his district.

WAYNE is the most decent and honorable candidate I have ever met. In a period of transition, since the primary election, WAYNE and his entire staff, both in California and Washington, have been courageous and courteous.

No tribute to WAYNE would be complete without mentioning his wonderful wife, Millie Grisham. WAYNE has been married to Millie for the past 37 years. Throughout these many years, Millie has been an inspiration to WAYNE and a friend to us all.

Millie, who is now president of the Congressional Wives Club, will be missed greatly by the many friends she has made here in Washington. She is a woman of grace and dignity.

I extend to WAYNE GRISHAM, his wife Millie, and his three children, Cathy Brooks, Randy, and Kellie, my warmest wishes for a healthful and prosperous future.

He has been a great friend. Since we had to go through our internicine battle I cannot imagine anyone being as gracious. In fact, I have said to him on several occasions that for myself and my staff, had we come out on the other end of the stick, I am not sure we would have been as gracious as WAYNE has been, and that is the best compliment I could possibly pay him.

He will be missed and as I look at the seven senior colleagues who have been a tremendous inspiration to me as we get ready to embark on the challenges of the 98th Congress with fewer Members on our side of the aisle, I will look forward to the challenges but those challenges will be even more difficult to face without our great senior colleagues.

I thank very much my senior colleague, the gentleman from California (Mr. MOORHEAD), for taking out this special order.

Mr. MOORHEAD. I thank the gentleman for his comments.

At this time I yield to the gentlewoman from Ohio (Mrs. ASHBOOK).

Mrs. ASHBROOK. Mr. Speaker, I would like to take this opportunity to pay tribute to a true friend and dear colleague, JOHN ROUSSELOT.

I first met Mr. ROUSSELOT many years ago, when I had come to Washington with my husband, John A. When I was elected to Congress last summer, he was quick to offer any assistance he could in helping me learn my way around, and I could always turn to JOHN for advice.

His activities and interests are very diverse. From the Congressional Balanced Budget Caucus to the Coalition of Peace Through Strength, JOHN ROUSSELOT showed his dedication and devotion to the constituents he so ably served.

I admire his consistency in fighting excess Government spending and his interest in fiscal responsibility. JOHN ROUSSELOT is a hard-working, intelligent man and I would like to wish him much success in the future.

□ 1940

I also would like to say what a loss to this Congress it is to say goodby to BOB DORNAN, a very special friend of John Ashbrook's. BOB DORNAN is a great American, and BOB, I wish you love and success in the future.

Mr. MOORHEAD. I yield to the gentleman from California (Mr. LEWIS).

Mr. LEWIS. I thank my colleague for yielding me this time.

CARLOS, I cannot help but formally express my appreciation and our whole delegation's appreciation for your putting together this effort to recognize a group of the finest Members of this House that have ever served in this which is known as the finest legislative body in the land. Personally I think it is the finest legislative body in the world.

I cannot help but remember the first time I met the former dean of our delegation, DON CLAUSEN. Shortly after Congressman Jerry Pettis was elected in San Bernadino County to the Congress, DON CLAUSEN's old administrative assistant had been a roommate of mine years before, and he came down to talk about this incredible hulk of a guy from up in northern California. And so I went out of my way to seek out DON and try to get some advice and counsel, for it was my responsibility to attempt to help the then Congressman Pettis organize his district field operation.

DON in those early days, probably he will not remember it, but in discussing the Congress and the work that I was later doing in the State legislature, one of those late evening gatherings where you discuss politics among those who must live with it day in and day out, took off from his tie, and drew out a tie clip that had the seal of the Congress on it, and looked at me and said, "JERRY, I hope to see you there some day."

DON has been a friend from the day we first met, and a leader in the House who has taught me more than I could ever share this evening.

During the 97th Congress it was my privilege to serve with DON on the Public Works and Transportation Committee. He sort of twisted my arm in fact to recognize that if there was opportunity in the House, it certainly lay in that committee. And once I had the opportunity to serve there, his leadership, his counsel, his direction allowed me to get an early start, I hope, in learning this process.

DON CLAUSEN reflects very much the best of that which is leadership from California. We are going to dearly miss him.

But I have got to tell you that DON is a guy who we will not miss very long, because he is not going to be very far away. We will continue to need his counsel. I think we are going to hear an awful lot from DON CLAUSEN in the years ahead.

What can you say about the gentleman from San Diego, CLAIR BURGENER. CLAIR, in the year, CARLOS, that you and I shared with him in Sacramento, in the State legislature, immediately made it obvious that he was the cream of the crop. He was there a legislator's legislator. He became known as—maybe a surprise to him in the House—a moderate to liberal—most people described him as a liberal legislator. And that was because within the body that is a State legislative responsibility, among others education is held by our Constitution as our greatest responsibility. And CLAIR had an active interest in the problems of the handicapped, and particularly educational programs that related to those who were handicapped.

Without any doubt, he absolutely reversed the direction and pattern of opportunity for those in California and in the country who happen to be special people. Without any doubt in my mind, he demonstrated for all of us that each and every one of us has a responsibility to see that people and their concerns come first.

CLAIR BURGENER here in the House of Representatives, his success and his leadership is obvious to anybody who will but look. To me it has been an inspiration to get his advice and counsel as well. There is no doubt that each of us will miss him and Marvia as they go back to San Diego County and do a little bit of business with their sons.

But I think perhaps do that which all of us would do if we were wise enough—recognize that in those years following public service, if you can lay a pattern that will allow such a wonderful couple to share one another and spend the time together that they will spend, what better second or third, I am not sure if this is CLAIR's fifth or sixth career that is ahead of him.

PETE MCCLOSKEY—within our delegation there is little doubt that PETE perhaps is considerably more moderate in the spectrum than most of the others. At the same time, while being more moderate, there is little doubt as well that PETE is one of the finest minds in the House of Representatives. He has made an intensive contribution to the committees in which he has worked. He has been willing to develop a new path where a new path was needed.

There is no question in the minds of those who share the future of the Republican Party that PETE MCCLOSKEY has played a key role in seeing that the two-party system has a chance to continue to exist—for each of those parties needs a broad spectrum.

And whenever there was a need for a voice that essentially would raise that which nobody on the inside wanted to discuss, PETE MCCLOSKEY was the guy who was willing to make sure that those voices were heard within the Grand Old Party.

I think frankly we are going to miss that kind of voice as much as anything, not only within our delegation, but within the entire Congress.

I will miss PETE as a friend but most important I will miss him because he forces us to think.

What can you say about BOB DORNAN. Most people do not know it in the House but those from our delegation know it very well. We have in the California delegation normally approximately a weekly meeting. And during that weekly meeting we have what we call the DORNAN hour. That is when we have got our business taken care of, we say, "BOB, what are you doing this week." And he is amazing, unbelievable personality. For BOB will describe what he has been doing or what the issue is at the moment, and his parenthetical phrases can last 25 minutes.

He can remember dates and places and people and times. I did not know he could swim, and he went up to Massachusetts to swim across the channel. Unbelievable guy.

I cannot forget the many, many times it has been my questionable privilege to approach BOB on the floor and put my hand on his shoulder and say, "BOB, do you really have to talk on this one this time." And the reason for that approach is simply this. BOB is very, very emotionally involved in those issues he believes in, and he insists that his voice must be heard when principle that is close to his heart is tied with one of the issues that may be before the House that day.

BOB DORNAN time and time again has spoken to the issue, even though his district was in disagreement with it, and he has one of the toughest races of anybody in the House almost every time. He is a voice that insists that it will be heard, and he is a person who insists that principles are more important than getting elected this year. A great contributor to this House, a wonderful personality whose friendship I hope I will have forever.

BARRY GOLDWATER, JR.—I have never called him Junior—BARRY GOLDWATER is a marvelous personality. A lot of people do not realize it, but within his committee BARRY is one of the hardest workers we have that I know in our delegation.

□ 1950

I served with him on the Public Works Committee and watched him in his work on the subcommittee dealing with aviation. There, there is little doubt where BARRY's heart was. He concentrated his attention. He made a great contribution and virtually has been one of those Members who has been able to change the direction of public policy in that field.

Few people really have had a chance to see that side of BARRY GOLDWATER. Beyond that, he is a very quiet person. In many ways he keeps to himself. If you take the time and have the opportunity, as I have, to discuss in depth his concern and beliefs, his feeling about humankind, he is one of the most marvelous men you will ever get to know. It has been a privilege to serve with BARRY, and I look forward to working with him for a long, long time.

Mr. Speaker, shortly after I came out of college I decided that my mother was wrong, that I should not go to law school, and that is one of the best decisions I ever made. In that, I ended up in the sales business, finally decided on the life insurance business in Los Angeles, went to work for a company called the Penn Mutual Life Insurance Co. Lo and behold, who was associated with that life insurance company, but one JOHN ROUSSELOT—my first exposure to a guy who was destined to have a truly immeasurable impact upon the direction and the future of the Republican Party, not just in our State, but throughout the country.

JOHN received his greatest compliment, as far as I am concerned, when shortly after arriving at the House I had a chance to sit down and talk with some of the real leaders, those people who put together policy and votes on

the Democrat side of the aisle, and in that discussion JOHN ROUSSELOT's name came up and there was a good deal of give and take.

The bottom line is that, to a man, he was described in this business as a pro—a man who knew what his job was, who was willing to do what was necessary to get it done, a man whose word was good and who understands that in this business we have got to deal with one another.

It is like the professional lawyer who goes to the courtroiom and fights his battle and then he goes across the street and has an ice cream soda with his adversary.

JOHN ROUSSELOT understands that we have to work with one another issue by issue, year in and year out.

JOHN ROUSSELOT is a pro in the business of legislative government.

Let me conclude my remarks in connection with JOHN by saying that I will never forget the time that reapportionment took place and suddenly he did not have a district, and for 2 years he was not able to work it out, but reapportionment took place again and there was a new district that kind of overlapped in San Bernardino County and, lo and behold, I was amazed to see JOHN ROUSSELOT in my county asking for votes. He was pounding the pavement talking to people and JOHN ROUSSELOT was back.

Do not count him out, folks. There is reapportionment next year. I fully expect JOHN will continue to make a great contribution to legislative government and public affairs.

I left the seventh Member for last in my comments for a very special reason. Shortly after arriving here, I struck up a very close personal friendship with WAYNE and Millie Grisham. It was not too long after their arrival with me here in the U.S. Congress that we had occasion to take a trip together, leaving Washington and going through several States over several days and finally ending up in a community known as Chappaquidick. We had a lot of fun in that process. We saw lots of the East that we had not seen before. We had a lot of stories to tell when we came back; but more important than that was the friendship itself. There is nothing quite like being with people day in and day out, in this case in social circumstances as well as legislative work, to lay the seeds for a friendship that will last a lifetime.

I could not have a greater friend in terms of the future in public affairs than WAYNE.

I was going to mention another item about WAYNE that you really have to go out of your way to have him tell you sometime. WAYNE does not talk about this very much, but if you go out with him—and especially if Millie is there—after hours and maybe you have something in your meal to loosen you up a little bit, you have got to ask WAYNE about the time he had to crash land during World War II. He got shot down, an absolutely wild circumstance. I had not known before that he could even fly an airplane. As he tells me smilingly—after he found himself on the end of the tail with the plane probably sinking, and eventually waking up in a hospital—he told me that he was no ordinary dummy, that he has not flown since.

WAYNE is a special guy who has made a very important contribution to public affairs in his hometown. He has been on his city council for a number of years, Meredith community. Coming to Washington was one of the goals one has in life that rounded out his great career in public affairs.

Few people realize, but beyond that, WAYNE is one of the more successful independent businessmen in the House. He is not one in this body who was born with a silver spoon but rather, he came back from serving his country during World War II and built a real estate business that any of us would be proud of. He is a rounded leader with business experience, who served his local community, who has made a great countribution here, and for whom I have the deepest respect.

I will not be losing WAYNE and Millie, as far as I am concerned, because we are going to continue not just to be friends, but to be together often.

CARLOS, I thank you for the time.

Mr. MOORHEAD. Mr. Speaker, I yield to the gentleman from California (Mr. HUNTER).

Mr. HUNTER. Mr. Speaker and CARLOS, like you, I am saying goodbye to Members of our family. When I bid farewell to DON CLAUSEN and CLAIR BURGENER and PETE MCCLOSKEY and BARRY GOLDWATER and JOHN ROUSSELOT and BOB DORNAN and WAYNE GRISHAM, I really feel like I am losing members of my family. You are now the head of the California delegation, CARLOS, which is the largest delegation in the Nation. I know that you are going to do a tremendous job serving us and being our leader.

I would like to reflect on a few things that we have shared in the last several years. You know, I really felt like we were a family because when I came here as a freshman, we had a lot of strategizing to do as Californians and as Republicans. We strategized; we fought battles; we helped each other.

Most importantly, everybody in our delegation cared about the other Members. I can remember that practically all of the guidance that I received when I came here as a freshman came, not from any particular institutions, but from the delegation. I can recall that BARRY GOLDWATER showed me how to set up my computer mail system.

WAYNE GRISHAM turned over his mobile office to me. Incidentally, WAYNE, the block is cracked and we would like to return it—I am just kidding, WAYNE. It is a tremendous mobile office and it has helped me carry out my duties in my district that has been expanded greatly.

I appreciate also, WAYNE, the tremendous help that you gave me in my mailing system and in my townhall meeting setups. I want you to know that I will not forget that.

I can recall that PETE MCCLOSKEY pulled out of a race for the House Armed Services Committee seat when we were going for committees so that the freshmen could have a shot at it.

I can remember that CLAIR BURGENER worked to get us all good committee assignments—worked very successfully, I might add.

I can recall in those early days watching BOB DORNAN and JOHN ROUSSELOT giving us tremendous leadership on our floor battles.

I would like to look at these friends individually for a moment, if I might. DON CLAUSEN, our dean, served California for over 20 years with great distinction. In his position on the Public Works and the Interior Committees, DON helped to maintain our infrastructure and to provide our water, which is very important to California.

I hope that we can maintain the dominance that you exercised, DON, in these areas and that accrued so greatly to the benefit not only of the people in the Second District of California, but also to all Californians.

You know, I learned early that seniority on committees is very important in this House, and in DON we had the ranking member on the Public Works Committee and former ranking member on the Interior Committee. I just hope that we can build some day in the future back to the seniority that you earned, DON.

□ 2000

I can remember, DON, that you were good enough to share your expertise in transportation and in other areas with junior Members. You were always there, always willing to help us in our districts.

I have to confess that I felt that you were the father of the delegation, and you really were. You know, you have had a very magnificent career, DON. I know there are a lot of things that you could be proud of, but I know that you personally are most proud, not of any public works but, rather, of your lovely wife Ollie and your two very private works, your daughters Beverly and Dawn Marie, and your four grandchildren.

I can tell you, I know a winner and a champion when I see one. I have a feeling that you may be back in this Chamber with us shortly. Let me tell

you that anything that I can do, of course, will be done, as you have always been there for us, always ready to help.

I would like to speak for just a minute about JOHN ROUSSELOT. A lot of Members in this Congress on both sides of the aisle can represent the feelings and opinions of their constituents through taking polls and through close personal contact and townhall meetings and mail and communication. They can change their positions to reflect those opinions, those changing opinions of their constituents, but there are very few people in Congress—and there have been very few in Congress—who could change people's minds and who could change the political mood of the Nation or of a district. JOHN ROUSSELOT is one of those people.

JOHN ROUSSELOT is truly a mover and a shaker. The ability to do that, I think, is a very rare gift. It requires a great speaking ability, it requires a very keen mind, and it require dedication to ideals. JOHN ROUSSELOT had all of those assets.

I can recall when I ran for Congress in 1980, I was a guy who did not have a chance of winning. There was one gentleman who came down to my district by the name of JOHN ROUSSELOT who was assured by several political experts—namely, my mother and father—that I had a great chance of winning. Sure enough, a couple of weeks later we got some real help from the party and I managed to be successful.

Here was a guy, I learned later, who had helped out a lot of long shots, not people who were favorites, who were sure to win, but people who did not have a real great chance of winning. In fact, I called JOHN's office the other day. He was out at that time installing some members in a club quite a distance from his district. That is typical of JOHN, because he is a guy who has worked for long shots, to try to change this country, to try to bring about a consensus in conservative politics.

One thing has always impressed me about JOHN and that is his ability to literally beat the tar out of a fellow in a debate and make the guy like him at the same time. I have seen that ability in no other Members of the House. I think in future days we are going to need Members who have that ability. JOHN ROUSSELOT has that unique gift. So thanks, JOHN, for your magnificent contribution to America.

The SPEAKER pro tempore (Mr. MINISH). The time of the gentleman has expired.

GENERAL LEAVE

Mr. MOORHEAD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

TRIBUTE TO HON. CLAIR W. BURGENER, HON. DON H. CLAUSEN, HON. ROBERT K. DORNAN, HON. BARRY GOLDWATER, JR., HON. WAYNE GRISHAM, HON. PAUL N. (PETE) McCLOSKEY, JR., AND HON. JOHN H. ROUSSELOT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DREIER) is recognized for 60 minutes.

Mr. DREIER. Mr. Speaker, I yield to the gentleman from California (Mr. HUNTER).

Mr. HUNTER. Mr. Speaker, I would like to say, in finishing my comments about JOHN ROUSSELOT, that here is a man who truly changed America and who is going to continue to change America.

JOHN, thank you for your friendship. I know that we are going to see you in political circles for a very long time to come.

I would like to talk a while about BARRY GOLDWATER, JR., who was one of the first Members that I met when I came back here and who, like JOHN ROUSSELOT, is one guy who came down and worked out in my campaign when I had no chance at all of winning the election.

You know, BARRY was one of the first guys I met on the Hill. He took me over to his office. He showed me his computer system. He helped me set up my mailing system. He taught me about constituent contact. He taught me how to set up an office.

When I met BARRY GOLDWATER, JR., I immediately became aware of the fact that we had a close, tight California delegation that was going to be helpful. Here was a real family.

I can remember debating BARRY GOLDWATER, JR., on the House floor in a debate I did not think we would get into—the draft registration penalties proposed for those who resisted registering for the draft. At that time I became aware of the fact that BARRY GOLDWATER, JR., was a great champion of a right which is very prized by conservatives; that is, the right of personal privacy.

While I did not agree with BARRY in his argument that day, I realized that in BARRY GOLDWATER, JR., we have somebody that this Nation really needs more of; that is, people who feel strongly about some of our rights, so strongly that they are willing to dedicate their careers to preserving those rights. Even though perhaps the committee work and the work on the House floor necessary to develop that advocacy does not involve large political contributions, does not involve building a large political base, but nevertheless it is very important and very necessary to this Nation.

I have to tell you, BARRY, that I greatly appreciated your assistance when I arrived here, and you were one of the first people to help me. I can remember you calling in a proxy vote from Los Angeles, to help me get a committee assignment.

By gosh, when I was in the closing days of my campaign in 1980, you were there. BARRY, when you are in a campaign—and I know you are going to be in more campaigns—I am going to be there. Thank you.

I would like to talk about my colleague from San Diego, CLAIR BURGENER. You know, CLAIR took BILL and I under his wing in 1980. CLAIR is the senior member of the San Diego delegation. At that time we had a big change. Bob Wilson left us in 1980, and BILL and I came in as freshmen Congressmen. CLAIR looked after us.

One of the main things he did for us and for the whole delegation was to fight hard in the Committee on Committees to get us strong committee assignments.

What an important battle that was. It is not until today that I realize how important and how critical that initial fight is. It was great to have an advocate such as CLAIR.

The main thing that CLAIR showed us, DAVE, I think, is that you can disagree without being disagreeable. I do not think there is any Member in the House who is a stronger believer in his own principles than CLAIR. Yet you have a guy who showed us that you can be powerful without being arrogant. You can get along with your adversaries even though you fight with them on the floor.

CLAIR BURGENER brought a certain class to this House and to this delegation. We are going to remember him for that. CLAIR worked very hard in some special areas that do not involve large voting blocs or large numbers of constituents. Particularly, he worked for those who are mentally retarded and for the disabled and the disadvantaged.

You know, I have seen CLAIR put in a lot of time on things that got him very little publicity but that helped people.

Perhaps to some degree Congress is being perceived by the Amercian people as being publicity first and substance second, but CLAIR BURGENER is one of those guys who believes that the substance and the accomplishment is the more important thing. He has always dedicated more of his time to substantive issues.

I have said a lot of things about CLAIR in some of the farewell dinners he has had, and will have in the

future, but I would like to finish with what I believe are CLAIR BURGENER'S three trademarks.

I notice that CLAIR always votes for what he thinks is right, not for what is expedient. He is always forthright and honest with his constituents and his colleagues. Most importantly, again, he has devoted most of his time to accomplishments and less to publicity. I think if we in the San Diego delegation can follow CLAIR BURGENER'S legacy, San Diego and California and this delegation will be very well served.

WAYNE GRISHAM, you have been a wonderful colleague.

WAYNE, the greatest thing that you did for me when I first arrived in Washington, was to let me know how important it was to have townhall meetings, and to set up a mobile office schedule. You, in fact, turned over your mobile office to me. It would have been very difficult for me to get one, so you gave me yours.

I appreciated that. I think that the mobile office operation was a new dimension for San Diego County. I do not think that any Congressman prior to my election had utilized mobile offices or townhall meetings.

WAYNE, you emphasized to me that personal contact was one of the most important things you could do as a Congressman. I did what you advised and I set up a regular schedule and got out there at the shopping centers and factories and parked that mobile office and met constituents. Maybe I would have 30 people in a day or maybe I would have 50 people, but I got a lot of good advice and I got some advice from people and suggestions for legislation that I have put into the hopper in the House. At town hall meetings I discovered issues that were arising in the district that I otherwise would have had absolutely no knowledge of. So, I thank you for that, WAYNE. I thank you for taking me under your wing with respect to constituent service and getting me started.

But, WAYNE, I would like to talk very briefly about something that I think was perhaps your biggest impact on our delegation, and that is the primary battle that you had with our friend, DAVE DREIER. DAVE, I know you have just spoken on this, but I think it is important to bring it up because after that battle, which DAVE won, WAYNE, you were the guy who really held this delegation together. I have seen some other delegations in other bodies where the type of a political conflict that was forced by reapportionment has torn apart the good will and the cohesion of those delegations. In this case, WAYNE, you showed tremendous class. Really you, more than anybody in this delegation, and that includes all of us besides the seven who are being honored today, you held us together. For that, WAYNE, we will never forget you.

I know you are going to be continuing to provide leadership to us in California. I am just a few miles to the north, and I have got to bring that mobile office up there to get it serviced anyway, so I will be up shortly. I want you to know that I appreciate your leadership, WAYNE, and your friendship.

I would like to talk a little bit about BOB DORNAN. We had an amendment on the floor today, the Harkin amendment, and I saw something that I have observed quite often in this House. That was BOB DORNAN coming down to the floor with absolutely no notes, no preparation, no time to have anybody whip up a speech for him; come down, grasp a situation, stride down into that well and make a tremendous presentation with his facts, his figures, his places precise, and exact. Here is another guy who has the ability to change peoples' minds, and excite them, and get them moving.

I noticed, BOB, when you came down things were kind of dragging on, and it looked like the amendment might have a chance of going somewhere. Pretty soon, when you launched into your oratory, we saw people start to appear on the floor, and people were coming down and asking us, "What is DORNAN going after them for," and we got enough people down here on our side so that we were able to easily defeat by a substitute, the proposal that was put forward. I think that is a quality, BOB, that nobody else in this House has.

I have heard a lot of people talk about who the best speaker in the House is. I do not think it is JIM WRIGHT or GUY VANDER JAGT. I think the best speaker in this House is BOB DORNAN.

BOB, I know we are going to see you speaking in political forums for a long time to come.

BOB is a man who has been a friend of people and constituents who really do not have any friends, constituents without votes, without politicial clout. It cannot be argued that there is anyone in this House who has done anywhere close to as much work as BOB DORNAN has for MIA's and POW's, and for unborn children. I would say, BOB, if somewhere in Southeast Asia—and I believe there are places in Southeast Asia where there are still Americans who are remaining from the conflict we had in Vietnam—if there is someone in Southeast Asia, even one man who is hoping someday to return to this Nation whole and healthy, if he has got any friends in the United States of America, the first friend that he has is you.

So, BOB, thanks for your complete dedication, for your oratorical abilities, for your enthusiasm, and for the straightforwardness that is your trademark.

I can still remember when you got up when we were choosing committees, and you were running for one of the same committees I was running for. We were all supposed to get up and make a pitch for ourselves, and instead of making a pitch for yourself, you made a pitch for me. That is not supposed to be the way it works. I was told that everybody in Congress goes for himself and forgets the other guy. I will never forget that, and I appreciate it greatly.

I would like to talk, finally about PETE MCCLOSKEY. You know, I had a dinner in San Diego, DAVE, not too long ago at which PETE was present. And following that dinner Charley Cooper, who is a general at the Marine Corps Recruiting Depot, told me a story about PETE.

He said that he was with PETE the day he won the Navy Cross in Korea. His particular platoon was at the base of a hill that the Americans had tried to take back and had been knocked back from. They had tried to take it, and had been decimated. A lot of units with very few people in them were milling around. PETE MCCLOSKEY, ran around and rallied a couple people from this platoon and a couple people from that platoon. Pretty soon he got his people together and charged up the hill. They took that hill, and when they got to the top PETE jumped on a bunker and waved his rifle. All these guys were milling around engaging in hand-to-hand combat with the Communist Chinese and he jumped up on the bunker and says, "We got them by the throat. Now, boys, let's squeeze."

PETE, you did not quite have that Senate seat by the throat, but if there was ever a guy that had no bluff, no politics about him; if there was ever a guy who was completely honest, completely open, completely candid, with a high degree of intelligence behind it all, it was you, PETE.

We disagreed on a lot of issues, but I think in your campaign and in your last several years in Congress I saw several issues framed by you that I think will have an impact on the Nation. One of those issues was national service. You introduced the idea that every man and woman in this country, every young man and woman had a duty to their country to give some type of service, whether it was military or whether it was working in some conservation corps; that they owed something to this Nation for the freedom that they have. PETE, that is going to be your legacy. I think a bill of that type is going to be carried successfully in the near future because of your efforts.

So, DAVE, I think we owe a great debt to PETE MCCLOSKEY.

I would like to say this: I have talked a little bit about this family that is leaving us, this part of our family, these seven gentlemen we are honoring today. These were all great Congressmen; they all rendered a tremendous service to their constituents, but beyond that they were friends to all of us. I thank them for the honor of serving with them.

Mr. DREIER. I thank my friend and colleague from San Diego for his tremendous and sincere addition to this special order.

Mr. Speaker, I am very, very honored to yield to my distinguished colleague from La Mirada, Calif., Mr. GRISHAM.

Mr. GRISHAM. Mr. Speaker, I would like to take this special order to thank the people who have gone before me, to recognize the seven Members of Congress from the great State of California who are retiring, and the very kind words they have said—and they are all true—about we people.

Let me tell you my feeling about retiring with this "magnificent seven," if I can just list them by name and give a short story on their credentials.

□ 2020

The first one is DON CLAUSEN, the dean of the largest delegation in the Congress, one-tenth of the Members. DON CLAUSEN is the dean of that delegation and is retiring with us.

Next, PETE MCCLOSKEY, a man who had the ability and the nerve to run for the office of President of the United States of America. That is the caliber of the Members I am leaving with.

Next, JOHN ROUSSELOT, who has not only been a leader in the Western States of the Republican Party but in the entire Nation.

Next, ROBERT K. DORNAN, who is probably the confidante of more leaders of the United States, and other nations, than we know about. While sometimes we think BOB DORNAN tells us all he knows, I think BOB DORNAN does not tell us how many people he is that close with. That is one more Member I am retiring with.

The name BARRY GOLDWATER will never be forgotten in these Halls of Congress or in the whole world. That is one more Member I am retiring with, BARRY GOLDWATER, JR.

The next, CLAIR BURGENER is probably the man with the most friends in the U.S. Congress among Members on both sides of the aisle.

So, Mr. Speaker, while I am speaking not for them but with these seven Members, as a retiring Member I am very proud and privileged to be retiring with such a tremendously American group.

Mr. DREIER. Mr. Speaker, I thank the gentleman from La Mirada, Calif., for his very thoughtful addition to this special order. The gentleman knows how greatly he will be missed in this body.

It is now my great pleasure, Mr. Speaker, to yield to the dean of the largest and greatest delegation of this body, the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I thank the gentleman in the well not only for yielding to me but for his efforts and the efforts of our distinguished new dean, CARLOS MOORHEAD, in having taken the time for this special order to give some recognition to some of us who have been described as "the magnificent seven." I guess we would have to say that really there is maybe a "magnificent six" with one also-ran, and that is the Member who is speaking now. I was genuinely moved by all the remarks that have been made about our distinguished colleagues, and I think the thing that impresses me the most is the sincerity with which these presentations were made by each and every one of the Members.

We are told that a friend is one who comes to you when all others leave. That is particularly significant for all those who have gone through a number of elections and then find themselves on the losing side of an election. That is in itself a test of the caliber and character of an individual. I would also suggest to those who are leaving, as I have tried to convey to my friends, something that I believe has relevance to those of us who are departing, and that is that a real happy person is one who can enjoy the scenery when he has to take a detour.

So I am going to be presenting my remarks concerning all the distinguished Californians with whom I have served, and I would like to offer a few comments about at least the three Members who are here on the floor.

Mr. Speaker, I am pleased to come to the well and pay this tribute to my fellow Californian, WAYNE GRISHAM, who will be leaving the Congress at the end of his present term.

We can ill afford to lose Members with the ability, dedication, and unlimited potential of my good friend, WAYNE GRISHAM. He is leaving behind an impressive record of service to our State and this Nation, and in that respect, he has only continued the pattern he set before coming to the Nation's Capitol. In fact, WAYNE GRISHAM left one highly distinguished career in the city government and business community of LA MIRADA to start another one in Washington in 1978.

He wasted no time putting to work his strong background of experience in both local government and the private sector. In the relatively short span of 4 years, WAYNE has played a very active and effective legislative role in Congress.

It has been my good fortune to have worked closely with WAYNE on the Public Works and Transportation Committee. He has been a particularly valuable member of our Aviation and Water Resources Subcommittees.

Having served as a fighter pilot in World War II, WAYNE has had a special interest in aviation. His experience and expertise in this area have enabled him to make an important contribution to the cause of a safe and efficient airport and airway system.

WAYNE brought to the Public Works and Transportation Committee and to the Post Office and Civil Service Committee, on which he has also served, a first-hand knowledge of public works, transportation, and other needs facing the cities and towns of America. That background also served him well as a member of the Suburban Caucus and the Travel and Tourism Caucus.

With his extensive knowledge of local transportation needs, it, therefore, was only natural that WAYNE should play a key congressional role in important transportation projects, such as the Century Freeway project, which provides for the construction of a roadway through the very heart of Los Angeles County, eventually to connect the east and west sides.

WAYNE GRISHAM's World War II experience, which included being shot down over Germany and becoming a prisoner of war, undoubtedly helped shape his great appreciation for and commitment to a strong national defense, and he has worked tirelessly and effectively to that end throughout his service in the House.

WAYNE has also built a strong record in support of fiscal responsibility in Government, a balanced budget, lower taxes, less Government intervention, and a reduction in both Government spending and excessive regulation. He has pursued his concern for reducing Government regulation as a very active member of the regulatory reform task force.

Those of us who have had the opportunity to serve with WAYNE GRISHAM have been most fortunate. He has been one of our most dedicated and hard-working Members, and I shall miss working closely with him in committee and in this Chamber.

Mr. Speaker, I am pleased to tribute to my good fellow California, colleague, BARRY GOLDWATER, JR., who will be ending his congressional service at the close of the 97th Congress.

Our State and the Nation is losing a highly effective public servant in BARRY GOLDWATER, JR. and certainly the 98th Congress will miss his tremendous contributions. Having worked closely for the past 14 years with him on matters affecting California and the Nation, I know very well the void his departure will leave in this Chamber.

BARRY GOLDWATER, JR., has made an enormous impact on the affairs of Government since coming to Congress in 1969. His California constituents wisely returned him to Washington for seven consecutive terms, and, as a result, we in this Chamber have had the good fortune to enjoy BARRY'S special talents and considerable legislative experience.

He has been a valuable member of the minority leadership of both the Public Works and Transportation and Science and Technology Committees. On the latter, he serves as the ranking Republican of the Transportation, Aviation and Materials Subcommittee, and he is a member of the Energy, Research and Production Subcommittee.

It has been a special pleasure for me to have served with BARRY on the Public Works and Transportation Committee, He has served on both our Aviation and Investigations and Oversight Subcommittees.

His leadership during this Congress as the ranking minority member of the Investigations and Oversight Subcommittee has enabled that subcommittee, under the able chairmanship of ELLIOTT LEVITAS, to meet its mandate to provide oversight of the important programs under our committee's jurisdiction.

Certainly in the field of aviation, an area in which he and I share a common interest, BARRY GOLDWATER, JR. has had few equals. His special insight into the problems, needs, and potential of aviation, particularly general aviation, and his vast legislative experience in this area have proven invaluable to the development of sound legislation to insure the growth of a healthy national airport and airway system.

Of course, BARRY'S record of accomplishment ranges far beyond the scope of public works and transportation. He has been one of our most outspoken Members, and particularly so in assessing the proper roles of the Federal Government. He has led the fight to limit the growth and size of Government, to end unfair Government competition with the private sector, and to protect the rights of States against encroachment from the Federal Government. He has also applied his expertise as a member of the Energy Research and Production Subcommittee to the vital search for workable solutions to our Nation's energy problems.

All Americans can be thankful for the successful efforts of BARRY GOLDWATER, JR. in guiding his landmark 1974 Right to Privacy Act into Public Law. As a result, private citizens now have access to Government files about them.

Whenever BARRY has attacked an issue, he has done so with his full energies, dedication, and tenacity, and far more often than not, he has been highly successful in his efforts. His efforts have been guided always by what he considered in the best interest of his constituents and the Nation. His presence and his leadership will be missed in our California delegation and in the Congress, and I personally will miss his good counsel as a Member of this body.

Mr. Speaker, it is with a great sense of loss that I rise with my colleagues in paying tribute to my colleague and friend, BOB DORNAN, who will be ending his distinguished tenure as Representative of the 27th Congressional District of California. For these past 6 years, BOB has represented his constituents with a zeal of legislative purpose and direction, and he can be most proud of his record of congressional actions which includes being the only Member of the minority party to have a record of 24 amendments passed and to have been appointed as Chairman of the House Task Force on American Prisoners and Missing in Southeast Asia. We have all known BOB as an individual who has worked above and beyond the call of duty on issues that are consistant with the ideals for which he stood, and I am proud to have had the opportunity to list BOB as one of the most esteemed Members of the California Delegation and a special friend.

BOB DORNAN will be remembered as the champion of such mutually shared concerns as returning our Vietnam POW/MIA's, the Pro-Life movement, restoring the production of the B-1 bomber, and stopping the sale of American high technology items to the Soviet bloc countries. Many of these causes had been a focal point of interest to BOB long before the initiation of his congressional carer. Many Americans became acquainted with BOB when he was a TV news anchorman. During the Vietnam era, as a war correspondent, BOB aired 14 air combat stories. Consequently, BOB'S interest in the POW/MIA movement had been an ongoing concern for the past 17 years. BOB had served in the U.S. Air Force for 5 years as a fighter pilot, then 18 years in the Air Force Reserve. During this time, he had personally flown over 17 high-performance United States and foreign fighters. BOB'S background represents a significant expertise factor which contributed to the solving of difficult legislative issues regarding our military and civilian aircraft systems, and the questions of selling American technological systems to foreign governments.

BOB is a leader who has successfully mastered the rare combination of technological competence and humanitarian concerns. Since the 1960's, BOB has been active in civil rights issues, and he has achieved recognition for his work in this area by being the recipient of several awards which include the Brandeis Award, the Cardinal Mindzenty Award, the Tom Dooley Award, the Hungarian Freedom Fighters Award, and numerous community awards for work against drug abuse.

It was my privilege and honor to have had the opportunity to work with BOB DORNAN these past 6 years. BOB has been a shining example of the high principles and standards which is the cornerstone tradition set forth by our Founding Fathers to which we all strive as Members of this esteemed body of Congress. Above all, BOB is a gentleman in the world of our great statesmen, and, most significantly, a loyal and devoted husband to his lovely, most patient and considerate wife, Sally, and father to their beautiful family.

May the good Lord bless and keep you and your family in the days ahead.

Mr. Speaker, I rise to pay tribute to my dear friend and able colleague, JOHN ROUSSELOT. During our many years in Congress, JOHN has become known for his consistent efforts to fight excess Government spending, cut taxes, and balance the Federal budget.

JOHN was one of the original "supply side" economic supporters. Very early, he recognized that excessive Federal taxes destroy initiative for individuals, encouraging consumption rather than savings.

He has been honored with countless awards, including the "Guardian of Small Business Award," "Watchdog of the Treasury," and even an Emmy Award for the Lomax-Rousselot Debate on KTTV television.

It is with sincere and profound sadness that I realize JOHN ROUSSELOT will not be returning for the 98th Congress. Those of us who have observed JOHN closely realize he is a real dynamo and his attention to detail on the floor helps keep the House action honest. He has extraordinary follow through—"If JOHN gave you a commitment, his word was his bond." Our colleague has a very distinguished record in the Ways and Means Committee and the members will be deprived of his talents. JOHN, has the ability to retain an inordinate amount of information, pay close attention to detail and still he always finds the time for his colleagues and his constituency. The Congress will long remember the extraordinary legislative contributions JOHN has made to the American people.

I want to take this opportunity to express my sincere and heartfelt thanks to JOHN, his lovely wife Yvonne, and his three lovely children. As a result of JOHN'S untiring and dedicated service, he has left his footprints on this legislative body, the great State of California, and the United States of America.

As a spiritual and religious man, I believe that God doesn't close one

door without opening another. I hope that the door(s) that open for JOHN and his family will have a happy and rewarding future.

Mr. Speaker, CLAIR BURGENER has left his mark on the record of Congress and most importantly in the minds of my colleagues on both sides of the aisle who, like myself, were so privileged to serve with this outstanding legislator.

CLAIR BURGENER began his public service on the San Diego City Council and the State legislature where he gained a reputation for performance and followthrough. This reputation followed him to Washington where he has become one of the most distinguished and respected Members of Congress in recent history. On many an occasion, I have heard people say that if there is a tough job to be done and you want the job done well—call on CLAIR BURGENER and he will see it through.

While I served as dean of the California Republican delegation, CLAIR BURGENER took on a very special assignment as our representative on the all-important Committee on Committees. His sense of fairness and very constructive approach afforded us with results that far exceeded our expectations. To say that he has earned our deepest admiration and respect is at best an understatement. His position as Secretary of the House Republican Conference is further testimony to this fact.

CLAIR BURGENER has a richness of character that has afforded him unique access to the personalities participating in the political process which has proved to be instrumental in his service as a key member on the House Appropriations Committee. In that capacity, CLAIR will leave a legacy of energy and water projects, such as Santa Margarita, and the special initiatives in addressing reclamation reform which will stand forever as living monuments to the service of this very distinguished and congenial gentleman from southern California.

With all of these responsibilities and commitments, CLAIR BURGENER always made time to address our shared concerns for the handicapped and retarded which gained him recognition with a national constituency. All of his qualities are based on a lifelong adherence to the Christian ethic—qualities which will leave a deep impression on me as I reflect back on our relationship.

CLAIR and his lovely wife, Marvia both radiate the kind of goodness that makes them the kind of people you are very comfortable to be around. while most of us have committed "the golden rule" to memory, CLAIR and Marvia have committed it to their lives. We, of the California delegation, and yours truly, are proud to have them as special friends.

Mr. Speaker, it gives me great pleasure, yet a shared sadness, in paying tribute today to one of my distinguished colleagues of the California delegation, the Honorable PAUL MCCLOSKEY, JR. It is a great pleasure to recall the many years we have served together in the House, his significant accomplishments, and his public-minded, forward-looking spirit. It is with some sadness that we will soon bid farewell to our colleague, who, after 15 years of service in this body, chose to seek higher office.

As ranking minority member of the Committee on Merchant Marine and Fisheries, PETE and I have had the opportunity to work closely together on a number of issues crucial to our coastal districts, particularly management of the marine environment. PETE could always be relied upon for original and creative thinking when resolution of a difficult issue was required. His strong support for the first Earth Day earned him the National Park and Recreation Association's Award of Excellence, making him the only Member of the House, before or since, to be so honored.

Outside of his own committee, PETE MCCLOSKEY led the fight for a more market-oriented, free enterprise approach in economic matters, and was a strong advocate for the small business man and woman. He was a key player in the passage of the Steiger amendment, the first rollback of capital gains taxes in history, which is credited with restoring a favorable environment for high risk capital investment in small businesses. He was instrumental in the abolishment of the Renegotiation Board, which reduced the size of the Federal bureaucracy and eliminated many unnecessary Government regulations.

A fourth-generation Californian, PETE has an outstanding record of service in his community as well as in the House of Representatives. He worked hard to achieve his goals, earning his way through college as a laborer, athletic coach, and law librarian. In 1950 he received his bachelor's degree from one of the great centers of learning of the West, Stanford University, and was graduated from Stanford Law School in 1953. He served as a deputy district attorney in Alameda County, Calif. during 1953 and 1954, as president of the Palo Alto Bar Association and as president of the Conference of Barristers of the State Bar. In 1961, PETE MCCLOSKEY was voted Young Man of the Year by the Palo Alto Junior Chamber of Commerce. Deeply concerned with the future of this Nation's youth, he founded the Stanford Area Youth Plan, a college and high school counseling program which has spread from Stanford to over 70 Universities across the country.

More than anything else, PETE will long be remembered and admired for his steadfast commitment to his principles, even when the tide of popular opinion ran against him and the opposition was strong as well-organized. This is the legacy he will leave to those who remain here; this is the bond he will share with those of us who will soon depart this House.

When all is said and done, your presence will be missed PETE. Good luck and Godspeed in all your future endeavors.

□ 2030

Mr. DREIER. I am happy now to yield to the gentleman from northern California (Mr. SHUMWAY).

I deeply appreciate having this opportunity to pay tribute to seven good friends and colleagues from California as they wind up their careers in the House of Representatives, and to thank each of them for the influence, guidance, and leadership they have demonstrated to me in particular.

JOHN ROUSSELOT is a special friend, one with whom I became acquainted while still a candidate for congressional office. I will never forget visiting JOHN's office back in 1978 to explain my reasons for seeking this seat, and to request his opinion and the benefit of his experience. JOHN engaged me in some fiery exchanges, playing devil's advocate as perhaps only he can do. Finally, he said he thought perhaps I might have bitten off too big a bite in my effort to win a seat held by a 22-year incumbent, and I left his office saying he was certainly entitled to his own opinion. As I walked down the hall, I heard him call me back; the conversation then took a more positive turn, and JOHN was most helpful to me. Following my election to the House, he continued that helpful guidance. His voting record was an inspiration to me, as was his respected record as a member of the Banking Committee. I followed him on that panel, and I have always considered it a personal challenge to measure up to his distinguished record.

DON CLAUSEN was perhaps the most helpful colleague to me following my election to the House. In the member-elect days, his hospitality and assistance were invaluable. He provided me with a mailing address, a telephone, a key to his office and access to his staff. That helpfulness continued during my first term, particularly concerning the filling of New Melones dam in California. Despite the fact that it was a tough position for him to take, DON supported my efforts and was extremely instrumental in the success which was achieved. Given the prestige which he enjoyed as a senior member of the California delegation, that backing was extremely vital.

CLAIR BURGENER is universally respected as being one of the most fair, trustworthy, dependable Members of

the House. I learned very early in my congressional career that his reputation was duly earned. I have watched CLAIR perform in our delegation meetings and in the Republican Conference, and have found him to be not only a reliable, committed House Member with a sound legislative record, but also a solid citizen and an outstanding lawmaker.

To me, BOB DORNAN is a most unique individual. Throughout my many years of education, I was never privileged to have a teacher or professor who was able to speak in such convincing detail on complex issues without benefit of notes as BOB has done. I am repeatedly amazed by his wealth of historical anecdotes, and by their appropriateness to the occasions upon which he chooses to share them. He is an able, experienced, and intelligent legislator, and I have always respected his political outlook, particularly in the areas of defense and abortion.

BARRY GOLDWATER has surely carved his own niche in Congress, and has proven to be very much his own man. Unlike some of us who are readily stereotyped as conservatives with predictable voting patterns, BARRY clearly applies his own thinking and decisionmaking to every separate issue. He is strongly guided by that in which he believes.

WAYNE GRISHAM holds a place that is particularly special for me because we entered Congress together and, as fellow newcomers, we learned the ropes together. By and large, he has been a faithful carrier of the banner for free enterprise, limited government, and personal liberty. I am also most appreciative of his ability to inject a note of levity into otherwise grim proceedings.

PETE MCCLOSKEY has always been an example to me of the value to be gained from calmly reasoning things through. While I may not always agree with his position, I admire his ability to successfully reconcile divergent opinions, and to bring about compromise instead of chaos. He will be sorely missed, particularly by me, and particularly on the Merchant Marine Committee. As he prepares to depart, I find myself wishing that I had taken more time to absorb his knowledge, and to learn to emulate his impressive example in committee deliberations.

All seven of these men have made positive and memorable contributions as Members of the House. They have served their respective constituencies and their mutual State well, and have all proven to be responsible and respected legislators. I will miss them as individuals for their friendship and their guidance, and I believe we will all miss them collectively for their leadership and their impact. I wish each of them the very best in the years to come, and to each of them I say "thank you" for the privilege of knowing and working with them.

□ 2040

Mr. DREIER. I thank my colleague, a member of the Banking Committee, for his thoughtful addition and thoughts on our colleagues in the delegation.

It is great honor for me to yield to one of my friends and leaders, my colleague from California (Mr. GOLDWATER).

Mr. GOLDWATER. I thank the gentleman for yielding.

Mr. Speaker, one of the greatest privileges and certainly personal challenges is serving in the U.S. Congress.

It is a challenge and a privilege and a personal reward to have had this opportunity, to have had this experience.

It is because of gentlemen such as DAVE DREIER that I speak these words. For as we look around, we are surrounded by marble and ornate objects of lights and glass and television cameras, material symbolizing man's work. But it is the human element, the people, the men and women on Capitol Hill who you work with, who you have an experience with, who you touch in some way or another going about your job that gives this experience life and meaning.

DAVE, I guess I stand here with a certain amount of pride in seeing you in the well of the House of Representatives, for, as you well spoke, it was not long ago that you were a student and a intern here on Capitol Hill, and we had the opportunity of starting a good friendship—only to find you treading along and working hard and campaigning and being involved in politics and concern for your country that manifests itself in your election to the Congress.

I can only thank you for your kind words and thank you for your friendship.

The U.S. House of Representatives is a great institution. And I can only say I have enjoyed every minute of it, and I will miss this great body, and I will miss the people who make it function and make it work.

I guess the best part of this service that I have performed was not necessarily here on Capitol Hill or in the committees or in my office or here in the Congress, but in having the chance and making the chance to return back to my district almost every weekend for 14 years, where I have grown very fond of the people and the district that I represented.

That was the reward to me, getting to know a group of some half a million souls better, and to work with them in solving some of their problems, getting very intimate in some of those problems, whether it involves a veteran or a social security recipient. But to see the smile on their face and to hear them say thank you for something that you are paid to do was a reward that I would have to confess I have not truly felt here in Washington, D.C., some 3,000 miles distant from those individuals that I serve.

And it was getting to know my State and my district and the people that gave me a sense of being, a sense of responsibility, and I guess compelled me to try to do the best job that I could.

I enjoyed the issues of privacy, energy, aviation safety, transportation, and the handicapped, the blind and the deaf, working to limit the size and the scope and the cost of Government, the give and take and the compromise. All these were exhilarating, all of these were part of the job. Met with some success and some failure. But nevertheless enjoyed from a personal point of view. Because I learned well that you truly can disagree, that you can fight with every ounce of energy you have in opposition to another colleague and yet walk away with a friendship remaining.

It is that which symbolizes this Republic, which allows free men to talk, to speak, to debate, to discuss, and to arrive at a conclusion.

It is ironic that all Members of Congress bask in the sunlight of publicity and notoriety and to some extent they earn that as a public figure standing for election. But I would like to remind my colleagues, and I often remind myself, there are those behind Members of Congress that allow us that privilege of basking in the sunlight.

Oh, yes, we take credit for our failures of our staffs, but those are few and far between compared to the excellence of which they function on our behalf. And it is the professionalism that I admire in the men and the women who served me here in Washington and back in my district that I count as some of the most rich and gratifying experiences of dealing with such fine human beings.

Probably the worst part of leaving the Congress, I guess, is the prospects of leaving that family which you build up over the course of the years that you work with here. Some of your staff come and go. But I have almost half of my staff who have been with me for 14 years. And it becomes a very close family affair that you miss, that you regret. But the memories of that friendship will always stand me in good stead.

One of the great rewards in my life, and I think in most Americans' lives, is the idealism of a close family. And I am no exception to that. I am blessed with a very close family. And I remember growing up as a young boy, hoping and wishing for the opportunity to work side-by-side with my father, little knowing that some many years later I would find myself in the U.S. Congress, fulfilling that dream.

I am thankful for his confidence and for his advice.

All of us here in the Congress, we come here, we do our best, we make a mark, and we go. And there will be few that will remember the names of those who are departing today, or who have departed in the past. But no one who enjoys freedom and respects it will forget their work, for it continues to go on. For long after I leave, I shall hear the gavel demand order, and the many voices of elected representatives throughout this country expressing a point of view on an issue, symbolizing that foundation of freedom.

This institution will always be a wonderful memory because of the friends that I have made and the fine people I have worked with.

□ 2050

I was reminded, in closing, that you can have all the money in the world, but without friends you are very poor.

I feel very rich and fortunate for the friends that I have and will always have during this brief experience in my life.

I thank the gentleman for yielding.

Mr. DREIER. Mr. Speaker, I thank the gentleman very much for his heartfelt and sincere remarks in addition to this special order. It is very obvious that he will be greatly missed by not only the members of our delegation and the Members of this body, but the entire country.

Mr. Speaker, I am very pleased to have the opportunity to yield to my great friend, the gentleman from California (Mr. DORNAN).

Mr. DORNAN of California. Mr. Speaker, I thank the gentleman.

I am not about to draw delighted smiles from my colleagues by saying that I am unprepared for any remarks, but I had intended to sit here and bask in a tribute that has gone beyond my wildest expectations in warmth and eloquence; but since the other Members, most of them who are retiring with me, saw fit to speak so eloquently and if possible even make a sad, but warmly sad moment of departure that much better, let me try to add a contribution, leaving myself out, although I did think of a movie title that fits at least the departure of the six after hearing all this good stuff, and that was an excellent film with a classic theme song that won an academy award, "The Magnificent Seven."

Now, in that story, the Magnificent Seven rode into town and put down the forces of evil. I did not spend nearly as much time here as I planned. I knew you would get me in the end, PHIL BURTON, and I think it is a compliment that you put me on your radar screen about a week after I was here and decided that you would eliminate my seat, at least for a Republican, especially a conservative Republican, a fine young man of different ideology who is replacing me; but PHIL, it is a compliment, given some of the more bizarre things that that distinguished gentleman from California supports and has supported here. It is a compliment that you targeted me for the reapportionment effort of 1982.

I would like to point out some of the reflections I had listening to some of the fascinating backgrounds of the colleagues with whom I depart to fight other battles on other battlegrounds.

It is great to hear CLAIR BURGENER described as a class act. He is the kind of a guy that when he is in his twenties and he joins an organization, people start referring to him as "the old man" because of the stability that he represents and the deep insight beyond years that a person like that brings to any issue. In a way, he is the only one of us that sought retirement from the political battlefield, but since he represents one of the most gorgeous districts in the United States and has been so close and so helpful to one of our fine new Members coming here, the former mayor of Carlsbad, Ron Packard, I know that CLAIR's political impact will never diminish from that great double district that he represented for 4 of his 10 years. It was twice the size of any other district in the United States. I believe he won by more votes than anybody has ever won in a contested election in the House in over two centuries. That is something.

With the other six, there is something that they share. Four of us are pilots. I do not think anybody has more hours in private aviation than BARRY in this House or that dedicated more of his time and effort to making it a safe environment for private pilots in this country and to make business and general aviation a respected profession in the United States of America.

Three of the other pilots are all fighter pilots; two of them are my senior and I do not mind saying that when the Second World War ended and I was 12 years of age, I thought the very salt of the Earth were people like that Corsair pilot in the Navy, DON CLAUSEN, and that Thunderbolt pilot who was a POW in Germany when the war ended in Nazi Germany, WAYNE GRISHAM. These are the kind of guys that put stars in my eyes and kept my energies focused on one goal from the time I was literally 5 years of age, and that was to serve in the Marine Corps, the Navy, or the U.S. Air Force as a fighter pilot.

PETE MCCLOSKEY was the kind of hero that caused me to leave college and join the Air Force while the Korean war was still going on.

I know it may be nauseatingly unreal to some of my colleagues on the other side who managed to avoid military service as a student during the Vietnam war, but to the DON BAILEY's of the other side and to the BOB DORNAN's of this side, I felt a gnawing guilt every day that I walked into a classroom at Loyola University, that kids not fortunate enough to get into college, just like Vietnam, many of them brown and black beyond their population percentages in our great country, were dying on Pork Chop Hill, as they died later on Heartbreak Ridge, and I joined the Air Force because there were kids in their early twenties like PETE MCCLOSKEY who were pulling the pins out of grenades with their teeth and dropping them over a wall immediately adjacent to his shoulder to stop the Communist invasion of the Korean Peninsula and I ran into an old Marine buddy of PETE's who said the enlisted kids turned to him in one of the smoke-filled noise-wracked moments and said, "Lieutenant McCloskey, you know who you look like? You look like John Wayne."

And PETE responded, "Shut up and give me another grenade."

That is the kind of an American that I looked up to as a teenager when I joined the Air Force 30 years ago next month during the Korean war.

JOHN ROUSSELOT never had the honor of wearing his Nation's uniform, but like John Wayne who said that he had more fun and honor and felt more creative when he was defending the military and that it was always gnawing for the rest of his life that he had not had that great honor, JOHN ROUSSELOT is the kind of a guy who reminds me more of a fighter pilot than anybody who ever strapped a military aircraft to his behind.

JOHN ROUSSELOT was my inspiration when I came here.

When I got here, there were three tigers that sat on the center aisle there: two Bobs and a John—BAUMAN, ASHBROOK, and ROUSSELOT. To my dying day, I feel it was one of the greatest honors I ever had that I could try to join that distinguished group of Three Musketeers and try to make it a foursome to bring some balance during the Carter years to the dismantling of our defense structure and the disregard for the free enterprise system that makes the wheels of our economy grind around and around.

What a group of six Californians I depart this House with; BURGENER, those other fighter pilots, ROUSSELOT, BARRY, who helped me come to this House with unstinting work as he has for so many Members because of the glory of his great family name, helping around this country. I do feel good that in a way BARRY and PETE and I got to leave in a small sense the way CLAIR went out, on our own terms, but not one of us ever put up the fight of DON CLAUSEN, the Corsair pilot, the Thunderbolt pilot, as DAVE DWYER has so graciously mentioned about that awful race that none of us look for-

ward going against an ideological colleague and soul brother.

The way that ROUSSELOT and CLAUSEN went out will be remembered around here forever.

I hope that all of us have an opportunity still to peek at some further moment in our life and to build upon the careers that we have been able to establish here.

□ 2100

This is a magnificent group of six, at least, that I go out with as the seventh, and they are friendships that I will treasure all of my life.

I know that my wife, who is watching, was brought to tears by my big brother DON. I am lucky to have two big brothers, one a brother given to me by God and one appointed by himself, DON CLAUSEN. I know he brought me to tears.

References from all of the pals that I picked up here, I repeat, went beyond my wildest hopes.

I just will do what one of my colleagues mentioned, come back to this cloakroom and come out here on this House floor as many times in my future life as I can, agonizing over the fact that I can only join in debate quietly whispering in colleagues' ears, and I will not get that honored American privilege to vote.

My colleagues know I am a statistician of sorts. It knocks me out that in a nation of 226 million Americans and millions who existed over 206½ years, that only 4,000 people have ever gotten to sit in this body for 6 years or more. Maybe it is in the cards that I come back; maybe it is in the cards that I take another shot at the goal I tried to achieve and help PETE WILSON with all of the fiber of my being to attain this year. But I know one thing: This place is home to me for the rest of my life.

To the three Republican freshmen and to some of the young Democrats who will be taking our places sitting on the other side of the aisle, I wish them well, because I have said in election after election, maybe losing some redundancy, that this is the most important election of our life.

I feel George Orwell was God-inspired when he picked the year 1984 to title a book. We are going to need the 17 Republicans and the best insights and wisdoms of the 28 Democrats coming back in the 98th Congress. These are the toughest years coming up for our country and our civilization as we know it. I wish I could be here. I will be cheering from the sidelines.

Mr. DREIER. I thank the gentleman very much for his extremely eloquent, thought-provoking addition to this special order.

I think it is quite apparent that we have a tremendous delegation, the largest delegation in the country, and the title which has been dubbed this evening, "The Magnificent Seven," I think is a very appropriate title for our retiring colleagues. They should all know that they will be greatly missed not only by our delegation but by our colleagues on both sides of the aisle.

● Mr. PANETTA. Mr. Speaker, I want to join my colleagues in paying tribute to a group of men it has been a pleasure to serve with over the past 6 years, my fellow Californians PETE MCCLOSKEY, DON CLAUSEN, CLAIR BURGENER, WAYNE GRISHAM, JOHN ROUSSELOT, BARRY GOLDWATER, and BOB DORNAN. While we have served on opposite sides of the aisle, I have had a great deal of respect for each of them, and I have worked especially close with some of them on issues of particular concern to California.

I would like first to say a special word about PETE MCCLOSKEY, a man of principle who has shown tremendous courage and wisdom in his time here. He has never allowed partisan interests to stand in the way of what he believes is right. I was particularly proud to receive his endorsement for reelection in 1978, but his work on behalf of peace and justice goes far beyond the kindness he has shown to me. He fought the Vietnam war from within his own party and became a national spokesman. His kind of courage is always in short supply, and he will be dearly missed.

In addition, I would like to take special note of the departure of DON CLAUSEN, a man with whom I was proud to work on many occasions on behalf of our State. This was particularly true on issues affecting the environment. DON was a leader of our bipartisan efforts to protect the central and northern California coastline from irresponsible efforts to permit offshore oil and gas drilling. Again, I am proud to have been able to work with him, and I know my colleagues join me in wishing him the very best in the years ahead.

CLAIR BURGENER has also done an excellent job in representing our State, and particularly his home of San Diego. As a member of the Appropriations Committee, he was particularly important in this regard, and the Congress and our State will miss him.

WAYNE GRISHAM has also proven himself to be an excellent public servant during his time in the House. As a member of the Post Office and Civil Service Committee and the Public Works and Transportation Committee, he has done outstanding work, and he, too, will be missed a great deal.

Mr. Speaker, during my time in the Congress, I have not always agreed with JOHN ROUSSELOT on the issues debated in this House. He has never been boring, and he has shown great tenacity and integrity in the pursuit of his goals. In addition, he has always possessed a great sense of humor which, when one was not the butt of his jokes, helped to make the House proceedings and debates a little more interesting and a little easier to withstand.

BARRY GOLDWATER, JR., has come a long way during his time here. He became a spokesman on the issue of personal privacy, which has become ever more important in our computer society. Indeed, I think we will miss his advocacy on this issue in particular, and I hope we do not lose sight of the point of view he espoused in this regard, a point of view which placed the U.S. Constitution above the exigencies of the moment.

Finally, Mr. Speaker, I want to join my colleagues in paying tribute to BOB DORNAN, another gentleman with whom I rarely agreed but who was never less than interesting. His tremendous concern for the Nation's defense and his compassion for those who suffer the effects of war throughout the world certainly helped him to make a mark on the Congress.

These men will be greatly missed by my State and by the entire Congress. I wish them the very best both now and in the future.●

● Mr. GILMAN. Mr. Speaker, while it is with pleasure that I take the opportunity to speak highly of one of our most well-liked and industrious of colleagues, I regret the circumstances for which this special order has been brought. I am, of course, referring to our distinguished colleague from California, the Honorable DON CLAUSEN, and I thank the Congressmen from California (Mr. MOORHEAD and Mr. DREIER) for giving us this opportunity to pay just tribute to him.

DON CLAUSEN has been privileged to represent one of the most beautiful districts in California, with over 300 miles of glorious California coastline, the "Redwood Empire" as it is familiarly called. I can fully appreciate DON's great pleasure in having been able to represent the inhabitants of such a district, and while I am saddened by his departure, I am certain that when he returns to California, he will now have the time to relax and enjoy his surroundings.

DON's legacy, however, will not be forgotten, both here and in California. Since his arrival in Washington almost 20 years ago, DON has been a respected and admired member of the Interior and Insular Affairs Committee, as well as the Committee on Public Works and Transportation. Both these assignments have reflected the concerns of the people of California's Second District, and DON has never neglected any of them. He has always had time for others, too, and I well remember the instance when DON took time out of his unusually busy schedule to fly to my district in order to review the flood control needs in the black dirt

region of Orange County. He provided us with invaluable assistance in working effectively with the Army Corps of Engineers, and in so doing, earned the respect and admiration of our agricultural community.

It is this quiet willingness to work on behalf of all the people that has brought DON the many friends and admirers that he now has, so I am saddened that DON will not be part of the 98th Congress. I join my colleagues in wishing DON and his lovely wife, Ollie, all the best in the future, and express my sincere hopes that he will continue to give us the benefit of his vast experience in whatever capacity he chooses.●

● Mr. WOLF. Mr. Speaker, the adjournment of the 97th Congress will mark the end of congressional service for seven Members of the California delegation we are honoring today with this special order.

It is with regret that we acknowledge the retirement of Congressmen BURGENER, CLAUSEN, DORNAN, GOLDWATER, GRISHAM, MCCLOSKEY, and ROUSSELOT for we will sorely miss the expertise, commitment and wisdom they have brought to the work of this body.

I rise today to express to them a deep sense of appreciation for their years of dedicated service to this institution and to this Nation. They have served with honor and distinction, many in leadership positions, and have played critical roles in redirecting this Nation toward fiscal responsibility. They leave a legacy of creative thinking and courage of conviction which we should all try to emulate.

They have dedicated a large part of their working lives to meeting the needs of their constituents and this Nation and in solving the difficult problems we face. I congratulate them and thank them for their distinguished service.

It has been a privilege serving with these Members and I salute them as outstanding and effective public servants and wish them continued success and many happy and healthful years ahead.●

● Mr. ANDERSON. Mr. Speaker, I, too, would like to join with my colleagues in paying our respect for our colleague from California's 26th Congressional District, the Honorable JOHN H. ROUSSELOT.

Although JOHN and I have often had differing opinions on issues before the House, we both have shared a deep respect for each other's opinion. This is an important part of serving in this House.

For many years, JOHN was able to walk into this Chamber and in his own colorful way, brighten up the debate. It has been a pleasure for me to watch JOHN operate and I will certainly miss him when the 98th Congress convenes in January.

For my part, I am proud to call JOHN ROUSSELOT my friend. My wife, Lee, joins me in wishing JOHN his wife, Yvonne, and their three children, Craig, Robin, and Wendy, the best of everything in the years ahead.●

● Mr. CARMAN. Mr. Speaker, it is an honor for me to pay tribute today to seven Members of the California congressional delegation who have served their State and country with distinction and who will be sorely missed in the 98th Congress.

DON CLAUSEN began serving his country as a Navy pilot during World War II. He was first elected to Congress in a special election in 1963. He has been reelected nine times through 1980 and he is now ranking minority member of the Public Works and Transportation Committee as well as a member of the Interior and Insular Affairs Committee. His dedication and hard work has been reflected in his effective efforts for his California constituents. His absence in the next Congress will definitely be felt.

PETE MCCLOSKEY also began his public service in the military. He was active during the Korean war and received the Navy Cross, Silver Star, and Purple Heart in recognition of his distinguished service. When PETE was elected to the Congress December 12, 1967 he brought that same dedication and integrity to Washington. During the last 15 years he has contributed his insightful reasoning to a wide variety of issues always improving the quality of congressional debate.

BARRY GOLDWATER, JR. will be leaving the Congress after more than 12 years of dedicated service. He is a member of the Committee on Public Works and Transportation and the Committee on Science and Technology. He will be remembered for his dedication to his constituents and especially for his work in protecting the privacy of all citizens.

JOHN ROUSSELOT was first elected to Congress in 1960 and he has been elected to six other Congresses since. He has served with distinction on several committees, most recently the Ways and Means Committee; but it is his boundless enthusiasm and energy combined with the courage he had to do what he thought was right that made JOHN a leader in Congress. He worked tirelessly on behalf of causes he believed in and the 98th Congress will be a different place without him.

BOB DORNAN has served in Congress for only 6 years, but during that time he established himself as a leader in the area of POW's and the question of those missing in action. As a member of the Foreign Affairs Committee, a former fighter pilot in the U.S. Air Force, and a journalist who covered Southeast Asia, BOB was exceptionally well qualified for his tireless work on behalf of those who served our country. His personal integrity and dedication has been well used in the cause of the constituents he represents and the country.

WAYNE GRISHAM served in the U.S. Army Cadet Corps in Europe during World War II and was taken prisoner during that war. He received the Air Medal and the Purple Heart in recognition of his valor. Since being elected to Congress in 1978 WAYNE has worked hard for those he represents. As a member of the Committee on Public Works and Transportation he was instrumental in obtaining funding for the Contury Freeway. He has also shown integrity and dedication throughout his tenure in Congress.

CLAIR BURGENER also began his public service in the Armed Forces where he served during both World War II and the Korean war. He was awarded the Air Medal in 1945. He was elected to his fifth term in Congress in December 1980 and as a member of the House Appropriations Committee and of the Republican leadership he has worked hard to control big government. He has also worked to stem the tide of illegal immigration into this country. His leadership positions testify to his fine record of service and achievement.

I wish each of these men and their families all the best in their future endeavors. It has been both a pleasure and an honor for me to work with them. California has been fortunate to have such representation and both their constituents and their country will miss their services in Washington.●

● Mr. ERLENBORN. Mr. Speaker, during the time we are privileged to serve in this body, we serve with people of varying stripes and character. One real character is my special and good friend PAUL MCCLOSKEY, who most of us know better as PETE.

For 16 years, the House of Representatives has had the benefit of PETE's independent, fair-minded thinking. He has given us an outlook reached through studious research and intense conviction.

There is no point in my rehashing the many legislative actions in which PETE has been a lead player, but I do want to say that I will always look back with pleasure on the years we served together on the Government Operations Committee and the Select Committee on Population. We can be especially proud of the Freedom of Information Act, the Privacy Act, and our valiant attempt to define executive privilege. We can also be proud of the Select Committee's reports defining population issues.

I know the House will be sadly different without PETE MCCLOSKEY, but I also know that we have not heard the last of him.●

● Mr. ANDERSON. Mr. Speaker, I am pleased to join my colleagues in

paying tribute to our good friend and colleague from California's 27th Congressional District, the Honorable ROBERT K. DORNAN.

Because of his forthright manner, we were always able to know where BOB stood on a particular measure. Maybe we always did not agree with each other, but we always knew where the other stood. His energy and drive stood almost without parallel.

Although BOB will not be with us in the 98th Congress, I feel that he will continue to remain visable to the people of this Nation. Particularly, I feel that he will continue to contribute much of his time toward the important subject of missing POW's and MIA's. He has done much for this cause, and I urge him to continue his efforts in this area.

My wife, Lee, joins me in saying farewell to BOB, his wife, Sallie, and their five children, Robin Marie, Robert Kenneth II, Theresa Ann, Mark Douglas, and Kathleen Regina. And we wish them well in all their future endeavors.●

● Mr. GILMAN. Mr. Speaker, the name GOLDWATER has always stood for a conviction to lofty principles that are part of our Nation's heritage. BARRY has stood by these principles throughout his years in this body and because of it he has been able to lead the fight to protect the rights and privacy of individual citizens in a time where the size of Government and the advances of technology place pressures on the fine balance between the rights of the individual and the society.

We thank you for the courage and tenacity you have exhibited, BARRY, and for your determination to stand up for basic principles on which this country was founded. We lose a firm voice on behalf of individual liberty and a knowledgeable one on the committees on which he so ably served. Science and Technology and Public Works and Transportation have lost a staunch friend, but we are certain, BARRY, that you will continue the journey on which you have set out with the same drive you have exhibited in these halls.

The honorable gentleman from California forged his own road and left his mark in our history with his hard and innovative work to protect the privacy of American citizens in this fast-moving computer age. He knows his subject well and courageously took the lead as well as the responsibility of driving this legislation through.

We wish you the best, BARRY, and thank you for what you leave behind with us and for what you have yet to give and accomplish for the citizens of our Nation.●

● Mr. GILMAN, Mr. Speaker, we salute the honorable gentleman from California, who has served as ranking Republican on the Government Operations Committee. When he was elected, he spoke strongly for the protection of our environment, and in that fight he has persisted regardless of what administration policy may have been or is. As he has been true to that important fight, he has also stood firm by his conviction that the free market forces should be encouraged and allowed to operate. On the Merchant Marine and Fisheries Committee, he put this conviction to work.

I had the privilege of working with PETE on the committee on the missing in action, where he showed extreme dedication and determination that we search out the agonizing cases involved. He demonstrated tremendous courage in this endeavor as he did in his opposition to the Vietnam war. While I often differ with PETE on foreign policy issues, I did respect that in those many battles he waged on the floor of the House and for his constituents in the Halls of Congress, he fought like the marine that he is, with a devotion to duty and love of this country and all it stands for.

I join in wishing to PETE and his family in the months ahead, good health and happiness, knowing that you will continue to bring to the State of California and to this Nation the same leadership, courage, and conviction that earned him the Purple Heart and the Silver Star.●

● Mr. ANNUNZIO. Mr. Speaker, I rise today to pay tribute to the Honorable JOHN H. ROUSSELOT, who has ably served in the House of Representatives for 14 years. His dedication to high standards is an inspiration to his friends and fellow citizens, and his accomplishments as a Member of Congress are most commendable.

Before coming to the House of Representatives, JOHN was the president of a public relations consulting firm from 1954 to 1958, and the Director of Public Information for the Federal Housing Administration from 1958 to 1960.

Congressman ROUSSELOT was first elected to the 87th Congress in 1961, and after one term, he resumed his career as a management consultant. JOHN returned to Congress in a special election held in 1970, and has represented in Congress first the 25th, then the 24th, and later the 26th District of California. During his tenure in the Congress, JOHN ROUSSELOT has distinguished himself while serving on the House Banking, Finance and Urban Affairs Committee, where I have served with him, and have come to know and respect him. He also is a former member of the Subcommittee on Bank Supervision and Insurance of the House Banking, Finance and Urban Affairs Committee, a member of the Subcommittee on Census and Statistics of the House Post Office and Civil Service Committee, and a member of the House Budget Committee.

Presently, JOHN is providing exemplary service as a member of the Subcommittee on Social Security and the Subcommittee on Public Assistance and Unemployment Compensation of the House Ways and Means Committee, and as a member of the Joint Economic Committee. He also has a record of outstanding service to his party as the chairman of the Republican Personnel Committee, as vice chairman of the Republican Study Committee, as executive vice chairman of the National Republican Congressional Committee. His efforts have been both fruitful and beneficial to his own constituents, and to the citizens of this Nation.

JOHN ROUSSELOT is a dedicated and devoted American, and a Congressman of outstanding ability who will be missed here in the House of Representatives by those who have had the opportunity to work with him.

I extend to JOHN ROUSSELOT my best wishes for continued success in all future endeavors in devotion to highest principles.●

● Mr. McDONALD. Mr. Speaker, I would like to say a few words on behalf of the Honorable JOHN ROUSSELOT before his departure from these Halls. In my case, I was fortunate enough to make JOHN's acquaintance before coming to the Congress. Even knowing of his reputation then, I was surprised and pleased by the extraordinary diligence and energy that he put daily into the exercise of his duties. No one is more faithful to floor attendance, examining, and questioning all legislation with only the good of the country and taxpayer in mind. JOHN has never avoided the tough fights here and that became his hallmark. He does not run for cover when everyone announced that a stand for or against might be political suicide. JOHN stands and fights the good fight toe to toe. JOHN stands for basic principles and the Constitution, and not what appears on the op-ed page. These stands have made him beloved by his constituents who surely would have returned him to office, had his district not been so drastically changed. JOHN has been able to bring a little old-fashioned commonsense to the deliberations of the House Ways and Means Committee, as well as the Joint Economic Committee. In prior years, he was a tower of strength on the old House Banking Committee.

I will miss you, JOHN, and I hope someone is ready to take your place in the cockpit. You will be sorely missed. We will lack your leadership and oratory next year. Good luck in whatever you undertake. I know you will be successful.●

● Mr. SCHUSTER. Mr. Speaker, I rise today to join with my colleagues in

tribute to the Honorable BARRY M. GOLDWATER, JR., who will be leaving this House after 12 years of service to the Nation and to the people of the 20th District of California.

As a Member of this body, BARRY GOLDWATER has been an articulate spokesman for reducing Government interference in our daily lives. He has acted to maximize the ability of a free people to prosper in a free economic system. He has been a proponent of many efforts to protect the privacy of the individual, including the significant Right to Privacy Act of 1974.

I have had the opportunity to serve with BARRY on the Public Works and Transportation Committee and I have always respected his hard work and dedication.

The House of Representatives will miss BARRY GOLDWATER'S advocacy of individual initiative and personal freedom, but I am certain that he will continue to work for these ideals in or out of Government.

I wish him the best of success in the future.●

● Mr. RUSSO. Mr. Speaker, while it will be some relief to avoid confusion on mail and phone calls, I must say that I am quite sorry to have to say good-bye to Representative JOHN ROUSSELOT as a Member of Congress, even though admittedly it was occasionally fun to get messages from the White House.

There were two sides of JOHN ROUSSELOT, both of them honorable and wise. He was in public a fierce debator with strong views and he presented them with force and effectiveness. Despite the fact that we were often on opposite sides of the issues, he always had my respect.

But even when he was not speaking in the public forum, he remained gracious and witty and a gentleman. He was a delight to know as well as being a good Member of Congress. He served long and well and his amicable demeanor added to his effectiveness. He will be missed—his knowledge of House rules, his sense of humor. It simply will not be the same without him here. A tremendous advocate, energetic and aggressive, I know JOHN will continue to have great success.●

● Mr. SENSENBRENNER. Mr. Speaker, I would like to join with my fellow colleagues in honoring Congressman JOHN ROUSSELOT for over a decade of distinguished service representing the 26th District of California.

Known for his verbal jousting, he has made the somewhat dry debates on the House floor a bit more interesting. His determination to address the issues has made him a watchdog of the House floor. In particular, he has been active in the issues of welfare, foreign aid, and the budget. Since the mid-1970's, he has offered a balanced budget amendment to every budget resolution on the House floor.

Throughout his tenure in office, his leadership abilities have been called upon more than once by the Republican Party. Once chairman of the Republican Study Committee, he now serves on the executive committee. He also serves as the vice chairman for Political Action Committees of the National Republican Congressional Committee, as chairman of the Congressional Target Committee in California, and as regional whip in the House of Representatives.

I will miss working with JOHN on the House floor. I am glad I had the opportunity to do so.●

● Mr. GILMAN. Mr. Speaker, WAYNE GRISHAM has served two terms and has represented his constituents loyally, just as he promised them he would. He stood firmly by his principles that the hard-working American should not be overburdened by Government regulation, and that free enterprise is a great hope for the development of human potential.

His life from day to day on the Hill exemplified an honorable and hard-working determination of spirit. His decency lent him respect; his study of the issues in order to most fully represent those who had elected him to serve overshadowed any effort to put his own position in the forefront through legislative or committee efforts. I had the privilege of serving with him on the Post Office and Civil Service Committee and enjoyed working with him on the day-to-day issues affecting post office and civil service employees. He worked diligently in this effort and in the job of trying to maintain a healthy postal service.

We will miss WAYNE on our committee. We will miss his skill of listening to the arguments before speaking on the issue, and his conviction that one must know the subject matter well before introducing legislation or leading battles. Through this quality he was able to discern what legislation was important and needed and what would result in extra expense or burden to the people of his district and of this Nation.

WAYNE, we wish your lovely wife and three children the best in the future. We thank you for your dedicated spirit, your discipline, and your determination to do what you were elected to do in order to serve your district.●

● Mr. ROE. Mr. Speaker, I welcome the opportunity to join in this well deserved salute today to our fine colleagues from the State of California, DON CLAUSEN, WAYNE GRISHAM, BOB DORNAN, BARRY GOLDWATER, JR., PAUL MCCLOSKEY, and JOHN ROUSSELOT, who will not be returning to Congress next year.

I have worked closely with each of these fine lawmakers and party politics aside, I will miss their contributions to the debates on this House floor.

DON CLAUSEN and I have served together on the Public Works Committee for many years. I have found him to be among the most dedicated, hard working individuals I have ever known. He has devoted his years of unselfish public service to bettering the lives of all Americans. As the ranking Republican member of the Public Works Committee, DON CLAUSEN has been a leader in the battle to rebuild America's crumbling infrastructure system. His expertise in the areas of clean water, clear air, and other environmental matters will be sorely missed. I am proud to call him my friend.

BARRY GOLDWATER, JR., and WAYNE GRISHAM have also served as highly effective members of the Public Works Committee. BARRY in his role as a leader on the Aviation Subcommittee is a recognized leader in the fight to keep our space program adequately funded. BARRY has been my neighbor in the Rayburn Building for several years and I will miss the close working relationship we have developed.

WAYNE GRISHAM served for many years as an excellent legislator in his home State of California. That experience served him well during his terms in the House. As a member of my Water Resources Subcommittee, WAYNE developed into an avid spokesman for the water development needs of the western section of our Nation. I would hope he will continue to advise us on those needs as we deal with the Nation's water needs.

The voices of BOB DORNAN, PAUL MCCLOSKEY, and JOHN ROUSSELOT have been heard loud and clear on this House floor during many debates on the key issues facing our Nation. While there have been times I have not agreed with their positions, I have always respected the professional manner in which they were made. They all have made outstanding contributions to the Nation and I wish them the very best in the years ahead.●

● Mr. SAM B. HALL, JR. Mr. Speaker, regardless of party affiliation or political differences, Members of the House are going to miss the service of my good friend, JOHN ROUSSELOT. In characteristic fashion, when reapportionment forced JOHN ROUSSELOT into the congressional district of a friend and colleague, he went to an open seat and ran a tremendous campaign against overwhelming odds. By this act alone, JOHN ROUSSELOT qualifies for a chapter in the late John Kennedy's book, "Profiles in Courage."

Political courage, honesty, and integrity, are all characteristics of JOHN ROUSSELOT. He is a modern equivalent of Sir Thomas More, truly a "Man for All Seasons." He does not mind taking a stand and speaking his mind. He is intellectually honest, and if he dis-

agrees with you, his demeanor can be incisive but his nature is that of a gentleman and loyal opponent. In short, he pulls no punches.

We need more men and women in public office willing to emulate the traits of a person like JOHN ROUSSELOT. Parliamentary democracy had its genesis in America with men of his caliber, men who were not afraid of expressing what at the time was an unpopular point of view, because they realized the long-range consequences would benefit a free and open society.

On occasion I have disagreed with JOHN ROUSSELOT, but on every occasion whether in disagreement or agreement, I feel the greatest admiration for his adherence to good manners and his love of the give and take of participatory democracy. He can be sarcastic and tough as nails, but like one of his early mentors, the renowned paragon of parliamentary maneuvering, the Honorable H. R. Gross, the verbal assaults are not meant to be personal or rancorous.

It is my understanding that the California Legislature must again go back to the drawing board on redistricting. I have a feeling that once this is accomplished, our dear friend, JOHN ROUSSELOT, will once again prepare for battle. I sure hope so. We need the voice of loyal opposition. We will always need legislators who are willing to tackle the unpopular issues and take the unpopular stands. That's what democracy and freedom is all about, and that's what JOHN ROUSSELOT is all about. I wish him well.●

● Mr. GUARINI. Mr. Speaker, I rise to extend my warmest best wishes to our friend from California, JOHN ROUSSELOT, with whom I have worked these past 4 years on the Ways and Means Committee. JOHN leaves behind the legacy of his thorough knowledge of the many revenue issues which come before the committee. He is an astute and dedicated student of tax matters.

His keen, incisive mind has helped throw light onto many controversial issues, encouraging healthy dialog. He has served the institution of the U.S. Congress, and the Nation as a whole, very well.

I shall always remember JOHN ROUSSELOT's quick wit and ready response to any situation. He certainly has the much-appreciated ability to help break up tension during long meetings with one of his patented side-splitting observations. Those sessions will seem that much longer without him.

Despite some differences of opinion, I know I will miss JOHN. I join the many friends he has here in Congress in extending to the gentleman from California my sincere hopes for success and happiness in all his new endeavors.●

● Mr. DONNELLY. Mr. Speaker, I would like to take this opportunity to join my colleagues in paying tribute to one of the finest men in our midst, the Honorable DON CLAUSEN of California. It has been my privilege and pleasure to have served these last 4 years with him on the Committee on Public Works and Transportation.

If DON had been the kind of man to pick fights or to try and score political points at someone else's expense, there was plenty of cause for friction between us. We come from opposite ends of the country, two dramatically different districts, and we sit on opposite sides of the aisle. To DON's credit, he has chosen to use his position and his seniority and his vast abilities to make the legislative machinery work as smoothy as possible. The very complex and very important Surface Transportation Act we passed earlier this week is a prime example of the kind of necessary legislation that was made possible by DON's quiet, cooperative, conciliatory manner as a legislator.

I will miss DON CLAUSEN as a colleague; I will always treasure him as a friend.●

● Mr. SAM B. HALL, Jr. Mr. Speaker, DON CLAUSEN is a gentleman and friend of the first order. I am going to miss his congeniality, good advice, and above all, his friendship. DON CLAUSEN has an enjoyable personality, and we have come to rely on his charm and good manners. In short, he is well liked by his colleagues.

Despite representing an area with vastly conflicting political opinions, DON CLAUSEN has achieved an outstanding record of constituent service. He is an extremely dedicated Member of Congress and has a reputation for hard work and being informed on the myriad of issues that come before the Interior Committee and the Public Works and Transportation Committee.

As a strong proponent of air transportation, DON CLAUSEN has been a solid and effective voice in promoting civil aviation. Much of the technological leadtime that this Nation enjoys in aerospace is due to the dedication and commitment of people like DON CLAUSEN, and there is no question that the aviation community will sorely miss the leadership he has provided in strengthening their cause in the Congress.

I look forward to working with DON in the future. It has been a privilege to have served with him for the past 6½ years.●

● Mr. EDWARDS of California. Mr. Speaker, I want to thank my colleagues from California, CARLOS MOORHEAD and DAVID DREIER, for arranging for this special order. As chairman of the California Democratic delegation, I'm pleased to extend my thanks to the retiring Members of the California Republican delegation for their collective years of service in the Congress.

Even though those of us on this side of the aisle may have different views on many of the issues which come before this body than our friends on the Republican side, we take pride in the fact that we put aside those differences to work together for our State of California. There are many examples of our bipartisan efforts. For instance, when California's beautiful, but fragile, coastline was threatened by the possibility of virtually unfettered offshore oil leasing, we worked together to prevent this prospect from becoming a reality. We also work together in insuring that California receives its fair share of Federal dollars—the past year alone has seen strong bipartisan efforts in areas as diverse as obtaining adequate funding for refugee resettlement and encouraging an appropriate share of defense contracts for California.

I would like to mention especially how much I have appreciated working with the gentleman from Crescent City, DON CLAUSEN. Not only has DON been my counterpart in his position as chairman of the California Republican delegation, he has also been my next door neighbor in the Rayburn Building for the past 2 years. I will miss working together with DON and his fine staff on California issues, and wish he and Ollie all the best.

In closing, let me again express my best wishes to our retiring California Republican colleagues.●

● Mr. CONTE. Mr. Speaker, fellow colleagues, I am proud to come before you today to honor our dear friend PETE MCCLOSKEY. As we are all aware, our distinguished colleague from California will be retiring at the end of this Congress.

Looking back, there is much to be said about PETE and his career. As a World War II Navy veteran and a decorated Marine Corps veteran in Korea, PETE was first elected to represent the 12th District in 1967. Many of you may remember that election because of PETE's victory over a former movie actress that you grew up with—Shirley Temple Black. Of course, that was before my time.

Since then, PETE has proven himself one of the most diligent and hardworking Members of the House. Primarily, he has distinguished himself as a staunch environmentalist, rising to the position of ranking minority member on the Merchant Marine and Fisheries Committee. For his tireless efforts in protecting all of our natural resources we should be very thankful. Truly, PETE has served his district and his Nation with dedication, conviction, and pride.

I have been most impressed, however, by PETE's go get 'em attitude. Nowhere perhaps was that attitude best displayed than on the ballfield. Who can forget the day of our 1980 baseball

game when ol' killer PETE ran right over EARL HUTTO on first base? Poor EARL had a tough time campaigning that year with a broken jaw. What is worse, we still lost the game—21 to 9. I would have to say, though, that PETE was one of the best hitters and outfielders I have ever had on my team.

Finally, I want to extend my warm personal thanks to PETE for all that he has done for me. In 1980, for instance, PETE was kind enough to come to my hometown of Pittsfield to help me open my campaign headquarters. PETE and I have become the closest of friends over the past 15 years and one reason for that may be that we have so much in common. It is no secret that both PETE and I have reputations of taking on tough issues. Equally, we share a deep love of the beauty the world has to offer. For these and many other reasons, I am particularly saddened by PETE's departure. Do not stray too far old buddy, this country needs more leaders like you.●

● Mr. SAM B. HALL, JR. Mr. Speaker, one of the very sad results of this year's elections is the fact that BARRY GOLDWATER, JR., will not be serving with us next year. While his campaign to represent California in the Senate fell short, we all know that the GOLDWATER name is synonymous with politics and public service, and I have a strong feeling that he will once again enter the political fray. I sure hope so, because he has achieved a great deal since coming to the House in 1969.

BARRY GOLDWATER, JR., fervently shares his father's love of country and the free enterprise system which has provided the abundance we all enjoy. He has fought Government regulation and was in the forefront of the successful struggle during the 1973 oil embargo to assure that no class of energy user was denied equity in the energy distribution system.

As an eloquent and effective promoter of the Nation's space effort, BARRY has made a magnificent contribution to the House Science and Technology Committee. He was a favorite of the late Tiger Teague, my dear friend from Texas, who served so effectively as chairman of the committee.

In addition, BARRY has been a legislative pioneer in the area of alternative energy sources. During the last decade as energy research and development bills have come to the floor for debate, his influence has been positive and effective in shaping their direction.

As a strong advocate of civilian and military aviation, BARRY GOLDWATER, JR., has promoted both the technological and economic aspects of this vital segment of the economy. Aviation in every category will miss his leadership and devotion to their cause.

In the growing age of so-called Big Brother, it was BARRY GOLDWATER, JR., who launched a nationwide campaign to guarantee individual privacy in the relationship of a citizen to his government. The 1974 Privacy Act bears his name, and everyone who cherishes the first amendment to our Constitution owes him a debt of gratitude.

BARRY GOLDWATER, JR., has served his State and Nation well. He will be back in this capacity, I feel confident. It has been an honor for me to have served with him.

● Mr. SHUSTER. Mr. Speaker, I am proude to join with my colleagues in tribute to the Honorable DON H. CLAUSEN, who will be leaving the House of Representatives at the end of this Congress.

It has been a profound honor and pleasure to serve with DON in Congress and particularly in our close working relationship on the Public Works and Transportation Committee. He was one of my chief mentors in the field of transportation policy, and without his help and thoughtful assistance on the committee, my job would have been immeasurably more difficult.

As a member of the Public Works and Transportation Committee for 20 years, and as ranking member for 2 years, DON CLAUSEN was a prime moving force in transportation policy. He has been a positive force as a leader, and he continued and expanded the unique bipartisan working relationship on that committee.

DON CLAUSEN has been dedicated to the balanced protection and use of our Nation's land and water resources. His efforts were of vital importance to the passage of the Surface Transportation Act which will restore our Nation's deteriorating highways and bridges.

DON CLAUSEN has been a hard worker, a dedicated public servant, and a good friend. I will greatly miss having him as a colleague in Congress. I wish him the best of success and happiness in the future.●

● Mr. CORRADA. Mr. Speaker, I rise to pay tribute to our fine colleagues from the State of California that are leaving us at the end of this Congress.

They are: CLAIR W. BURGENER, first elected to the 93d Congress; DON H. CLAUSEN, elected to the 88th Congress; ROBERT K. DORNAN, from the 95th Congress; BARRY GOLDWATER, JR., who joined his father in the U.S. Congress in the 91st Congress; WAYNE GRISHAM, elected to the 96th Congress; PAUL N. MCCLOSKEY, elected to the 90th Congress, and JOHN H. ROUSSELOT, first elected to the 87th Congress and again to the 91st Congress.

All these Members have faithfully and conscientiously represented their districts and I want to join my colleagues in wishing them well and the best of luck. I want at this time, however, to pay particular tribute to the dean of this distinguished group, my good friend DON CLAUSEN.

I am going to particularly miss DON's good counsel and help to me in our work in the Interior Committee. DON has served in the committee for many years and has a dedication to his work and zealous performance of his duties will be sorely missed.

As a member of the Task Force on the Presidential Vote for Puerto Rico established by President Nixon and Governor Luis A. Ferré, DON spent many hours looking into the issue and became very knowledgeable about Puerto Rico. In the process he also became an advocate and friend of the people of Puerto Rico, a friendship which I hope will continue for many years. DON will always hold a special place in Puerto Rico and a warm bienvenido awaits him whenever he visits our lovely island. I am sure I speak for all our colleagues in wishing DON and all our other departing colleagues from California our best wishes for luck, health, and happiness in the future.●

● Mr. SHUSTER. Mr. Speaker, I rise today to join my colleagues in tribute to the Honorable PETE MCCLOSKEY, who is retiring from this body after 15 years of distinguished service.

PETE MCCLOSKEY has always shown courage and determination in taking positions that were not always the most popular on many difficult issues. He has fought to reduce or abolish unnecessary agencies of the Federal Government, and to limit the growth of the Federal bureaucracy.

His hard work and dedication have been an example to all of us who have served with him, and he has been personally supportive and helpful to me during my years in Congress. I would like to thank him for his assistance to me, and I am sure that the people of his district and the Nation are grateful for his efforts on their behalf.

I wish him success in all his endeavors in the future.●

● Mr. BEVILL. Mr. Speaker, a gentleman of unquestioned honesty, integrity, and dedication to this country, my good friend CLAIR BURGENER, is retiring from Congress at the end of this term.

During my 16 years in this body, I can think of no finer person than CLAIR. It has been my great honor to work closely with CLAIR on the Energy and Water Development Subcommittee of the Appropriations Committee. I have deeply appreciated his able service and his tremendous contributions to the work which that subcommittee has accomplished.

CLAIR has been an able and effective spokesman for his district and for his party, and never hesitated to let his views be known concerning this Nation's water resource and energy development and conservation policies. However, CLAIR never let regional or partisan politics hinder any action on

our committee. He is, without a doubt, among the most fairminded individuals in Congress.

He has made many lasting friends during his service in Washington, but I am sure the friendships and mutual respect most important to him are those which he has developed with his constituents in California, for whom he has worked tirelessly and skillfully.

While I am deeply saddened that CLAIR has chosen to leave the Congress, I will be eternally grateful to him for sharing his wisdom, his wit, and his contagious optimism with all of us in this body. CLAIR BURGENER truly has been one of our greatest examples of a fine public servant.●

● Mrs. HOLT. Mr. Speaker, I shall feel great personal loss at the absence of CLAIR BURGENER. He was a classmate of mine in the 93d Congress and has been a real gentleman whose quiet and sound judgment have won him the keen respect of this House. Duncan and I wish him and Marvia good health and great happiness.●

● Mr. SHUSTER. Mr. Speaker, I am pleased to join in the tribute to the Honorable WAYNE GRISHAM, who is leaving the House of Representatives after 4 years of dedicated service to the people of the Nation and of his district in California.

I have had the pleasure of serving with WAYNE GRISHAM on the Public Works and Transportation Committee, where he showed diligence and determination. He led the way in negotiations that enable the building of the Century Freeway which will be of great importance to the people of the Los Angeles metropolitan area.

WAYNE GRISHAM has shown his commitment to reducing the size of the Federal Government, reducing the tax burden, and protecting the liberties of individuals. He has ably represented the people of his district, and he will be missed in Congress.

I wish all the best for him in the future.●

● Mr. ERLENBORN. Mr. Speaker, throughout the history of the House of Representatives, a few have stood out as true watchdogs of the Nation's purse strings. One of these is JOHN ROUSSELOT, the gentleman who has served eight terms as a Representative for the people in and around San Marino, Calif. I am proud to salute him, but saddened that he will be leaving at the close of this Congress.

I dare say that JOHN ROUSSELOT has been instrumental in persuading a host of our colleagues to the need for prudence in Government. He was preaching his sermon on fiscal responsibility long before it became a household term, and he has been persistent.

JOHN'S absence in the 98th Congress will be felt for other reasons as well. He is colorful and frank, and such commodities are needed here.

My good wishes go with him for a future that is as meaningful and constructive as his stalwart service here.●

● Mrs. HOLT. Mr. Speaker, this House is losing one of its most able legislators. JOHN ROUSSELOT will be leaving the Congress following this special session, and I am sure we will all miss this articulate gentleman. John was frugal before frugality became chic, and he was always a champion of responsible Federal fiscal policy. I wish him and his wife Vyonne, good health and happiness, and hope they will rejoin us.●

● Mr. SUNIA. Mr. Speaker, American Samoa was not represented in the Congress of the United States until January of 1981. But Congress was aware of the territory and paid attention to its problems long before I got here to begin that representation. As a matter of fact, this Congress has been remarkable in its attention to our needs for the last several years. One of the men responsible for that is a Member of Congress who is about to leave his seat and return to his home in the great State of California.

This Member is not an American Samoan. He owes no obligation to the islanders. He almost did not have a reason to do what he did. I remember going to see him to seek his support, even before I came here. He was always willing. He was kind. He cared.

Mr. Speaker, I speak of the Honorable DON H. CLAUSEN. And I speak for all of the people I represent. He is an American and a Congressman who will always stand tall among the Americans of Pacific islands. He treated the Samoans, the Guamanians, the Marianas and everyone else out there as if they were his own constituents. We did not, and will never have the privilege of casting a vote in his support. And that is really not fair, for this gentle and kind person voted for us time and time again. I can never recall DON CLAUSEN ever turning us down.

Acting Governor Tufele Li'a, on behalf of Gov. Peter T. Coleman, the government and the people of American Samoa, has asked that I incorporate in these remarks the following:

Hon. DON H. CLAUSEN,
Congress of the United States, Rayburn House Office Building, Washington, D.C.

I am moved to extend to you my deep appreciation, as you prepare to vacate the hallowed seat for the great state of California which you occupied with distinction and with great benefit to American Samoa. Our people and government have seen great strides in their political, economic and social development. The invaluable assistance which you readily extended with remarkable sensitivity to the uniqueness of our culture and special situation of small island economies was, to a large extent, responsible for these accomplishments. We look forward to continuation of our relationship. May God continue to grant you wisdom and success in the future. With warmest "alofa".

Fa'afetai tele,
High Chief TUFELE LI'A,
Acting Governor, on behalf of Governor Peter T. Coleman, the government and people of American Samoa.●

● Mr. SHUSTER. Mr. Speaker, I join today in the tribute to the Honorable ROBERT K. DORNAN who will be leaving the House of Representatives after this Congress.

For the past 6 years, ROBERT K. DORNAN has very capably served the people of the Nation and his district. As chairman of the House Task Force on Americans Prisoners and Missing in Southeast Asia, he has diligently pursued the difficult task of seeking an accounting of those servicemen still listed as missing in action in Vietnam.

ROBERT DORNAN, who served as a fighter pilot for the U.S. Air Force for 5 years, is a knowledgeable and persuasive advocate for the strengthening of America's strategic Triad defense system. His efforts to bring about tax reform were influential in the passage of the individual tax rate cuts in 1981.

We will miss the valuable contributions and hard work that he always demonstrated in his efforts in Congress. I know that he will use those qualities to great success in the future.●

● Mr. SENSENBRENNER. Mr. Speaker, at the end of this Congress, after five terms serving the 43d Congressional District of California, Congressman BURGENER has chosen to retire. At this time, I would like to join with my colleagues in recognizing his commitment to his district, his Nation, and his party.

His dedication and concern for his district is reflected in his long record of service at all levels of government. In 1953, he was elected to the San Diego Council where he served as a member and deputy mayor. From 1963 to 1967, he represented California's 76th Assembly District in the California Legislature and served from 1967 to 1973 as a State senator for the 38th Senatorial District. Since 1973 until the present, we have been privileged to serve with him in the House of Representatives.

As a Member of the House, I have shared with him, on many occasion, the goals he has worked for. He has been both a solid advocate of immigration reform and strong proponent of fiscal restraint and control of big government.

During his tenure in Congress, Congressman BURGENER has been sought after to take a leadership role. As Secretary of the House Republican Conference, he has been both hardworking and effective. I join with my colleagues in honoring the distinguished service of Congressman CLAIR W. BURGENER.●

● Mr. SHUSTER. Mr. Speaker, I am proud to rise today to join with my colleagues in acknowledgement of the outstanding service of the Honorable JOHN ROUSSELOT, who will be leaving the House at the end of this Congress.

JOHN ROUSSELOT has earned my profound respect, and that of the rest of Congress and indeed the Nation for his consistent stand in support of a balanced Federal budget. He fought a courageous and often lonely fight for fiscal responsibility long before it became a popular position to take. JOHN ROUSSELOT recognized earlier than most that excessive taxation destroys the initiative of businesses and individuals, and that Government interference in the marketplace leads to economic stagnation.

The people of the 24th District of California have been well served by his able and tireless efforts. His leadership in the House and in the key Ways and Means Committee will be sorely missed, but he leaves behind a House with many more voices that have picked up his cry for more sensible fiscal policy.

I wish him all of the best in the future.●

● Mr. SHUSTER. Mr. Speaker, I rise today to join in tribute to our friend and colleague CLAIR W. BURGENER, who will be retiring from the House of Representatives after 12 years of distinguished service.

CLAIR BURGENER's leadership will be greatly missed by the Members of the House, and by the members of his party. He has earned the respect and admiration of his colleagues, and when elected to the post of secretary of the House Republican Conference, he showed through his hard work that our confidence in him is well founded.

His efforts on the behalf of our Nation's mentally retarded citizens have had a direct and positive effect on many families. His work on the appropriations committee has helped to set the direction of Federal fiscal policy, and his guidance will be missed in the trying times ahead.

I would also like to thank him for his thoughtful assistance to me, which has been invaluable in my experience in Congress. I have benefited from having him as a friend and colleague, and I wish him the best in the future.●

● Mr. GILMAN. Mr. Speaker, I would like to thank my colleagues, the gentleman from California, DAVE DREIER and CARLOS MOORHEAD, for requesting today's special order. I join them and other Members of this body in paying tribute to JOHN ROUSSELOT, an outstanding American and dedicated Congressman.

JOHN ROUSSELOT has served in this House for a long time—so long, in fact, that his absence will be extremely difficult for those of us who admire not only his legislative skills and accomplishments but his wit, as well as his integrity. JOHN has always had the concerns of his consitutents in the forefront of his thoughts and actions, as his dedicated service on the Ways and Means Committee will attest.

JOHN ROUSSELOT has been a leader in the fight for fiscal responsibility as well as moral responsibilities. Many times I found him on the floor of the House speaking extemporaneously on one matter or another, and I marveled at the breadth of his commentary. I will always remember the tireless hours JOHN put into Soviet Jewry legislation, which is of such importance to us both, and I personally appreciate the many times JOHN courageously stood up for what might have been an unpopular opinion. Certainly, the House of Representatives is a forum for differing opinions, and I for one, have always appreciated and listened to what JOHN ROUSSELOT has had to say. He is one Member who we will miss a great deal, and I certainly hope that JOHN will not be too far from us and will continue to give us the benefit of his views in the future.●

● Mr. ANDERSON. Mr. Speaker, before this 97th Congress adjourns and becomes a part of history. I would like to take just a moment to say a few words about my colleague from California, the Honorable WAYNE GRISHAM.

WAYNE and I have been good friends for some time. His election to Congress only enhanced and strengthened this bond between us. Because of his assignment on the Public Works and Transportation Committee I was able to work with WAYNE on a number of projects which benefited our constituents.

Although WAYNE has been with us only a short 4 years, he has done much for the betterment of our Nation. I have seen him, firsthand, put in many hours on our committee so that he may better understand the issues before us. Because of WAYNE's knowledge and insight into the needs of southern California, I have been able to openly discuss many subjects which affect our constituents. It has been through these conversations that I was able to formulate a more knowledgable position on a particular matter and, hopefully, get it enacted into law.

Due to reapportionment, I will be representing part of WAYNE's current district in the 98th Congress. I am looking forward to this challenge and hope that I can call on WAYNE for advice so that I may best represent this area. WAYNE has contributed much and I shall miss seeing him in this Chamber and in committee.

My wife, Lee, joins me in extending to WAYNE and his wife, Mildred, and their three children, Cathy, Randall, and Kelly, all the best in their future endeavors.●

● Mr. BEVILL. Mr. Speaker, my close friend and one of this body's most dedicated Members, DON CLAUSEN, has effectively represented his constituents for 20 years in the U.S. House of Representatives.

In addition, DON has worked hard to develop this Nation's ports, waterways, and other public works projects, in his position as ranking minority member of the Public Works and Transportation Committee. DON CLAUSEN was trying to solve the problems of our country's ailing infrastructure long before the word ever appeared in our Nation's media.

I have been privileged to work with him in these efforts and I consider DON CLAUSEN to be one of the best informed Members of Congress as to the real needs America has for rebuilding and strengthening its network of public works.

Personally, I will miss DON's bright presence in this body, but I am grateful to him for the tireless and often untold sacrifices he has made to help prepare this Nation for the future. DON CLAUSEN has been an able and respected Member of the U.S. House of Representatives.●

● Mr. GILMAN. Mr. Speaker, this Congress is going to miss Congressman BOB DORNAN who has been throughout the years one of the most effective and articulate legislators that I have known.

BOB's interest and enthusiasm on a wide range of topics has become his hallmark in the Congress. He will be perhaps best remembered for his selfless dedication and work in the issue of our servicemen listed as missing in action and prisoners of war. Under his able chairmanship of the House Task Force on MIA's, Americans again learned that their Congress had not abandoned the MIA's and POW's left behind in Southeast Asia. As long as BOB DORNAN was there, a flame was burning bright for all to see.

BOB and I traveled to Hanoi to request that the Vietnamese Government redouble their efforts in seeking information and the remains of our 2,500 Americans missing in action. Both the American delegation and the Vietnamese officials were deeply impressed by BOB's incredible memory for details, by his articulate analysis of the situation and by his compassion for the families of the missing in action. I can think of no one whose grasp of the issue equals BOB DORNAN'S.

One of the most laudable and estimable characteristics for which BOB DORNAN will be remembered is his ability to put everyone at ease, and to listen to each person's story. From the Vietnamese refugees he interviewed to the Vietnamese officials, from the generals in our own Government to the families of our servicemen, BOB's com-

passion and charisma made all people at home, and gave them the confidence that their views made a difference.

Our Nation found a patriotic and dedicated public servant in BOB DORNAN. His concerns for our national defense, for international human rights, for our older Americans, our Armed Forces, and our American form of government have restored the faith of many in our Congress.

I am certain that after BOB leaves the Congress that his burning interest and dedication will not diminish. I am certain that wherever he goes and whatever BOB does, Americans will be nobly served by his wisdom and devotion.

We will all miss BOB DORNAN and we all know that he is irreplaceable here and in our hearts. Good luck, BOB DORNAN.●

● Mr. RUSSO. Mr. Speaker, I know when Representative DON CLAUSEN leaves Congress we are not only losing a hard-working Member but the best "old man" ballplayer we ever had. It is not often you have someone who can manage the tricky maneuvers of the congressional ball play as well as the complexities of public works.

DON has been a good friend, and I know we are going to miss him here. His constituents and the country have been well-served by his commitment and his ability to see projects through, and while I have never had the privilege of working with him on committee I have certainly enjoyed our work together on the floor.

Whatever DON is doing, I know he will always apply the same tenacity and talent that we have seen so ably demonstrated in his years here in Congress. I am pleased to join with my colleagues in commending DON for a job well-done and to wish him continued success.●

● Mr. ANDERSON. Mr. Speaker, among those who will not be with us in the 98th Congress will be our good friend and colleague from California's 43d Congressional District, the Honorable, CLAIR W. BURGENER.

Long before I was elected to Congress, I became friends with CLAIR. His vast experience in the California State Legislature enabled him to enter Congress with a thorough understanding of the legislative process and thus the necessary skill for getting a job done. His contributions to this Nation—especially to the State of California and the city and county of San Diego—are many and his absence in future Congresses will certainly be felt.

CLAIR's assignment on the Appropriations Committee has enabled him to do much for his constituents. However, he always looked at our national needs and made appropriated judgments.

Often I would look to CLAIR for help on a particular project and usually we were successful in our efforts. It did not matter to CLAIR whether you were Republican or Democrat, if you needed assistance in getting a project funded, CLAIR would carefully study it on its merits and would make an appropriate decision. His service and tireless work was always performed with the utmost efficiency and competence, coupled with the keen insight and intelligence necessary to effectively deal with the many intricate pieces of legislation which come before the Appropriations Committee.

When the 98th Congress convenes, you can be sure that CLAIR's presence and friendly disposition will be greatly missed by all of us who have had the pleasure of serving with him. CLAIR has been a good friend of ours through the years and has continuously shown enormous wisdom in understanding the needs which face the people of San Diego and the State of California, as well as the other 49 States

My wife, Lee, joins me in saying farewell to CLAIR and his wife, Marvia, on this occasion. We wish them and their sons, Greg and John, the best in their future endeavors.●

● Mr. GILMAN. Mr. Speaker, I appreciate the fact that time has been allowed for us to pay special tribute to the Honorable CLAIR BURGENER of California, after 10 years of dedicated and tireless service on behalf of the people of southern California.

I know CLAIR BURGENER as an involved and caring man. Through his service on the Appropriations Committee, he has had the opportunity to review every social program, every fiscal program, and every military program. And CLAIR has considered each and every proposal with his customary equanimity and good sense.

CLAIR's congressional service has been highlighted by his distinguished membership on the President's Committee on Mental Retardation, as well as service on the National Advisory Committee on Handicapped Children. His careful consideration of the particular needs of our handicapped only serve to emphasize the important role that CLAIR has played here in the House of Representatives over the years, as well as the valuable contribution that has benefited all Americans.

As such, Mr. Speaker, I am saddened by the fact that CLAIR will not be among us for the 98th Congress; however, I understand his reasons for retiring at this time. So, I wish CLAIR, and his lovely wife Marvia and their family the best of good health and success in the coming years, secure in the knowledge that he has done more for the people of his district than most other Members.●

● Mr. RUSSO. Mr. Speaker, if I had to share the Most Valuable Player Award with someone in my first congressional baseball game, I am delighted it was PAUL MCCLOSKEY. As I was to find out in my work in Congress, PAUL fights well and hard, whether he is member of a team or taking a courageous stand alone. Congress works best when there are such courageous men who will take the lead and champion a course regardless of political consequences.

PAUL is a man of many talents. I do not know if we made any sports commentary history with Joe Garagiola on the congressional ball game but certainly PAUL demonstrated his prowess for shrewd analysis. This same thoughtful and incisive approach to issues of national and worldwide significance gave him a well-deserved stature as a man to be heeded. He knew what he was talking about and he became an important spokesman for progressive Republicanism. Because he backs up his beliefs with action, he is a man to be greatly respected.

I am sorry the Congress is losing this distinguished Member. He has served with integrity and commitment, but I know he will continue to be active in world affairs and to be a man who has an impact, who makes us think. I join my colleagues in wishing his continued success.●

● Mr. ERLENBORN. Mr. Speaker, DON CLAUSEN, our colleague from California's Second District, has made scores of contributions to the commonweal during his 20 years as a Member of this House, and I am proud to join in this tribute to him.

When I think of DON CLAUSEN, I think about the national parks and wildlife refuges, the scenic wonders and nature trails which have been preserved because of his work on the Interior and Insular Affairs Committee. When I think of DON CLAUSEN, I also think about the dams and bridges that have been built and those that have not because of his efforts to weed the worthy and necessary projects from those that are only a good idea.

DON's labors, however, did not begin and end with his committee assignments. Thus, when I think of DON CLAUSEN, I also recall his untiring work to make the guaranteed student loan program work; and I recall his dedication to one of our most sacred principles as a Nation—religious freedom.

Together we succeeded in getting the law passed which says Americans need not choose between their religion and a job, that those who hold religious beliefs against joining or financially supporting labor unions need not do so.

DON can go forth to a new chapter in his life knowing that he has been a stellar public servant. He will be missed by this colleague, but I wish him well.●

● Mr. SENSENBRENNER. Mr. Speaker, as the 97th Congress draws to a close, I am glad to have the opportunity to join with my fellow colleagues in extending my thanks and appreciation to Congressman WAYNE GRISHAM for his service in the House of Representatives.

As a strong opponent to the creation of the Department of Education, he took an uncompromising stand, as a member of the Committee on Government Operations, on its creation. In addition, he has worked consistently to bring the fundamental values back in to our American way of life. His support of a constitutional amendment to restore prayer back in the public schools exemplifies his relentless belief in these ideals.

WAYNE, I join with my colleagues in honoring your distinguished service in the House of Representatives and your dedication to the constituents of the 33d Congressional District of California.●

● Mr. ANDERSON. Mr. Speaker, I am deeply honored to join with my colleagues in paying tribute to our good friend, Hon. DON CLAUSEN.

DON, who will be leaving us this year after serving 20 years in Congress, has done a great job for his district, the State of California, and the Nation. I have had the distinct privilege of serving with DON on the Public Works and Transportation Committee my entire 14 years in the House. It is through this committee assignment that I developed my great respect for DON.

Through all these years, I have been continually impressed with his desire, intelligence, wit, and dedicated hard work for the people of this country. Time, and time again, I have seen him operate in committee hearings and markups with the greatest finesse in striking compromises with other members so that a particular measure could be reported out on to the House floor.

He has truly become an expert in all fields which the jurisdiction of the Public Works and Transportation Committee encompasses. Whether it be in aviation, water pollution, port dredging, highway financing, or the construction of public buildings, DON has been able to offer us insight which many are not able to do. Next year, when the committee meets, I will truly feel a sadness for not being able to walk over to DON in a crucial situation and ask for his advice.

Although DON always worked for the betterment and development of the entire Nation, he kept a close eye on the needs of his constituents and the needs of our State of California. Every major bill, which has been reported out by our Public Works and Transportation Committee, was thoroughly reviewed by DON and his staff so they could see how it affected our State—and this is critical in these times when funds are scarce and budgets are tight. It has always been comforting for me to know that DON would look out for the best interest of California in case something might have slipped by me. For if something did, DON was right there to point it out, get our attention, and get the situation fixed. DON was above the partisan bickering which could occur in committee. If he felt a certain way on a particular bill, he voiced his opinion and let the chips fall where they may.

His leadership has been appreciated and his guidance will be missed. Although the rest of the country will miss the services of DON, and his wife, Ollie, my wife, Lee, and I will miss their friendship and warmth. We wish DON and Ollie, and their daughters, Beverly and Dawn Marie, all the best in their future endeavors.●

● Mr. SENSENBRENNER. Mr. Speaker, I am glad to have this occasion for extending gratitude and wishing good luck to my colleague, Representative BARRY M. GOLDWATER, JR., while being the son of BARRY GOLDWATER, SR., BARRY JR. has distinguished himself as a knowledgeable and respected Member of Congreess in his own right. Not only has he brought to this body his expertise in aviation—his beloved avocation, he has also brought with him his unswerving devotion to both his own constitutents and to all the people of this Nation.

Being a fellow conservative Republican, I have been fortunate to work with BARRY on numerous occasions. Most recently, during this Congress, I served on the House Science and Technology Committee with him, and gained further respect for his knowledge of the many issues considered by that committee. And further, I have been lucky to have known BARRY for years now, having worked with him in the California Republican campaign in 1964. I am going to miss him in Congress, and know this country will miss him. I wish him the best of luck in his future years, knowing he will add an element of quality in whatever he does.●

● Mr. CAMPBELL. Mr. Speaker, I am honored today to participate in this special order for our distinguished colleague from California, WAYNE GRISHAM.

No stranger to difficulty after being held as a prisoner of war in World War II, WAYNE GRISHAM not only won election as a Republican in a district with a Democratic majority of registered voters, but served the 33d District admirably. Working on both the Post Office and Civil Service and Public Works and Transportation Committees, WAYNE GRISHAM was a marked asset to his delegation and to the Nation.

Certainly, WAYNE GRISHAM will be missed by this body. I am sure that he will continue to be successful in his future endeavors.●

● Mr. SENSENBRENNER. Mr. Speaker, I join with my fellow colleagues in expressing my thanks and appreciate for the opportunity to serve with Congressman PETE MCCLOSKEY.

He is a man of principle and conviction. He has supported the causes he believes in even though sometimes it was not popular opinion with the public or his party. Yet, at the same time, he has faithfully represented his constituency, the 12th Congressional District of California. This dedication was reflected time and again as he was reelected six out of seven times with a majority of over 70 percent.

In his 13 years in Congress, PETE has provided leadership in a wide variety of issues important to his district and the Nation. Whether it be his stand on environmental issues or his position on the Vietnam war, he was a champion of the cause. His accomplishments are numerous as legislator, author, and citizen. It is with regret that we say goodby to this fourth-generation California Republican. His persistant drive in addressing the issues along with his deep concern for them, has made the current chairman of the bipartisan Environmental Study Conference, an invaluable assest to the House of Representatives. I join with my fellow colleagues in honoring PETE and wish him only the very best in the future.●

● Mr. MONTGOMERY. Mr. Speaker, I want to join with my colleagues today in paying tribute to one of the most respected members of this Chamber, the Congressman from California, DON CLAUSEN.

After a long and successful business and State political career, DON was elected to the House of Representatives in 1963. Since that time, he has been a most effective member of this Chamber. I know his leadership and experience will indeed be missed when the 98th Congress convenes in January.

DON worked very hard for the people of his Second District. He was also very active in committee work. He was a member of the Interior and Insular Affairs Committee, and he was the ranking Republican on the Public Works and Transportation Committee. His contributions to these committees were very valuable.

DON has gained the respect and admiration of his colleagues over the years. I want to point out that he has been a most distinguished Congressman for nearly two decades. A man of his high integrity and knowledge will not easily be replaced in this Chamber. I want to commend him for a job well done.

Mr. Speaker, I am most honored to take part today in this tribute to my friend, JOHN ROUSSELOT.

Since his election to the House of Representatives in 1961, JOHN has consistently been a strong conservative voice in this Chamber. His very articulate speaking manner and his experience will definitely be missed here in Washington.

JOHN has been a hard worker for his congressional district in California, but he has also been a strong force for the National Republican Party, serving as vice chairman of the Republican Study Committee and executive vice chairman of the National Republican Congressional Committee.

JOHN has served on a number of committees during his tenure in the House. He has been a member of the Budget Committee, as well as the Post Office and Civil Service Committee and the Banking, Finance and Urban Affairs Committee.

In the 97th Congress, JOHN has been active on the Ways and Means Committee and on the Joint Economic Committee.

I have come to respect JOHN ROUSSELOT over the years. He is a very personable man who has great leadership ability. I am sure his political experience and that leadership ability will be a great asset in the years ahead. Men of his high integrity, experience, and honesty are hard to replace. We will miss him.

Mr. Speaker, I am honored to join with my colleagues today in this tribute to the Congressman from California, PAUL MCCLOSKEY.

PETE came to the House of Representatives the same year I did, 1967, and although he and I have disagreed on the issues many times, I consider him a good friend.

We served together on the Select Committee on Missing Persons in Southeast Asia, where I found him to be an intense and hard working man, determined to find the truth. He was a great help to me on that committee.

I know he has worked with equal tenacity on the Merchant Marine and Fisheries Committees, and the Government Operations Committee. He can be proud of the service and contributions he has made to this Congress.

The people of the 12th District, who reelected PETE seven times, will no doubt miss his leadership and voice here in Washington. He has always been a fighter for his district and I know service to them has been a top priority.

As you may know, PETE was active in the Armed Forces of this country and then as a successful attorney before coming to Congress. In fact, he won the Navy Cross, Silver Star, and Purple Heart while serving in Korea with the U.S. Marines. He was in the U.S. Navy in 1945-47. He retired with the rank of colonel in the Ready Reserve, where he served from 1960-67.

I want to wish the best for PETE MCCLOSKEY. I would not be surprised if he is heard from again on the political scene in California in the years to come.

Mr. Speaker, I am happy to add my name to the list of colleagues in this special order on BARRY GOLDWATER, JR.

Since his election to Congress from California's 20th District in 1969, BARRY has been a strong conservative voice in this Chamber. He will not be in the House in January as the new Congress convenes and we will miss him.

During his tenure here, BARRY has worked hard on the Science and Technology Committee and he has also made a great contribution to the Public Works and Transportation Committee.

I know his constituents in the 20th District will miss his service and hard work on their behalf. I am sure, however, that BARRY GOLDWATER, JR., will continue to speak with a forceful voice for conservative causes across this Nation for many years to come. Public service has been a tradition in his family for so many years and I can say that this Nation has benefited from that service.

I want to express my appreciation to him for his contributions to the Congress and wish the very best in the years ahead.

Mr. Speaker, I am happy to take part in this tribute to Representative CLAIR BURGENER, who is retiring from service in the House of Representatives after 10 years. He represented the people of California's 43d District with distinction since 1973. We will miss his strong leadership in this Chamber.

CLAIR BURGENER began serving his country long before coming to the House of Representatives. He flew in the U.S. Army Air Corps in World War II and earned the Air Medal in 1945. During the Korean conflict, he was recalled for active duty with the U.S. Air Force.

After this service, he went into politics and worked his way up as councilman and then vice mayor of the city of San Diego, California State assemblyman, and State senator before running for Congress.

CLAIR has served as secretary of the Republican conference and his experience and leadership have been counted on over the years. He has also been a valuable member of the Appropriations Committee.

I understand he is headed back to California to enter private business and possibly teach political science. I want to wish the best for him in these future endeavors. We will miss him here in Washington.

Mr. Speaker, it is a pleasure for me to join in this special order today on Representative ROBERT DORNAN. He will not be among us in the 98th Congress, but I do not think we have heard the last of BOB DORNAN. There is always a place in public service for a man of his experience and high integrity.

During his three terms in the Congress, BOB DORNAN has distinguished himself as a champion of conservative causes. He is credited with invention of the POW/MIA bracelet and he has worked most diligently on their behalf. He has been active in the VFW and Air Force Association. BOB served this country in the U.S. Air Force as a fighter pilot from 1953-58 before turning to broadcast journalism, where he won two Emmys in 1968 and 1969.

BOB has been a leader on the Select Committee on Drug Abuse and Control, as well as the Committee on Drug Abuse in the Military. He also has been very active on the House Foreign Relations Committee and he is a member of the Republican Task Force on Defense.

As you can see, BOB DORNAN has been a fighter for the people of the 27th District of California and for this country. I am sorry this hard-working and dedicated American will not be back in the House, but I know the future is still bright for him and I want to wish him the very best.

Mr. Speaker, I want to join in this tribute to the gentleman from the great State of California, WAYNE GRISHAM.

WAYNE is truly an outstanding American and he can be proud of his fine accomplishments as a Member of the House of Representatives. Before being elected to this Chamber, WAYNE had been a successful businessman and teacher. In addition, he served with distinction in the U.S. Army Air Corps in World War II as a fighter pilot in Europe. He was shot down and was a prisoner of war. WAYNE won the Air Medal and the Purple Heart for his service to the Nation.

After coming to Congress, he has become very active on the Post Office and Civil Service Committee, as well as the Public Works and Transportation Committee. His contributions have been most valuable to these committees.

WAYNE is a man of great integrity and I know the people of the 33d District are proud of his work on their behalf. As he returns to private life, I am sure WAYNE will continue to be an influential leader in his community and the State.●

● Mr. CAMPBELL. Mr. Speaker, I am pleased to be able to take part in this special order today for our distinguished colleague and good friend, BARRY GOLDWATER, JR. It has been a pleasure serving with him during my tenure in Congress.

During his 13 years of service in this body, BARRY has provided excellent representation for his consitituents in the 20th District of California. He has

worked tirelessly on both national and local issues, which has contributed to his expertise in various legislative areas. His knowledge and hard work will be missed on both the Public Works and Transportation and Science and Technology Committees.

BARRY's achievements reflect his sincere interest in people and his strong concern for the welfare of our Nation. His service to the people of California and the Nation as a whole are a tribute to his dedication and strong sense of duty, which are well known attributes of the Goldwater family. Although BARRY GOLDWATER will be sorely missed in the House, I am sure that he will be successful in his future endeavors.●

● Mr. SENSENBRENNER. Mr. Speaker, on this occasion, I am happy to join my colleagues in extending gratitude and thanks to Representative DON CLAUSEN for his years of service in the House of Representatives. Elected in a special election in 1963, DON has worked with unswerving devotion to his constitutents and his country. Distinguishing himself as a naval aviator, DON gave 4 years to serving in the military and then stayed involved with aviation in the capacity of Del Norte County aviation director until running for Congress.

DON's years in Congress are a reflection of the respect so justly given him by his fellow colleagues. This Congress, DON served as ranking Republican on the House Public Works and Transportation Committee and also as second ranking Republican on the Interior and Insular Affairs Committee. As an ardent advocate for protection of the environment, over the years, DON has played an important role in such big issues as Alaska lands, Energy Mobilization Board, and national parks. Paying homage to the mighty redwood trees native to his district, DON has sought to preserve the delicate balances between utilization and preservation which are so essential in formulating a national environmental policy. This sense of foresight and direction exhibited on so many occasions by DON over the years will be sorely missed in Congress. I wish DON the best of luck for the future, knowing he will add an element of quality to whatever he does.●

● Mr. CAMPBELL. Mr. Speaker, I join my colleagues today in paying tribute to our distinguished colleague, DON H. CLAUSEN.

DON's service in this body speaks for itself. His work in the Committee on Interior and Insular Affairs, and as the ranking minority member of the Committee on Public Works and Transportation has been untiring and diligent. Representing a district with diverse interests and views, DON has displayed the judicious care in decisionmaking which is vital to being an effective Representative. Coming into the House after a special election, DON quickly established himself as a knowledgeable legislator and began displaying his effective leadership skills immediately.

DON CLAUSEN, after his 19 years of dedicated service, will leave large shoes to fill in the California delegation and in this body. I certainly wish him the best in his future endeavors.●

● Mr. HOWARD. Mr. Speaker, it gives me great pleasure to join with our colleagues in a tribute to DON CLAUSEN. He has certainly rendered outstanding service to California and this Nation and deserves this tribute in full measure.

DON CLAUSEN has been a devoted public servant for most of his life. A look at his accomplishments certainly illustrates this fact. DON was first elected to the House of Representatives in 1963 from the Second District in California. Prior to that, DON served many years in the Del Norte County government as a member on the county supervisor's panel and as its aviation director. Don also was a pilot with the U.S. Navy during the years of 1943–47.

It has been my special privilege to work with DON over the years on the Committee on Public Works and Transportation. As chairman, I have been extremely fortunate to have DON CLAUSEN as my ranking minority member. He has at all times been willing to work in a spirit of cooperation to confront the issues within the committee's area of jurisdiction.

With the passage of the Surface Transportation Act of 1982, DON's career in the House is coming to a successful end. His endless work on this legislation insures a strong transit system for future generations.

We all know of his expertise in aviation; but diligence in his duty did not end there, he addressed himself to all our areas of responsibility with the needs of his constituency, State and the Nation foremost in mind.

I shall lose a great friend. The committee will lose a wise counselor, and the Nation a distinguished public servant.

I join with my colleagues in wishing him a fruitful and happy life in his future endeavors. I certainly hope we will continue to see and hear from DON CLAUSEN.●

● Mr. SENSENBRENNER. Mr. Speaker, I am glad to have this opportunity to join with my colleagues in extending thanks and appreciation to Representative BOB DORNAN for his service in the House of Representatives. Since his election in 1976, he has added much color to this body with his remarks and efforts in support of his beliefs. But more importantly, BOB has added integrity to the House as he fought for the protection of this Nation's citizens. As a strong prolife advocate, he took uncompromising stands time and again on behalf of the unborn. And in seeking to protect the American way of life, he consistently supported a strong national defense—both militarily, and in formulating a decisive foreign policy. As a fellow Republican, I was always glad to know BOB was on the side aiming for better government through less government control. As a fellow Congressman, I will miss BOB greatly, but am grateful to have had the chance to work with him in Congress. I wish BOB a happy and fruitful retirement.●

● Mr. BADHAM. Mr. Speaker, this evening, as we take time from the legislative business at hand to recognize our departing colleagues, I want to say to my colleagues on the California delegation who are retiring that it has been a special honor to serve with them. Not only has it been a fulfilling, challenging experience to work in concert with JOHN ROUSSELOT, CLAIR BURGENER, WAYNE GRISHAM, DON CLAUSEN, BARRY GOLDWATER, JR., PETE MCCLOSKEY, and BOB DORNAN; it has been a pleasure as well.

The California Republican delegation, despite its size and diversity, has over the past several years been able to work well together as a group for the good of the people of California we represent and for the country. In doing so, we have maintained a mutual respect for one another, even when our opinions differ, and a camaraderie that helps to make Washington's cold winters and humid summers more tolerable.

The accomplishments of these seven members are many and their talents and legislative victories reflect the qualities of leadership, independence of spirit and diversity for which California is known.

For example, CLAIR has been part of the House Republican leadership in his role as secretary of the conference and has been an effective member of the Appropriations Committee. He has also been a leader in protecting the interests of America's handicapped and disabled citizens.

CLAIR and I have worked closely together on issues which effect southern California, such as the problem of beach erosion in Oceanside. He has been a friend since our days together in the California legislature and his advice and help when I first came to Congress were invaluable.

The dean of our delegation, DON CLAUSEN, holds the influential positions of ranking minority member of the Public Works and Transportation Committee and second ranking minority member of the Interior Committee. As such, he has been in the center of the debate on issues ranging from clean water programs, flood control and water conservation to the state of our Federal highways, harbors and airport-airway systems. DON initiated the

push for legislation to establish a 200-mile limit to protect U.S. fishing interests, which was enacted in 1976.

Off the floor, DON took to the baseball field for the annual congressional baseball game, playing real hardball against the Democrats and bringing fun and excitement to many while raising funds for charity.

JOHN ROUSSELOT is well-known for his watchdog role on the House floor, a role which he has used to fight for a balanced Federal budget, lower taxes and less government. In addition, JOHN has worked tirelessly for other California Republicans as vice chairman of the National Republican Congressional Committee and chairman of the Congressional Target Committee in California.

PETE MCCLOSKEY is a Member who has never been afraid to follow his conscience and strike out on his own. PETE chairs the Environmental Study Conference, is a ranking minority member of two subcommittees and serves as an adviser to the U.S. delegation to the U.N. Law of the Sea Conference. Among other legislative accomplishments, he was the main force behind abolition of the Renegotiation Board and the first rollback of the capital gains tax rate. Also, like DON, PETE helped give the Democrats a real challenge on the baseball field each year.

BARRY GOLDWATER, JR., is recognized for his expertize on the subject of aviation and is considered a principal spokesman for general aviation in particular. Also, he is a proponent of legislation to protect the personal privacy of Americans and authored the landmark Right to Privacy Act of 1974, which is now law.

A number of awards have been received by WAYNE GRISHAM for his work in the Congress. These include the Republican Policy Award, the Disabled American Veterans' National Commanders' Award, the Coalition of Peace through Strength Leadership Award and one from the National Taxpayers' Union. Personally, I think WAYNE deserves an award for his skills as a host, which I experienced firsthand on Catalina. Also, an achievement of which WAYNE is rightfully proud is the enactment of legislation to prohibit housing subsidies to illegal aliens.

On numerous conservative issues, BOB DORNAN has been in the forefront of the legislative area. BOB has been influential on issues such as restricting Federal funds for abortions, restoring fiscal responsibility to the Government and providing for a strong U.S. defense posture. In fact, like me, BOB personally checks out the aircraft used by our Armed Forces.

As my colleagues can see, a broad range of interests have been successfully pursued and many important goals have been achieved by these Members. They have left their mark on the affairs of the Congress and the Nation, and they have set a fine example for those will serve in the next Congress.

DON, CLAIR, PETE, JOHN, WAYNE, BOB and BARRY will be missed, each in a different way for the different contributions they made. Beyond their political and legislative accomplishments, each of them will be missed for the close friendship which we have shared with them on the Hill and which I know we will want to continue off the Hill in the years ahead. I urge my colleagues to join me at this time in saluting them and thanking them.●

● Mr. CAMPBELL. Mr. Speaker, I am pleased to join in this salute to our distinguished colleague PETE MCCLOSKEY, for his outstanding service to the House of Representatives.

During his tenure in Congress, PETE has established himself as one of the most dedicated and honorable men. He is highly respected for his independent thinking and his hard work on the Government Operations and Merchant Marine and Fisheries Committees. Although PETE has many legislative accomplishments, he will be most remembered for his vigilence in protecting our environment.

PETE'S service to the people of California's 12th District and the Nation as a whole will be sorely missed. His compassion for people and desire to improve the lives of Americans are values that he not only held, but practiced. I wish PETE MCCLOSKEY well in his future endeavors, as I know that he will be successful.●

TRIBUTE TO FIORELLO LA GUARDIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BIAGGI) is recognized for 30 minutes.

GENERAL LEAVE

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BIAGGI. Mr. Speaker, I have reserved this special order today to honor the centennial birthday of one of the truly greats of American history—Fiorello H. La Guardia.

He was born in New York City on December 11, 1882. They called him the "Little Flower," yet no man stood so tall in the hearts and minds of those who came to know him. He served this Nation as Congressman and mayor of its largest city during very difficult times, and it was his untiring spirit and deep convictions—and those of others like him—that helped pull this country through two world wars, a great depression, rampant corruption, and a host of other mighty tests.

The "Little Flower" was indeed no small man. He served 12 distinguished years in this august body from 1917 to 1919, and from 1923 to 1933. Then, in 1933, he was elected mayor of New York City and he was reelected in 1937 and again in 1941, making him the first mayor of New York ever to be elected to three consecutive terms.

When he died in 1947 at the age of 64, his record of achievements was as impressive as the man himself.

I have vivid memories from my childhood of a fiery Mayor La Guardia campaigning from atop a truck in the Upper East Side of New York City. Several years later, I was honored to be a letter carrier who delivered mail to the mayor and his wife, Marie, at 1274 5th Avenue in East Harlem.

Later on, Mayor La Guardia provided me with yet another fond remembrance when he attended my swearing in as a New York City police officer.

To this day, I still have enjoyable chats with the mayor's wife, Marie, about our memories of the man who made such a positive impression on my life and the lives of so many others.

When we speak of honesty and fairness, we speak of Fiorello La Guardia. In 1917, his first year in Congress, he voted to declare war against Germany and then enlisted for military service himself, as he promised his constituents he would do.

When we speak of morality and justice, we speak of Fiorello La Guardia. An incorruptible man, Mayor La Guardia once told his beloved constituents, "I like Coney Island. I like its hot dogs, I like its popcorn . . . but I do not like immorality, indecency, commercialized vice and gambling," His actions spoke even louder. He destroyed slot machines on Staten Island, he led a police raid on gangsters in Manhattan, and he eliminated the considerable graft and corruption that existed within the city government before he took office.

And, when we speak of commitment and fortitude, we speak of Fiorello La Guardia. During his early years as mayor, he once wrote, "I shall not rest until my native city is the first not only in population but also in wholesome housing; not only in commerce but also in public health; until it is not only out of debt but abounding in happiness."

Although skilled in rhetoric, Mayor La Guardia was even better at producing results. Among his many accomplishments as mayor were the establishment of low-cost housing and slum clearance programs; improved health and sanitary conditions within the city; construction of many new public

school buildings; and the balancing of the city budget.

He also played a major role in city beautification efforts and promoted a number of major construction projects, including the Triborough and Bronx-Whitestone Bridges, the Queens-Midtown Tunnel, and the La Guardia Airport—which, of course, bears his name.

His dedication to important national causes was just as great during his 12 years in Congress. He gained national prestige as an outspoken opponent of prohibition, and as a major advocate of old-age pensions, unemployment insurance, and strict Federal control of water power and other natural resources.

But, perhaps his greatest accomplishments at the national level came in the area of labor. He was a leading supporter of the Davis-Bacon Act, which requires Government contractors to pay the prevailing wage rate to workers. The landmark prolabor law that bears his name, however, is the Norris-La Guardia Act of 1933, which restricts Federal courts from prohibiting certain organized labor activity—including the right to strike. As a coauthor of this watershed legislation, Fiorello La Guardia was clearly responsible for many of the early and subsequent gains of our Nation's organized labor movement.

Mr. Speaker, during his life, Mayor La Guardia served as an inspiration to many people, including myself, I feel strongly that his life and work can and should continue to inspire others. That is why I authored a resolution (H.J. Res. 595) earlier this year to designate Mayor La Guardia's 100th birthday, December 11, 1982, as "Fiorello H. La Guardia Memorial Day." This resolution unanimously passed the House on September 30 and is expected to be approved by the Senate later in the week.

Hopefully, this official recognition of Fiorello La Guardia's centennial birthday will revive memories of his greatness and will allow all Americans to gain from his worthy example.

As a New Yorker, I will never forget Mayor La Guardia's Sunday afternoon radio broadcasts. Sometimes he would read from the funnies; often, he would use the opportunity to warn the corrupt elements of the city that he was coming after them.

On one of these Sunday broadcasts, Mayor La Guardia admitted to being somewhat of a dreamer—a trait common to many other noble figures. He said to his loyal audience, "I once dreamed of a city called heaven and I tried to make it my New York." Fortunately, for New Yorkers and Americans everywhere, Fiorello La Guardia's dreams often became our realities.

● Mr. MINISH. Mr. Speaker, I am proud to join my colleagues today in saluting an outstanding American who contributed greatly to the welfare of the United States—Fiorello H. La Guardia. As a Congressman and mayor of New York City, La Guardia enacted many progressive policies which greatly benefited the country.

This Saturday marks the 100th anniversary of La Guardia's birth and I am pleased that this Chamber recently passed a resolution designating December 11, 1982, as Fiorello H. La Guardia Day.

Born to immigrant parents in the Italian section of Greenwich Village, New York City, La Guardia was raised on western army posts where his father served as an enlisted bandmaster. As an ambitious and idealistic young man, he worked his own way through New York University Law School at night, while working as an interpreter at Ellis Island during the day.

In the 1920's, La Guardia denounced the hypocrisy of prohibition and opposed the immigration laws as discriminatory. Moreover, he publicly criticized the tax plans of then Secretary of the Treasury Andrew W. Mellon as favoring the rich. La Guardia was also vocal in opposition to the "food trust," whom he saw as raising the cost of food beyond the buying power of poor Americans. Through these and other issues, La Guardia gained his reputation for commitment and courage on the issues of the day.

As mayor of New York City, from 1933 to 1945, La Guardia's accomplishments were numerous. He raised the general quality of life in the city—bringing many New Deal projects to New York and he helped to put men and women back to work. During La Guardia's administration, schools, bridges, roads, parks, and other projects were realized under the New Deal.

I am proud to say that Fiorello La Guardia's life is among the best in the tradition of American success stories and as an American of Italian descent, his accomplishments are especially meaningful to me.

I would like to thank the gentleman from New York, Mr. BIAGGI, for reserving this special order today so we may honor one of our most outstanding former colleagues.●

● Mr. PANETTA. Mr. Speaker, as an American, as an American of Italian descent, and as an American who believes that government and political leaders should play a special, helpful role in the lives of people, I am particularly proud to join the gentleman from New York (Mr. BIAGGI) and the rest of my colleagues in paying tribute to one of the great political leaders in our Nation's history, Fiorello H. La Guardia.

I was pleased to cosponsor the resolution which established December 11 as Fiorello H. La Guardia Day. This will be the 100th anniversary of his birth, and it is an appropriate time to remember and recognize his contributions to the lives of the people of this country and especially to the people of New York City.

I do not think it is a coincidence that Fiorello La Guardia's 12 years as mayor of New York coincided with the years that Franklin D. Roosevelt served as President of the United States. They were both leaders who felt that government existed to serve people, and during the most difficult economic crisis this country has faced in the 20th century, both did their best to restore the faith of their constituents in this country and in themselves.

Mr. Speaker, Fiorello La Guardia is remembered with great fondness by people all around this great country. He was a special man, a special leader, and I think my colleagues will agree with me that this kind of leadership—dedicated, creative, and incorruptible—is sorely needed in our country today.●

● Mr. ADDABBO. Mr. Speaker, I am pleased to join my colleagues today in paying tribute to a great New Yorker, Fiorello Henry La Guardia, on the 100th anniversary of his birth.

This occasion offers us a wonderful opportunity to recognize the many accomplishments and the remarkable character of "the Little Flower." Fiorello La Guardia was first elected to the U.S. House of Representatives in 1916, and participated in the special session called by President Woodrow Wilson to declare war against Germany. He left Congress for a 2-year period in 1919 to serve as president of the New York Board of Alderman, but returned to serve as a Member of Congress for 10 more years. In 1933 he was elected as mayor of New York City, and then reelected twice, becoming the first New York mayor to serve three consecutive terms. La Guardia's achievements as mayor are familiar to us New Yorkers and to those who have studied that great city's history. His work in balancing the budget, establishing low-cost housing, improving health conditions, and eliminating the graft and corruption in city government alone have carved a permanent place in history for him. In addition, La Guardia was involved in the promotion and construction of many major construction projects—the Triborough Bridge, the Queens-Midtown Tunnel, and the La Guardia Airport, later named after him.

Fiorello La Guardia, as a great New Yorker, a great Italian American, and a Member of this body epitomized the qualities so important to public service: Honesty, personal integrity, loyalty, and dedication. I am proud and honored to add my name to the long list of those who admire and respect this man.●

● Mr. BINGHAM. Mr. Speaker, I am grateful to my colleague from New York (Mr. BIAGGI) for arranging for this special order so that Members may pay tribute to that great New Yorker and American, Fiorello La Guardia, who was born 100 years ago this month.

While I did not know Mayor La Guardia personally, I admired him from afar, as did millions of Americans all over the country.

For this occasion August Heckscher, distinguished authority on urban America and author of a recent biography of La Guardia as mayor, has at my request submitted a statement about the significance of La Guardia's life and work, as follows:

It seems altogether right that the Congress should be setting aside time to take note of the hundredth anniversary of Fiorello La Guardia's birth. As one who in writing a biography of the mayoral years has lived in imagination with his deeds and personality, I am glad of the opportunity offered me by Congressman Bingham to pay a brief tribute.

La Guardia's record as congressman will undoubtedly be recalled by others. By itself it was sufficient to give him a place in history. But his twelve years in the office of New York's Mayor, carrying him through the crises of depression and war, saw him making an absolutely unique contribution. He may be said to have been the first of modern mayors, and to have made New York during his time the first of modern cities. When he came to office nine months after Franklin Roosevelt's inauguration the city lay crushed by debt, riddled with corruption, and reeling under the burden of unemployment. Physically, the city was still in the last stages of the nineteenth century, its neighborhoods isolated from another, its various boroughs aggressively independent, and the whole lacking the centralizing force of social services or of advanced means of transportation. By his dynamic energy and unchallengeable rectitude LaGuardia changed all this. The New York he left behind him was largely the city of today, with its highways, its bridges, and all the subtle forces of cohesion that make it one, a throbbing and intensely alive place.

Through his association with the leaders of the New Deal—an association assiduously cultivated—La Guardia brought New York into an unprecedentedly close relations with the national government. Roosevelt needed a laboratory where his social legislation could be made highly visible to all, where his reforms could be administered honestly, efficiently, and with compassionate zeal. LaGuardia for his part needed the cold cash which Roosevelt, Ickes and Hopkins could supply. From these mutual needs a partnership was forged between New York and Washington which has left its mark upon subsequent urban history. No one today can think of national policy as being disassociated from the welfare of urban America.

La Guardia had his troubles and suffered his defeats at the hands of Washington. Roosevelt never concealed the fact that he would have preferred to have his New Deal reforms introduced by a city administration that was not only honest but also under the control of a reliably Democratic machine. La Guardia was a Republican and a Fusionist, and he had not the slightest intention of yielding to the importunities of Boss Flynn. Yet as so often happens where men of conviction but also of good will are concerned, the two sides surmounted their differences in the main. If Roosevelt never gave La Guardia the kind of post in the national administration he hungered for, he did at least treat him benignly and receive his pleas with consideration.

The figure of La Guardia survives in popular imagery: the small, doughty fighter against organized crime, the attender of countless fires, the avuncular reader of comic strips over the radio. He was spunky, stubborn, often unforgiving; yet when he made one major mistake he could disarmingly admit it to have been "a beaut". He had his shortcomings. He over-build the city with parks and hospitals that could not be adequately maintained in subsequent years; he never faced up to raising the five-cent fare, and he left a threatening budgetary situation. When all is accounted for, he can be said to have possessed the true magic of politics. He made public events seem important to a wide and diverse constuency. He somehow convinced the men and women of his time that in struggling for a better city, in fighting the battle for decency day by day, they were not foredoomed to fail.

Mr. Speaker, I would like to associate myself with Mr. Heckscher's words, as well as those of my colleague, Mr. BIAGGI.●

● Mr. ANDERSON. Mr. Speaker, it gives me great pleasure to join my good friend and colleague, MARIO BIAGGI, in honoring the 100th anniversary of the birth of Fiorello La Guardia, a former Member of the House of Representatives and mayor of New York City.

Fiorello Henry La Guardia, affectionately known to New Yorkers as the Little Flower, was unswerving in his commitment to honesty and to fairness, to the underprivileged and to the elderly, to the elimination of corruption, and to the enhancement of his city's environment.

La Guardia began his congressional career in 1916 and left Congress in 1933. Once in Congress, La Guardia showed that his campaign pledges were not idle promises. La Guardia enlisted for military service in World War I as he had promised his constituents he would do after voting for war in President Woodrow Wilson's special session of Congress. I believe that this Nation might, indeed, see better law come out of Congress if the Members who passed legislation would themselves directly face the consequences of their votes on the floor, as did Mr. La Guardia.

As mayor of New York City, La Guardia's first-ever, three-term rule was marked by his heroic leadership in eliminating graft and corruption, and balancing the city's budget, while initiating low-cost housing and slum-clearing programs. In addition, he led the city's beautification efforts and was instrumental in promoting major civic construction projects.

In short, it gives me great pleasure to join my friend and colleague, MARIO BIAGGI, in paying this eminently justifiable tribute to Fiorello La Guardia.

Yet, Mr. Speaker, as I enumerate the qualities that made Fiorello La Guardia such an outstanding public servant, I cannot help but notice that the life and career of our esteemed colleague, MARIO BIAGGI, to a large degree, parallels that of the man whose birth we honor today.

In particular, Mr. Speaker, let us take especial note of parts of the resolution we are endorsing today, and I quote:

His vast energy, fiery leadership and considerable wisdom contributed greatly to the betterment of our nation and the city of New York; his public service career serves as a benchmark from which others are judged; and his many accomplishments and the honesty and fairness which characterized his work continue to serve as an inspiration to all Americans, particularly those who share his Italian heritage.

I would suggest, and I am sure that my colleagues who have had the privilege of serving with him would agree, that our colleague, MARIO BIAGGI, is a man who honors the memory of Fiorello La Guardia through his honesty, his fairness, his energy, and his commitmemt to public service.

In conclusion, Mr. Speaker, I believe that a most appropriate tribute to "the Little Flower," and one that he himself would be proud of, would be that the legendary life of Fiorello Henry La Guardia would serve as a model for the life of future New Yorkers of Italian heritage. The accomplishments of MARIO BIAGGI indicate that MARIO is indeed living up to the high standards set by Fiorello La Guardia.●

● Ms. FERRARO. Mr. Speaker, I want to join in honoring Fiorello La Guardia as we near the 100th anniversary of his birth.

As an Italian American from New York, I know I speak for thousands when I say that no name conjures up greater ethnic pride than that of Fiorello La Guardia. This man, who did so much for so many, ranks still as perhaps the greatest mayor in the history of our greatest city.

Born in the city he would later service so well, he moved at an early age to Arizona, and became a journalist after high school. After working for newspapers in Phoenix and then St. Louis, he returned to New York to pursue a career in public service.

In 1916, at the age of only 34, he was elected to the U.S. Congress. As one of his first acts, he voted for the declaration of war against Germany. Then, with his typical energy and commitment, he left Congress to enlist for military service, in which he distinguished himself as a bombing squadron leader.

After the war, La Guardia retured to his seat in Congress. He left Congress for 4 years in 1919 to become president

of the New York of Alderman, only to be reelected to the House in 1923.

In the next 10 years, he was a strong advocate for programs that help people, including old age pensions and unemployment insurance. Much of his work later came to fruition in the New Deal.

Despite his growing stature in the House, New York City held too great an attraction for him, and in 1933 he ran for and was elected mayor. He would later be reelected to two additional 4-year terms, making him the first person ever to serve three consecutive terms as mayor.

It is entirely fitting that La Guardia's service as mayor coincided exactly with F. D. R.'s time as President. Both men provided dynamic leadership and brought to their work the enthusiasm and confidence which were so badly needed during the bleak years of the Depression.

Some of the "Little Flower's" most notable accomplishments are cornerstones in the daily lives of millions of New Yorkers today. The airport that bears his name is one of the Nation's busiest. The La Guardia Community College in my district is an outstanding institution of higher learning which has helped thousands of New Yorkers get a good start in life. It stands as a monument to his commitment to better education.

Many of the main transportation arteries that have allowed New York to grow and to function, including the Triborough and Bronx-Whitestone Bridges and the Queens-Midtown Tunnel, are the result of his efforts in building and promoting New York. In fact, the spirit, if not the actual slogan, of the "I Love New York" campaign can be traced directly to Mayor La Guardia.

Many of his other accomplishments are not as visible as airports and bridges, but they are just as important to the city, and they add just as much to his stature. In 12 years as mayor, he succeeded in balancing the city's budget and eliminating graft and corruption in city contracting. He also improved city services such as education, health, housing, and sanitation. In short, again like Roosevelt, La Guardia was a classically brilliant public administrator.

The great example of Fiorello La Guardia stands as an inspiration to Italian Americans and all Americans who value honesty, energy, and compassion in public officials. I am honored to have this opportunity to participate in paying tribute to this great man.●

● Mr. SCHUMER. Mr. Speaker, I would like o express my wholehearted support for the resolution put forth by my colleague, the Honorable MARIO BIAGGI of New York, designating December 11, 1982, as "Fiorello Henry La Guardia Memorial Day." This day, marking the 100th anniversary of the birth of the former Member of Congress and mayor of New York City, has long been neglected as an important day for all in the Nation, especially those from New York. I thank my respected colleague for initiating this long-overdue tribute to the late Mr. La Guardia.

As a Congressman, mayor, and private citizen, Fiorello La Guardia was a champion of the workingman. Coming from a poor immigrant family, he put himself through New York University Law School at night while utilizing his knowlege of five languages as an interpreter at Ellis Island. As a result of his early experiences, he developed a compassion for the poor which he carried with him to Capitol Hill and City Hall, always believing in "government with a heart."

While in the House of Representatives, his actions were in keeping with his deeply felt convictions of equality for all. In the 1930's he opposed the tax plans of Secretary of the Treasury Andrew W. Mellon which benefited the rich. In addition, he opposed the "food trust" which unfairly raised food prices beyond the reach of the poor.

La Guardia was mayor of New York City for three consecutive terms from 1933 to 1945 and became one of the best chief executives that New York City ever had. La Guardia raised the quality of life for New Yorkers by obtaining grants from Washington for the improvement of schools, playgrounds, swimming pools, bridges, roads, parks, health centers, and the arts. During a time of mass unemployment, he put men and women back to work through the development of public improvement projects, similar to the remedy proposed by this Congress almost five decades later. This is just one example of the foresight and progressivity of this dynamic and respected politician.

Mr. Speaker, I am honored to be a part of this great body which is able to pay tribute to the memory of this distinguished leader. I am in full support of the resolution calling on the people of this Nation to observe December 11, 1982, in commemoration of the life of the inspiring Fiorello H. La Guardia.●

● Mr. RODINO. Mr. Speaker, I rise to commemorate the 100th anniversary of the birth of Fiorello La Guardia, the former Member of this House and mayor of New York City who became a legend as one of the most effective, compassionate, and colorful statesmen of this century.

Fiorello La Guardia won international acclaim in 1933 when he became the first American of Italian origin to be elevated to the position of mayor of New York City. As a young man living across the Hudson River in Newark, N.J., I can remember how this fiery orator—this man of integrity who rooted out corruption in New York City Hall and who started the city on a number of long-term improvements—captured my imagination and inspired me to seek public office.

However, I was not unique. Millions of Americans loved and admired the man affectionately known as the Little Flower. As a Member of Congress, he fought for programs to help the elderly and the disadvantaged, leading efforts for legislation establishing old-age pensions, unemployment insurance, and Federal controls on water power and other natural resources.

As the first mayor of New York to be elected to three consecutive terms, he did something which many present-day mayors would envy—he balanced the municipal budget, but never at the expense of programs for the needy. In fact, he established many low-cost housing and slum clearance projects. He also improved health facilities and sanitary conditions and began construction of numerous important public facilities still in use today, such as the Triborough and Bronx-Whitestone Bridges, the Queens Midtown Tunnel, and the airport in Brooklyn which bears his name.

Fiorello La Guardia was a man who served his country in many ways. A stateman, he served in the House of Representatives from 1917 to 1919 and then from 1923 to 1933. A patriot, he took a leave of absence from Congress in 1917 to sign up for duty in the Army Air Service during World War I. He commanded U.S. air forces on the Italian-Austrian front during World War I and was awarded the Italian War Cross. A diplomat, he served as American consular agent in Hungary in 1904, U.S. delegate to the Interparliamentary Conference at Berlin in 1928, Special U.S. Ambassador to Brazil in 1946, and Director General of the U.N. Relief and Rehabilitation Administration in that same year.

Every time he was called into service by the people of his country, Fiorello La Guardia performed with the highest integrity, dedication, and professionalism. These qualities, combined with his warmth and wit, made him one of the most beloved statesmen of his time.

I join the millions of Americans of Italian descent who feel a special pride at the memory of Fiorello La Guardia. I believe he set an outstanding example for all men and women who aspire to public office.

I strongly supported the resolution which passed the House in September designating December 11, 1982, as "Fiorello Henry La Guardia Memorial Day." I urge the Senate to pass this resolution honoring an extraordinary American whose memory brings honor to all of us.●

● Mr. CARMAN. Mr. Speaker, I am pleased and gratified today to have

the honor of noting the 100th anniversary of Fiorello H. La Guardia's birthday coming up on December 11, 1982.

Mayor La Guardia was first elected to Congress in 1916. He voted for the declaration of war against Germany and promptly symbolized his character by enlisting for military service as he had promised his constituents he would. After distinguishing himself in the military, he returned to Congress; in 1933 he was elected mayor of New York City. As mayor, through his integrity and dynamic leadership he balanced the city budget and successfully fought corruption.

His honesty, decency, and accomplishments make him thoroughly deserving of the honor the Congress has done him of proclaiming December 11, 1982 "Fiorello H. La Guardia Memorial Day."●

● Mr. CONTE. Mr. Speaker, I am pleased and proud to take a few moments to reflect on the accomplishments of former Member of Congress and mayor of New York City, Fiorello H. La Guardia, on the observance of his 100th birthday.

It is the rarest public official who inspires the genuine trust and admiration of his constituents with his natural countenance; the "Little Flower" was such an official. While he served in the Congress for 12 years in the early part of this century, he is best known for his unprecedented three consecutive terms in what is possibly the most difficult job in the world—mayor of New York City.

Those were not easy years to be in government—those whose sons and brothers had been sent to defend freedom needed comfort, those whose lives and livelihoods were threatened by raging racketeers needed protection, and those whose own countries had failed them needed opportunity. Regardless of, or perhaps in spite of, his small stature, Mayor La Guardia was always able to meet the toughest challenge, but no demand was greater than those he made on himself. As he wrote:

I shall not rest until my native city is the first not only in population but also in wholesome housing; not only in commerce but also in public health; until it is not only out of debt but abounding in happiness. To maintain its position, to lead in character and reputation as well as in material possession, its course must be lean, its charitable relief must be humane, its correctional procedure must be enlightened, business must be fostered and encouraged.

Mr. Speaker, this was no small quest, but in his 12 years at the helm of our Nation's largest city, he made great progress. In so doing, he served as a model of integrity for all elected officials and inspired many of us who shared his heritage to also share his dreams.

I join with my colleagues in saluting Mayor La Guardia's achievements on this occasion.●

● Mr. ANNUNZIO. Mr. Speaker, earlier this year the House passed by voice vote the bill I was pleased to cosponsor with my colleague from New York, the Honorable MARIO BIAGGI, to designate December 11, 1982, as "Fiorello H. La Guardia Memorial Day," and today, I am glad to join in this memorial tribute to an outstanding public official and a great American.

Born 100 years ago in New York City to an Italian bandmaster serving with the U.S. Army, Fiorello La Guardia became the first mayor of New York City to be elected to three consecutive terms. He grew up at Army posts in South Dakota and Arizona, and after the death of his father in 1898, he moved to Budapest, Hungary, with his mother where he secured employment at the U.S. Consulate there and eventually became active U.S. consul in Fiume, which was formerly part of Italy.

In 1907, La Guardia returned to New York, became a lawyer, and was appointed deputy attorney general of New York State in 1915. In 1916, he was elected to Congress, and in 1917, after the United States entered World War I, he was commissioned a lieutenant in what was then called the U.S. Air Service and was sent to the Italian front where he commanded a bombing squadron and utilized his public speaking skills in various Italian cities at mass meetings on behalf of the Allied cause. By the end of the war, he had attained the rank of major, and in 1920 and 1921, served as the president of the board of aldermen of New York.

Congressman La Guardia ran for Congress again in 1922, and served in the House of Representatives for 10 years from 1923 to 1933 where he became known as the coauthor of the Norris-La Guardia Act of 1932 which banned labor contracts requiring employees to pledge not to join a labor union as a condition of employment—yellow dog labor contracts—and forbid the courts to break strikes by injunction.

In 1933, Fiorello, or Little Flower as he was affectionately called by his constituents, was elected as mayor of New York City, where he served from 1934 to 1945. During those years, he became nationally famous, loved, and widely respected for his honesty, his highly effective administrative reforms, and his programs benefiting the people. He promoted slum clearance and low-cost housing, the construction of schools, playgrounds, bridges, the Queens-Midtown Tunnel, La Guardia Airport, large building projects, balanced the city's budget, and improved health and sanitary conditions as well as government efficiency.

He was the first director of the Federal Office of Civilian Defense from 1941–42, and President Truman sent him to Brazil in 1946 as a special envoy for the inauguration of a new Brazilian President. From March to December of 1946, he served as director general of the U.N. Relief and Rehabilitation Administration, and he died on September 20, 1947.

During his brilliant career in public service, Mayor La Guardia was a champion of immigrants to the United States. Italo-Americans have made giant and lasting contributions to the strength and greatness of the United States, and in all walks of our beloved country's life, Americans of Italian heritage have carried forward the New World tradition of determination, hard work, and courage begun by Christopher Columbus.

It is a great honor for me to participate today in this memorial tribute to the Honorable Fiorello La Guardia, whose life was a splendid and inspiring example to all of our citizens.●

● Mr. CORRADA. Mr. Speaker, I am honored to be able to join my dear colleague and friend, MARIO BIAGGI, and our other colleagues in paying tribute to Fiorello H. La Guardia on the 100th anniversary of his birth.

A former Member of Congress and a three-term mayor of New York City, Fiorello La Guardia was an excellent example of a politician who delivered on what he promised. He distinguished himself in World War I and returned to a seat in Congress that had been reserved for him by a special act of Congress after he enlisted in the service.

Mayor La Guardia championed a wide range of causes, from child labor legislation to support strict Federal control over water and natural resources. He became mayor of New York City during the depths of the Depression. Despite this fact, he succeeded in the many efforts he undertook on behalf of his city, and his leadership provided inspiration to a generation of young people.

As a first-generation American, he remained loyal to his Italian heritage and proved, over again, that any person with ambition, drive, and dedication can succeed in our Nation. He became a leading figure that set an example for thousands of other minorities that came to this country during this century for a better future for themselves and their children.

It is fitting that we remember Mayor and Congressman Fiorello H. La Guardia on the 100th anniversary of his birth. His work is still with us and the memory of his achievements and efforts continue to be a source of inspiration to all of us in public service.●

SEVEN SUGGESTIONS TO THE 98TH CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. FINDLEY) is recognized for 5 minutes.

● Mr. FINDLEY. Mr. Speaker, the great gentleman from Texas, Speaker Sam Rayburn, had about 8 months to live when I first became a Member of this body in January 1961. His eyesight was not the best and his general health was failing rapidly, but his strength was adequate one day to a thoughtful, loving tribute to the House of Representatives.

Anyone who has served here even a few years must gain a feeling of affection for this institution and its Members. I have had the great honor to be a Member for 22 years. I came crewcut, and as my former colleague, Graham Purcell, once put it "with pink and unwrinkled cheeks." I have seen my seniority position rise to 11th among Republicans and just 30 for the entire body. This means that I have seen 405 of my original colleagues depart. Not one of the present members of the House Committee on Agriculture was here when I first joined.

Many have come and gone during these years, and most of them—almost all of them—remarkable men and women. High-type people to whom you would trust your last dollar. A few of course have been bad apples, but far fewer, percentagewise, in my opinion, than in the general population. I do not suggest they are all angels, and I recognize that the glass house in which we all reside tends to improve behavior.

Still, it must be said that the personal character of our membership is exceptional.

And, as I reflect on my years here, I rejoice that this experiment in self-government is among the longest lasting in human history. Tour guides say this Chamber has been used continuously as a legislature longer than any other in the world.

Sam Rayburn could not love and respect this institution more than I, and the comments I make arise from affection and high hopes. As Abe Lincoln, my most important constituent might say, the Congress is "the last best hope of earth." I want it to survive. More than that, I want it to serve mankind in the future even better than in the past.

With that in mind, a few words of advice.

My first suggestions have to do with reforms of the recent past. Some of them should be undone. They have not worked. They hurt, not help, the system.

Specifically:

First, eliminate recorded voting in the Committee of the Whole. This so-called reform—which I supported originally—has weakened seriously the prestige and influence of standing committees. It prolongs the legislative process by enabling just 25 Members to get a recorded vote on an amendment. It lets Members who stream into the Chamber during the 15-minute voting period decide amendments without the advantage of hearing any of the debate. Under the old system, proposed amendments were almost always settled by Members who were on the floor during debate and thus were informed about the subject matter. Under it, the original work of standing committees had greater impact, and expedited consideration of legislation once it reached the House floor.

Second, repeal the subcommittee bill of rights approved in 1973. This change in committee rules seriously fragmented legislative authority among 160 subcommittee chairmen. Today every third Member of the House is a chairman, and each possesses a striking degree of independent authority. This fragmentation of power is at the expense of the institution itself. It diminishes the capacity of traditional power centers—the Speaker, committee chairmen and party leaders.

This body will function far better if the chairmen of the major standing committees once again have complete control of legislation within the committee's general purview. Choose good chairmen and then let them take responsibility and control.

Third, repeal the rule which requires referral of a bill or resolution to more than one committee. This adds enormously to the total workload of the House without any appreciable gain. Go back to the former system, under which the Speaker assigned each bill to just one committee and let that committee handle its entire content. This occasionally gives a committee a little more variety of subject matter than usual. But why not? Variety is the spice of life.

Fourth, outlaw proxy voting. This would quickly lead to another needed reform: the elimination of multiple committee assignments. It makes no more sense to permit proxy voting in committees than it would on the floor of the House.

Fifth, rush through a constitutional amendment which lets Congress set limits on campaign spending. The way things are going, Congress will soon consist of nothing but millionaires and/or people beholden to special interest groups.

Sixth, fix a limit on the number of years any Member can serve on a particular committee. Rotation of committee assignments, say, every 6 years, would be healthy for Congress and for the executive branch. It would break up combines that often frustrate the public interest. For example, I have noted that the Armed Services and Defense Appropriations Committees tend to be populated by Members whose district have a lot of defense facilities or manufacture a lot of defense articles. This can lead to inbreeding or obligations that practically rule out objective consideration of legislation. Combines that threaten the public interest can never be completely eliminated, but this rule change would at least force a healthy periodic reconstruction of such combines.

Seventh, budget and appropriate 2 years at a time instead of 1, with appropriation bills handled the first year of the Congress. Reserve the second year mainly for consideration of new legislation. Congress is almost totally bogged down under present circumstances with the budget and appropriations process.

If this change is made, it may be possible for Congress to adjourn each session by August or September. If so, Members could have the character-building experience of actually living in their home district and pursuing a normal vocation part of each year.

And, who knows, in time Congress might return to its former status in which legislators continued to pursue a career in private life part time, because the work of the Congress did not require full-time attention.

The present congressional pace has produced a class of professional Congressman—I have been one of them—who are denied the precious experience of living life as their constituents must.

I almost hear Sam Rayburn muttering a few supportive comments, which probably means this impertinent retiring Member has given his colleagues enough advice for one day.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. FORSYTHE) is recognized for 5 minutes.

● Mr. FORSYTHE. Mr. Speaker, since I am recuperating from surgery and under doctor's orders, I was not able to be present for several of the votes on H.R. 6211 the Surface Transportation Act of 1982. However, I would like to take this opportunity to state for the record how I would have voted had I been present.

Rollcall vote No. 416: An amendment waiving Davis-Bacon requirements from all construction work resulting from this legislation; I would have voted "aye."

Rollcall vote No. 417: An amendment insuring that Davis-Bacon wage rates apply to initial construction only and not to resurfacing, restoration and rehabilitation activities; I would have voted "aye."

Rollcall vote No. 418: An amendment deleting the provision of the bill that would redirect interstate highway discretionary funds to the high cost interstate projects; I would have voted "nay."

Rollcall vote No. 419: An amendment providing that none of the provisons

of title I—Federal Aid to Highways, be used to limit or in the opinion of the Secretary have the effect of limiting job opportunities for any individual; I would have voted "aye."

Rollcall vote No. 420: An amendment to increase the Federal gasoline, diesel and special fuels taxes by 5 cents beginning April 1, 1983; I would have voted "aye."

Rollcall vote No. 421: Final passage of H.R. 6211, the Surface Transportation Act of 1982; I would have voted "aye."●

□ 2110

THOUGHTS ON THE HARKIN AMENDMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 5 minutes.

Mr. DORNAN of California. Mr. Speaker and colleagues, because of the importance of the passing of the amendment by Mr. BOLAND as a substitute for the amendment of Mr. HARKIN on the Defense appropriations bill today, and because of the constraints of time, I was not able, in addressing my colleagues about why I was so strongly against the Harkin amendment, to use what I think would have been the most telling example of why this type writing of foreign policy in the well of the House—without running from our responsibility to prevent from maybe from ever getting into immoral situations when we are trying to help as far as fighting for freedom around the world, let me now give that one final example, briefly.

Suppose in 1937, 1938, or 1939, Klaus Von Stauffenberg, the man who gave his life by execution from Nazi thugs because he tried to assassinate Adolf Hitler in the Walkirie assassination plot of July 20, 1944, when he and hundreds of other brave Germans who had finally had enough died trying to stop an insane Fascist dictator; let us say he had come to the United States in the late 1930's when he was only a captain or major, a member of the regular force of a sovereign nation's insane army about to embark upon the killing of 55 million people.

Suppose he had come to our Pentagon, then called the Department of War, in what is now the Old Executive Office Building next to the White House, and had asked for some advice—advice only—on how to, not assassinate Hitler, that might have been hard for some so-called moralists to take, that we might encourage the assassination of a madman who was about to launch the most evil holocaust in the history of the world, excepting only by the killing of Stalin or Mao, but supposing he had just asked for advice from our then embryonic Office of Strategic Services—actually it was not even formed yet until a few years later, the precursor to our CIA—or from our Defense Department, called the Department of War, or the Department of the Navy, for advice on how to destabilize the Third Reich, Adolf Hitler's thousand-year reich.

If a Harkin amendment spread from countries beyond the illegal Sandinista Communist government of Nicaragua, and illegal, I repeat, because they refused to let their people have elections because they betrayed their revolution against their dictator Samoza, betrayed it to the Communist dictatorship—if he had asked for advice and a Harkin amendment existed, the young captain or major Klaus Von Stauffenberg, a righteous gentile, a man who received the permission of the Catholic Bishop of Berlin to kill the despot Adolf Hitler—it is called tyrannicide, the right to kill a tyrant—he would not have been in a position to get any advice from our Government or use it to destabilize the Nazi government about to drag the whole world into the greatest orgy of killing if we extend the Stalinist killings as an extension of the nightmare of World War II.

I think that in the House well Members—and I repeat, I do not impugn their warmth or sincerity or motives when they talk against human rights violations by rightwing death squads in Central America, they do not take a place ahead of me in the passionate abhorrence of this inhumanity from those who would return oligarchy to Central America, but I repeat as passionately as I can my plea to some of the more eloquent Members on the other side of the aisle to speak out with some regularity about the Communist atrocities and other crimes that are taking place across this planet at this very moment. It would have been a moral act for any righteous gentile to come to the United States representing the German people and moved against the so-called sovereign government for a minority government with less than 24 percent, in the personage of Adolf Hitler, had been elected once and once only, and there has not been such an election in Cuba, in Nicaragua, in the Soviet Union, in any of the East Bloc countries. There has never been a contested election in any Communist country, and there never will be. I can guarantee that Allende, once he had seized power in Chile, would have canceled all future elections.

Consider the Klaus Von Staffenbergs of the world when you look at the Harkin amendment.

A TRIBUTE TO THE HONORABLE WILLIAM BRODHEAD

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. BONIOR) is recognized for 60 minutes.

Mr. BONIOR of Michigan. Mr. Speaker, I asked that this time be set aside today to pay tribute to our colleague WILLIAM BRODHEAD on his retirement from Congress.

In saying goodbye to BILL BRODHEAD, I bid farewell not only to a brillant colleague but also to a dear friend.

It has been my good fortune to know BILL for more than 10 years. I first met BILL when he was serving in the Michigan House of Representatives. His work there elicited such respect from his constitutents that they elected him as their Representative to this body.

In four terms as a Member of Congress, BILL BRODHEAD has proven that their confidence was well founded. His accomplishments are numerous and varied. As a Member of the House Ways and Means Committee, BILL has demonstrated a keen understanding of, and has made a remarkable effort to reform, our tax system. His work there earned him the "Taxpayers Friend" award from the organization, Taxation With Representation.

BILL's attempts to aid the ailing U.S. auto industry are also noteworthy. He is founder and cochairman of the House Auto Task Force. He was instrumental in the development of and obtaining funding for the trade adjustment assistance program which was designed to compensate workers in industries hit by foreign competition.

BILL has been no less of a driving force in the areas of health and welfare. Among other things, BILL has secured passage of an amendment to increase support for community group homes for retarded, disabled, and aged individuals as an alternative to institutional care. This body has also passed BRODHEAD's amendment which was intended to end prolonged and needless placement of children in foster care and institutions by providing benefits of a permanent home for children whose special problems would otherwise prevent their adoption.

While this list of accomplishments is some indication of the professional void BILL's retirement will leave, it is no indication of the personal loss his friends will feel.

I thank you, BILL. Thank you for your good-natured cordiality. I respect your decision to retire from Congress. Most of us will never have the courage to make and follow up on a personal decision to retire from Congress. You have done so at the height of your career.

I wish you luck in your law practice. I have no doubt that you will be as successful there as you have been here.

□ 2120

GENERAL LEAVE

Mr. BONIOR of Michigan. Mr. Speaker, I ask unanimous consent that

all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order: the life, character, and public service of our colleague, the Honorable WILLIAM M. BRODHEAD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to my friend and colleague, the gentleman from Michigan.

Mr. WOLPE. Mr. Speaker, I thank the gentleman for yielding, and I want to thank him for taking this special order to provide this opportunity to pay tribute to BILL BRODHEAD.

Like the gentleman in the well, I had the very great privilege of serving with BILL BRODHEAD not only in the Congress during these past several years, but prior to that, during my tenure in the State legislature. So BILL BRODHEAD is far more than simply a colleague; he has become a very close personal friend, and indeed he and his wife are neighbors of ours in McLean, Va.

I remember the reputation that BILL enjoyed already at the point when I entered the State legislature, and there as here, during the 4 years I have served in the Congress, I do not ever recall an unkind thing being said of BILL BRODHEAD. It was not that BILL has ever attempted to avoid the hard issues or the controversies of the day. In fact, he has really been on the cutting edge of the entire progressive agenda in domestic as well as foreign policy, but when BILL has spoken to the issues publicly, whether in committee meetings or on the floor or before the media, he has always done so with the profound sincerity and conviction that has earned him the respect of his colleagues and the love and respect of his own constituents.

In a very real sense, BILL BRODHEAD has been the conscience of our own delegation in Michigan, and I think that his election to the Democratic Study Group chairmanship is probably one of the finest expressions of the tremendous affection in which he has been held by his colleagues in this body.

He will be missed. He will be very deeply missed by all of us who have been privileged to work with him. But I know that the commitment that he has brought to his work in the lelgislative bodies will carry beyond this body to his activites in his community in Michigan, and I feel quite certain in saying that we have not heard the last of BILL BRODHEAD when it comes to public service.

Mr. Speaker, I simply want to join this evening with the gentleman in the well in extending my very best wishes to both BILL and Kathy BRODHEAD and their entire family. We shall miss him.

Mr. BONIOR of Michigan. Mr. Speaker, I thank my colleague, the gentleman from Michigan, for his very fine and appropriate remarks.

● Mr. KILDEE. Mr. Speaker, it is with pleasure that I join my colleagues in the House of Representatives in honor of our friend, WILLIAM M. BRODHEAD, of Michigan, who is retiring from the Congress. BILL BRODHEAD has served with distinction and been highly respected by his colleagues over the entire 8 years he has been in Washington. Throughout his public service career in the Congress and in the Michigan State Legislature, his highest standards and his conscientious and caring approach to issues and problems have set an example for all elected officials to emulate.

I served in the Michigan House of Representatives with BILL and was impressed by his effectiveness there and the high respect with which he was held by his fellow State legislators and the public. He preceded me to the Congress by one term, and when I arrived here, I quickly discovered that he already had come to be appreciated by his colleagues here for his high standards of service.

BILL BRODHEAD was a valued member of the Michigan congressional delegation as a faithful, hardworking and capble U.S. Representative and as a member of the Committee on Ways and Means. His leadership also was recognized later by his elevation to the chairmanship of the Democratic Study Group, which has come to be the hallmark of informed, thorough, and objective analysis of legislation before the Congress. As a member of Ways and Means, he addressed national goals while keeping special attention on the needs of Michigan during this period of economic crisis. His fellow members of the Michigan delegation have relied on BILL BRODHEAD greatly for his expertise, strengthened by his credibility, and extend our best wishes as he pursues his next career.

BILL BRODHEAD always has been a thoughtful and articulate spokesman for the Democratic Party on a wide variety of vital and complex issues and has been a warm and personal friend of all of us. He will be missed very much.●

● Mr. BROOMFIELD. Mr. Speaker, with the close of this Congress in a few weeks, we will be losing the talents of Congressman WILLIAM BRODHEAD.

While we have often followed differing views on what the role of the Federal Government should be, I have always respected BILL's skills and dedication in pursuing what he believed to be best for our country and for Michigan. Over the years that we served together in the House of Representatives, he has always been a hard working, dynamic legislator.

For the past 8 years, BILL and I have had the privilege of representing neighboring congressional districts in Michigan. The problems facing my constituents have often been similar to those facing his constituents, and I believe the people of the 17th District have been very fortunate in having him represent them in this distinguished body.

Mr. Speaker, BILL has chosen to leave the Congress to be able to spend more time with his family and to further pursue his career in law. His reasons are certainly understandable. I wish BILL well in his new career, and I wish to say it has been an honor to work with him and to consider him a friend. He will be missed in the Michigan congressional delegation and in the House of Representatives.●

● Mr. HERTEL. Mr. Speaker, it is a pleasure and a privilege to salute my friend and colleague BILL BRODHEAD as he completes 8 years of outstanding service to the people of the 17th District of Michigan.

To say a Congressman has served his people well is, I think, the highest praise one can hope for and BILL BRODHEAD certainly deserves that recognition. He is an individual of great principle and strong moral convictions—characteristics which are reflected in his record in Congress. He has consistently manifested deep concern about legislation that impact heavily on the needs of the poor, the handicapped, and the elderly. His interest in the youth of America deserves to be mentioned as well.

A member of the Ways and Means Committee and director of the Democratic Study Group, BILL was able to demonstrate his leadership qualities of some of the major legislation enacted duing his tenure. He was influential in making the Chrysler loan guarantee a reality; introduced a measure to reduce the minimum tax on income; and more recently, authored legislation to help children under foster care by permitting Federal adoption subsidies.

I have worked with BILL on many projects and have been very impressed with his expertise and sense of fairness in resolving difficult problems.

His absense from the Halls of Congress and as a spokesman for Democratic principles and goals will indeed be missed. I want to wish him and his family well in his new endeavors. And my warmest rememberances to his wife Kathi and their two sons, Michael and Paul. He has been a hardworking successful public official and a good friend.●

● Mr. ALBOSTA. Mr. Speaker, it is certainly with mixed emotions that we bid farewell to my friend and colleague from Michigan, BILL BRODHEAD. We in the Michigan delegation have been very proud of BILL and the many

contributions he has made to the House of Representatives during his service in this House. He came to Washington with high ideals and a determination to make this Nation a better place in which to live. I believe that he has succeeded in that task, which is often difficult for a single Member. I only regret that he will no longer be serving with us.

I know that BILL looks forward to this important change in his life and my wife, Dorothy, and I want to wish him and his family the very best for the years ahead. I am pleased that he will be available for consultation and will continue to make a contribution to our State.

BILL has always been an innovative and hard-working Member of Congress. I have traveled with him many times from Washington to Detroit and back, and I know that he has given this job his full attention and effort. He has taken his responsibilities very seriously and forsaken other obligations in order to fulfill his tasks as a Congressman. He has not been satisfied to sit back and simply tend to his constituents' needs. While he has done that with great skill, he has also directed his many talents toward improving the work of the Ways and Means Committee on which he serves and toward improving the functioning of the House as an institution. Through his notable service as chairman of the Democratic Study Group, we have seen services expanded and quality improved. He has carried on in the great traditions of past chairmen in assuring that the DSG would continue to play a primary role in the operation of the House, and its Democratic Caucus in particular.

BILL can be very proud of his record in the Congress—a record of service to his people, of service to his State, and of service to the Nation. He has worked diligently for those things in which he believed. He has left an important mark on this institution and his absence will be sorely noted. I join my colleagues in wishing him Godspeed and congratulate him on a job well done.●

● Mr. PURSELL. Mr. Speaker, the State of Michigan and the Congress are going to miss the effective presence of BILL BRODHEAD. I have had the privilege of serving with BILL in both the Michigan Legislature and the Congress. In both aspects of BILL'S public service career, he has distinguished himself as one of Michigan's hardest working, inventive, and committed advocates.

On the Committee on Ways and Means, BILL served with distinction. He tackled the hardest problems of the State of Michigan and sought to soften the painful effects of our State's staggering unemployment. His work on Michigan's unemployment compensation debt problem and the implications of changes in medicare has been of great significance to Michigan's employers and medicare beneficiaries.

His contributions to the work of Congress are highlighted by his integrity and honesty. He represents the high road of politics in America today. By dealing fairly with his colleagues, he has made friendships which cross political and philosophical boundaries. Personally and professionally, BILL BRODHEAD will be missed. On this, his day of tribute, I want to wish BILL all of the best as he moves into another professional chapter of his life.

● Mr. PANETTA. Mr. Speaker, I am proud to have served with BILL BRODHEAD in this House, and I want to join my colleagues in paying tribute to a thoughtful and responsible leader of this body.

I had the pleasure to serve a term with BILL BRODHEAD on the Budget Committee, and he was an excellent legislator who did his best to balance the competing interests and concerns that face the members of that committee. In addition, as chairman of the Democratic Study Group, BILL has continued the process of strengthening that organization as a voice for responsible leadership and an indispensable source of knowledge and legislative information for its members.

Mr. Speaker, I think we can all identify with BILL'S decision to retire this year. The difficulties of life in the Congress sometimes go unrecognized by the public, and he has, during the past year, done a great deal to educate those who do not realize that along with the advantages of serving in this body go several distinct disadvantages. I hope that BILL will find that his decision was the right one for him. The Nation loses a great public servant, but perhaps a great public servant is going to find the time to think, to pursue other interests, and, most importantly, to spend time with his family. I know my colleagues join me in wishing BILL BRODHEAD the very best.●

● Mr. CONYERS. Mr. Speaker, it has been an honor and a pleasure to work with BILL BRODHEAD in the Congress over the past 8 years, and I wish to add my voice to the many which are raised in salute to him tonight. As a member of the Michigan delegation I have had first hand knowledge of the excellent service BILL has provided for his constituents and the Nation as a whole. His dedication and ability to work hard and long on legislative issues before the Congress in order to produce the best possible results for the people of this country shall not be forgotten as he departs these Halls. One particular piece of legislation that BILL and I worked on together stands out in my memory, the Humphrey-Hawkins Full Employment and Balanced Growth Act. I know that the integrity and idealism displayed during efforts such as this will continue to earmark all future endeavors of this outstanding public servant.●

● Mr. FORD of Michigan. Mr. Speaker, many will join me here today to list all of BILL BRODHEAD'S numerous legislative accomplishments during his 8 years as Michigan's Representative from the 17th Congressional District. Although I knew BILL before he began his service in Washington, it has been a real privilege to work with him in so many different capacities in the House of Representatives.

BILL founded the 100-member House Auto Task Force and has served as its cochairman. In this capacity he has worked nonstop to seek solutions to the severe problems brought about by the slump in domestic auto sales.

Congressman BRODHEAD leaves Congress near the end of his term as chairman of the Democratic Study Group. Throughout his term, the DSG has distinguished itself and published many excellent documents to assist Members of Congress.

But most important of all, BILL BRODHEAD has served the residents of the 17th District and the State of Michigan in a most distinguished way. He and his outstanding staff have responded to the needs of his constituents promptly and professionally. The 17th District has been privileged to be represented by Congressman BILL BRODHEAD and, before that, by Martha Griffiths our new lieutenant-governor-elect. Congressman BRODHEAD'S constituents, the entire Michigan delegation, and I in particular, will certainly miss having his views, advice, and dedicated hard work.●

● Mr. RODINO. Mr. Speaker, I could not let this session of Congress close without saying a few words about the distinguished chairman of the Democratic Study Group, WILLIAM BRODHEAD, who will be leaving Congress at the end of this term.

Few Members of this House work as hard or produce as much for their constituents as BILL BRODHEAD. Since he came to Congress in 1975, BILL has built a solid record of accomplishment as a member of the Ways and Means Committee and the Budget Committee. He has fought for a more equitable tax system and been a strong defender of those who are less fortunate in society. He has advocated compassionate Government policies for handicapped, elderly, and low-income Americans, and worked successfully for legislation to help provide homes to abandoned children.

BILL BRODHEAD has used his position as chairman of the Democratic Study Group to help his colleagues, and I can say that I have valued most highly the excellent research and analysis that the DSG has produced under his direction. His diligence, perception,

and integrity have won him the respect of Members from both sides of the aisle, and his leaving is certainly a loss for this institution.

I will miss serving with my friend from Michigan, but I am sure that whatever field he chooses to pursue will benefit greatly from his outstanding abilities. I wish him all good things in the future.●

● Mr. COELHO. Mr. Speaker, it is a great honor for me to add my praise and heartfelt thanks to our colleague and dear friend, BILL BRODHEAD, for the magnificent contribution he has made to this Congress and the Nation. When thinking of BILL BRODHEAD'S service, the words honor, integrity, and loyalty come to mind. These qualities are embodied in BILL BRODHEAD and in his record of service here in the Congress. His departure will be a great loss not only for those he represents in Michigan but for this country.

Throughout his tenure, BILL has accomplished much that merits praise; however, I would like to especially commend his outstanding work on the Committee and Ways and Means and as chairman of the Democratic Study Group. As a member of the Ways and Means Committee, he served on the Trade Subcommittee where he worked diligently and effectively, as he did on the Social Security Subcommittee where he also demonstrated his true concern for the unfortunate and needy of this Nation. In his role as chairman of the Democratic Study Group, he has done a superb job, and his innovation, leadership and dedication have been a true inspiration to the Democratic Party.

During his congressional career, BILL has been a steady, dedicated and thorough legislator who earned and won the respect of all who came to know him. His retirement at the end of this term will leave a vacancy among our ranks which will be hard to fill. We cannot, however, but wish him the best in the future, while simultaneously expressing our regret that he will no longer be among us.●

● Mr. REUSS. Mr. Speaker, I am delighted to join my colleagues in paying tributes to Congressman BILL BRODHEAD of Michigan, who will retire at the end of the 97th Congress after 8 years of distinguished service in the House of Representatives.

BILL will be deeply missed. His leadership on both the Ways and Means Committee and the Budget Committee in matters of tax and welfare reform has earned him the reputation of an innovative and dynamic champion of America's workers, particularly those who have been hardest hit by staggering unemployment. In addition, his many contributions as this year's chairman of the Democratic Study Group were marked by a commitment to traditional Democratic ideals and practical recommendations on how to realize them.

Most of all, BILL BRODHEAD is a humanist. His personal commitment to the quality of life of all Americans, and most particularly children, contributed to his decision to leave the Congress to spend more time with his family. While here, he has been a diligent defender of comprehensive health care programs, and his efforts brought a major legislative achievement, the adoption of Federal subsidies for adoptions.

I send BILL, and his wife Karen, my best wishes. I am confident that he will continue in his law career all the good works that have been a hallmark of his congressional service.●

● Mr. HOYER. Mr. Speaker, the House of Representatives will soon lose one of its most distinguished young members. WILLIAM BRODHEAD, after serving four terms in Congress, has decided to retire, and I am certain that all of my colleagues will agree that BILL'S decision to leave us is indeed a great misfortune.

When BILL BRODHEAD came to Congress in 1974, he brought with him some courageous goals: He was a champion of peace, an advocate of urban reform and a strong believer in the right of each citizen to have access to a quality education. Throughout his 8 years in Congress, BILL BRODHEAD has tirelessly pursued the attainment of these goals. And he has had a great deal of success.

As a member of the Ways and Means Committee, BILL BRODHEAD actively sought to instill fairness in our tax system. He attempted to block the many loopholes in the income tax in order to distribute the tax burden equitably and fairly. BILL BRODHEAD, in short, stood for fairness in taxation, and more importantly, for fairness in providing access to the opportunities available to the citizens of this country.

BILL comes from one of the most heavily industrial areas of our country—Michigan has been particularly hard hit by the downturn in the economy and unemployment figures have skyrocketed there. Yet while many in his area, like in so many other parts of this country, have fallen victim to the economic maladies of the time, BILL did not abandon his ideals and work for quick-fix, short-term solutions to our economic woes.

Rather, BILL BRODHEAD has sought to encourage employment and the modernization of manufacturing facilities through a tax policy which establishes genuine reward for investment in physical capital and, therefore, for investment in human capital.

BILL BRODHEAD is an intelligent, thoughtful man, and the paths by which he seeks to better the quality of life for all Americans are to be commended. He is a man of conscience, and he stands by his beliefs. His decision to retire has caused a great sense of loss among his colleagues, but we must respect the reasons for this decision. His announcement was courageous, and we, who remain behind, fully understand the difficult choice he had to make.

I know that my colleagues will join me when I say that BILL will be sorely missed by us all, and, most particularly, by the citizens of his district in Michigan and in the United States, who have so benefited by his leadership during the past 8 years.●

● Mr. ADDABBO. Mr. Speaker, I am honored to join my colleagues today in paying tribute to one of our good friends and distinguished colleagues, BILL BRODHEAD, who will be leaving us at the end of this Congress. BILL'S dedication, insight, and hard work will be missed by all, and I am grateful for this opportunity to show my admiration and appreciation.

BILL'S efforts on behalf of his constitutents, the residents of the 17th Congressional District of Michigan, and indeed, the voters of this country in general, have been diligent, dedicated, and most importantly, compassionate. He sponsored legislation to allow funding of medicare and disability insurance from general revenues, assuring a reduction of social security payroll tax and insuring the soundness of the social security system for years to come. He introduced legislation to provide assistance for middle-income families in obtaining loans and grants for college tuitions, and has successfully introduced amendments to increase support for retarded, disabled, and aged individuals; stressing independence and community concern rather than institutional care. As a member of the powerful Ways and Means Committee, BILL has had the opportunity to deal with many of the major issues facing the Congress, and his performance has certainly earned the respect and admiration of his constituents and colleagues.

BILL will be sorely missed by all of us who have had the privilege of working with him, and I would like to wish him the best of luck in his law career.●

● Mr. LONG of Louisiana. Mr. Speaker, WILLIAM BRODHEAD will be retiring from the House at the close of this session of the Congress. I note his departure with both a touch of sadness and a large measure of pride. In his 8 years of service in the House, BILL BRODHEAD has built up a solid reputation as a good representative of his Michigan constituents and as an effective practitioner of the legislative art.

During his years in the House, Bill has been a dedicated and conscientious member of the Ways and Means Committee. He has served with distinction as a member of the Subcommittee on

trade and the Subcommittee on Social Security. Besides his committee work, BILL BRODHEAD has been active in the areas of political reform, the problems of the handicapped, and improved adoption programs. His work in the House has served not just the interests of his district but the interests of the country as a whole.

Congressman BRODHEAD founded the 100-member House Auto Task Force and served as its cochairman. BRODHEAD formed this group to seek congressional participation in the attempt to understand and find solutions to the severe problems that have resulted from the slump in domestic auto sales. At the beginning of the 97th Congress, WILLIAM BRODHEAD was elected chairman of the Democratic Study Group. Under his leadership, the Democratic Study Group has continued to be the primary source of legislative research for House Democrats and has continued to be an active force seeking to improve congressional procedures and the legislative process.

Besides this work, BILL BRODHEAD has been active in the Democratic Party. I have found him to be a faithful and dedicated colleague of mine in the work of the caucus. There have been many Members of this Chamber who have been called leaders. BILL is a leader. He has sought to be a constructive leader who has been distinguished by his attempts to reconcile rather than to exploit differences. At the same time, BILL has shown each of us what can be accomplished by working within the system.

As WILLIAM BRODHEAD leaves the House, I am saddened somewhat by the fact that we as a legislative body are losing a dedicated and hard-working Member. Yet, in another sense we are both thankful and grateful for his presence and friendship. As he returns to private practice as an attorney, we wish him the very best in the years ahead. The House is losing a good Member. Yet, wherever he goes in the years ahead, we know in our hearts that the same qualities which have made him so vital and integral a Member of this body, will make him a source of strength and inspiration to those who are fortunate enough to come into contact with him. My friend, I wish you the very best and am proud to be able to say that I know WILLIAM M. BRODHEAD.●

● Mr. BROOKS. Mr. Speaker, in his 8 years in Congress, BILL BRODHEAD has compiled a record that would be the envy of Members with far longer service. He has served on two of our most prestigious committees, been chairman of the Democratic Study Group, and founded and led a task force to help solve the problems of the automobile industry. BILL's term as chairman of the DSG was especially noteworthy. I found invaluable the breadth and quality of the reports it turned out under his guidance.

Such hard work and ability are valuable qualities in a national legislature, and I regret that we will not be able to draw on them in the coming Congress. I am sure that BILL will continue to put them to good use, however, and I wish him all the best in the years ahead.●

● Mr. RUSSO. Mr. Speaker, these farewells to colleagues do not get any easier. In my years here I have said goodby to so many fine people and today is yet another occasion to adjust to the idea that Congress is losing one of its outstanding Members. Representative BILL BRODHEAD is someone of whom it can truly be said—he made a difference.

During his years in the House, he has distinguished himself in his committees, as chairman of the Democratic Study Group and in his efforts to help our domestic auto sales. He has been a Representative of whom his district and the State of Michigan could be justifiably proud because he served not only his own constituency but the country well.

But all of this still does not tell you about the nature of the man himself. BILL is a genuinely good and decent human being. He took his job seriously, but not himself. And it was not only his very real contributions here that won him the respect of his colleagues, but an attitude of fair play and integrity as well. Even when we disagreed in the Ways and Means Committee, for example, I still had the utmost respect for his work and opinions and admired the way he handled himself. He is, to put it succinctly, a class act.

I know we all wish the best for BILL as he pursues his career in law. Whatever he does, he will do with enthusiasm and will distinguish himself as he did here. He will be greatly missed.●

● Mr. RAHALL. Mr. Speaker, I would like to thank my colleague and good friend from Michigan (Mr. BONIOR) for taking this special order today so that we in this body can pay tribute to a man, who in 8 short years has made a record of integrity and hard work in the U.S. House of Representatives, WILLIAM BRODHEAD.

As representative of Michigan's 17th District, BILL BRODHEAD has provided his constituents with first-rate service. As a member of the Ways and Means Committee here in the House, BILL BRODHEAD has played a major role in some of the most progressive measures to come out of this body—particularly his efforts to rewrite the trade adjustment assistance program designed to compensate workers in industries hit by foreign competition, industries like the auto industry which is the mainstay in BILL's region of Michigan.

Those of us on this side of the aisle know and respect BILL for his fine work and leadership as the chairman of the Democratic Study Group. His tenure in that post, has elevated the DSG to a new level of research information on the vital.

I am sure I am joined by others who feel saddened by the fact that BILL BRODHEAD is ending his career here in the House so prematurely. However, I am confident that he has earned the utmost respect of his colleagues for doing what he believes is right, and for setting his own personal priorities in order.

I for one will miss him, but know he will carry on in the legal profession with the same enthusiasm and dedication that he showed in the House.●

● Ms. OAKAR. Mr. Chairman, it is my pleasure to join in this salute to my distinguished colleague, BILL BRODHEAD.

The cities of Cleveland and Detroit have much in common: solid, blue-collar auto and basic industry workers as well as broad expanses of active, middle-class employees. The two cities also proudly claim BILL BRODHEAD, who was born and raised in Cleveland and settled in Detroit. Both cities have a proud tradition of producing outstanding political leaders.

In Detroit, Mr. BRODHEAD's career was closely intertwined with the movement against the war in Vietnam; he has consistently supported legislation for human needs. His tax and welfare reform proposals have earned him overwhelming victories at the polls ever since 1974, when he took over Martha Griffith's seat. In Cleveland we are deeply appreciative of his fights to save the auto industry.

Maybe his most important contribution from my standpoint has been the leadership in the Democratic Study Group. Both parties must applaud the day-in and day-out work of this group in providing fundamental—and mainly impartial—information on the largest (and smallest) items to come to the floor. The DSG has become an influence on legislation which has helped smooth out a sometimes rough process.

I salute a man who will be missed here. I applaud the voters of Michigan for their wise decisions in support of BILL. I know he will help mold the future of the country in a positive way.●

● Mr. SILJANDER. Mr. Speaker, it is with great pride and deep reverence that I address my colleagues today as we bid farewell to one of our most effective and esteemed legislators: WILLIAM BRODHEAD.

Since my special election to the House in 1981, I have had the honor of working with BILL BRODHEAD on several legislative initiatives—together we share the cosponsorship of some 70 bills. As a new Member, having the fortuitous opportunity to observe a

Member who possesses the highly coveted qualities of forthrightness and legislative acumen necessary to make a statement in the House—and be listened to. Not only have the legislative efforts of BILL BRODHEAD brought much needed relief to the State of Michigan, but his tireless work on the Ways and Means Committee have produced sound answers to the problems facing this Nation.

The memory of Congressman WILLIAM BRODHEAD will be an indelible one. As we put a cap on the 97th Congress and move into the 98th, the members of the Michigan congressional delegation are enthroned with the monumental task of charting a path of economic renaissance for a financially ravaged State. However, we approach this task with spirits lifted toward that guiding light of hope and leadership that BILL BRODHEAD has left behind.

Thank you.●

● Mr. OBERSTAR. Mr. Speaker, the manner in which BILL BRODHEAD reached his decision to leave the House at the end of the 97th Congress epitomized the thoughtfulness, compassion and talent of a much-respected colleague.

For BILL BRODHEAD, whose record would have earned him certain reelection, there is life after Congress. I, like so many of his colleagues, know that tremendous rewarding personal and professional experiences await BILL. We do regret the loss of this dynamic and unshamedly liberal colleague.

During the past 2 years, it has been my pleasure to serve on the executive committee of the Democratic Study Group with BILL, who served most admirably as Chair of the DSG.

For those of us deeply concerned about humane tax legislation, welfare reform, fair trade laws, and a responsible unemployment compensation program, we have been able to count upon BILL BRODHEAD in the House Ways and Means Committee. He has been an eloquent, and often lonely, voice against senseless retrenchment and mindless capitulation to unsound and selfish economic policies.

I thank the gentleman from Michigan (Mr. BONIOR) for his thoughtfulness in scheduling this special order. I entered the House with BILL. I wish that our association here would have been longer.●

● Mr. MATSUI. Mr. Speaker, I join my colleagues today in paying personal tribute to the service of one of the most outstanding Members of this body, Hon. BILL BRODHEAD of Michigan.

As one of the new members on the Ways and Means Committee during this Congress, it was my privilege to serve with BILL and to benefit from his guidance and leadership. It was with tremendous regret that I learned of his decision not to seek reelection. However, we can all empathize with the frustrations and the pressures that led him to that decision. His departure should give us great pause for reflection; we must take some corrective actions in the next few years to see that other Members of BILL BRODHEAD's caliber are not lost to national public service.

But for now, I wish BILL and his family nothing but the best. This House and our entire Nation are richer for BILL BRODHEAD's service. We shall miss him.●

● Mr. OTTINGER. Mr. Speaker, I rise in warmest praise of our colleague from Michigan, WILLIAM BRODHEAD, and his tremendous contributions to this House and our country.

Few Representatives have been able to accomplish so much in such a short time. BILL has been an effective leader in creating a more equitable tax system while serving on the House Ways amd Means Committee. In addition, he has sought constructive alternatives to maintain social security benefits.

However, we will best remember BILL for his work on human needs. BILL has always been sensitive and representative of all especially those who tend to need Government assistance the most: the poor, handicapped, and elderly. His success in improving assistance programs to the handicapped and providing Federal support for parents who adopt foster children exemplify his commitment to goals of fairness and humanity.

His leadership on the Democratic Study Group, the center for progressive work and strategy, has led to many fresh ideas and approaches which will continue to strengthen the group in the years ahead. We can all appreciate BILL's flexibility and understanding of other points of view, which have led to effective coalitions on difficult issues. While BILL has always been a loyal Democrat, his independent views should be an inspiration to us all, as we are subject to great pressures to conform to politically safe attitudes and choices.

BILL will be sorely missed by his colleagues. We wish him well in pursuing his law career back in his home State, where he will surely represent his clients with the same energy and integrity that he showed while serving in this Chamber.●

● Mr. CROCKETT. Mr. Speaker, it is with great sorrow that I watch BILL BRODHEAD leave the House, for we are losing a man who has contributed much to the Congress, the residents of his district, and to Americans everywhere. I shall miss the leadership, compassion, and humor that he has so often displayed.

BILL and I have shared far more than simply the fact of representing the same Detroit metropolitan area. I have served on the executive committee of the Democratic Study Group under his very capable leadership. We have worked together on the House Auto Task Force, which he founded and cochairs. Both of these groups can credit much of their fine work to BILL's outstanding energy and ability.

But BILL's leadership has demonstrated itself even more in the legislation he has chosen to sponsor as a member of the Ways and Means Committee. He has consistently pressed for national health insurance. It was his amendment that encouraged the use of community group homes for retarded, disabled, and aged individuals instead of other, more restrictive institutions by increasing the supplemental security income to these homes. His unflagging interest in improving adoption programs has resulted, among other things, in continued Federal support for adoption subsidies for hard-to-place children. Time and again he has worked to raise student financial assistance, to improve the social security system, and to strengthen programs serving the handicapped. He has very ably represented the needs of all his constituents—from the low-income elderly, to the unemployed autoworker, to the average taxpayer.

The House has many liberals, but few who have so consistently taken a leading role as BILL BRODHEAD. Like his predecessor Martha Griffiths, BILL has set a standard of leadership that is hard to follow. Although I wish BILL much success with his law career, I hope this decision to move on does not mean he is completely withdrawing from the political realm. At times like these we cannot afford to completely lose from public service men and women with the vision, stamina, and ability of BILL BRODHEAD.●

● Mr. FIELDS. Mr. Speaker, I would like to take this opportunity to honor my friend and colleague, Congressman WILLIAM BRODHEAD who has a distinguished record of 8 years of service in the House of Representatives.

For the past 8 years, the Congress has benefited from BILL's innovative ideas and his efforts on the House Ways and Means Committee, and as a member of the House Budget Committee.

BILL's dedication and warm friendship will long be remembered by all of us who have had the pleasure of working with him, and "playing" with him—he is undoubtedly, the most tenacious basketball player with whom I have ever competed. Not only will he be missed by the Ways and Means Committee, but he will also be missed by the "B" Committee.

I consider BILL a good friend and a person for whom I have the utmost respect. I have only the best wishes for his continued success and all endeavors.●

● Mr. STOKES. Mr. Speaker, I would like to thank my distinguished colleague from Michigan (Mr. BONIOR) for reserving this time for Members to salute a man who is one of the most deeply committed legislators in the House of Representatives—Congressman WILLIAM BRODHEAD. Mr. Speaker, Congressman BRODHEAD will be retiring at the end of the 97th Congress after four terms in the House. At this juncture, it is only fitting that we pause to salute this dynamic and energetic legislator.

I believe that I speak for Members on both sides of the aisle when I say that we will miss BILL BRODHEAD for the unswerving dedication and commitment he brought to this Congress. More importantly, Mr. Speaker, we will miss the diligence in which he has worked to meet the needs of not only the residents of Michigan's 17th Congressional District, but also the needs of the politically powerless in this Nation.

Mr. Speaker, during his career in public service, BILL BRODHEAD has been what I can best characterize as a peoples' legislator. In many battles on the floor and in various committees, BILL BRODHEAD has been the champion of the poor and the workers of this Nation. He has held steadfastly to the idea that our Government is designed to help those who cannot help themselves and has facilitated that philosophy with innovative ideas and hard work.

Because of those qualities, Mr. Speaker, BILL BRODHEAD has enjoyed the unqualified support of his constituents. Before being elected to the House of Representatives, Congressman BRODHEAD served 4 years in the Michigan House of Representatives. He has served four consecutive terms in the House of Representatives and has had the good fortune of being reelected each time by resounding margin. This is because people in his district have confidence in his commitment and ability to meet their needs.

Just like the people in the 17th District, Members of Congress have a profound sense of respect and high regard for Congressman BRODHEAD. We quickly recognized when BILL took office in 1975, Mr. Speaker, that he was a man deeply committed to making government work and work effectively for the people of this Nation. Many of us who embraced the liberal political philosophy saw Congressman BRODHEAD as a new rising star on the horizon in the House of Representatives. My good friend, Congressman BRODHEAD, has not disappointed us.

Mr. Speaker, at the beginning of the 97th Congress, Congressman BRODHEAD was elected as the chairman of the Democratic Study Group. He has taken this valuable research and policy group to new levels of excellence and efficiency in terms of informing Democratic members of key issues in the House.

Mr. Speaker, as a member of the powerful House Ways and Means Committee, BILL BRODHEAD has gained a reputation as an expert on the impact of tax policies on our citizens. He has been at the forefront of efforts on the committee to reform welfare and tax laws. Additionally, he was the catalyst for the completion of the revised trade adjustment assistance program and passage of the Chrysler loan guarantee. His work through this committee and the national reputation he has gained earned him the "Taxpayers' Friend" award from the organization, Taxation With Representation.

In addition to the House Ways and Means Committee, Mr. Speaker, Congressman BRODHEAD serves on the House Budget Committee. I had the pleasure of serving with BILL on that committee.

I found in Congressman BRODHEAD an ally particularly when it came to funding for vital human needs programs and programs which aided the workers of this Nation. Through our association on the Budget Committee, I gained a deep respect for his ability as a responsible and compassionate legislator. We also became close friends. I would like to use this time to thank Congressman BRODHEAD for that support.

In addition to the victories he amassed through his committee assignments, Congressman BRODHEAD founded the 100-member House Auto Task Force and serves as its cochairman. He formed the group to seek congressional solutions to the severe problems resulting from the slump in domestic auto sales.

In closing, Mr. Speaker, I would like to add a personal note to my salute to our honoree, BILL BRODHEAD. I feel a special attachment and sense of pride about the achievements that BILL BRODHEAD has made in the Congress. As some of my colleagues know, BILL BRODHEAD is originally from Cleveland, Ohio. In fact, Mr. Speaker, BILL's mother currently resides in my congressional district. And so, in addition to all of the positive accomplishments of this dynamic and energetic legislator, I point with pride to the fact that this committed individual has roots in my city. In the years he has been in Congress, Congressman BRODHEAD has made not only his constituents proud of him, but also he has made those of us from his hometown extremely proud of our native son.

Again, it is a signal honor to join in this appropriate salute to Congressman WILLIAM BRODHEAD. With such a distinguished career in public service as a foundation, I know that we will be hearing even greater things about Congressman WILLIAM BRODHEAD in the future.●

● Mr. SCHUMER. Mr. Speaker, I would like to take this opportunity to bid farewell to my friend and distinguished colleague, BILL BRODHEAD; his leadership and energy will be greatly missed by us all.

Since 1974, when he became a Member of Congress, BILL has proven himself to be a tremendous force in many areas of political reform. BILL has provided the impetus for much innovative legislation in the areas of tax and welfare reform, and his efforts to aid the ailing domestic automobile industry by founding the House Auto Task Force will stand as a paramount accomplishment in his admirable congressional career.

Nowhere did BILL display his leadership ability more than in his capacity as chairman of the Democratic Study Group; this body will miss his active presence as will the entire House of Representatives.

I consider myself fortunate to have had the opportunity to work with BILL, and I know that I speak for all my colleagues when I wish BILL BRODHEAD the best of luck in all of his future endeavors.●

THE DREAM OF A UNITED IRELAND IS SHATTERED AGAIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. SHANNON) is recognized for 5 minutes.

● Mr. SHANNON. Mr. Speaker, once again, a terrorist bomb has set back the dream of a united Ireland.

The attack, 2 nights ago, on a tavern in Ballykelly, left at least 16 people dead. Dozens of others have been injured and mutilated.

The vast, vast majority of Irish Americans hang our heads in frustration. Can there be no end to the savagery, to the senseless brutality?

We know that these terrorists are dedicated not to ideals, but only to death and anarchy.

We know that the road to a united Ireland is blocked every time a corpse falls across it.

On behalf of all Irish Americans, I offer my sympathy to the families of those who were killed and injured.

We understand your pain.

We know that lives have been destroyed, and for no purpose.●

BANKRUPTCY LEGISLATION: THE NEED FOR A CONSTITUTIONAL BANKRUPTCY COURT—H.R. 6978, THE BANKRUPTCY COURT ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentelman from New Jersey (Mr. RODINO) is recognized for 10 minutes.

● Mr. RODINO. Mr. Speaker, at a time of 10.8 percent national unem-

ployment and business bankruptcies running at the highest rate since the Depression, the Nation's bankruptcy court structure is in danger of collapsing, unless Congress acts to correct the constitutional defect in the court by December 24.

This is not a partisan issue. The impending constitutional crisis in the judicial system may have serious economic ramifications. The responsibility rests clearly with the Congress as the Supreme Court has now twice afforded Congress the opportunity to solve what the Court itself recognized as a critical economic problem.

On June 28, 1982, in the case of *Northern Pipeline Construction Company* v. *Marathon Pipe Line Co.*, — U.S. — 50 U.S.L.W. 4872, the U.S. Supreme Court held that the jurisdiction conferred on the bankruptcy courts by section 241(a) of Public Law 95-598 cannot be constitutionally exercised by those courts, because bankruptcy judges are not afforded the protections set forth in article III of the Constitution to insure judicial independence—tenure during good behavior and guarantee against salary diminution while in office. However, in an unusual act, the Court stayed the entry of its order in the case until October 4, 1982, to allow Congress time to correct the constitutional problem and protect the orderly administration and adjudication of bankruptcy cases in the interim.

The Congress has considered this same issue on two prior occasions. In both the 94th and 95th Congresses, the House of Representatives examined the constitutional issues surrounding the bankruptcy court structure and concluded that the limited circumstances in which a departure from the requirements of article III have been permitted were not present in the bankruptcy context. In the 95th Congress, the House of Representatives passed a bill to establish the bankruptcy courts under article III of the Constitution. In a compromise with the Senate, a nonarticle III court was created however. It was this compromise court structure that was held unconstitutional in Northern Pipeline.

Aware of the necessity for prompt action in order for the Congress to comply with the October 4, 1982, deadline originally imposed by the Supreme Court, the House Judiciary Subcommittee on Monopolies and Commercial Law began hearings on July 21 and 22, 1982, on possible legislative solutions to the constitutional problem. As a result of these hearings, I, along with Congressmen EDWARDS, MCCLORY, and BUTLER, introduced H.R. 6978, a bill to provide for the appointment of U.S. bankruptcy judges under article III of the Constitution, on August 12. On August 17, the subcommittee favorably passed H.R. 6978, and the Judiciary Committee ordered the bill favorably reported on August 19. The committee report on H.R. 6978 was filed on September 15 (H. Rept. No. 97-807).

While the House diligently addressed the issues presented by the Northern Pipeline case and was anxious to meet the deadline imposed by the High Court in that decision, it was enormously difficult to enact such important legislation in the short period of time set forth in that case.

On October 4, 1982, the Solicitor General of the United States appeared before the Supreme Court and requested that the Court extend its stay of the Northern Pipeline decision until December 24, 1982. The Solicitor General pointed out the degree of disturbance that would occur if the Nation's bankruptcy system were placed in constitutional limbo and argued that there was "strong reason to believe" that the Congress would act to solve the problem in the lameduck session.

In his motion on behalf of the United States, the Solicitor General further emphasized before the Supreme Court that an interm rule promulgated by the Administrative Office of the U.S. Courts on September 27, 1982, to temporarily govern the operation of the bankruptcy court in the event of congressional inaction would be unworkable and subject to constitutional challenge. The Solicitor General stated:

> On September 27, 1982, the Administrative Office of the United States Court promulgated a proposed district court local rule to govern the operation of the bankruptcy courts after October 4. The proposed rule assigns to the bankruptcy courts in each district the district court's jurisdiction over "(a)ll cases under Title 11 and all civil proceedings arising in or related to cases under Title 11." Proposed Rule (b)(1). District courts are authorized to withdraw any reference to a bankruptcy judge, in whole or part, upon the court's own motion or the motion of a party., Id, (b)(2). In addition, the district courts must review de novo any proposed judgment of a bankruptcy court in any proceeding "related to" but not "arising under" a case under Title II and in any other proceeding where such de novo review is constitutionally required. Id., (c)(3), (c)(5)(A)(iii), (c)(5)(B). However, the proposed rule does not define those other cases in which district court de novo review is constitutionally required. . . .
>
> . . . As an initial matter, it is uncertain whether the proposed rule would withstand a judicial challenge. The proposed rule is based on the assumption that the Court's decision has left untouched the broad bankruptcy jurisdiction conferred upon the district courts by Section 241(a) of the Act, 28 U.S.C. (Supp. IV) 1471 (a) and (b). In fact, it is unclear whether the Court's holding may be limited in that fashion. See slip op. 37 n.40 (plurality opinion); id. at 4 (Rehnquist, J., concurring). Furthermore, there are serious questions whether the proposed rule legitimately may assign to the bankruptcy courts significant portions of the district courts' broad bankruptcy jurisdiction under the Act, since this is precisely what the Court refused to do in holding that the bankruptcy courts' jurisdiction over constitutionally-recognized or state-created rights could not be severed from the remainder of the bankruptcy courts' jurisdiction under the Act. Ibid.
>
> These uncertainties about the validity of the proposed local rule cast doubt upon the rule's effectiveness as an interim remedy. If district courts recognize the problems with the rule and withdraw the reference of many bankruptcy matters from the bankruptcy courts, they will severely hinder the operation of the bankruptcy system because of their own large workloads. On the other hand, if the district courts permit the bankruptcy courts to adjudicate a broad range of cases and proceedings pursuant to the local rule, there is a substantial risk that these cases and proceedings will have to be relitigated if the local rule is found invalid. Under either alternative, the bankruptcy court system will operate under a cloud. The magnitude of this problem and the potential waste of judicial resources is indicated by the fact that over 700,000 bankruptcy estates—and 100,000 adversary proceedings—currently are pending and new bankruptcy petitions are filed at the rate of more than 10,000 per week. Administrative Office of the United States Courts, 1982 Annual Report of the Director 8, 10 (preliminary ed., Sept. 22, 1982).

On the afternoon of October 4, the Supreme Court entered an order extending the stay of the Northern Pipeline decision until December 24, 1982.

It is unusual for the Supreme Court to stay the effective date of a decision and even rarer for it to grant the extension of a stay. The extension until December 24 was granted in part upon the representation that the Congress would certainly act by that date. It is almost universally believed that the Supreme Court will not grant a third postponement of the effective date of the Northern Pipeline decision since the Court has already twice afforded the Congress an opportunity to act.

The expiration of the stay of December 24 will create enormous uncertainty, potential economic loss, massive litigation and delay in bankruptcy proceedings, and great waste of judicial resources.

In the interest of maintaining the orderly administration of bankruptcy proceedings, particularly in the present state of our Nation's economy, I believe that this institution has a serious responsibility to grapple with this issue before it adjourns.

H.R. 6978, the Bankruptcy Court Act of 1982, which provides for the appointment of U.S. bankruptcy judges under article III of the Constitution, would eliminate the constitutional defect found by the Supreme Court to exist in the bankruptcy court. The bill does not authorize additional numbers of judges or personnel. The number of bankruptcy judges authorized under the bill is 227. There are currently 241 bankruptcy judges in the Nation. It does not alter in any way the jurisdiction of the bankruptcy courts, which only encompasses bankruptcy and

bankruptcy-related cases as under present law.

In order to meet the requirements of article III of the Constitution, H.R. 6978 simply provides that U.S. bankruptcy judges be appointed by the President for life, rather than for 14-year terms as is the case under existing law. As the Supreme Court expressly stated in Northern Pipeline, that is all that article III of the Constitution requires. It does not require that all article III judges be given the same staff support or hearing rooms, or, indeed, even be paid the same:

Relevant to that question of need, it seems worth noting that Article III itself permits much flexibility; so long as tenure during good behavior is granted, much room exists as regards other conditions. Thus it would certainly be possible to create a special bankruptcy court under Article III and there is no reason why the judges of that court would have to be paid the same salary as district judges or any other existing judges. . . . *(Northern Pipeline Construction Co.* v. *Marathon Pipe Line Co.* (June 28, 1982)—U.S.—Slip op., p. 24, n. 28).

The change from 14-year terms for bankruptcy judges to constitutional tenure is, in some respects, more of a conceptual change than a practical one, since tenured judges often do not serve longer than 14 years. However, in the wake of Northern Pipeline, it is a constitutionally required one.

The Congressional Budget Office estimates that the fiscal year 1983 cost of H.R. 6978 would be approximately $3 million.

As H.R. 6978 will be offered on the floor, bankruptcy judges cannot be assigned even temporarily to the district or circuit court. Article III bankruptcy judges will not be authorized to hear any non-bankruptcy-related cases.

The Judiciary Committee has spent many hours examining this problem, consulting constitutional scholars and bankruptcy experts, and reviewing possible alternatives. In light of the reasoning and holding of the Northern Pipeline decision, the importance of expedition in bankruptcy cases, and the present workload of the Federal district courts, an article III bankruptcy court is the only clearly constitutional and workable solution to the problem created by the Supreme Court's ruling.

The Justice Department has also conducted a detailed examination of the available options. In testimony before the Senate Judiciary Subcommittee on Courts on November 10, 1982, Jonathan C. Rose, Assistant Attorney General, Department of Justice, stated:

. . . I cannot overstate the need for the enactment of remedial legislation before the Supreme Court's stay expires. The plurality and concurring opinions in the *Northern Pipeline* case have left many important questions unanswered, and the extent to which the bankruptcy courts and the district courts will be able to adjudicate bankruptcy matters after December 24 is highly unclear. Some have, indeed, questioned whether *any* court will have jurisdiction over bankruptcy matters after December 24.

* * * * *

. . . (W)e do not believe that the bankruptcy court system can operate effectively after December 24 in the absence of remedial legislation. The disruption of this system would ultimately result in losses of millions of dollars and thousands of jobs, as reorganizations of our Nation's productive resources are delayed by the legal uncertainties outlined above.

Nor can we rely on the prospect of a further stay from the Supreme Court. The Court's stay has been extended once, to coincide with the adjournment of this Congress, almost six months after the Court's decision. As a practical matter, the deferral of this issue until the next Congress would make final action by Congress unlikely before the late spring, a delay the Court likely will not countenance.

Thus, it is essential that remedial legislation to deal with the *Northern Pipeline* decision be enacted before the end of the current session.

. . . (T)he Department initially had attempted to develop an Article I solution that was both workable and constitutional. Unfortunately, our extensive review has led to the conclusion that we cannot recommend to the Congress any Article I solution that is either workable as a practical matter or sufficiently free of constitutional doubt.

Among the alternative approaches carefully examined by the Judiciary Committee were various proposals attempting to, in some manner, split the jurisdiction over bankruptcy cases between an article I judge and an article III judge. One example of this approach is contained in a bill drafted by the Judicial Conference and introduced by Mr. KASTENMEIER on September 17, 1982, as H.R. 7132. H.R. 7132 would create a trifurcated jurisdictional system, producing endless litigation over which forum should hear an issue, and thereby diluting the assets of the estate and reducing the present value of creditors' claims. This approach would also result in massive duplication of effort by bankruptcy and district judges and magistrates. H.R. 7132 or similar "split jurisdiction" proposals would generate wasteful litigation over jurisdiction, productive only of needless expense and delay in bankruptcy cases. Aside from judicial inefficiency, such a "remedy" would completely undermine the goals of successful rehabilitation of debtors in reorganization cases and prompt liquidation and distribution to creditors in asset liquidation cases.

The Justice Department has commented as follows on the constitutional and practical problems of H.R. 7132:

One Article I solution has been proposed by the Judicial Conference. Under this proposal, jurisdiction over all cases under title 11 and "subsidiary proceedings" would be vested in the district courts, and those matters would be referred to the bankruptcy court for the district for disposition. The district court, on its own motion or the motion of a party, would be able to recall any case referred to the bankruptcy court, either for determination or for reference to a magistrate. "Related proceedings" to the case under title 11 would not be referred to the bankruptcy court but would be decided by the district court.

It is very difficult to determine from the opinions filed in Northern Pipeline exactly what aspects of bankruptcy proceedings might or might not be constitutionally adjudicated by a non-Article III tribunal. The rationales advanced by both the plurality opinion and the concurring opinion are, however, sufficiently sweeping that it is doubtful that the proposal to reestablish an Article I bankruptcy court advanced by the Judicial Conference would provide a workable bankruptcy tribunal that would be both effective and capable of withstanding constitutional scrutiny.

The plurality opinion of four justices distinguished between "public rights" which may be adjudicated by an Article I tribunal and "private rights" which may not. That opinion did not delineate what constitutes "public rights" but noted generally that they must at a minimum arise "between the government and others." 102 S. Ct. at 2870. By contrast, private rights, which must be adjudicated by Article III courts, are those involving "the liability of one individual to another." 102 S. Ct. at 2870-71. Though some aspects of bankruptcy proceedings may involve matters of "public right," the adjudication of creditors' claims against a bankrupt, which is at issue in many bankruptcy proceedings, would seem to involve primarily the "private rights" of the parties.

The concurring opinion of Justices Rehnquist and O'Connor was expressly limited to the particular type of claim involved in the case (i.e., a bankrupt's common law claim against a third party uninvolved in the bankruptcy proceeding). Nevertheless, the rationale advanced is in some respects no less sweeping than that of the plurality opinion. Justice Rehnquist's opinion suggest that matters arising under state law, as well as "the stuff of the traditional actions at common law tried by the courts at Westminster in 1789," must be tried by Article III courts. 102 S. Ct. at 2881. This could entail a vast number of matters in and related to bankruptcy.

The Judicial conference has argued that the decision in *Northern Pipeline* should be read to require only that actions at common law arising under state law must be decided by an Article III tribunal.[1] It is apparently the view of the Judicial Conference that matters "arising under" bankruptcy law do not entail issues of state common law and, accordingly, may be constitutionally considered by an Article I tribunal.

The analysis and proposal offered by the Judicial Conference present a number of problems. First, we would not advise Congress to base its legislative solution to this problem on the speculation that the more narrow construction of Northern Pipeline advanced by the Judicial Conference will ultimately prevail in the Supreme Court. Second, even under the construction of Northern Pipeline advanced by the Judicial Conference, there may be significant constitutional problems in attempting to adjudicate a large proportion of the matters arising under bankruptcy law in an Article I tribunal. Cases arising under bankruptcy law

[1] Report of the Judicial Conference of the United States on Northern Pipeline Construction Co. v. Marathon Pipe Line Co., and Proposals for Remedial Congressional Action, 11 (1982).

frequently entail consideration of state law or traditional common law issues in many different contexts. To cite an obvious example, proofs of claim offered by a claimant against a bankrupt will generally be predicated on state law (of contract, property, domestic relations, etc.). It is arguable that, even under the construction of Northern Pipeline offered by the Judicial Conference, state law issues concerning proofs of claims could not be adjudicated by an Article I tribunal.[2]

Finally, the Judicial Conference proposal would reduce the efficiency of the bankruptcy system established in 1978 by bifurcating proceedings between an Article I and an Article III tribunal. One of the most important purposes of the 1978 reforms was the consolidation of bankruptcy proceedings before a single forum with jurisdiction over all relevant matters. This put an end to costly delays and jurisdictional litigation which had plagued bankruptcy adjudication prior to 1978. The bifurcated system proposed by the Judicial Conference would resurrect some of these same problems. Moreover, it would place an additional caseload of uncertain dimensions on already overcrowded district court calendars.

For these reasons, the Department has concluded that only an Article III approach will provide the workable and constitutional solution that is essential to assure the continued integrity of the bankruptcy system. Grave constitutional doubts would surround any further temporizing with an Article I solution and would cast a shadow on all bankruptcy cases raising the possibility of a new ruling that such a bankruptcy court structure is unconstitutional. In our judgment, a legislative proposal that simply offers an opportunity for more litigation to test its constitutional validity is no solution at all. The appointment of Article III judges will resolve any constitutional concerns, allow the consolidated disposition of all related bankruptcy matters, and attract the highest caliber of lawyers to the bench.

Another alternative considered by the committee would be to have bankruptcy cases and proceedings adjudicated by article III district courts. This approach is not feasible as a practical matter, because of the congested calendar of the U.S. district courts. Assigning all matters to the district courts would not provide the speed and expertise necessary in bankruptcy cases.

This approach would be enormously expensive since a large number of Federal district court judgeships would be needed, and additional facilities and supporting personnel would have to be authorized.

When a business reorganization case is pending, quick responses from the court are essential to matters of continued financing, litigation about the automatic stay, litigation over the ability to use property of the estate, and numerous other matters. Crowded civil calendars and the Speedy Trial Act severely limit the ability of the district courts to handle bankruptcy matters as promptly as needed.

[2] In their letter of September 20, 1982 to the Chairman, Professors Countryman, Kennedy and King present a more extensive analysis of such problems.

The district court approach is contained in H.R. 7294 and H.R. 7349 introduced by Mr. BUTLER. Under these bills, bankruptcy judges would sit as full-fledged article III judges on a division of the district court. H.R. 7294 and H.R. 7349 would also create more Federal district court judgeships in addition to article III "bankruptcy division" district judgeships, would enhance pension benefits for all judges, and make numerous other changes that would have a large cost impact on the Federal budget. Under these bills there is a real danger that bankruptcy judges will be assigned to criminal cases because of Speedy Trial Act considerations, or used to clear up the great civil case backlog in the district courts. If these other matters took precedence over bankruptcy cases, there would not be any bankruptcy law worth speaking of, since speed is so critical to these proceedings.

Mr. Speaker, the Judiciary Committee reviewed the above alternatives and others. The committee concluded that an article III court is constitutionally required by Northern Pipeline and that an article III bankruptcy court is the simplest, least expensive, and most workable solution to the constitutional problem.

The cases pending in the bankruptcy courts involve more people, more money, more jobs, and more tax revenues than the combined total of all civil cases pending before the remainder of the Federal judiciary. The crisis in the bankruptcy judicial system could become an economic problem as well. The constitutional problem in the court system must be our primary concern in the short time remaining. It is an emergency matter with a deadline already extended by the Supreme Court.

Changes in the substantive bankruptcy laws, including some radical changes in the traditional fresh-start concept of our Nation's bankruptcy law, have been sought by various interest groups. We will seriously examine all of these proposals. The wallpaper can be hung and the furnishings can be arranged, however, only if the foundation has been laid and the structure built. The Congress has first been charged with the responsibility of constructing a constitutionally sound court.●

THE NINE-DIGIT ZIP CODE: STATUS REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, I rise today to give my colleagues a brief update on the status of the U.S. Postal Service's plan for a nine-digit ZIP code.

As you will recall from past deliberations, the plan really represents two distinct proposals: First, the introduction of automation and additional mechanization into the mail sorting process; and second, the division of the country into some 20 million nine-digited ZIP code areas—there are currently some 40,000 five-digited areas—so that mail can be sorted into smaller units by machine before being presented to the letter carrier for delivery.

After an indepth examination of this proposal by my Government Information and Individual Rights Subcommittee, the Committee on Government Operations issued two investigative reports raising numerous questions about the adequacy of the Postal Service plan and the accuracy of its financial projections. The concern of the Congress was such that a provision was included in the Omnibus Budget Reconciliation Act of 1981 delaying the project until October 1983. The General Accounting Office was ordered to study the Postal Service proposal and report its findings and recommendations to us by December 1, 1982.

Mr. Speaker, I have some pretty good news. GAO is nearly on target and will, I understand, issue its final report in mid-December. Thus, it would appear the Congress could take whatever further action might be indicated by the report in advance of the October 1983, startup date we chose.

But there is some bad news, too. Yesterday—only days before we received the GAO report—the Board of Governors of the Postal Service approved going ahead with a one-half cent discount for mailers who use the longer ZIP codes. Their decision followed a lengthy discussion of whether commonsense and common courtesy did not argue for delay of that decision until Congress had seen the GAO report. All but two of the Governors felt that the project had already encountered too many delays and that any further delay was unwarranted.

Somewhat earlier in the day yesterday, the Postmaster General reported to the Governors on the status of deployment of the linchpin—automated mail sorting equipment. He had some good news: The primary contractor, Pitney-Bowes, had delivered eight of the complex optical character readers (OCR's). Unfortunately, he also had some bad news: Problems had cropped up in the acceptance testing of all eight OCR's. The news on testing of OCR's supplied by another contractor, Burroughs, is better—none of its machines has experienced problems. There is a very obvious explanation for this: Burroughs has had a problem with technology transfer from its foreign partner, Nippon Electric, and has yet to deliver a single OCR.

89-059 O-86-44 (Pt. 21)

Although I have seen a draft of the GAO report on which the Board of Governors jumped the gun with its decision yesterday, it would be inappropriate for me to discuss details. Suffice to say that, while it will be subject to varying interpretations—as most GAO reports are, the report concurs in our long held view: If the machines do not work as well as the Postal Service has alleged they will, the entire project could be a real fiasco. It seems to me that the Postal Service Board of Governors should be more concerned with the delivery and performance of new equipment and spend less time rushing to establish discounts for nine-digited mail which can only be given if and when the equipment is in place and working.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

● Mr. BONKER. Mr. Speaker, because of a longstanding commitment in Washington State, I was unable to be present to vote on December 6.

I want to make it public record, though, that if present I would have supported H.R. 7368, the Highway Revenue Act. When faced with a crumbling American infrastructure and high unemployment, the responsible action was to support this measure both to repair and construct highways, bridges, and mass transit, and to create thousands of jobs.

If present, I would have voted "yes" on rollcall No. 414, "no" on rollcall No. 415, "no" on rollcall No. 416, "no" on rollcall No. 417, "no" on rollcall No. 418, "no" on rollcall No. 419, "yes" on rollcall No. 420, and "yes" on rollcall No. 421.

ROLLCALL VOTES DECEMBER 6, SURFACE TRANSPORTATION ASSISTANCE ACT

Rollcall No. 414—Rule. Passed 197-194.

Rollcall No. 415—Conte amendment to require appropriations for all funding. Rejected 96-305.

Rollcall No. 416—Waive Davis-Bacon provisions for bill. Rejected 174-223.

Rollcall No. 417—Restrict Davis-Bacon provisions to initial highway construction. Rejected 191-194.

Rollcall No. 418—Strike language in bill to permit Secretary of Transportation to prioritize allocation of interstate discretionary funds for high-cost projects. Rejected 21-329.

Rollcall No. 419—Davis-Bacon provisions should not be used to limit or, in opinion of Secretary of Transportation, have effect of limiting legitimate job opportunities. Rejected 149-217.

Rollcall No. 420—Adoption of the Rostenkowski amendment to revise the present highway user taxes, extend the highway trust fund through September 30, 1988, and increase the Federal gasoline tax by 5 cents, making an estimated $5.5 billion annually available for construction and repair of our national infrastructure. Adopted 236-169.

Rollcall No. 421—Final passage. Adopted 262-143.●

THE IMMIGRATION REFORM AND CONTROL ACT OF 1982

Mr. SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

● Mr. MAZZOLI. Mr. Speaker, I am very pleased that the House Rules Committee today granted a rule to H.R. 7357, the Immigration Reform and Control Act of 1982.

The committee granted an open rule, though it does require that all amendments to the bill be submitted no later than Thursday, December 9. Therefore, I would advise our colleagues to submit any amendments that they may have to the bill as soon as possible.

I would also like to remind our colleagues that H.R. 7357 is the same as H.R. 6514, the Judiciary Committee version of the immigration reform bill, with one technical correction. All amendments should be drafted to H.R. 7357.

I look forward to floor consideration of this important piece of legislation.●

LIMITS ON CAMPAIGN EXPENDITURES

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. BINGHAM. Mr. Speaker, I am introducing today a joint resolution providing for a constitutional amendment that would permit the Congress to set limits on campaign expenditures for Federal office and the States to do the same with respect to State and local offices.

I am delighted to have, as one of the cosponsors of this amendment, the distinguished and able gentleman from Wisconsin (Mr. REUSS) who like myself is retiring from the House at the end of this session. Last June Mr. REUSS introduced a similar amendment dealing with congressional elections: The amendment I am proposing is broader in two respects: First, it extends to Presidential elections, where there is a growing problem with respect to spending by allegedly "independent" committees; and second, it would authorize the several States to impose limits on spending for State and local offices.

The addition to the Constitution which I propose would read as follows:

"ARTICLE

"SECTION 1. The Congress may enact laws regulating the amounts of contributions and expenditures intended to affect elections to federal offices.

"SECTION 2. The several States may enact laws regulating the amounts of contributions and expenditures intended to affect elections to state and local offices."

We are introducing the amendment at the present time, not in the expectation that it can be dealt with in the current session, but in order to stimulate debate and discussion of the subject throughout the country. It would be my hope that the 98th Congress might then adopt an amendment along these lines and submit it to the states for ratification.

THE PROBLEM

In 1980 and 1982 the level of spending in campaigns for Senator, Representative and Governor, as well as for President, long rising astronomically, went through the roof. In two 1982 campaigns for Governor, more than $12 million was spent, one of them involving some $8 million of the candidate's own funds. Multi-million-dollar campaigns for the Senate have become commonplace, even in small states. In 1980 and 1982 several campaigns for House seats went over the million dollar mark, with one candidate reportedly spending some $2 million of his own funds. Also in 1980, spending in the Presidential race by allegedly independent groups shot out of control, even where the candidate was accepting public funding.

This situation is intolerable. The political process is distorted, and public confidence in our domestic system is undermined, as high offices are perceived to be for sale to the highest bidder. The need to raise large sums for their campaigns puts incumbents and challengers under intolerable pressures and obligations that may well influence their conduct in office. Because of this, many good people are deterred from seeking elective office.

For many years the Congress—and before it the House of Commons—have been concerned with excessive campaign spending and have sought to control it.

PRIOR LEGISLATION

As early as 1677 the House of Commons passed a standing order that if any one should spend above ten pounds before election in order to win "it shall be accounted bribery" and the seat vacated!

In 1910 and 1911 the Congress passed laws placing limits on the amount of money that could be spent by candidates for the Senate or the House. In 1921, the Supreme Court held that these restrictions were unconstitutional insofar as they applied to primary elections (Newberry v. U.S., 256 U.S. 232). Such a distinction between primary and general elections has long since been rejected by the Supreme Court, but the distinction was observed by the Congress when in 1925 it passed the Corrupt Practices Act, attempting to regulate general election campaign spending only.

The Corrupt Practices Act itself was upheld by the Supreme Court in 1934 (Burroughs vs. U.S., 290 U.S. 534). The Act, however, proved full of loopholes and ineffective. In 1971, responding to a clear need, the Congress passed a comprehensive campaign reform act, applying to primary as well as general election campaigns, the Federal Election Reform Act of 1971. In reporting out its version of that bill, the House Administration Committee (of which I was then a member) said:

"Witnesses at the hearings expressed the view that a system which sets no overall

limits on campaign spending in Federal elections may lead to a closed, insulated, self-perpetuating system, dominated by special interests, and unresponsive to the public will and which often creates the impression that only the rich can run for public office, and that a candidate can buy an election by spending large amounts of money in a campaign . . ."

"Such a situation works an inequitable hardship on the candidate who cannot compete with the resources of great wealth, but on even greater significance, it is unfair to the electorate which is entitled to have presented to it for its evaluation and judgement candidates from all walks of life and not just those persons who, because of their wealth can conduct a campaign which resorts to techniques which are more appropriate to merchandising a product than to familiarizing the public with a candidate's qualities as a potential public official and his program for the country."

It is almost incredible today that, as late as 1971, the House Administration Committee proposed an expenditure limit for House campaign of $15,000!

The final product of the legislative process that year did not contain any such limit on total campaign expenses. It did, however, seek to limit expenditures on communications media and expenditures by candidates from their personal funds ($50,000 for President or Vice-President, $35,000 for Senator, $25,000 for Representative).

Recognizing that the 1971 Act was flawed, the Congress tackled the problem of campaign financing again in 1974. The Federal Election Campaign Act Amendments of 1974 combined comprehensive disclosure requirements with restrictions upon the amounts of contributions, independent expenditures on behalf of candidates, expenditures from a candidate's personal funds, and total campaign expenditures. The Act also provided for the now familiar system of partial public funding for Presidential campaigns, both primary and general.

Again the House Administration Committee, in its report stressed the need for such legislation. The Committee said:

"The unchecked rise in campaign expenditures, coupled with the absence of limitations on contributions and expenditures, has increased the dependence of candidates on special interest groups and large contributors. Under the present law the impression persists that a candidate can buy an election by simply spending large sums in a campaign . . .

"Such a system is not only unfair to candidates, in general, but even more so to the electorate. The electorate is entitled to base its judgement on a straightforward presentation of a candidate's qualifications for public office and his programs for the Nation rather than on a sophisticated advertising program which is encouraged by the infusion of vast amounts of money . . .

"The Committee on House Administration is of the opinion that there is a definite need for effective and comprehensive legislation in this area to restore and strengthen public confidence in the integrity of the political process . . ."

BUCKLEY V. VALEO

The constitutionality of the 1974 Act was promptly challenged in the case of *Buckley vs. Valeo.* A panel of three distinguished judges in the Circuit Court for the District of Columbia sustained the Act, but in January 1976 a majority of the Supreme Court reversed the Circuit Court and held unconstitutional those portions of the Act which undertook to limit campaign expenditures, on the grounds that these provisions constituted an improper limitation on freedom of speech as protected by the First Amendment.

The Court drew a distinction between contributions and expenditures and upheld provisions limiting individual and committee contributions, including the unrealistically low figure of $1,000 for individual contributions. The Court also upheld the provisions dealing with Presidential elections on the grounds that the limitations on expenditures were made conditional on the candidate's acceptance of public funds.

These various distinctions have been widely criticized as unsound. In dissents to the decision itself, Chief Justice Burger and Justice Blackmun argued that there was no basis for the distinction between contributions and expenditures (their position was that limits on both were unconstitutional). In his dissent, Justice White argued that all the limits were constitutional, saying ". . . expenditure ceilings reinforce the contribution limits and help eradicate the hazard of corruption. . . . Without limits on total expenditures, campaign costs will inevitably and endlessly escalate." 424 U.S. at 264.

Writing in the Columbia Law Review in 1977, the late Judge Harold Leventhal, an outstanding member of the D.C. Circuit Court, vigorously criticized what he said was the Supreme Court's equating of money with speech. He referred to Justice White's comment that the majority's opinion proceeded "from the maxim that 'money talks' "and quoted Anthony Lewis in the N.Y. Times: "We know that money talks; but that is the problem, not the answer."

Judge Leventhal also pointed out that "even if 'money is speech', limitation on amount is constitutionally different from limitation of content."

Judge Leventhal quoted the House Committee report on the bill that "the impression persists that a candidate can buy an election by simply spending large sums in a campaign" and went on to say "The expenditure limits in the Act were intended to equalize spending and restore public confidence in the democratic breadth of representative government."

In his opinion differing from the majority with respect to the constitutionality of limits on candidates' personal spending, Justice Marshall said "the perception that personal wealth wins elections may not only discourage potential candidates without significant personal wealth from entering the political area, but also undermine public confidence in the electoral process."

To me that is the key point. Even if the Buckley case be viewed as technically correct, it has already done great harm and will do incalculably more if allowed to stand.

INCUMBENTS' ADVANTAGES

I am not insensitive to the argument that restrictions on campaign spending tend to help incumbents stay in office, but this consideration can be met in various ways: the Congress can, and should, set the limits at high enough levels to permit challengers a fair shot; some assured access to the media can be provided; and partial public funding is certainly a possibility.

On the first point, the level at which limits are set, I think we in the Congress made a bad mistake in the 1974 Act when we set the limit for independent expenditures on behalf of a candidate at $1,000. The Court in *Buckley* zeroed in on this particular limit, saying that it "would appear to limit all citizens and groups except candidates, political parties, and the institutional press from any significant use of the most effective modes of communication." Indeed, one may speculate whether the result in *Buckley* might not have been different if Congress had not set that particular limit so low.

I do not accept the argument that Congress, being always composed of incumbents, will never treat challengers fairly. An example of Congressional concern for challengers was its action in prohibiting the use of the frank for mass mailings during the two months before an election.

In any event, considerations of this kind are essentially political, not constitutional. As Judge Leventhal pointed out, the Supreme Court in the *Buckley* case was entering the "political thicket". In such a situation, it seems to me the Congress has the obligation to reassert its own responsibilities in the only way open to it, by initiating an appropriate constitutional amendment.

THE PROBLEM OF PACS

In addition to the more general problem of excessive campaign spending, the astronomical increase in the number of PACs and their influence in the voting patterns of many members of Congress has caused widespread concern. To some degree the activities of PACs can and should be limited by statute: for example, a limit could be set on the total of contributions from PACs that a Congressional candidate could receive.

However, how to control expenditures by PACs is another matter. In view of the broad ruling in the *Buckley* case, it is difficult to see how such expenditures can be controlled by statute, unless the Constitution is amended.

In the case of *Common Cause vs. Schmitt,* the Supreme Court this year upheld a lower court ruling that the Presidential Election Campaign Fund Act limitation of $1,000 on expenditures by an independent committee was invalid under the *Buckley* doctrine, even where the candidate had accepted public financing. This leaves a gaping hole in the structure of limitations on Presidential campaign spending. In the 1980 elections independent groups spent some $14 million (most of it for Ronald Reagan) or almost 50% of the expenditures allowable for a Presidential campaign.

This case illustrates the long-range damage that *Buckley vs. Valeo* will continue to do if the Congress and the State legislatures allow it to stand.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ALEXANDER (at the request of Mr. WRIGHT), for today, on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. PARRIS) to revise and extend their remarks and include extraneous material:)

Mr. FINDLEY, for 5 minutes, today.

Mr. COURTER, for 60 minutes, December 9.
Mr. FORSYTHE, for 5 minutes, today.
Mr. DORNAN of California, for 5 minutes, today.
Mr. DANNEMEYER, for 60 minutes, December 9.
(The following Members (at the request of Mr. WOLPE) to revise and extend their remarks and include extraneous material:)
Mr. BONIOR of Michigan, for 60 minutes, today.
Mr. SHANNON, for 5 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. RODINO, for 10 minutes, today.
Mr. LAFALCE, for 10 minutes, today.
Mr. ADDABBO, for 10 minutes, today.
Mr. ENGLISH, for 5 minutes, today.
Mr. BONKER, for 5 minutes, today.
Mr. MAZZOLI, for 5 minutes, today.
Mr. BONIOR of Michigan, for 60 minutes, on December 10, 1982.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:
Mr. WEISS, immediate prior to the vote on H.R. 7355 today.
(The following Members (at the request of Mr. PARRIS) and to include extraneous matter:)
Mr. BROOMFIELD.
Mr. YOUNG of Alaska.
Mr. GREEN.
Mr. GINGRICH.
Mr. DORNAN of California.
Mr. NAPIER.
Mr. ROBINSON.
Mr. RHODES.
Mr. FORSYTHE.
Mr. ARCHER.
Mr. EDWARDS of Oklahoma.
Mr. DENARDIS.
Mr. FIELDS in four instances.
(The following Members (at the request of Mr. WOLPE) and to include extraneous matter:)
Mr. MCHUGH.
Mr. MATSUI in three instances.
Mr. MONTGOMERY.
Mr. SIMON in two instances.
Mrs. BOUQUARD.
Mr. BONER of Tennessee.
Mr. D'AMOURS.
Mr. ROSE.
Mr. WON PAT.
Mr. BINGHAM.
Mr. GARCIA.
Mr. MCDONALD in five instances.
Mr. FRANK.
Mr. TRAXLER.
Mr. MOTTL in two instances.
Mr. SCHUMER.
Mr. HUBBARD.
Mr. PEYSER.
Mr. BONKER.
Mr. WIRTH.

ADJOURNMENT

Mr. BONIOR of Michigan. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 25 minutes p.m.) under its previous order, the House adjourned until tomorrow, Thursday, December 9, 1982, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5259. A letter from the National Adjutant, Disabled American Veterans, transmitting the proceedings of their national convention, held in Las Vegas, Nev., July 18-22, 1982 (H. Doc. No. 97-265); to the Committee on Veterans' Affairs and ordered to be printed.

5260. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the proposed conversion to contractor performance of the grounds maintenance function at the Naval Public Works Center, San Diego, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

5261. A letter from the Commissioner, Immigration and Naturalization Service, transmitting notice of 813 waivers granted to refugees for the second half of fiscal year 1982, pursuant to section 207(c)(3) of the Immigration and Nationality Act; to the Committee on the Judiciary.

5262. A letter from the Secretary of Health and Human Services, transmitting the executive summary of the final report of the evaluation of the administration for Native Americans training and technical assistance program, pursuant to section 810(e) of Public Law 93-644; jointly, to the Committees on Education and Labor and Interior and Insular Affairs.

REPORT OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the clerk for printing and reference to the proper calendar, as follows:

Mr. BEILENSON: Committee on Rules. House Resolution 623. A resolution providing for the consideration of H.R. 7357, a bill to revise and reform the Immigration and Nationality Act, and for other proposes (Rept. No. 97-947). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DYMALLY:

H.R. 7383. A bill to restore social, economic, and cultural well-being to the communities of American citizens, permanent resident aliens, and others whose lives, communities, employment, and social networks were disrupted and damaged when they were evacuated from their homes as a result of Executive Order Numbered 9066, issued February 19, 1942, and related actions of the Government of the United States of America during World War II; jointly, to the Committees on Agriculture, Banking, Finance and Urban Affairs, Education and Labor, Energy and Commerce, and Ways and Means.

H.R. 7384. A bill to provide individual reparations for wrongs committed against Japanese Americans and Aleut Americans, and other individuals relocated by the Government of the United States during World War II; to the Committee on the Judiciary.

By Mr. GORE:

H.R. 7385. A bill to amend the Consolidated Farm and Rural Development Act to provide that emergency loans not to exceed $5,000 may be made and insured under such act on the basis of estimated losses caused by disasters; to the Committee on Agriculture.

By Mr. GREEN (for himself, Mr. SMITH of New Jersey, Mrs. SCHNEIDER, Mr. UDALL, Mr. FISH, Mr. EDGAR, Mr. WYDEN, Mr. MARKEY, Mr. BARNES, Mr. FOGLIETTA, Mr. CROCKETT, Mr. SYNAR, Mr. FROST, Mr. SCHEUER, Mr. STARK, Mr. MITCHELL of Maryland, Mr. FRANK, Mr. WILSON, Mr. JEFFORDS, Mr. FAUNTROY, Mr. DELLUMS, Mr. HOWARD, Ms. OAKAR, Mr. YATES, Mr. OBERSTAR, Mr. RODINO, Mr. SOLARZ, Mr. LEHMAN, Mr. HOYER, Mr. RANGEL, Ms. MIKULSKI, Mr. STUDDS, Mr. PRITCHARD, Mr. MATSUI, Mrs. SCHROEDER, Mr. CONTE, Mr. CORRADA, Mrs. SNOWE, Mr. DWYER, and Mrs. KENNELLY):

H.R. 7386. A bill to amend the laws of the United States to eliminate gender-based distinctions, and for other purposes; to the Committee on the Judiciary.

By Mr. ROSE:

H.R. 7387. A bill to authorize the transfer of certain property to the town of Wrightsville Beach, N.C., to provide for the ownership by the town of a Federal desalting facility, to authorize the transfer of certain property to the city of Rosewell, N. Mex., to provide for the ownership by the city of a Federal desalting facility, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SCHUMER (for himself and Mr. LUNDINE):

H.R. 7388. A bill to authorize the Department of Housing and Urban Development to insure and otherwise promote the use of mortgage instruments with monthly payments and loan balances that are adjusted to reflect changes in a selected index which measures the rate of inflation or the rate of change in wages or consumer disposable income; to the Committee on Banking, Finance and Urban Affairs.

By Mr. VOLKMER:

H.R. 7389. A bill to freeze natural gas prices; to the Committee on Energy and Commerce.

H.R. 7390. A bill to allow the adjudication of claims against the United States for damages arising from the activities of the Army Corps of Engineers at the Clarence Cannon Dam project on the Salt River in the State of Missouri; to the Committee on the Judiciary.

By Mr. WON PAT:

H.R. 7391. A bill to amend title 10, United States Code, to authorize the Secretary concerned to transport to the place of burial the remains of a member of the uniformed services entitled to retired or a retainer pay who dies in a military medical facility; to the Committee on Armed Services.

By Mr. YOUNG of Alaska:
H.R. 7392. A bill to eliminate Coast Guard responsibilities regarding marine sanitation devices on small vessels, and for other purposes; jointly, to the Committees on Public Works and Transportation, and Merchant Marine and Fisheries.

By Mr. CONTE (for himself, Mr. PAUL, Mr. ROE, Mr. DUNCAN, Mr. PARRIS, and Mr. WEBER of Minnesota):
H.R. 7393. A bill to amend the Internal Revenue Code of 1954 to provide a refundable credit against income tax for social security taxes paid by an individual who has attained age 62 but not age 70; to the Committee on Ways and Means.

By Mr. BINGHAM (for himself, Mr. REUSS, Mrs. FENWICK, Mr. BEVILL, Mr. DONNELLY, Mr. D'AMOURS, Mr. EDGAR, Mr. LAFALCE, Ms. MIKULSKI, Mr. RANGEL, Mr. VENTO, Mr. WEISS, and Mr. WOLPE):
H.J. Res. 628. Joint resolution proposing an amendment to the Constitution of the United States relative to contributions and expenditures intended to affect congressional, Presidential, and State elections; to the Committee on the Judiciary.

By Mr. VENTO (for himself, Mr. PEASE, Mr. YOUNG of Missouri, Mr. OBERSTAR, Mr. GLICKMAN, Mr. KINDNESS, Mr. GILMAN, Mr. WASHINGTON, Mr. LOWRY of Washington, Mr. JOHN L. BURTON, Mr. HOYER, Mr. DWYER, Mr. WEISS, Mr. CROCKETT, Mr. PATTERSON, Ms. FERRARO, Mr. FRANK, Mr. BARNES, and Mr. HUBBARD):
H. Res. 624. Resolution expressing the sense of the House of Representatives with respect to the unacceptable rise in the price of natural gas to consumers; to the Committee on Energy and Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. GORE:
H.R. 7394. A bill for the relief of John Smitherman; to the Committee on the Judiciary.
H.R. 7395. A bill for the relief of Richard S. Young, Jr.; to the Committee on the Judiciary.

By Mrs. SCHNEIDER:
H.R. 7396. A bill for the relief of Dr. Mario J. Wexu; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 4821: Mr. CRAIG and Mr. ROBERTS of Kansas.
H.R. 4931: Mr. GOODLING.
H.R. 6347: Mr. OBERSTAR.
H.R. 6789: Mr. BEREUTER.
H.R. 7043: Mr. LELAND.
H.R. 7108: Mr. VENTO and Mr. BEREUTER.
H.R. 7315: Mr. SHARP.
H.R. 7372: Mr. SABO.
H.R. 7373: Mr. NOWAK, Mr. FRANK, Mr. MINISH, Mr. D'AMOURS, Mr. APPLEGATE, Mr. LEACH of Iowa, Mr. KASTENMEIER, Mr. MOTTL, and Mr. HUBBARD.
H.J. Res. 172: Mrs. SNOWE.
H.J. Res. 590: Mr. DONNELLY.
H.J. Res. 591: Mr. RATCHFORD and Mr. ROBERTS of South Dakota.
H.J. Res. 627: Mr. HOYER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

672. By the SPEAKER: Petition of the State Council, Republic of Nicaragua, relative to a peaceful solution in Central America; to the Committee on Foreign Affairs.
673. Also, petition of the National Association of State Auditors, Comptrollers and Treasurers, Nashville, Tenn., relative to Federal bankruptcy statutes; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R 6957

By Mr. MITCHELL of Maryland:
—On page 3, line 13, insert before the period the following: "*Provided*, That during 1983 total commitment to guarantee loans shall not exceed $150,000,000 of contingent liability for loan principal: *Provided further*, That total obligations for new loans under the Economic Development Revolving Fund shall not exceed $30,000,000.".

H.R. 7357

By Mr. EDWARDS of California:
—Page 20, at the end of the page, insert the following new section (and insert a corresponding item in the table of contents):

RESTRICTING WARRANTLESS ENTRY IN THE CASE OF OUTDOOR OPERATIONS

SEC. 114. Section 287 (8 U.S.C. 1357) is amended by adding at the end thereof the following new subsection:
"(d) Notwithstanding any other provision of this section, other than paragraph (3) subsection (a), an officer or employee of the Service shall not enter without the consent of the owner (or agent thereof) or a properly executed warrant onto the premises of a farm or other outdoor operation for the purpose of interrogating a person believed to be an alien as to the person's right to be or to remain in the United States.".

By Mr. MILLER of California:
—Page 59, line 10, strike out "by striking out" and all that follows through "labor" on line 19, and insert in lieu thereof the following: "by inserting '(a) in agricultural labor or services included within the provisions of section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)) or section 3121(g) of the Internal Revenue Code of 1954, or (b) in any other labor or services' after 'temporary services or labor'.".
—Page 60, strike out lines 1 through 3 and insert in lieu thereof the following:
"(1) under section 101(a)(15)(H)(ii) for an aggregate period longer than eight months in any calendar year, except in the case of agricultural labor or services which the Secretary of Labor, before the date of the enactment of the Immigration Reform and Control Act of 1982, has recognized require a longer period; or".
—Page 60, line 18, strike out "and" and all that follows through "Agriculture" on line 20.

Page 65, line 2, strike out "and the Secretary of Agriculture".

Page 66, line 14, strike out "and the Secretary of Agriculture".
—Page 60, strike out line 21 and all that follows through page 61, line 8.

Page 61, line 9, strike out "(ii)" and insert in lieu thereof "(2)(A)(i)".

Page 61, line 10, strike out "101(a)(15)(H)(ii)(b)" and insert in lieu thereof "101(a)(15)(H)(ii)".

Page 61, line 20, strike out "(iii)" and insert in lieu thereof "(ii)".

Page 64, line 12, strike out "able, willing, and".

Page 64, beginning on line 17, strike out "able, willing, or qualified" and insert in lieu thereof "qualified or available".

Page 64, line 19, strike out "able, willing, or" and insert in lieu thereof "actually available or are not".
—Page 61, line 19, strike out the period and insert in lieu thereof a comma.

Page 61, after line 19, insert the following: "and such certification has been issued."
—Page 61, after line 23, insert the following new clause:
"(iv) After the Attorney General has approved petitions in a fiscal year for a number of nonimmigrant workers classified under section 101(a)(15)(H)(ii) equal to the number of such workers for whom petitions were approved in fiscal year 1982, the Attorney General may not approve any additional such petitions for such workers in the fiscal year unless the Secretary of Labor has certified in writing to the Attorney General and to the Congress that there are sufficient funds and personnel available to adequately enforce the provisions of this subsection.".
—Page 61, line 20, strike out "may" and insert in lieu thereof "shall".

Page 61, at the end of line 23, insert the following new sentence: "Such fees and all penalties collected pursuant to this subsection shall be applied toward reimbursement of the costs of processing applications for certifications under this subsection, of making determinations of violations of this subsection, and of assessing and collecting such penalties.".
—Page 60, after line 3, insert the following new paragraph (and redesignate the succeeding paragraph accordingly):
"(2) under section 101(a)(15)(H)(ii)(a) unless the conditions described in subsection (c)(2)(B) have been met with respect to the employment of the alien; or".

Page 61, after line 23, insert the following new subparagraph (and redesignate the succeeding subparagraph accordingly):

"(B) The Secretary of Labor shall ensure that the following conditions are met with respect to employment of a nonimmigrant worker under section 101(a)(15)(H)(ii)(a) and eligible individuals in the job opportunity for which a certification under subparagraph (A) is sought:

"(i) the employer will provide adequate and safe housing without charge to the worker.

"(ii) If the employment is not covered by State workers, compensation law, the employer will provide, at no cost to the worker, insurance covering injury and disease arising out of and in the course of the worker's employment which will provide benefits at least equal to those provided under the State workers' compensation law for comparable employment.

"(iii) The employer will provide, without cost to the worker, or reimburse the worker for the cost of all tools, supplies, and equipment required for the worker to perform the duties assigned.

"(iv) The employer will provide three meals a day or, where under prevailing practice or long-standing arrangement at the establishment workers prepare their meals,

will furnish free, convenient, and safe cooking and kitchen facilities. Where the employer provides such meals, the job offer must state the reasonable cost to the worker of such meals.

"(v)(I) The employer will provide or pay for transportation and daily subsistence (consistent with clause (iv)) from the place from which the worker, without intervening employment, will come to work for the employer, to the place of employment.

"(II) The employer will provide safe and adequate transportation between the worker's living quarter and the employer's work site without cost to the worker.

"(vi) The employer guarantees to offer the worker employment for at least three-fourths of the workdays of the total period during which the work contract and all extensions thereof are in effect.

"(vii) The employer will keep accurate and adequate records with respect to the worker's earnings.

"(viii) The employer will furnish to the worker at or before each payday written statements including information on the worker's wages and deductions taken from wages.

"(ix)(I) The employer must pay a wage rate which will not adversely affect the wages and working conditions of similarly employed eligible individuals.

"(II) The employer must not discriminate in the wage rate paid between United States and foreign workers who are engaged in the same tasks.

"(x) The employer must provide for payment of wages not less frequently than biweekly or at such more frequent intervals as may be the prevailing practice in the employment area.

"(xi) If the cost of such transportation and subsistence described in clause (v)(I) is deducted from the wages of a worker, the worker shall be reimbursed the amount so deducted upon the worker's completion of 50 percent of the worker's contract period.

"(xii) The employer must provide the worker with a copy of the work contract between the employer and the employee, which contract shall contain all of the information pertaining to the requirements set forth in regulations issued under this paragraph.".

—Page 61, before line 24, insert the following: "In addition, the Secretary of Labor shall ensure that the employer shall pay each nonimmigrant worker under section 101(a)(15)(H)(ii)(a), at the end of the contract period, an additional amount equal to the amount of taxes that the employer would have paid under the Federal Insurance Contributions Act and under the Unemployment Compensation Act with respect to the employment of that worker if such employment were included in the definition of employment for purposes of the imposition of such taxes.".

—Page 61, strike out line 24 and all that follows through "(ii)" on page 62, line 4, and insert in lieu thereof the following:

"(B)(i) The Secretary of Labor may not issue a certification under subparagraph (A) if a strike or other labor dispute involving a work stoppage or layoff of employees is in progress in the occupation and at the place the alien is to be employed. If, after such a certification is issued and during the period of the certification, such a strike or other labor dispute occurs, the certification shall be automatically suspended while such strike or labor dispute is in progress.

"(ii) The Secretary of Labor may not issue a certification under subparagraph (A)".

Page 62, line 13, strike out "clause (ii)" and insert in lieu thereof "this clause".

—Page 62, beginning on line 4, strike out "the employer" and all that follows through "and" on line 7.

Page 62, beginning on line 9, strike out "at any time" and all that follows through line 12 and insert in lieu thereof the following: "has not complied with the terms of a labor certification, or, if the Secretary has assessed a civil penalty for failure to comply with such a term, that the employer has failed to pay the penalty.".

—Page 62, line 19, strike out "may not require" and insert in lieu thereof "shall require".

Page 62, line 20, strike out "more than 50" and insert in lieu thereof "at least 80".

Page 63, line 10, strike out "the recruitment of" and insert in lieu thereof "a recruitment period of at least 60 days for".

—Page 62, line 24, strike out "within seven days of" and insert in lieu thereof "promptly after".

Page 63, line 9, strike out "the" before "criteria".

—Page 63, beginning on line 18, strike out "the date the aliens depart for work with the employer" and insert in lieu thereof "50 percent of the period of the work contract for which the certification was issued has elapsed".

—Page 63, after and below line 21, insert the following: "The failure to provide timely notice under clause (ii) does not preclude denial of an application based on a standard described in that clause.".

—Page 64, line 2, insert "or user's" after "member's".

Page 64, line 3, insert "or user" after "member".

Page 64, beginning on line 3, strike out "for representations made in such petition or application" and insert in lieu thereof "under this subsection".

—Page 64, at the end of line 21, insert the following new sentence: "In determining whether or not an individual referred is qualified, the individual's initial level of proficiency or productivity shall not be a basis for establishing that the individual is not qualified.".

—Page 66, line 2, strike out all that follows the first period.

Page 66, after line 2, insert the following new paragraph:

"(7) Any person aggrieved by a violation of this section or any regulation under this section with respect to aliens classified as nonimmigrant workers under section 101(a)(15)(H)(ii) may file suit in any district court of the United States having jurisdiction of the parties, without respect to the amount in controversy and without regard to the citizenship of the parties and without regard to exhaustion of any alternative administrative remedies.".

—Page 66, line 9, insert after "(d)" the following new sentence: "The Secretary of Labor, in consultation with the Attorney General, shall issue regulations implementing the amendments made by this section.".

By Mr. MINETA:

—At the end of title II, part A (page 59, after line 6), insert the following new section:

SEC. 205. Section 202(c) (8 U.S.C. 1152(c)) is amended by striking out "six hundred" and inserting in lieu thereof "3,000".

EXTENSIONS OF REMARKS

IFAD FUNDING SHOULD BE APPROVED

HON. MATTHEW F. McHUGH
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. McHUGH. Mr. Speaker, among the items that remain to be dealt with before the Congress adjourns, Mr. Speaker, is the question of whether the United States will keep its commitment to the International Fund for Agricultural Development (IFAD).

Created with significant OPEC support following the 1974 U.N. World Food Conference, IFAD is a promising agency whose mission is to increase international lending to small farmers in the poorest countries.

While the United States contributed generously to the initial funding for IFAD, we have yet to make any payment toward the $180 million U.S. contribution negotiated by the Reagan administration and authorized by the Congress. The United States is already 2 years behind in payments to what was to have been a 3-year replenishment.

Unless we make definite provision for IFAD in the next version of the continuing resolution, Mr. Speaker, there appears to be a serious risk that the Fund's operations will be severely damaged. Indeed, the future of the agency itself may be called into question.

For the benefit of those of our colleagues who may not be familiar with IFAD or with the likely consequences of our failure to provide adequate funds in the continuing resolution, I am inserting three recent news articles and an editorial from the Christian Science Monitor into the RECORD at this point:

[From the Christian Science Monitor, Nov. 30, 1982]

FULFILL AMERICA'S PLEDGE TO THE HUNGRY

(By George Dorsey)

In the rush of business it faces during the present lame duck session, the Congress may, by inaction, deliver a fatal blow to an international development organization that is helping the poorest people in this world pull themselves up by their bootstraps.

The organization in jeopardy is the International Fund for Agricultural Development (IFAD), the only development agency that has marshaled OPEC money on a scale that covers a really substantial portion of its budget and the only such agency governed equally by the industrial countries, OPEC, and the non-OPEC developing countries.

This three-way sharing of authority has a particularly significant element. In having a say in policy discussions, the recipient developing countries not only contribute a valuable, firsthand understanding of the needs of the third world—their participation also paves the way toward a friendly reception when projects are actually started up. An IFAD initiative is not looked upon by third-world governments as an external intervention to be regarded with suspicion. Another unique aspect of the organization is that all of its funds are directed toward helping the poorest farmers and the landless laborers.

The present danger to IFAD is procrastination or lack of interest on the part of the leading industrial nation, the United States of America. The fate of IFAD is now tied to the question whether the Congress, before this session adjourns, approves a specific appropriation for the agency, in line with the pledge given by the US at a bruising replenishment meeting in Rome last January.

At that meeting the head of the US delegation sought "to reassure the other members of the Fund that the US government will make every effort to obtain funds for our contribution of $180 million [for three years] . . . at the earliest possible date."

Some governments, however, were not reassured. Several, in fact, reacted strongly to what some called a "US attempt to delay IFAD to death."

And, in truth, during the ensuing congressional process, the administration, for the most part, did not exert itself, despite President Reagan's agreement with other heads of state at the Cancún summit meeting last year, to press for "prompt replenishment" of IFAD's resources. The calendar 1981 passed without a single dollar put up by the US. Without prompt congressional action, a second year will go by with no funds for IFAD.

"Unless the administration moves quickly to support funding," says Larry Minear, secretary of the Interreligious Taskforce on US Food Policy, "IFAD's supporters on the Hill may have difficulty prevailing, leaving President Reagan's commitment and the existing congressional authorization unfulfilled."

There has been in some US circles resentment that IFAD never attained the 50-50 financing by OPEC and the industrial countries that was envisaged when the organization was born in 1977. The present split is 57 percent funding from the industrial countries and 43 percent from the OPEC countries. Yet in the tough negotiations leading up to the January meeting, the US won important concessions, succeeded in broadening the burden-sharing, and agreed to go ahead. While persuading both OPEC and the other industrial countries to raise their contributions, the US lowered its three-year pledge from $200 million to $180 million.

The total agreed IFAD budget for 1981-83 is $1.1 billion. Thus, for every dollar put up by the US, six are contributed by the other member countries.

The trouble is that the first American dollar has yet to appear—while many other donor countries have paid in more than 50 percent of their commitments. Some have sent in 100 percent in an effort to contain damage to the organization's work program.

Abdelmuhsin Mal-Sudeary, the Saudi Arabian who has headed IFAD since its inception, said recently: "The delay by the US is having a very negative impact on IFAD. It is slowing down the pace of the Fund's operations just at the time when the poorest countries urgently need IFAD assistance to combat their deteriorating food situation, especially in Africa, and it also undermines the excellent cooperation between the OECD and OPEC countries.

"What is at stake, in my opinion, is not only the immediate future of IFAD but also the credibility of American commitment and the very role of the US in the fight against world hunger."

[From the Christian Science Monitor, Nov. 30, 1982]

AMERICA'S PROMISE TO THE POOREST

The world's fund to help the very neediest has taken steps to reassure the United States Congress that it is living up to its mandate. Now Congress ought to respond by supplying America's pledged share of support for this fund, the International Fund for Agricultural Development (IFAD).

For nearly two years the US has withheld its budgeted payments. The Senate Subcommittee on Foreign Operations wanted to be sure that IFAD's staff was not getting too big, that the early US hope for OPEC to supply half of IFAD's funds would be fulfilled, and that IFAD gear its development lending to projects designed by other agencies like the World Bank, rather than initiate projects on its own.

IFAD offers reassurances such as these: Its staff freeze of the past two years has been extended for 1983 and a new study undertaken to keep its staffing lean. OPEC's share of the funding has climbed from 40 to 43 percent, while the US share has dropped from 35 percent to 29 percent. And IFAD has indicated its commitment to seek out projects initiated by existing agencies (though this is not always possible since IFAD's mandate to reach the poorest of rural poor is not always the aim of other development agencies these days).

This year the Reagan administration, no spendthrift on foreign aid, has requested $65.4 million of its $180 million promise for 1981-1983. It needs to push its case this week, as noted in today's Opinion and Commentary article, "Fulfill America's pledge to the hungry."

If Congress follows through, the US delegation can take more than empty promises to the fund's governing council Dec. 13.

But for Congress to try to get by with mere half-loaf tokenism could lead other impatient IFAD donors to drop their own commitments and the fund to unravel altogether. Why run such risks—especially when everyone seems to agree (including Congress and the administration) that IFAD is one joint venture on the world scene that really works?

UNITED STATES IS SAID TO LAG ON PLEDGE TO FOOD AGENCY

(By Henry Kamm)

ROME, Dec. 4.—The head of a United Nations agency that seeks to increase food production in impoverished countries says his

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

organization may be in jeopardy because Washington is refusing to fulfill a financial pledge.

The agency, the International Fund for Agricultural Development, was established after a 1976 agreement to help small farmers and the landless in the world's poorest countries. It is financed both by the industrialized nations and by the Organization of Petroleum Exporting Countries. In its first three years of operation, the industrial countries contributed $569 million, the OPEC nations $435 million.

The United States, an initiator of the agency, contributed $200 million in the first three years. President Carter offered $230 million for the 1981-83 replenishment; President Reagan reduced that to $180 million but none of it has been contributed.

The three-year total was authorized in both houses of Congress and $40.5 million was appropriated by the House for the last fiscal year. The Senate struck it out, and its view prevailed.

The Senate action, led by Senator Robert W. Kasten, Jr., Republican of Wisconsin, was based on a sentiment that the OPEC nations, which hold the same number of votes as the industrial countries, were committed to match their contribution. There was also a feeling that the fund had exceeded its projected staff size. It employs 74 people in the professional category.

On Wednesday, acting on the Administration's request for $65.4 million for the 1983 fiscal year, which began Oct. 1, an appropriations subcommittee headed by Mr. Kasten reduced the amount to $10 million. This would leave the United States to contribute $170 million next year to meet its pledge, which has not been withdrawn.

This is believed to be virtually impossible, and Philip Birnbaum, the fund's vice president, who is on loan from the State Department's Agency for International Development, said that the situation was "a minor tragedy."

The fund's president, Abdelmuhsin M. al-Sudeary, an agronomist from Saudi Arabia, said that if the agency was unable to finance its activities, "no other effort like this will succeed."

Mr. Sudeary said that "the spotlight will be on the United States" Dec. 13-15 at the annual meeting of the fund's governing council.

[From the Christian Science Monitor, Dec. 8, 1982]

UNITED STATES DRAGS FEET IN CONTRIBUTING TO JOINT WEST-OPEC AGRICULTURAL FUND

(By Richard M. Harley)

BOSTON.—The only major joint effort by the West and the Organization of Petroleum Exporting Countries (OPEC) members to fight world hunger appears to be losing sustenance from the United States.

It's known as the International Fund for Agricultural Development (IFAD). It was designed in 1976 to help the world's poorest pull themselves up by their bootstraps. But without strong US support, IFAD's officers say, the global compact could now hit the skids.

Last week the Senate Appropriations Committee set aside $10 million as this year's US payment to replenish the $1 billion fund. That was more than the committee's zero allocation last year, but far short of the Reagan administration's requested $65.4 million. For two years, the US has paid none of the $180 million it promised for IFAD's 1981-83 budget. The outcome awaits talks Wednesday in the House Appropriations Committee and its meeting with the Senate.

With US payments lagging in recent years, IFAD officials fear other donors (US allies and OPEC) will withhold their payments, sending the fund into disarray—a prospect doubted by the US administration. One State Department official says the US still aims to get the full US pledge of $180 million, though probably not in the current budget cycle.

Earlier this year, delegates from Canada, France, and West Germany said they were exasperated over US foot-dragging. They are expected to express their concerns to Secretary of State George P. Schultz, who will be in Rome next week when IFAD meets. IFAD, ironically, is one of the few international agencies that gets high ratings from rich and poor countries alike—including the US.

"I think if IFAD were judged on its merits in helping to reverse poverty and to serve US interests abroad, it would be getting far better treatment by the administration and Congress," says Larry Minear of the Interreligious Task Force on US Food Policy.

The congressional impasse surfaced in recent years in the Senate subcommittee on foreign operations. It has been trying to get IFAD back to its earliest definition carved out in 1976: a $1 billion fund, leanly staffed, with OPEC and Western countries paying an "equitable share." They do not want IFAD to become a huge development bureaucracy.

IFAD officials say that they have made every effort to respond to Congress's concerns, although circumstances make it unreasonable for IFAD to be held uncompromisingly to the earliest definition.

In fact, IFAD began in 1977 only after a compromise in which the Western negotiators, including the US, agreed to pay 57 percent with OPEC paying 43 percent. The fund's staff has grown, although a General Accounting Office report last year lauded IFAD on keeping its staff lean. The fund's responsibilities also grew since it embarked on its second $1 billion lending program in 1981. Then Iran's once-generous donation unexpectedly dried up after its revolution.

Despite growing demands on the agency, IFAD officials say it has extended its staff freeze for the third straight year and committed itself to fund existing projects wherever possible (another congressional concern). Officials say OPEC countries individually have increased their shares dramatically after Iran dropped out of the fund, so that it is unreasonable for OPEC as a bloc to be expected to pay more than its current 42 percent.

The Senate Appropriations Committee report stated that IFAD has made some, but still relatively little, progress toward meeting its concerns. It said that increased US contributions next year hinge on whether OPEC gives more—a condition IFAD officials say will be very difficult given the economic difficulties faced by those donors.●

THE SOVIET UNION AFTER BREZHNEV

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ARCHER. Mr. Speaker, the following article, which recently appeared in the Economist, presents an interesting analysis of post-Brezhnev Soviet Union policy options which might affect our own policies in regard to the Soviet bloc.

The article provides a great deal of food for thought as we approach further decisions in this country regarding foreign policy.

The article follows:

BREZHNEV, ANDROPOV: A BURIAL AND A BIRTH?

A man who joined the Soviet Communist party just after its collectivization policy had caused the death of 14 million peasants, and while it was engaged in the subsequent process now known as Stalin's Great Terror, is no shrinking violet. Yuri Andropov's climb up the ladder of Soviet power did not have to wait until his ambassadorship in Hungary during the crushing of the Hungarian 1956 rebellion, or the years he later spent polishing up the KGB, to make it clear that he is a tough servant of his party's and his country's interests. Let the word "liberal" be excised from future discussion of Russia's new leader. Nevertheless, there are three reasons for thinking that tough Andropov's inheritance of the crown which death took away from Leonid Brezhnev could, with luck and judgment, usher in a better period for Russia, and for the world which has to deal with Russia.

The first is simply the fact that there has been a change. Leonid Brezhnev was chosen in 1964 by a rattled Soviet Communist party, after its experiences with Stalin and Khrushchev, as a man of order, conservatism and consolidation; and the last eight years of the great consolidator's life were marked by an illness which he faced with courage but also with steadily growing immobility. From Brezhnev neither innovation nor a leap of the imagination was to be expected.

The second is the way the change took place. Everybody knew that Brezhnev wanted to be succeeded by Konstantin Chernenko, and yet within 30 hours of the announcement of his death the party he left behind had "unanimously" picked somebody else. Not exactly a vote of confidence in Brezhnev.

The third reason is Andropov's own record. After the Hungarian rebellion, he helped to choose as Hungary's new leader Kadar who, having ruthlessly stamped out the last embers of revolution, then began the only experiment with imaginative semi-change in the Soviet world that has ever won the Russians' blessing. At the KGB, Andropov gave that organization a new urbanity and sophistication without in the least diminishing its skill at spying and dissident-repression.

AN INTELLIGENT TOUGH

Andropov is a tough, but he is an intelligent tough, not just the iron-bottomed sort. As the west adjusts itself to live with post-Brezhnev Russia, it needs to have a clear picture in its mind of (a) what it wants from Andropov; (b) what Andropov will probably want to do with the Russia he has inherited; and (c) how these two things might be made to pull in the same direction.

What the west wants from Andropov is an understanding that "detente" will mean the same for him as it means for the west. The last attempt at detente, in the early 1970s, collapsed because Brezhnev and the west thought that a time when it was lending

huge amounts of money to communists was no time for Russia and its friends to be punching their way around the world. The Brezhnev government thought it could collect the economic benefits of detente while Russia and its allies used force, or the threat of force, to help their own interests and damage the west's interests in assorted parts of the globe. Poisoned by such a contradiction, detente was doomed to die: Angola, Ethiopia, Afghanistan, Kampuchea and Poland were the drum-beats at its funeral.

In the jargon of these things, Yuri Andropov has to decide whether his foreign policy is to be a limited one, or an unlimited one. The west has a limited foreign policy. It wishes to prevent the expansion of communist power. It would like to encourage the growth of liberalism inside the communist world by non-military means. But it does not believe that it can, or should, aim for the removal of Marxism-Leninism from the face of the earth. Such ideas exist only in the curlicues of a few far-right-wing minds, and are the policy of no western government.

Brezhnev's Russia, on the other hand, had an unlimited foreign policy. It believed it had a duty to help history remove capitalism and multi-party pluralism from the face of the earth, and not just a theoretical duty. On five occasions in the past seven years the Russians or their allies have given history a forceful shove in the desired direction. To be sure, Brezhnev was judicious in his use of force, unleashing Russian or Cuban or Vietnamese soldiers only when he thought it was safe to do so. But judiciousness in the application of a bad idea is not the same as giving the idea up.

If there is to be another go at detente, it cannot be on so lopsided a basis. There will have to be an agreement that detente rules certain things out. Of course, the ideological war of words will continue (and it should be thought no more offensive for Reagan to say that the west's ideas will eventually beat rotten old Marx's than it is for Andropov to say the opposite). The two alliances will continue to defend their borders, and to send money and arms and advisers to clients outside those borders. This relatively restrained sort of competition may occasionally lead to a non-communist country become a communist one or—Moscow papers please copy—vice versa.

What should be ruled out is the use by either superpower, or by their main allies, of their own soldiers to settle a political dispute in any country where this would change the international balance of power. The world being a compicated place, the application of this principle will sometimes be fuzzy-edged. The principle itself is perfectly plain. Real detente means, for both sides, less jostling for advantage.

REFORM NEEDS PEACE

If Andropov is willing to consider real detente, this could slot neatly into what he should be waiting to do with Brezhnev's Russia. The biggest worry for the man taking over the top desk in the Kremlin in 1982 is the creaking incompetence of most of Russia's economy. On official statistics, the country is sliding steadily down to zero growth. Its industry is failing to reach even the regularly lowered targets given to it. Its farms are so inefficient that Russia will probably have to import 20-30 million tons of grain a year throughout the 1980s. And the official statistics paint too bright a picture. They conceal the rapid decay and breakdown of many non-military products; the waste that piles up in the by-ways of the distribution system; the net work of bribery and private deals that crisscrosses the official economy. The west's economy is in a mess, but most honest Russians admit that their troubles are even deeper-rooted.

There are two ways in which Andropov might tackle the cleansing of the Brezhnevian stables. One is the classical Soviet way—to throw more investment and more planners at the problem, shoot more of the bribers and speculators (there was a rattle of firing squads earlier this year), and meanwhile tell the KGB to squash malcontents who dislike the fact that more investment means less consumption. If this is the way Andropov chooses to play it, the ewest could be in for a hard time, because he may try to divert his people's attention from the rigor at home by a headline-catching policy abroad. That might mean pulling strings in the Palestine Liberation Organization, to block an Arab-Israeli peace; sending more Cubans to help Central American guerrillas; even risking a prod at the west's sources of oil in the Gulf.

But this may not be the way Andropov chooses to play it. The alternative to a policy of throwing more investment planners at the Soviet economy is for the toughly intelligent Andropov to try real economic reform. Real reform means giving more economic freedom to managers and workers in factories and collective farms, and allowing those who use this freedom successfully to spend the extra money they make more or less as they wish. Which is where real detente could slot into real reform.

Andropov's military budget must already be making him groan, because the 3-5%-a-year real increase Russia's generals have come to expect over the past 15 years is eating up a steadily growing share of a slower-rising Soviet national income. The squeeze will get even worse in the next few years, if changes in missile technology make Russia's land-based missiles vulnerable to American attack and therefore oblige Andropov to put the missiles out to sea in a fleet of hugely expensive new submarines. All generals hate budget cuts. To get his generals to accept a cut, Andropov must have a foreign policy which even to their suspicious eyes permits a little military relaxation. He needs a believable detente if he is to be able to build a Russia his people can believe in.

LET HIM HAVE OPTIONS

How can the west encourage Andropov to plump for reconstruction at home and peace abroad rather than internal rigor and external pugnacity? By offering him two choices, one military, the other economic.

First, the countries of the western alliance should convince themselves (because that is the only way to convince Andropov) that they will not allow the Soviet Union to get a commanding military lead over them anywhere. Russia should be allowed no permanent first-strike nuclear possibility against either the United States or western Europe (both of which it temporarily has at the moment). Nor should it be allowed a big enough lead in numbers of soldiers and tanks and artillery pieces to enable it, under the umbrella of nuclear parity, to contemplate a non-nuclear war in Europe or the gulf.

Second, he should be offered an economic choice too. If his decision is for reform-plus-detente, and against repression-plus-expansion, his Russia can have a normal economic relationship with the west—"normal" meaning the sort of relationship the west has with any other country, easy credits and all, minus only the sort of western exports that could directly help Russia's military machine. If his decision goes against reform-plus-detente, however, Russia should not be able to go on enjoying the benefits of economic normality. It should face special restrictions on the flow of western credits. It should have less access to the west's technology. It should, in short, be subject to economic as well as military containment.

STRAWS TO WATCH FOR IN THE WIND

The next few months, perhaps the next few weeks, should show which way Andropov is leaning. An Andropov leaning towards reform-plus-detente could look for a deal in the Geneva missile talks which would remove the sword of a Russian first strike now hanging over western Europe. He would consider a settlement in Afghanistan which left behind in Kabul the non-communist government most Afghans obviously want, provided that government bound itself not to do things that could hurt Russia: in short, a "Finlandization" of Afghanistan. He would invite the Cuban army to leave Angola, so that the west could invite the South African army to leave Namibia. There will be no shortage of straws to show which way the Andropov wind is blowing. If not a straw moves, get ready for hard frost.

It would be dewy-eyed to assume that Andropov's decision will be the right one. There is no conservative like the revolutionary who has reached the top, and this one's metal seems unyielding. The ground for hope is that the intelligent and conscientious Andropov, looking around him at the Russia he is now responsible for, may see the need to do what most people think an intelligent and conscientious Soviet leader should want to do for his country. The thing is to be ready for him, either way.●

TRIBUTE TO CONGRESSMAN HENRY REUSS

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. MITCHELL of Maryland. Mr. Speaker, I am very proud to join in this tribute to my fine colleague, Chairman HENRY REUSS. The announcement of Chairman REUSS' retirement and the realization that he will no longer serve in this Chamber gives us a chance to reflect on his illustrious career as a public servant.

I have served both on the House Banking, Finance, and Urban Affairs and the Joint Economic Committees with Representative REUSS. He has proven to be a capable leader in these areas and others.

While I believe we all admire and will remember Representative REUSS best for his economic expertise, let us not forget that his legislative and policy interests have expanded beyond this area. For example, it was HENRY REUSS who was instrumental in the formation of the Peace Corps. I believe we will all agree that the estab-

lishment of this fine group of young people stands out among the country's greatest accomplishments.

It is also Representative REUSS who has played a critical role in bringing congressional attention to vital water pollution issues and insuring both public and private sector cooperation during the seventies.

Chairman REUSS' commitment to the elderly, and lower income citizens has stood out among his many efforts. For example, some years ago he was among the first to call for enactment of a 20-percent increase in social security benefits.

I am particularly grateful that, under the chairmanship of HENRY REUSS, the Joint Economic Committee has ridden herd over a number of critical issues—to include the problems of urban economic blight and youth and minority unemployment. His foresight in these areas has led the way for the committee to include such issues as top priorities.

Chairman REUSS will be sorely missed in this House. He is a steady, positive influence who is well respected for his strength, intellect, and compassion. Needless to say, I still believe we will continue to work closely with the chairman although he will not be physically with us. I am certain that his work during his retirement will remain a vital part of the workings of the Congress. I wish him all the best.●

HENRY REUSS: A MAN OF ACCOMPLISHMENT

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. DOWNEY. Mr. Speaker, I am participating in this special order today to express my personal thanks to my friend and colleague from Wisconsin, Representative HENRY REUSS. It is an honor for me to take part in this tribute to him.

Over the last 28 years Congressman REUSS has been an outstanding contributer to this Congress and our Nation's policies. He has proven himself an expert in monetary affairs while serving as chairman of both the Banking, Housing, and Urban Affairs Committee and the Joint Economic Committee. His innovative ideas, often proposed as new policy, were all formulated with the concept of economic fairness in mind. For example, he has often been in the forefront of the effort to bring about equitable tax reform. This goal has always included making sure that every American pays their fair share in taxes and bears their part of our Nation's existence. The strengthening of the U.S. economic situation, both at home and abroad, has always been one of his major concerns and through sound economic legislation he has also sought to strengthen and improve American industry and productivity. Overall, he has proven that he understands the needs of all the American people and his achievements, policies, and writings all reflect this understanding.

Congressman REUSS, although best known for his economic expertise and accomplishments, has also achieved admirable results in other areas. I would now like to take the time to mention just a few.

As Representative of Wisconsin's Fifth Congressional District, he has concentrated on revitalizing and rebuilding old neighborhoods into livable housing areas. On this local level his achievements include helping to create jobs in his local area, rebuilding the Grand Avenue and developing the desolated Park-West Freeway into a new residential, commercial community. All of this has been achieved while representing a diverse constituency including the rich, poor, and middle class, most races and religions and both a blue- and white-collar work force.

His list of achievements also includes being partly responsible for the establishment of the Peace Corps and the Ice Age Scientific Reserve and Trail and, as I have already expressed, he has been a strong advocate of equal right to housing policies. Finally, he has made admirable gains in, and contributions to, ecology by concerning himself with the pollution problems of our cities and rivers.

The overall conclusion that I draw from highlighting this man's congressional career is that he took action in many diverse areas of importance gave all of them his undivided attention and was, to his credit, successful in all of them.

I would also like to take some time out to express my sincere, personal thanks to HENRY REUSS. Like this Congress, I am going to miss his presence and I find it difficult to imagine this Congress reconvening without him. I am especially going to miss our daily lessons in vocabulary. Well, I guess I do not have to carry my pocket dictionary any more.

When I think back over the past several years beginning with when I first came to Congress, I am not only reminded of the fine career he has led. I also come to realize just how much this man has done for me personally. His guidance and advice, always unselfishly given, has always proved instrumental in my own efforts. Also, becoming his friend has been one of my finest experiences since coming to Washington. It is, in fact, both an honor and privilege to have served in the same Congress with him.

To find the right words to express my thanks is difficult. Let me just say that I will never forget all that he has done for me, this Congress, and the Nation nor will, I believe, anyone else.

Thank you and good luck in the many productive years which lie ahead of you.●

THE SOVIETS AND THE PEACE MOVEMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. McDONALD. Mr. Speaker, a barrage of criticism has been leveled at those opposing the nuclear freeze proposal. Most of this criticism relies on smears and slurs and not on facts, which is what freeze opponents have relied on in their critiques. Mr. John Rees, an internationally recognized journalist, has been the target of many of these unfounded attacks because of his understanding of Soviet manipulation of the peace movement.

In the December 8, 1982, issue of the news magazine The Review Of The News, Mr. Rees answered the charges of the freeze defenders and then went on to once again show open communist and Soviet involvement in the peace movement. In the concluding excerpt from his perceptive article, Mr. Rees reviews Moscow's active measures campaign and manipulation of the American nuclear freeze campaign. I commend his article to my colleagues.

The article continues:

[From the Review of the News, Dec. 8, 1982]

MOSCOW'S ACTIVE MEASURES

The International Department of the Central Committee of the Communist Party, Soviet Union, as well as the C.P.S.U.'s International Information Department, with assistance when required from the K.G.B., are now running the most complex active-measures campaign since the end of World War II. Its purpose, as former K.G.B. major Stanislav Levchenko put it, is to make permanent the new superiority of Soviet strategic military forces over those of the United States. Hence the "nuclear freeze" adventure.

This active-measure campaign operates by working to persuade public opinion in America and the Free World that the efforts of the United States to modernize its antiquated strategic-nuclear forces and its European-theater nuclear forces are a "threat to peace." It maintains that this "provokes" the Soviet Union despite the fact that the purpose of the U.S. nuclear weapons is to *deter* a Soviet first strike and prevent the invasion of Western Europe.

In the mid-1970s, many Soviet active-measures campaigns were operated in Europe and the United States with a variety of goals. The primary strategy was to weaken European confidence in the United States and to reduce the capability of the U.S. to defend itself and the Western world. Since 1981, however, the campaigns of what the W.P.C. terms "the fighters for peace"

have been related to a "nuclear weapons freeze."

On February 23, 1981, Leonid Brezhnev delivered an address to the 26th Congress of the Communist Party of the Soviet Union in which he called for a nuclear "moratorium." Within a matter of days the propaganda specialists had equated that with a proposal for a "nuclear freeze." And within four weeks the hard-line disarmament groups in the United States assembled several hundred "peace activists" at Georgetown University over March 20-22, 1981, to endorse a national "nuclear freeze" campaign. Sponsoring groups included the American Friends Service Committee, Clergy and Laity Concerned, the Mobilization for Survival, and Physicians for Social Responsibility. A Nuclear Freeze Campaign office had (Surprise!) been operating quietly in Washington, D.C., since February of 1981.

Attending the keystone "freeze" meeting in Georgetown were two important Soviet officials. One was Oleg Bogdanov, representing the Institute of the U.S.A. and Canada. He has been identified by John Barron as "an International Department specialist in Active Measures, who flew in from Moscow." Also present was Soviet Embassy counsellor Yuri S. Kapralov, named in Barron's article as a "KGB officer." Comrade Kapralov, a virtual "ambassador" to the U.S. disarmament movement since his posting to Washington in 1978, has visited many parts of the U.S. to address "peace" groups and to participate in meetings in which he is no mere observer.

At the "freeze" campaign founding in Georgetown, "K.G.B. officer" Kapralov addressed an overflow session of the conference and discussed the "freeze" concept with a panel of "anti-war" activists.

As reported in the Communist Party newspaper Daily World by Terry Cannon, who is styled "an activist in the U.S. Peace Council," Kapralov told the panelists that the Soviet Union welcomed the "freeze" proposal. "You mean you agree with it?" a panelist asked. " 'Absolutely,' answered Kapralov, 'I think it's great.' "

The imprimatur of the Soviet Union had been openly given, and the "nuclear freeze" campaign was offically under way. Its first focus would be on the United Nations Second Special Session on Disarmament in June 1982. When the U.S. "peace" groups assembled in October 1981 to commence planning the June 1982 "Rally for a Nuclear Freeze and Disarmament" in New York, participants included the U.S. Peace Council; Women for Racial and Economic Equality, the U.S. affiliate of the Soviet-run Women's International Democratic Federation; and, the Prague-based Christian Peace Conference.

Within two weeks, the Communist Party was openly participating in the organizing meetings along with the (Castroite Communist) Puerto Rican Socialist Party, the Communist front National Lawyers Guild, the Women's International League for Peace and Freedom, and Women Strike for Peace. The activities of the Communist Party, U.S.A., were reported on during that secret Communist conference in Milwaukee by Politburo member James E. Jackson who also serves on the Presidium of the World Peace Council. He quoted U.S. Senator Gary Hart's praise of the "nuclear freeze" campaign and stated: "The place of every Communist is in this army of fighters for peace."

And, said Comrade Jackson, "Nothing must divert the peace front away from the mainstream peace actions and organizational formations, such as the Freeze and the coalition for the June 12th United Nations Plaza Rally in New York City." Jackson praised Communist Party, U.S.A., functionary Michael Myerson, and the U.S. Peace Council which Comrade Myerson directs, as being "in the first position among these most advanced sectors of the peace front." He also told the C.P.U.S.A. activists that "an imperative for us in fulfillment of our role in the broad peace movement is to recruit from our contacts peace cadre into the Communist Party clubs. This obligation must be assumed alongside that of doing our duty to further the growth of the U.S. Peace Council."

Communist Party official Jackson also spelled out the domestic political purpose of the June 12th "Rally for a Nuclear Freeze and Disarmament," declaring: "June 12th will constitute an unprecedented mobilization of potential primary and general election canvassers and crusaders to wipe out Reaganites from public office. Those hundreds of thousands . . . [can] make the difference in the election campaigns of '82." As he explained: "The campaign to put a peace (Freeze) initiative proposition on the ballot in every congressional district, city and state will engage millions in a highly politicized activity. . . . All of this political energy will have its November pay-off. . . ."

COMRADES GET THEIR ORDERS

Michael Myerson, you will remember, is executive director of the U.S. Peace Council and a member of the C.P.U.S.A. National Council (as the Central Committee is currently tagged). Myerson reported his workshop's proposals at the secret Communist meeting in Milwaukee and all were adopted unanimously. Special attention was given to providing Communist help to develop "a national trade union peace network out of the local union activity on behalf of the Freeze and in support of June 12." In language reminiscent of a Soviet commissar, Myerson gave Communist Party members their orders:

"Every club discuss concretely at its next meeting how it is going to build for June 12.

"That there be a strong Party presence on June 12th, with banners and literature in addition to the Party press.

"That where the U.S. Peace Council (USPC) exists, we work with others to aid its participation for June 12; where it doesn't exist we work with others to try to launch local Peace Council participation with buses and banners. . . ."

By this time, Myerson and other World Peace Council and U.S. Peace Council activists had been involved in preparations for the June demonstration for many months. Early in March, Comrade Myerson sent a letter to U.S. Peace Council members announcing that "the US Peace Council has made mobilization for June 12 its first priority for the next 100 days." After noting that "local metropolitan June 12 coalitions are forming in Boston, New York, Philadelphia, Chicago, San Francisco and other cities," Communist Party official Myerson provided another commissar's check-off list of instructions:

"1. Join your local June 12 coalition. If there is not one functioning in your area, help to start one.

"2. Begin now to reserve busses to New York for that weekend.

"3. Make a list of local trade unions, community organizations, churches, local affiliates of national organizations supporting June 12 and get them involved.

"4. Get local unions, city councils and other important bodies to pass resolutions in support of the SSD-2 [*U.N. Second Special Session on Disarmament*] and the June 12 demonstration.

"5. Be in touch with our national office for further information. Also be in contact with the National June 12 Rally Committee, 853 Broadway, Room 2109, New York, NY 10003 (212) 460-8980."

Communist involvement? Clearly more than that. Throughout the line of march in New York, World Peace Council activists carried placards while contingents of the U.S. Peace Council, the Communist Party, and C.P.U.S.A. fronts marched behind their banners. And the publication of the June 12 Disarmament Coalition gave U.S. Peace Council "solidarity coordinator" Sandy Pollack special credit for her role in all of this. Sandy had of course cut her political teeth as a member of the Communist Party's youth group.

Yet, on a recent NBC "Today Show" broadcast, Representative Ed Markey (D.-Massachusetts), a supporter of the congressional Nuclear Freeze Resolution, stated: "Well, I've consulted with leaders of the congressional intelligence committees and they give the 'freeze' a clean bill of health. What we're seeing right now is just part of a long-term effort by the Reagan Administration to discredit, to diffuse the 'nuclear freeze' movement. . . . What they've done now is resort . . . to calling . . . names, the Red-baiting, McCarthy-style smear of Americans. . . ."

Contrary to Representative Markey's claim, no official "clean bill of health" has been issued by the Intelligence Committee regarding the "peace" movement, and none is likely to be issued, considering the overwhelming volume of contrary evidence.

On November 11th, during a Veterans Day press conference, President Reagan was asked by journalists about foreign involvement in the "nuclear weapons freeze" campaign. The President replied: "Yes, there is plenty of evidence. It's even been published by some of your fraternity. There was no question but that the Soviet Union saw an advantage in a peace movement built around the idea of a nuclear freeze, since they are out ahead . . . in the organization of some of the big demonstrations, the one in New York, and so forth; there is no question about foreign agents that were sent to help instigate and help create and keep such a movement going."

"Liberal" Senator Mark Hatfield (R.-Oregon) countered by saying of this Communist participation, "I just haven't found one in the nuclear freeze movement." If so, he hasn't looked.

Politicians busy exploiting what they view as populist issues that might provide manpower, votes, and funds for their re-election compaigns are notoriously loathe closely to examine who is supporting those issues. They are even less prone to make public admissions of serious political errors which their opponents might exploit. The vanity and ego factor among politicians can also be involved.

So it is with mere politicians. But statesmen, on the other hand, put their country's interests first and quickly change course when they find themselves being manipulated by hostile foreign powers. As more and more evidence of Soviet involvement in the "peace" campaign is assembled, Americans are about to have an excellent opportunity to discover which of their Senators and

Representatives are statesmen and which are merely politicians.●

THE TENN-TOM SHOULD BE COMPLETED

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. RHODES. Mr. Speaker, the Tennessee-Tombigbee Waterway, a project I have long considered to be a sound investment in our Nation's transportation system, is once again being targeted for elimination by some Members of Congress. At this point, however, with the project more than 80 percent complete, it is time to put this issue behind us and finish the job.

The Tenn-Tom is a 234-mile waterway being built by the U.S. Army Corps of Engineers between the Tennessee River and the Tombigbee River in Tennessee, Mississippi, and Alabama. It will connect the many inland waterways of middle America with the gulf coast, providing an important new shipping route for the Nation's coal, grains, steel, and other products.

I believe the arguments favoring continued funding for the Tenn-Tom are stronger now than they have ever been. The Federal Government has already spent more than $1.3 billion on the project. According to the Corps of Engineers, the remaining cost to complete the waterway is some $387 million, while the cost to place the project in "mothballs" would be $431 million.

Congress currently is preparing jobs program legislation for work on the Nation's transportation system. It therefore strikes me as ironic that a concerted effort would be made to eliminate funding for a transportation project that is 80 percent complete, and in the process eliminate 5,000 jobs. Moreover, once the Tenn-Tom is open to barge traffic from States throughout the South, East, and Midwest, the Corps of Engineers estimates it will generate benefits in excess of $127 million per year for the next 50 years.

Many environmental groups nonetheless are persisting in their opposition to further funding of the Tenn-Tom, proposing instead that the project be abandoned. I realize that it is difficult for these groups to forsake a cause for which they have worked so diligently. But, surely, leaving the open ditches and concrete locks and dams in their unfinished condition poses a greater environmental problem than a completed and open waterway with all its related environmental safeguards.

Claims that the project will eventually cost $3 billion deserve attention. This figure includes estimates for improvements on a connecting waterway below the Tenn-Tom and on the Port of Mobile in Alabama. None of this extra work has been approved by Congress. In fact, the 1981 Levin amendment prohibits the authorization of such additional improvements as part of Tenn-Tom.

The Tenn-Tom has been funded by Congress every year since 1968 and supported by the past six Presidents because it is recognized as an important new lane of commerce for carrying goods to domestic and foreign markets. The Corps of Engineers estimates that for every remaining dollar spent on the project, the American people will receive $3.50 in return. Commonsense says that is a good investment.

The central issue of the Tenn-Tom debate now is this: Whether to abandon the project and create additional environmental and economic problems, and to receive no return on the $1 billion already spent; or to spend less only to complete the project so the Nation can begin to realize a return on its investment in the years to come. All factors considered, completing Tenn-Tom is the most prudent course to take.●

HON. HENRY REUSS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. VENTO. Mr. Speaker, I am pleased to participate in this special order to honor Chairman HENRY REUSS, and I wish to thank the chairman of the Foreign Affairs Committee for organizing this effort.

In many ways HENRY REUSS personifies many of the attributes and beliefs which are regrettably scarce in the political arena at this time. Chairman REUSS sincerely believes that the Federal Government has the responsibility to be an affirmative force to improve the condition and quality of our citizen's lives. He has been a leader in Congress for housing, for urban economic development, for a rational and directed use of our Nation's monetary and human resources, for a cleaner environment, and for responsible reform of the House of Representatives.

It is regrettable that this body is losing this dedicated individual. In a time when so many public officials advocate abandoning the Federal Government's responsibility, HENRY REUSS' thoughtful, yet assertive criticism of unfair economic policies is welcomed by his philosophical soulmates, such as myself, and serves as a much-needed counterpoint to those who feel that the Federal Government should do nothing except finance the military.

While HENRY REUSS' political roots are firmly planted in the progressive tradition of the upper Midwest, he has not been afraid to try new and innovative approaches to solve problems. In the 6 years I have served with Chairman REUSS on the Banking Committee, I have found him always willing to listen to new ideas. It is truly a pleasure to work with a Member who enjoys the intellectual interplay of ideas. He brought to this body a wisdom and sophistication that will be sorely missed.

Under his chairmanship, tremendous advances were made in many areas within the committee's jurisdiction. City after city across this Nation experienced a renaissance because of the expansion of the community development block grant program and the initiation of the very successful UDAG program. Millions of people's lives were improved because assisted and nonassisted housing never had a higher priority than during his chairmanship. A country's human rights record became a valid consideration by our representatives of international institutions with his support. And in the face of some of the most difficult economic circumstances since the 1930's, critical and needed changes in the structure of financial institutions were begun. These are accomplishments for which you can be proud, HENRY.

But a tribute to your career would not be complete without expressing my thanks for the job you did as chairman of the Joint Economic Committee. HENRY REUSS used his chairmanship most effectively to point out the policies of this administration's economic policy and provided a focus for a commonsense economic policy.

Mr. Speaker, we will certainly miss the wisdom, dedication, and advocacy of HENRY REUSS. While we could certainly use his economic leadership, after 28 years of public service he is entitled to a less hectic life.●

FORD SPIRIT AND COMMITMENT STRONGER THAN EVER

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. GINGRICH. Mr. Speaker, while I was home in September, I had the opportunity to attend the production launch of the 1983 Ford LTD and Mercury Marquis at the Atlanta assembly plant in Hapeville, Ga.

What I saw and heard there was stirring. It was a determination and commitment that proved to me the U.S. auto industry is alive and fighting.

I want to share with my colleagues the remarks Ford President Donald E. Petersen made on that occasion. He spoke of a renewed commitment to achieving excellence and of a totally

new spirit of cooperation in the workplace.

Mr. Petersen's words prove that Ford is girding itself to win the trade battle against foreign competition.

The folks who work at the Hapeville plant reflect this winning attitude. As Mr. Petersen said, they have established a "record of hard work and dependability that makes us very proud."

Mr. Speaker, it is precisely this kind of spirit, this kind of driving desire to achieve world-class quality and increased productivity, that the entire U.S. auto industry needs to restore health and job security.

Congress must do its part to help in the fight. Congress must send a message to our Japanese and European trading partners that we expect them to pay more than just lip service to free trade. They must know we will not continue to watch Americans lose jobs because U.S. exports continue to run into their trade barriers. They must know unless they want to see their exports collide with U.S. barriers, they better tear down the ones they have built.

Through fair play, hard work, and the kind of spirit Mr. Petersen has described, the U.S. auto industry and American auto workers can prosper once again.

Mr. Petersen's remarks follow:

FORD SPIRIT AND COMMITMENT STRONGER THAN EVER

With the launch of the remarkable LTD/Marquis line of mid-size passenger vehicles, we take another major step toward a new generation of highly competitive, American-built products.

These two cars mark the beginning of Ford's year in the North American market. We are bringing to market this year the finest competitive products in our lifetimes in this business.

And today, more than ever, competitiveness is the name of the game in this industry. This is the message I want to leave with you today.

Before going any further, however, I want to first express my deep appreciation for the fine support the Metropolitan Atlanta Community has given to our operations here—for nearly 75 years.

And that goes for our dedicated employes, as well—every one of you.

You have established a record of hard work and dependability that makes us very proud. I thank you.

But I'm not here today to talk about past records.

I want to talk about the future by introducing the first in a series of new cars that represent the form and substance of tomorrow's cars today—our highly fuel-efficient and aerodynamically styled 1983 LTD and Mercury Marquis cars.

These new contemporary, high-technology, five-passenger cars have EPA fuel-economy ratings of 26 mpg city and 40 mpg highway, with standard 2.3-liter engines and four-speed manual transmissions. Those are remarkable numbers for vehicles of this size and comfort. We have aimed for and achieved small-car economy with the convenience of size.

The smooth, quiet ride and handling properties of these dramatic, family sedans will be enhanced by nitrogen-pressurized front struts and rear shock absorbers. These are features found only on cars like the Lincoln Continental, Rolls Royce and luxury cars built by Ford in Europe.

Both the LTD and the Marquis come with a lot of exciting options. And their fuel-saving, aerodynamic design provides a low 0.38 coefficent of drag. At 50 mph they use only 6.7 aerodynamic horsepower. This is the result of some 300 design changes, most of which came out of the work we do in the Lockheed-Marietta wind-tunnel just across town.

The new LTD and Marquis that are coming off the line at this plant are part of a remarkable revolution that is taking place in our company and in our industry.

Most people haven't any idea of what's occurring in our midst today.

Too few understand the across-the-board retooling that is reaching completion in our industry. It's the most massive peacetime, private-sector reconversion ever attempted, anywhere.

But, beyond retooling and plant reconversion, what matters most is our renewed commitment to achieving excellence. I mean world-class quality, and increased productivity. And a totally new spirit of cooperation in the workplace. In the world trade battle, these are the winning ingredients.

Our aim is very simple—to achieve competitive leadership in the North American market. And this leadership is within our grasp.

What you are seeing today is only one chapter in a competitiveness story of epic dimensions.

And, our commitment is backed up by a huge investment.

The 1983 cars and trucks that will go into Ford and Lincoln-Mercury showrooms across the North American continent have cost us almost $3 billion to bring to market. That's three thousand million dollars!

As a result, the 1983-model year represents the greatest offering of new, competitive products in Ford history.

Here at the Atlanta Assembly Plant alone, we have spent $18 million just to rebuild the line. We've installed new automatic paint systems and a new and innovative communications system. They will help us keep instant track of some 300 different items of information about cars on the line.

We are also using this plant to test a new automated parts system to give us rapid and accurate information about all parts enroute in rail cars and trucks.

This is helping us improve productivity and lower our costs—and that's good news for the consumer. And good news for us, too. For that means we're going to be more competitive.

Our commitment to competitive excellence is having some great results.

A recent survey of nearly 9,000 owners—of every make car—showed that Ford's quality is better than that of our domestic competitors—12 percent better than GM and 24 percent better than Chrysler. And GM and Chrysler don't dispute that.

Escort and Lynx were shown to be essentially equal in quality already to the Datsun 210 and the VW Rabbit.

In another survey, we found that only Toyota was equal in quality to our new Ranger pickup truck. Ranger tops all the others—domestic and foreign.

And right now I'm asking you to produce LTD and Marquis models that will be best quality cars in their class. Will you do that?

As you know, Escort was the first in our generation of all-new products. Worldwide sales of Escort have made it the world's best-selling nameplate. In America, too, Escort has outsold every import since it was introduced. And, this year, it is the best selling car in this country, by a wide margin.

We believe, over the next four years, we can repeat this success, again and again.

We've put about $11 billion in the past four years into new plants and equipment and new products. And we're going to spend even more in the next four years for more new products and new plants to be the leaders in the auto industry.

But there is another winning ingredient in our drive for competitiveness. It can be summed up in one word: people.

We're a people company, a company where people count.

One of the most remarkable things that is happening in this country today—led by Ford Motor Company—is the revolution in employe relations.

It is characterized here at Ford by a new spirit of teamwork, dedication, ingenuity and achievement.

Employe Involvement is the label that we put on it. But it's much more than that. It's improved quality of work life, employe commitment, employe excitement, employe fulfillment. It means all of these things.

These ingredients, together with our new relationship with the UAW, have provided a great sense of unity and enthusiasm and participation as we tackle our common goals.

What ever name you want to give to this new movement, the fact remains that out of our Employe Involvement programs we are forging a new sense of community. Let me urge all of you here in our Atlanta Plant to embrace this concept. Try it; you'll like it!

As I said before—our aim is very simple, although it is not modest; our objective is competitive leadership in the North American market.

We already have leadership in U.S. quality, and we will not settle for less than quality leadership worldwide. We have leadership in electronics and alternative fuels technology. We have leadership in aerodynamics and designs. We have leadership in employe relations; and we have leadership in better ideas.

We can achieve product leadership across the board. We can be leaders in caring about our customers. We can bring the Ford oval back to the position of authority and power it once held in this country above all others.

You can see for yourselves, here, today, that we are in the midst of a great industrial revolution. And you can see, as well, we are keeping our commitment to excellence.●

CHICAGO SUN-TIMES CALLS FOR FRA ACTION

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. SIMON. Mr. Speaker, we are at the point where the Federal Railroad Administration soon will act or fail to act on a requirement for warning lights by railroad locomotives.

The studies of the FRA indicate that such a regulation would both save money and save lives.

With that kind of overwhelming evidence, I hope we can get action soon.

You will be hearing more from me on this question if we do not.

In the meantime, I urge my colleagues to read the editorial from the Chicago Sun-Times which I am inserting in the RECORD at this point.

SAVE LIVES WITH RAIL WARNINGS

Last year, 623 people were killed and 3,020 injured in 8,546 car-train crashes at railroad grade crossings. And that was low. The death toll in most years tops 1,000.

Study after study shows such slaughter can be prevented. Simply require flashing lights on locomotives—to be flicked on 20 seconds before a train crosses a road.

The cost: $45.6 million. The savings: $104.9 million in property damage and accident costs, according to the watchdog Federal Railroad Administration.

The arithmetic indicates the agency should quickly issue a rule to require the warning lights. But it has not.

That's why Rep. Paul Simon (D-Ill.), who has demanded this safety step for six years, is angry. He should be. The issue, Simon said this week, is not just warning lights. It's also whether the watchdog agency will do its job or simply be a mouthpiece for the rail industry.

Agency chief Robert Blanchette has indicated he's serious about railroad safety. Fine. But we've heard that before. If Blanchette means it, let's see prompt implementation of the rule on warning lights. Amtrak already has them. Others can, too.

If there's more stalling, Congress should clear the tracks and force compliance.●

INFORMING THE PUBLIC ON REAL RISKS: A PRESS RESPONSIBILITY

HON. MARILYN LLOYD BOUQUARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mrs. BOUQUARD. Mr. Speaker, on Monday, November 1, the Washington Post ran a front page story on potential consequences of nuclear reactor accidents. Many of the numbers quoted in the article were extracted from a study conducted at Sandia National Laboratories for the Nuclear Regulatory Commission (NRC). The opening sentence states that * * * "the worst-case death toll could exceed 100,000 persons." The story later states that "The NRC staff has estimated the probability of such an accident * * * as 1 in 100,000 reactor years * * * this would mean there is approximately a 2-percent chance of such an accident occurring in the United States before the year 2000." Late that day, the NRC released a clarifying statement refuting the conclusions cited in the Post story. According to the NRC statement, the consequences described in the Post have probabilities of 1 in 1 billion to 1 in 100 million per reactor year, rather than the 1 in 100,000 cited in the article. This means that on the average, such an incident could occur at a specific plant no more than about once every 100 million years. The NRC also stated that the consequences described in the article are based on assumptions regarding release of radioactive material, which are known to be overestimated by factors of 10 to 1,000.

In giving this story front page attention, I think that the Post has done a great disservice to its readers. There is essentially no chance that such an accident could happen during the lifetime of the reactor, nor for that matter during our lifetimes, nor during the lifetimes of our children, or our grandchildren, nor indeed within the duration of Western civilization as we know it.

One might have thought that the Post article was based on a simple technical misunderstanding. Unfortunately, upon study of Sandia's report by the staff of my Subcommittee on Energy Research and Production, it appears that the Post article did not present significant qualifications clearly stated in that report.

The two-page Forward of the Sandia report contains the following qualifications:

"* * * results in this report do not represent nuclear power risk."

"These calculations treat siting factors such as weather conditions and emergency response probabilistically but postulate the siting source-term release." (The source-term of an accident is the amount of radioactivity released to the environment as a result of the accident. Accident consequences depend on source term, meteorological and site characteristics, and population distribution.)

"Currently, there is significant controversy about the realism of accident source terms, that is, the accuracy with which they describe potential releases of radioactivity for a given sequence of events in a core melt accident."

"* * * the risks posed by such accidents are very small. Therefore, the absolute numbers should only be quoted with the associated probabilities and with the stated assumptions recognizing the uncertainties in the analyses."

If the persons who released the consequences statistics to the press read the Forward and the first three pages of the report, they had the benefit of all of these highly responsible and clearly worded qualifications. They understood the great improbability of such a sequence of events including core melt, the failure of all safety systems, breach of the concrete containment building, wind to carry radioactivity over the most populated area in the region, and rain to dump it on that area. Despite this knowledge, they extracted from the report unrealistic conclusions on potential consequences and released them to the press to form the basis of an article designed to alarm the general public on November 1, the eve of election day. I find this action to be nothing short of irresponsible. Its major legacy will be to increase even further the general skepticism with which the American public views public debate on technical issues.●

A TRIBUTE TO THE LATE REPRESENTATIVE CRAIG HOSMER

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. ERLENBORN. Mr. Speaker, I am honored to join in the tribute to our former colleague, Hon. Craig Hosmer, who passed away suddenly a few weeks ago.

If my good friend had the occasion to look back on his life, he should have felt a great sense of satisfaction. He spent most of his life in public service in one way or another, beginning with a stint in the Navy during World War II and including 22 years as a Representative from California, during which time he also was a member of the Naval Reserve, rising to the rank of rear admiral.

His service to the public includes as well the years he spent after leaving this Chamber in 1974 in advancing nuclear power as the most realistic alternative in the near term to oil as a source of energy. Were it not for Craig, I believe it is fair to say that our dependence on imported oil would have a stranglehold on us.

Californians can be proud that they sent Craig Hosmer to Congress for 11 terms, and we can all be grateful that he saw the merit in and then pursued the peaceful use of the atom.

I hope his family finds consolation in knowing that Craig Hosmer was an honorable man who left his mark on the world.●

GREEN INTRODUCES BILL TO ELIMINATE SEX DISCRIMINATION IN THE UNITED STATES CODE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. GREEN. Mr. Speaker, today I am introducing a bill which would amend the United States Code in order to eliminate its sections which are explicitly discriminatory on the basis of sex. I am pleased to join efforts with my colleague from the other body, Mr. DOLE, in this quest to cleanse our Nation's laws of those provisions which still provide for different

treatment of our citizens on the basis of sex.

In the past 6 years, three comprehensive studies on sex bias in the United States Code have been conducted. The most recent study, which was released last June by the Task Force on Legal Equity for Women, provided a list of previously discriminatory statutes which have been remedied in recent years, and of those remaining on the books which are explicitly discriminatory. This legislation is based on the findings of that task force and of two previous studies.

As stated, this bill would amend many of the identified United States Code sections which still permit discrimination on the basis of sex. Quite honestly, many of the changes are cosmetic, while others have very narrow application. However, a few have very real impact. The bill would amend several provisions of the Social Security Act and the Railroad Retirement Act which still discriminate in the determination of benefits, albeit in very technical areas. But most of the provisions of this bill would be most appropriately characterized as "housecleaning." For example, it would grant widowers of deceased military personnel commissary privileges, whereas at present only widows of deceased military personnel are allowed this privilege.

Because it is aimed at statutes which are discriminatory on their face, this bill is somewhat limited in its application. So I am not claiming that passage of this legislation would result in the dissolution of discrimination in our society. Nor am I advocating this legislation as a replacement for the substantive and very necessary Equal Rights Amendment. However, I feel quite strongly that these discriminatory statutes have no place in our Nation's laws, and that passage of this bill would be a necessary though symbolic step in our continuing effort to attain equality for women under the law.

It is important to note that this bill intentionally avoids several very controversial sex-biased statutes, including combat limitations, the Selective Service, and parts of the Social Security Act and the Criminal Code. These sensitive matters would more appropriately be debated separately from this comprehensive bill.

I believe we still have a long way to go in this endeavor to secure equal rights and treatment for women. And I intend to maintain the strong positions I have taken in support of women's rights, including my advocacy of the Equal Rights Amendment. But I also hope that my House colleagues will agree that this bill, in seeking to amend outdated laws, is a necessary step in our effort.●

NUCLEAR FREEZE EQUALS SURRENDER

HON. LARRY P. McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. McDONALD. Mr. Speaker, as President Reagan began his program of rebuilding America's strength, a well-organized campaign demanding a nuclear freeze emerged to cripple his efforts. The same groups that favored such a freeze, also showed a tendency to ignore Soviet aggression in Hungary, Czechoslovakia, Poland, and Afghanistan; they argued that the Soviet threat was a myth created by the Pentagon to justify its expensive programs. This analysis, of course, is far from reality.

After a year of profreeze rhetoric and activity, many people are beginning to take another look at the supposedly "sincere" people who are coordinating the freeze movement. Mr. William Randolph Hearst, Jr., editor in chief of the Hearst newspapers, is one person who has spoken out on the hyprocrisy of the profreeze advocates. In the Hearst newspapers for Sunday, December 5, 1982, Mr. Hearst persuasively argued that "a nuclear freeze now would mean a surrender later."

I strongly commend Mr. Hearst's remarks to my colleagues. The article follows:

[From the News American, Dec. 5, 1982]

A NUCLEAR FREEZE NOW WOULD MEAN A SURRENDER LATER

NEW YORK.—This has been a pretty slow week at home, what with President Reagan off on a five-nation swing around Latin America. But the Soviet Union hasn't let up in its campaign for a nuclear "freeze" which many honest people here and among our allies embrace because they fear the thought of a nuclear disaster being suddenly unleashed. Obviously they are not alone because the prospect is indeed a terrifying one.

But there are much better ways of settling nuclear hassles and the Russians know it. The first is on-site verification, proposed long ago by President Eisenhower and recently repeated by President Reagan.

I have just been reading a fact-filled book entitled "The War Called Peace" (sub-titled "The Soviet Peace Offensive"). It is published by "Western Goals," with headquarters in Alexandria, Va., whose advisory board lists among others such eminent Americans as Dr. Edward Teller, father of the H-bomb; author Taylor Caldwell; former chairman of the Joint Chiefs of Staff Admiral Thomas Moorer; former Marine Corps Commandant General Lewis Walt, and renowned physicist Dr. Eugene Wignar.

This book, commenting on antinuclear demonstrations here and among our Western European allies, tells how pro-Soviet organizations organized and fueled protest movements. Most staggering, I found, was the voluminous list of pro-freeze, anti-nuclear groups located in the United States. They run the gamut from the straight freeze units to anti-draft registration to groups of scientists, lawyers and even include church groups of all denominations.

It's most curious, I thought, that all this effort has been synchronized into the major objective—"freeze now"—but there's nary a mention of Soviet wanton use of chemical warfare in Laos, Cambodia and, lately, in embattled Afghanistan where freedom fighters have slowed the invasion-occupation by the U.S.S.R.

The Soviets have used toxin weapons, commonly known as "yellow rain," spraying the poison over thousands of people, killing the land in communist-held Southeast Asia and Afghanistan. The symptoms are prolonged vomiting, dehydration and bone disease.

Months ago, I wrote about "The Yellow Rain," based on articles done by a brave lady, Jane Hamilton-Merritt, who worked and lived among the Hmong people in Laos and also spoke their language. After being instrumental in helping some Hmong villagers come to the States, she returned to Thailand to help refugees.

Just before he left to accompany President Reagan on the Latin American tour, Secretary of State Shultz flatly accused the U.S.S.R. of using toxin weapons, all of which are in gross violation of international law. Secretary Shultz, usually low-key, declared that the United States had accumulated new evidence of what he termed "cynical disregard of international law" by the Soviets and their communist comrades in Southeast Asia and Afghanistan.

Secretary Shultz, despite foot-dragging by other nations who are sympathetic, has been able to make our case more timely. This charge demands verification in Russian-controlled territory but the Soviets won't even let neutrals venture one foot inside.

It brings us right back to the freeze issue, which many Americans and our overseas friends and allies see as the road to peace. President Reagan put it bluntly at a press conference when he said that it "takes two to tango," referring to arms control and genuine disarmament. The Soviets have now shown an interest in his televised proposal on reducing risks. To repeat President Reagan's comment, it "takes two to tango" and we're here to dance.

Over a year ago President Reagan authorized our top negotiators to the nuclear disarment conference in Geneva, Paul Nitze and Eugene Rostow (they had been working all along on the problem), to make the offer to the Russians that we would not arm our allies in Europe with Pershing missiles if they'd withdraw their SS-20s. This was referred to as the "Zero Option" for varying reasons. It was promptly rejected by the Soviet representative, Yuli Kvitsinksky.

Strangely enough, the entire incident was given very little publicity in the American media. In Europe the blame for the almost deliberate ignoring of so important a development is placed on the Washington press corps which the continent sees as being anti-administration. It is quite likely that not being so close to the woods they can see the trees better.

The Russians, we must never forget, always break up meetings over there calling for nuclear disarmament and generally ship off protest leaders to harsh labor camps or mental hospitals. And when negotiators ask that the Soviets agree to on-site inspection, Russian representatives pretend unbridled anger, charging that we demand interference in their internal affairs.

As the book, "The War Called Peace," clearly presents, peace doesn't come about by wishing it to happen, particularly when the other side happens to be wily, powerbent and interested in unilateral nuclear disarmament, namely, ours. That isn't the way real, enduring peace can be achieved in the 20th century. The late, great Winston Churchill, when Russia under Stalin menaced Western Europe, put it in his usual eloquent manner, "We arm to parley."

His remark is as true today as it was when Europe was virtually naked before a post-World War II tyranny.●

BO GINN

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 6, 1982

● Mr. MONTGOMERY. Mr. Speaker, I want to join with my colleagues who have already participated in a special order honoring Representative RONALD "Bo" GINN, of Georgia.

Bo has been a fighter for his First District of Georgia. He has been reelected four times since first coming to the House of Representatives in 1973. I think that reflects the confidence his constituents had in his leadership abilities and his hard work in standing up for the First District and for the State of Georgia.

Bo has been a valuable member of the Appropriations Committee. He has had the opportunity to make a further contribution to this committee as chairman of the Military Construction Subcommittee and also as a very active member of the Defense Subcommittee. There is no doubt that his expertise and experience in these areas will indeed be missed when he leaves this Chamber.

Bo GINN is a man of obvious leadership capabilities and high integrity. At age 48, he will not doubt continue to be a leader for many years to come, both on the political scene and in service to his community.

I want to wish the very best for Bo and his family in their future endeavors. Bo will be missed by his many friends here in the House of Representatives. He can be proud, as can the people of Georgia, of his service and his accomplishments as a Member of this Chamber.●

GOO GOO CLUSTERS AN "OLE SOUTHERN TREAT"

HON. WILLIAM HILL BONER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BONER of Tennessee. Mr. Speaker, this morning's Wall Street Journal contains a front page article which I wish to commend to the other Members of Congress. This article concerns the Standard Manufacturing Co. of Nashville, Tenn., and its popular product, the "Goo Goo Cluster."

I was pleased to be able to distribute a package of this favorite candy of the district I represent to each of the Members this morning through the generosity of Mr. Jimmy Fischer, president of Standard Candy. After sampling it, I am sure the Members will understand why people nationwide are clamoring for this gourmet treat.

While there is a host of stories as to how the candy got its name, I wish to assure the Members that a Goo Goo by any other name would still taste as sweet.

Following is the article appearing in this morning's Wall Street Journal:

[From the Wall Street Journal, Dec. 8, 1982]

TENNESSEE GOO GOOS ARE HEADING NORTH; NEW YORK IS INVADED

NASHVILLE, TENN.—Chocolate and peanuts and caramel and marshmallow all are staples of the candy counter, and prosaic enough in themselves. But put them together and an interesting synergism takes place. They become a Goo Goo Cluster—a round mound of empty calories said to be "the South's favorite candy" since 1912.

Be that as it may, if you haven't heard of Goo Goos, you haven't been listening to the Grand Ole Opry radio show or examining the catalog of the Lynchburg (Tenn.) Hardware & General Store or browsing at Bloomingdale's. Yes Bloomingdale's.

Goo Goo Clusters lately have been moving north, like so many killer bees, and the Standard Candy Co. of Nashville hopes that ultimately the Goo Goo Cluster will be as familiar and available as a Snickers bar, which is America's favorite candy, as opposed to just the South's.

"They are a big nostalgia thing with people from the South," says Carey Katsidhe, the candy buyer at Bloomingdale's, the New York department store, which started stocking Goo Goos (at $10 the box of 24) this fall. "Some people get really emotional," she says, when they come upon the little delicacies at 59th Street and Lexington Avenue.

PLAYING HARD TO GET

Whether Goo Goos go national or remain as regional as Moon Pies and grits remains to be seen, but taste-making Bloomie's isn't a bad place to launch an invasion. In New York, Goo Goos also are available, to those who have paid the price of admission, at the Princess Theater, which currently features a rustic musical called "Pump Boys and Dinettes." They can be had in Chicago at Marshall Field's (40 cents apiece), and can be bought by mail from the aforementioned Lynchburg hardware catalog (at $12, delivered, for a box of 24 clusters). Here in Nashville they go for 30 cents or 35 cents apiece.

Word has it that Goo Goos have been eaten by "prominent people in the West Wing" of the White House, don't ask who. And Senate Majority Leader Howard Baker, the Tennessee Republican, passes Goo Goos around the Capitol. Thus, it is pretty clear that, if hype counts for anything, the onslaught will be successful.

Now if, as one newcomer to Goo Goos concludes, they taste pretty much as one might expect a 35-cent hash of chocolate and the rest to taste, Goo Goos do have a couple of things going for them—their Southern aura and their incongruous name. Oh yes, they also are a big favorite with singer Dinah Shore, once of Winchester, Tenn., and Pat Boone, an erstwhile Tennessee resident and popular singer of the 1950s.

Miss Shore, who pronounces Goo Goos "the most important candy in Tennessee," says that her "cousins send me boxes and boxes of them." Since Miss Shore, at 61, remains rather svelte, one wonders whether she actually eats them, at 5,880 calories to the box of 24. Mr. Boone, now of Southern California, used to receive regular shipments of Goo Goos but had them stopped, his secretary says, because he himself never got to eat any. The secretary doesn't say who hijacked his Goo Goos.

GAGA OVER GOO GOOS

The appeal of Goo Goos, to the extent that it exists outside Opry country, doesn't mystify people here at all. "Just like our Southern accent or country music, Goo Goos are a symbol of Nashville," says Marion Irion, a local woman who has taken visitors on the Goo Goo factory tour "five or six times." The makers of Goo Goos, she says, are a fixture of Nashville. "Standard Candy has been here a thousand years."

Actually, Standard started making candy in Nashville in 1901, and to this day makes a variety of confections, ranging from hard candy to coconut haystacks. But it wasn't until 1912 that the late Howell H. Campbell, Standard's founder, made the first Goo Goo in his kitchen. Some people believe he named Goo Goos after something his infant son said to him, but Howell Campbell Jr., the son in question, who became president of Standard in 1946, says that story isn't true. He doesn't, however, proffer an alternative explanation.

However the name originated, the candy itself had modest beginnings. "Standard Candy started with the country stores that handled horseshoes, nails, suits and groceries—the mom and pop stores on street corners," Mr. Campbell says. "Whole families used to work here."

Indeed, Clara Mai Tunstall, a 67-year-old "floor lady" in Standard's "enrobing room," where candy is coated with chocolate, says that her parents met at Standard Candy and married in 1910. "My sister wants me to retire," Mrs. Tunstall says, "but I don't want to. She says I got chocolate in my veins."

The same could possibly be said of the junior Mr. Campbell, a burly 69-year-old chain smoker who sits on the boards of two Nashville concerns and calls himself a farmer. He sold Standard Candy to two other Nashville businessmen in 1974, but not without regret among his relatives.

"I hate to see it get out of the family says his son, Howell Campbell III, who heads a Nashville brokerage firm. "A time or two I looked at buying the company back, but when it could be bought cheaply, it wasn't in great shape."

For many years, word of Goo Goos spread via citizens of Nashville who introduced the candy to friends. And since the late 1960s. Standard Candy has exploited the country-music boom by advertising on the Grand Ole Opry, which is heard in some 35 states. Goo Goos have at least one outlet in each of those states. Standard reckons, but distribution is "relatively strong" only in Mississippi, Alabama and Kentucky.

The busloads of tourists to Nashville who heard about Goo Goos at the Opry began taking the stuff home with them to places

where Goo Goos are hard to come by. Today, Standard says it gets 20 to 100 letters a week, many of them accompanied by checks, begging for Goo Goos. As one might expect, the company is delighted to fill mail orders.

YOUR GOO GOOS OR MY WIFE

"My wife asked me—no she told me—to find out how to get some more Goo Goos," a Houston man writes Standard Candy. "Please send me a price list before I have to send you my wife."

Because of consumer urges fed by wayfarers to Nashville, Goo Goos reached a few Midwestern outposts. And because Standard's new management—Nashville businessmen James M. Fischer Jr. and Jimmy Miller—changed distribution to concentrate on wholesalers, sales increased and, for a while, everything went well.

But trouble started in 1979 when the company moved to a new plant on the outskirts of Nashville, commodity prices rose, and a candy price-war broke out, all at about the same time.

Standard Candy was losing money and was precariously close to bankruptcy by the time James W. Spradley Jr. and his father, a retired food-company executive, acquired a 50% interest in the company this year. They paid no cash to Mr. Fischer, who in the meantime had bought out his partner, but assumed half the company's liabilities and agreed to match whatever loans Mr. Fischer made to the company.

ESTABLISHING A BEACHHEAD

Today, the younger Mr. Spradley, a man of swashbuckling ambitions who calls Goo Goos "our world famous product," hopes to establish the candy as a strong brand in the 700-mile area encircling Nashville. Then, someday, he hopes to go national.

For the time being, he figures he can trade on Goo Goo's good name and Southern tradition with the likes of Bloomingdale's. The candy is also available, albeit informally, on Wall Street, thanks to Bert Rayle, a broker friend of Mr. Spradley's at Goldman, Sachs & Co. "I give him investment ideas from time to time, and he gives me Goo Goos," says Mr. Rayle, who, in turn, makes them available to his growing list of friends.

Goo Goos also are making the rounds of official Washington. The candy was a refreshment at an "Art From Appalachia" show last year at the Smithsonian Institution's National Museum of American Art. More recently, a State Department protocol officer brought some Goo Goos back to Foggy Bottom (and to the White House) at the request of a Nashville tourist official she met at the Knoxville World's Fair. She won't specify who is eating Goo Goos at 1600 Pennsylvania Avenue because that "would sound like a commercial for the candy bar."

Still Goo Goos are probably best acquainted with less exalted company.

"It must have been 1924 when I ate my first cluster," writes a 71-year-old Mississippi woman to Standard Candy. "In that day, there were no Coke boxes distributing drinks or any other machines with goodies. We bought apples, oranges, and the poorer children—a baked sweet potato for recess.

"There was, though, an old black man, dearly loved to us all, who sat on the edge of the schoolyard with a little cart and sold us for one nickel each a large bag of hot roasted peanuts, a pickle with six crackers, a big round pink or white coconut candy ball, or the Goo Goo Cluster."

As Bloomingdale's buyer says, Goo Goos are a big nostalgia thing.●

EVILS OF SOCIAL SECURITY DISABILITY APPEALS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. SIMON. Mr. Speaker, every Member of the House knows about the wrongs that are being perpetrated by the Social Security Administration in the name of saving money, wrongs that take people who should be on disability off of disability or deny them the chance to get on disability.

There is a further wrong that does not hit us in most cases that have been called to my attention.

Charles Murphy of Marion, Ill., has serious heart trouble and a bad back and a bad hip situation.

He was on disability and was one of the many who was just taken off without adequate examination. He appealed, and one of the leaders of the senior citizens in our area who has taken some of these cases at no charge whatsoever—Bob Gustafson—represented him. The administrative law judge, after careful examination, after looking into the case, decided that Charles Murphy should be back on disability.

Then a review board in Baltimore made a determination that he should not be reinstated. That board says that if Mr. Murphy wants to appeal the case he can come to Baltimore with Bob Gustafson as his counsel for appearance before that review board. The problem with that is that, first of all, Mr. Murphy is not in the physical situation where he can go to Baltimore and, second, financially it is impossible for him and for most other people on disability to do that. And Bob Gustafson is doing this free for his fellow senior citizens and cannot afford to pay for a trip to Baltimore.

What kind of a monster have we created? Does this Government have a heart? Let us take a look at what we are doing and protect the citizens of our country?

We seem to be doing a good job at protecting the rich and the powerful. Let us start doing the job protecting the people that Government really ought to protect.●

INSIDER TRADING SANCTIONS ACT OF 1982

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. ROSENTHAL. Mr. Speaker, several days ago, I introduced H.R. 7352, the Insider Trading Sanctions Act of 1982 which has the full support of the Securities Exchange Commission. This bill would enable the SEC to increase the criminal penalties for trading in securities while in possession of material nonpublic information.

In the last 2 years over 20 insider trading cases have been initiated by the SEC, whereas only 40 had been brought to court prior to 1978. However, even with this vigorous action, the SEC is caught in a legal bind. The present sanctions are so weak that the benefits of insider trading far outweigh the criminal risk. The strongest civil penalty now available to the SEC is limited to seeking simple repayment or disgorgement of profits; while the maximum criminal fine is $10,000. H.R. 7352 seeks to increase this fine to $100,000.

The SEC has fought to increase the risk facing potential violators of the Securities Exchange Act for a long time and to uphold the fairness and integrity of the market by insuring equal access to information. Recently the SEC prepared a memorandum in support of the changes to insider trading sanctions embodied in H.R. 7352. I would like to include it into the RECORD at this time for my colleagues to review:

MEMORANDUM OF THE SECURITIES AND EXCHANGE COMMISSION IN SUPPORT OF THE INSIDER TRADING SANCTIONS ACT OF 1982

INTRODUCTION AND SUMMARY

Insider trading [1] in publicly traded securities undermines the expectations of fairness and honesty that underlie public confidence in our nation's securities markets. The Securities and Exchange Commission has in recent years stepped up its efforts to combat this threat to the securities markets. Prior to 1978, the Commission initiated about forty cases involving insider trading. Since then, the Commission has brought over fifty insider trading cases. Approximately twenty of these have been brought since July, 1981. In these actions the Commission has obtained injunctions requiring defendants to comply with the securities laws or face contempt citations, and has obtained disgorgement of millions of dollars in illegal profits.

Despite these vigorous enforcement efforts, insider trading continues because it presents the opportunity to reap huge profits with little risk. Economic risk is small because public disclosure of the inside information spurs significant price movements in securities or options for equity securities. And the deterrence presented by the Commission's current enforcement remedies—injunctions against further violations and disgorgement of illegal gains—too often fails to outweigh the temptation facing insiders to convert nonpublic information into enormous personal profits. In short, greater risk

[1] "Insider trading" is the term commonly used to describe the act of purchasing or selling securities while in possession of material nonpublic information about an issuer or the trading market for an issuer's securities.

must face insiders if illegal trading is to be deterred. Tougher sanctions are needed.

The Insider Trading Sanctions Act of 1982 meets this need. The Act would empower the Commission to bring an action for an order requiring the inside trader, or any person aiding and abetting the trader's violation, to pay into the Treasury of the United States an amount of money up to three times the profit gained or loss avoided through the illicit transactions. The Commission would be empowered to seek a penalty directly; it would not be required to obtain an injunction first.

The need to raise the level of risk facing potential violators of the Exchange Act also exists in other areas because inflation has diminished the deterrent effect of the criminal fines provided in the Exchange Act. To meet this need, the Act would amend the Exchange Act by increasing from $10,000 to $100,000 the fine for most criminal violations of the Exchange Act. This change, not limited to insider trading, would serve to restore and enhance the level of deterrence contemplated when the Exchange Act was enacted.

A. THE INSIDER TRADING PROBLEM

The United States has, and the Commission oversees, the best securities markets the world has ever known; they are liquid, efficient, and fair. The prices of the vast majority of actively traded securities reflect available information about companies and the economy. Capital formation and our nation's economic growth and stability depend on investor confidence in the fairness and integrity of our capital markets.

Insider trading threatens these markets. By abusing the trust and confidence reposed in them by shareholders, employers or clients, inside traders may reap huge profits in essentially risk-free transactions. Insiders—corporate officials, investment bankers, lawyers, accountants, financial printers, among others—often learn of profit or loss forecasts, imminent tender offers, mineral strikes, oil discoveries, lucrative contracts, and product failures before such information is available to the investing public. Indeed, the case law chronicles the diversity of business situations that give rise to nonpublic information.[2]

If such information is material, insiders can earn substantial profits by engaging in securities transactions before that information becomes generally known in the market place. The abuse of informational advantages that other investors cannot hope to overcome through diligences of zeal is unfair and inconsistent with the investing public's legitimate expectation of honest and fair securities markets where all participants play by the same rules. Noting that insider trading prohibitions "rest on considerations of equity," Professor Victor Brudney explains that:

"The inability of a public investor with whom an insider transacts on inside information ever lawfully to erode the insider's informational advantage generates a sense of unfairness. * * * The unfairness is not a function merely of possessing more information—outsiders may possess more information than other outsiders by reason of their diligence or zeal—but of the fact that it is an advantage which cannot be competed away since it depends upon a lawful privilege to which [other investors] cannot acquire access."[3]

By enacting the Insider Trading Sanctions Act of 1982, Congress will help insure that insider trading does not diminish public confidence in the fairness and integrity of our securities markets.

Insider trading may also inflict significant economic injury on exchange specialists or market makers. These market participants are required to provide market liquidity by standing ready to buy or sell for their own accounts in conditions of excess buying or selling demand. This liquidity creates, among other things, an orderly market which is advantageous to all investors. But exchange specialists and market makers cannot protect themselves from inside traders. Their market making obligations sometimes force them to trade securities with insiders at prices not reflecting the value of the inside information and, as a result, they may incur losses great enough to cause them to go out of business.

For the same reason, insider trading is also likely to cause market makers in options to be less willing to to bid for or to offer options. A decrease in the number of market makers would increase the cost of legitimate option transactions.

Insider trading on United States securities markets is a serious problem,[4] especially in connection with tender offers. One reason is that the prospect of enormous profits is a powerful lure. Another is the public perception that the risk of detection is relatively slight.[5] Moreover, Wall Street's current merger wave creates countless opportunities for insider trading. Because tender offerors typically offer substantial premiums over the prevailing market price of the subject company's securities, anyone knowing of an imminent tender offer can acquire substantial profits while incurring essentially no economic risk. Moreover, the purchase of options permits the violator to obtain far larger illegal profits than would be possible through purchases of the same dollar amount of common stock.[6]

B. THE NEED TO RAISE THE LEVEL OF RISK FOR INSIDER TRADING

In combating insider trading the Commission has used the full complement of enforcement tools available under current law. The principal Commission weapons against insider trading are an injunction requiring a defendant to comply with the law in the future, and ancillary equitable relief in the form of disgorgement of illegal profits.[7] Unfortunately, injunctions and disgorgement do not sufficiently deter insider trading.

An injunction orders a defendant to obey the law in the future and subjects a defendant to the threat of contempt proceedings if he violates the law again. As such, it presents no significant hardship to the defendant because "[c]ompliance is just what the law expects."[8] In view of this and the fact that they are prospective in operation, injunctions do not penalize the defendant for the illegal conduct for which the injunction was imposed.

The Commission has used its injunctive authority for many years and intends to continue to do so. However, given the enormous profit potential of insider trading and the small risk perceived to be associated with such conduct, the Commission has concluded it is necessary to raise the level of risk that potential inside traders face if insider trading is to be effectively deterred.

Disgorgement of illegal profits, the Commission's other major weapon against insider trading, is a useful equitable remedy because it strips the defendant of the fruits of his unlawful trading and returns him to the position he was in before he broke the law. But merely requiring a defendant to return "stolen goods" does not penalize the defendant for his illegal conduct. Thus, the prospect of compelled disgorgement alone cannot dissuade anyone from violating the law. According to a seminal report prepared in 1972 for the Administrative Conference of the United States, the problem with disgorgement is "that an insider who is caught

---

[2] The landmark decision of *Securities and Exchange Commission* v. *Texas Gulf Sulphur Co.*, 401 F.2d 833 (2d Cir. 1968) (en banc), *cert. denied*, 394 U.S. 976 (1969) reveals how company officials who knew of an ore strike, bought Texas Gulf Sulphur stock on the New York Stock Exchange, before that information was known even to the company's full board of directors.

In another case, a brokerage firm passed confidential information about an earnings decline, gained in the course of serving as an underwriter, to certain institutional investors who dumped their vast holdings before the information became public. *Shapiro* v. *Merrill Lynch, Pierce, Fenner & Smith*, 495 F.2d 228 (2d Cir. 1974). In *Chiarella* v. *United States*, 445 U.S. 222 (1980), a financial printer, whose firm was hired to print tender offer documents, broke codes in the materials being printed, determined the subject companies' identities, and bought their shares. After the announcement of the bids increased the price of the shares, the printer sold and made substantial profits.

United States v. *Newman*, 664 F.2d 12 (2d Cir. 1981), involved the misuse by certain investment bankers of confidential information about proposed mergers and acquisitions that was entrusted to their firms by corporate clients and was passed by the bankers to confederates residing abroad. Using foreign bank and trust accounts and spreading their purchases among brokers, the defendants bought stock in merger candidates and tender offer targets. See also *O'Connor & Associates* v. *Dean Witter Reynolds, Inc.*, 529 F. Supp. 1179 (S.D.N.Y. 1981) (insiders' purchasing of options before disclosure of takeover bid violates the Exchange Act). The Commission believes that in these cases the defendents' use of material nonpublic information entrusted to them by employers, clients, or shareholders constituted a fraudulent act under liability theories advanced by the Commission and adopted by the courts. See *United States* v. *Newman*, supra; *Securities and Exchange Commission* v. *Lund*, [1981-1982 Decisions] Fed. Sec. L. Rep. (CCH) ¶98,428 (C.D. Cal. Jan. 22, 1982). Thus, these activities violate Section 10(b) of the Exchange Act. When they occur in connection with a tender offer, they also violate Section 14(e) of the Exchange Act.

[3] Brudney, "Insiders, Outsiders and Informational Advantages Under the Federal Securities Laws," 93 Harv. L. Rev. 322, 346 (1979).

[4] The broad range of persons who have been the subject of the Commission's enforcement actions illustrates the breadth of the insider trading problem. These include: officers, directors and employees of issuers; the issuer itself; attorneys; law firm paralegals; principal shareholders; business consultants and investment analysts; merger partners; finders; underwriters; brokers; accountants for corporate directors; newspaper columnists; government officials knowing of lucrative government contracts about to be granted; and friends and relatives of the above individuals.

[5] The popular press echoes the perception that insider trading is hard to detect. Pauly, Weathers, Ipsen & Bentley, "Crackdown on Insiders," Newsweek, Nov. 16, 1981, at 77-78. See also Louis, "The Unwinnable War on Insider Trading," Fortune, July 13, 1981, at 72-82.

[6] Some options have increased in price enormously in a short period as a result of a takeover bid. In one case, the Commission alleged that an individual invested $3125 in call options of a corporation which was to be the subject of a takeover proposal and, in 48 hours, realized profits of approximately $430,000.

[7] When the violator is a regulated entity, such as a broker-dealer or a registered representative, the Commission has also instituted administrative proceedings against the offenders. See 15 U.S.C. § 15(b)(4) & (6).

[8] *Walling* v. *Harnischfeger Corp.*, 242 F.2d 712, 713 (7th Cir. 1957).

improperly profiting from the use of material information is placed in no worse a position than the honest man who refuses to act." [9]

In short, disgorgement is "hardly a disincentive for those who may cynically (and realistically) hope to avoid being caught." [10]

Recognizing that current remedies do not provide sufficient deterrence, the Administrative Conference Report urged that "the SEC should seek authority to adopt [a civil penalty] sanctioning approach." [11] A civil penalty would present the threat of economic punishment necessary to convince potential traders not to violate the law in the first place. [12]

The prospect of civil money penalties equal to a multiple of the profit gained (or loss avoided) would be a powerful deterrent to insider trading and would reaffirm that fairness and honesty are the guiding principles of our Nation's securities markets. The Supreme Court has recognized and approved the use of civil money penalties to deter illegal conduct. [13] Moreover, Congress has recognized the deterrent value of civil money penalties by giving the power to seek or assess penalties to other federal agencies, [14] including the Commodity Futures Trading Commission. [15]

In advancing this legislative proposal, the Commission is not abandoning the disgorgement remedy, which has served through the years as an important source of recovery for private plaintiffs. The Commission anticipates that, when appropriate, in an insider trading case it will seek (1) a court order enjoining the violator from breaking the law again; (2) disgorgement of ill-gotten gains which may, if appropriate, be paid into an escrow fund so that traders or other private parties damaged by the insider trading can obtain compensation for their losses; and (3) the imposition of a civil money penalty. [16]

The Commission does not intend that the addition of the civil penalty provision to the Exchange Act would effect the standard of proof applicable in Commission enforcement actions. The preponderance of the evidence standard applies to a Commission action for injunctive or other equitable relief. [17] Under long standing Supreme Court precedent, this standard, rather than any higher standard, would apply to a Commission action for a civil money penalty. [18]

C. THE COMMISSION'S PROPOSAL

The Civil Money Penalty.—Section 2 of the Insider Trading Sanctions Act of 1982 would amend Section 21(d) of the Exchange Act to provide that the Commission may bring an action for a court order requiring any person engaging in a trading transaction who violates the Exchange Act by reason of insider trading to pay into the Treasury an amount of money to be determined by the court in light of the facts and circumstances, but in no event to exceed three times the profit gained or loss avoided as a result of such unlawful purchase or sale.

This amendment would create a formidable deterrent to illegal insider trading by persons who might now be tempted to seize the opportunity for large illegal profits. First, upon proof of a violation by a preponderance of the evidence, the Commission would establish a basis for relief. Second, although the precise amount of the penalty is to be determined by the court, the amendment expressly authorizes the penalty to be as much as three times the unlawful profit gained or loss avoided.

The statute does not mandate that the maximum penalty be imposed in every case. Rather, the amount of the penalty shall be based upon the facts and circumstances of each case. However, the possibility of a penalty equal to some multiple of the illegally obtained profits would constitute a formidable deterrent to insider trading. The Commission proposes that the maximum penalty be set at three times the profit gained or loss avoided, but the Congress, in order to achieve greater deterrence, may wish to increase the maximum penalty by using a higher multiple.

The civil penalty provision addresses the problem of the abuse of material nonpublic information in the trading of equity and debt securities, including option contracts, on securities exchanges or in the over-the-counter markets. It does not apply to transactions such as public offerings by issuers, market stabilization bids entered pursuant to such offerings, or purchasers or sales of securities of closely-held securities. For these reasons, the civil penalty provision applies to a "transaction (i) on or through the facilities of a national securities exchange or from or through a broker or dealer, and (ii) which is not part of a public offering by an issuer of securities other than standardized options * * *." [19]

The Act expressly empowers the Commission to adopt rules or regulations that would exempt persons or transactions from the civil penalty provisions.

The Increased Criminal Fine.—Section 3 of the Insider Trading Sanctions Act would amend Section 32(a) of the Exchange Act to increase the potential criminal fine from $10,000 to $100,000. The $10,000 fine was enacted in 1934 and has not been increased since then, although today a dollar is worth less than one-seventh of what it was worth then.

The proposed legislation would restore, and somewhat enhance, the level of deterrence that Congress contemplated when the statute was enacted nearly 50 years ago. Inflation during that time has seriously eroded the deterrent value of the existing criminal fine. The increased criminal penalty would apply to most criminal violations of the Exchange Act. It would not be limited to insider trading.

D. CONCLUSION

The Commission believes that enactment of the Insider Trading Sanctions Act of 1982 will indicate to the investing public, and to potential inside traders in particular, that the Commission and the Congress intend to preserve the expectations of fairness and honesty that form the foundation of our Nation's securities markets.

For the foregoing reasons, the Commission urges that Congress adopt the Insider Trading Sanctions Act of 1982.●

[12] For a discussion of the deterrent value of civil penalties, see Diver, "The Assessment of Civil Money Penalties by Federal Administrative Agencies," 79 Colum. L. Rev. 1435, 1455-56 (1979).

[13] See, e.g., *National Independent Coal Operators' Ass'n.* v. *Kleppe*, 423 U.S. 388, 401 (1976) (purpose of mine safety penalties is to provide a "strong incentive for compliance with the mandatory health and safety standards"); *United States* v. *ITT Continental Baking Co.*, 420 U.S. 223, 232 (1975) (Federal Trade Commission Act civil penalties are designed to "provide a meaningful deterrence against violations").

[14] See, e.g., 47 U.S.C. § 203(e) (1976) (Communications Act of 1934; Federal Communications Commission); 15 U.S.C. § 1917 (1976) (Motor Vehicle Information and Cost Savings Act; Department of Transportation); 15 U.S.C. § 2069 (Supp. IV 1980) (Consumer Product Safety Act; Consumer Product Safety Commission); 12 U.S.C. § 1425a(d) (1976) (Federal Home Loan Bank Act; Federal Home Loan Bank Board).

[15] See 7 U.S.C. § 9 (1976).

[16] In appropriate cases, the Commission might seek a penalty less than three times the amount of profit gained or loss avoided.

[17] *Securities and Exchange Commission* v. *C. M. Joiner Leasing Corp.*, 320 U.S. 344, 355 (1943). In accordance with the Supreme Court's holding in *Joiner*, every court of appeals that has addressed the question has held that the preponderance standard applies in actions to enjoin violations of Section 10(b). See, e.g., *Securities and Exchange Commission* v. *First Financial Group*, 645 F.2d 429, 434-35 (5th Cir. 1981); *Securities and Exchange Commission* v. *Savoy Industries, Inc.*, 587 F.2d 1149, 1168-69 (D.C. Cir. 1978), cert. denied, 440 U.S. 913 (1979); *Securities and Exchange Commission* v. *Commonwealth Chemical Securities, Inc.*, 574 F.2d 90, 102 (2d Cir. 1978).

[18] See *United States* v. *Regan*, 232 U.S. 37, 48 (1914).

[19] The penalty provision applies to trading in standardized options, even though technically such options involve the offering of securities by an issuer. The principal reason for the inclusion of transactions in standardized options is to ensure that those who misuse material nonpublic information by buying or selling options are subject to the civil penalty provision.

Should there be a need to clarify the scope of any term used in the civil penalty provision, the Commission would define the term pursuant to Section 3(b) of the Exchange Act.

REGULATORY REFORM BILL

HON. MICKEY EDWARDS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. EDWARDS of Oklahoma. Mr. Speaker, I join with many of my colleagues in urging you to schedule a floor vote on H.R. 746, the regulatory reform bill, before the expiration of this Congress. This bill is an initiative of enormous importance. It fulfills the desire of our constituents for substantive regulatory reform and puts this Congress four-square on the side of responsible government.

Mr. Speaker, I have a copy of a letter you wrote to President Reagan on August 19, 1982. In your letter, you pledged to schedule floor action on this legislation as soon as the work on the bill is completed. Mr. Speaker, I am today asking that you honor that pledge. The work on H.R. 746 has been completed. Hearings have taken place; executive comments from a dozen agencies have been reviewed; business and consumer groups have had 4 years to communicate their opinions and every Member of this body has had ample opportunity to become thoroughly familiar with the content of this legislation. In addition, the Senate approved their form of this bill last March by a unanimous, bipartisan vote of 94 to 0.

Mr. Speaker, Americans overwhelmingly support changes in our regulatory process. They know first-hand the cost in time and money of thousands of useless Government rules and have repeatedly asked this Congress to come to grips with this problem and to find ways to separate needed regulations from those that are unnecessary. I urge you, once again, to schedule a floor vote on H.R. 746 before the end of this session.

THE SPEAKER'S ROOMS,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 19, 1982.

Hon. RONALD REAGAN,
The President, The White House
Washington, D.C.

DEAR MR. PRESIDENT: I am writing in response to your recent letter concerning House consideration of H.R. 746, the regulatory reform legislation.

As you know, Congressman Elliott Levitas of Georgia has been a tireless advocate of this legislation. Largely as a result of his persistence, I directed my staff to scrutinize this legislation, and work with the business community, administration representatives and other concerned parties to work out a regulatory reform package that meets the objectives of regulatory reform without unnessarily burdening federal agencies.

This legislation will make lasting changes in the way our government functions. These changes impose time consuming requirements that will involve additional burdens for federal agencies. These major changes to our basic administrative laws risk leading to expensive and time consuming litigation. Procedural changes, if not crafted with extreme care, could alter underlying substantive statutes. New opportunities to challenge agency actions in court might serve only to interfere with the ability of the government to function smoothly. Moreover, the changes in this legislation which affect independent agencies must be subjected to the most careful scrutiny, since these agencies have been set up so that neither Congress nor the President can determine their policies.

My staff reports to me that these discussions have progressed well and that a series of amendments to improve the House bill are close to completion. I am optimistic that work on these amendments can be completed quickly. I intend to schedule this matter for House consideration as soon as this work is completed, with the objective of completing House action on H.R. 746 by mid-September.

Sincerely,

THOMAS P. O'NEILL, Jr.
The Speaker.●

ISRAELIS DO HAVE A HIGHER STANDARD

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. DeNARDIS. Mr. Speaker, I wish to share with my colleagues who may not have seen it a most insightful article on the Israeli investigation into the massacres in Shatila and Sabra camps in Lebanon.

Dr. Nurnberger's occasional articles in the Washington Post on Middle East issues are always helpful contributions to the continuing debate on events in that unhappy region of the world.

I commend the following Christian Science Monitor item to the reading of my colleagues and those who find the CONGRESSIONAL RECORD a constant resource of knowledge and information.

ISRAELIS DO HAVE A HIGHER STANDARD

(By Ralph D. Nurnberger)

The Israeli reaction to the massacres in Shatila and Sabra camps serves to reaffirm the ethical, moral, and democratic foundations of the state. No other state in the Middle East has ever witnessed similar anguish to the slaughter of people of other ethnic backgrounds. Certainly no Arab nation has ever responded in kind to the murder of Jews.

One of the most striking aspects of world reaction to these massacres is the lack of blame or recrimination against the murderers themselves. Part of the reticence to look for the actual culprits is the pervasive belief that Amin Gemayel's own troops participated in the murders. There is a fear that condemning these soldiers might undermine the fragile structure of the newly elected regime.

More to the point, the spectacle of Arabs killing Arabs has apparently become so commonplace that even Arabs do not protest. This is not surprising or new. There was hardly any reaction to the slaughter of over 10,000 civilians by Syrian troops in Hama earlier this year. The Arab world remained silent; the world media chose to neglect this tragedy.

Similarly, the Arab world and the world media have also failed to emphasize the bloodbaths within Lebanon that have taken place since the outbreak of the civil war in 1975. Over 100,000 people have died in this strife-torn nation during the past seven years.

Although the world will now long remember the hundreds who died at Shatila and Sabra, few can recall the thousands of innocent Plestinian Muslims who met violent deaths at the hands of Christian Lebanese in Tel Zataar, or the thousands of Christians who were butchered by the Palestinians at Damur. These killings and feuds go beyond interreligious strife. Christians murdered other Christians following the assassination of Tony Franjieh and the death of Bashir Gemayel's 18-month-old daughter. Regardless of religion, historically when Arabs kill Arabs, the world remains silent.

The difference in Shatila and Sabra is the potential culpability of the Israeli defense forces and role of the Begin government. Thus far there has not been any accusation that a single Israeli soldier actually participated in the massacres. A good case, however, can be made that these troops mishandled the situation. By moving into west Beirut Israel accepted the responsibility for preserving order. Those who failed in this mission must be held accountable.

The psychology of the Jewish people, influenced by memories of the Holocaust, has fashioned a collective burden of guilt. Jews in Israel, America, and throughout the world rightfully condemn the massacres and protest against any complicity by Jewish officials. They are correct in demanding to know whether any Israeli could have prevented or minimized the slaughter. They are correct in demanding that justice be done. Jewish outrage following the death of Arabs at the hands of other Arabs also serves to reaffirm that Jews have learned the lessons of the past, that the basic morality of the people and state remains unquestioned.

The aftermath of the events in Lebanon also underscores the vibrancy of democracy in Israel. It is Israeli not Arab or Western journalists who are most active in uncovering every piece of information about the massacres. It was the Israeli press that first told the story of the possible complicity by the Israeli officials. The Israeli press has carried these stories on a daily basis, leading to continual protests in the streets of Tel Aviv.

The democratic process within Israel has been activated—soldiers and officers have protested and resigned their commissions, cabinet ministers have left the government, calls for new elections are more frequent, opposition spokesmen have criticized the Begin administration's actions in west Beirut, a full, impartial investigation will be initiated. These reactions stand in stark contrast to other nations in the region.

Israelis often complain that their country is held to a higher standard than any other state. Norman Podhoretz charged in his Commentary article entitled "J'accuse" that anti-Semitism was the cause of this misapplication of a double standard to the behavior of Jews. However, considering the origins of the state of Israel, the democratic nature of its system, the humanism of its people, these are precisely the criteria by which Israel must be judged. Considering their response to recent events, Israelis are meeting the test.

LEGISLATION TO ELIMINATE COAST GUARD RESPONSIBILITIES REGARDING MARINE SANITATION DEVICES ON SMALL VESSELS

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. YOUNG of Alaska. Mr. Speaker, during the beginning of this Congress the Coast Guard and Navigation Subcommittee engaged in extensive oversight hearings into the functions and activities of the U.S. Coast Guard. As a result of this oversight activity the subcommittee issued a report entitled "Semi-Paratus: The United States Coast Guard, 1981," House Report No. 97-355. One area of Coast Guard regulation and law enforcement that was investigated concerned the requirement for marine sanitation devices onboard vessels.

I believe this area of the law is one which needs revision. Therefore, I have introduced today legislation to eliminate Coast Guard responsibilities regarding marine sanitation devices on small vessels. In the oversight report I noted above is a discussion of the legal

basis for these regulations and the problems associated with this law and its implementation. Further, the report sets forth certain recommendations for future action. The following is an excerpt from that report which discusses marine sanitation devices:

The responsibilities of the Coast Guard and the Environmental Protection Agency (EPA) to require marine sanitation devices (MSD) are set out in Section 312 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C. 1322). EPA issued regulations on January 29, 1976, setting forth Federal standards of performance for MSD's. The Coast Guard issued regulations which implemented the EPA standards on April 12, 1976. The standards for MSD's are designed to prevent the discharge of untreated or inadequately treated sewage into or upon the navigable waters of the United States from new and existing vessels, except vessels not equipped with permanently installed toilet facilities. These regulations affect approximately 8 percent of the recreational boats in the United States in addition to commercial and fishing vessels.

The Coast Guard regulations require that all MSD's installed on new vessels built after January 30, 1977, be certified by the Coast Guard. After January 30, 1980, older vessels with installed MSD's were required to either remove these devices, replace them with a Coast Guard certified MSD, or, in special circumstances, obtain a waiver from the Coast Guard. Waivers are granted only when the vessel's space or power constraints prevent installation of a commercially available MSD or if there is a lack of pumpout facilities where the vessel is used.

The Secretary of the Department in which the Coast Guard is operating may (a) distinguish among classes, type, and size of vessels as well as between new and existing vessels, and (b) waive standards and regulations as necessary or appropriate for (1) classes, type, and sizes of vessels, or (2) individual vessels upon application. These activities would be in consultation with EPA. In addition, EPA has set a complete prohibition upon discharge of any sewage from a vessel in U.S. waters. Section 312 permits states to ask for "no discharge" areas, but does not provide for a state to request "discharge" areas. In response to questions submitted after the Subcommittee oversight hearing on the marine environmental protection mission of the Coast Guard, the Coast Guard had the following response with regard to the affect of sewage dicharge from small vessels:

The issue of sewage from small vessels is usually localized. Discharges in open waters may be almost undetectable as opposed to high traffic areas and enclosed bodies of water, such as fresh water lakes and marinas. In the latter, a large number of discharges may occur and/or there may be a very slow flushing action in these bodies of water. We have received complaints from shoreside residents of bays and inlets that experience large concentrations of boaters.

Experience with this regulation to date has raised questions regarding the necessity and effectiveness of the requirement that vessels on navigable waters of the United States be equipped with approved MSD's. Additional concern centers on whether appropriate consideration has been given to the various classes, type, and sizes of vessels in implementing the regulations and whether the FWPCA should be amended to recognize the differences in geographical regions of the United States.

Finally, enforcement of the MSD requirements rests primarily with the Coast Guard. The Subcommittee is concerned regarding the amount of Coast Guard resources to be used in the enforcement of these requirements. During the course of the July 23 hearing, Admiral Hayes reported that the MSD regulation is by far the most unpopular regulation enforced by the Coast Guard today. Enforcement of this regulation is decentralized within the Coast Guard. Therefore, data regarding violations and penalties is incomplete. Currently the Coast Guard has no formal cooperative agreement with any of the state or local jurisdictions. Violations discovered by local enforcement personnel are being reported on an informal and voluntary basis to the Coast Guard.

RECOMMENDATIONS

1. The Congress, together with the Administration, should review Section 312 of the Federal Water Pollution Control Act to:

a. determine the necessity and effectiveness of the regulations;

b. ensure that appropriate consideration is given to various classes, types and sizes of vessels;

c. determine the needs of different geographical regions of the United States; and

d. provide a proper role for the states including designation of discharge areas.

The legislation I am introducing today addresses these problems and concerns directly. Subsection (a) provides that vessels of 65 feet or less are not required by Federal law to have marine sanitation devices (MSD). The Federal standards of performance and applicability of manufacturing provisions are not disturbed by this change.

Subsection (b) provides that a State or a political subdivision of a State may not prohibit or regulate the discharge of sewage from vessels of 65 feet or less except in two circumstances. First, if marine sanitation devices are required, they must conform to the Federal standards of performance regulations. Vessels engaged in interstate travel, however, would not be subject to the laws and regulations of another State. Thus, a vessel equipped with a MSD meeting any of the Federal standards may discharge into State waters, except for waters designated as no discharge zones. Second, a State would be allowed to prohibit the discharge from all vessels in their own waters regardless of the State of registration. Subsection (c) provides the effective date is the date of enactment.

The Environmental Protection Agency and the Coast Guard have had a study of these regulations underway for some time. However, no formal recommendations to Congress have been made to date nor am I aware of any administrative steps that have been taken to change the regulations in this area.

The legislation I am introducing today is to take a step in this area to overcome the problems and deficiencies in the current statutory scheme. It is hoped that this will remove the Coast Guard from an area of regulation which it is ill equipped to perform and frustrated in enforcing so that it can turn its energies to more important and more effective functions such as search and rescue and fisheries law enforcement. For years we have been heaping additional duties on the Coast Guard and requiring them to do more and more with less and less. Some steps must be taken to alleviate and reverse that trend so the Coast Guard can live up to its fine traditions and carry out its most important functions concerning the safety of life and property at sea.

H.R. 7392

A bill to eliminate Coast Guard responsibilities regarding marine sanitation devices on small vessels, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 312 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new subsection:

"(n) No vessel having a length of 65 feet or less shall be required under this section to have in operation a marine sanitation device. Nothing in this subsection shall affect the Federal standards of performance promulgated under subsection (b)(1) of this section or the applicability of subsection (g) of this section to manufacturers of marine sanitation devices.".

(b) Subsection (f)(3) of section 312 of the Federal Water Pollution Control Act is amended by inserting "(A)" after "(3)", by inserting "and accessible" after "reasonably available", and by adding at the end thereof the following:

"(B) A State may prohibit the discharge from any vessel which is equipped with installed toilet facilities and which has a length of 65 feet or less into some or all of the waters of such State of sewage which has not been treated with a marine sanitation device which is designed, manufactured, installed, and operated in accordance with Federal standards of performance and regulations promulgated under this section, except that no such prohibition shall apply to a vessel which is registered in another State while such vessel is engaged in interstate travel.

"(C) Except as provided in subparagraphs (A) and (B) of this paragraph, a State or a political subdivision of a State may not prohibit or regulate the discharge of sewage in waters of such State from any vessel which has a length of 65 feet or less.".

(c) The amendments made by this Act shall take effect on the date of enactment of this Act.●

JOBS AND THE NEW CONGRESS

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. FRANK. Mr. Speaker, in November I was privileged to speak to the second annual convention of New England District Council 2 of the International Union of Electrical Workers. Under the very able chairmanship of District 2 President Peter S. diCicco, the convention dealt force-

fully with the needs of the working men and women not just of the IUE, but of America.

I was particularly impressed with the thoughtful statement on "Jobs and the New Congress" which served as the call to that convention and I ask that it be printed here so that the Members of the House and Senate can benefit from it.

JOBS AND THE NEW CONGRESS

Year 1983 will begin with the highest unemployment in our nation's history. We in the New England area have been on the trailing edge of this disaster, only because in prior periods of high unemployment we led the nation. But the current trend is now catching up. We see major layoffs taking place among our principal employers with no projection as to when they will stop.

Why? In simple terms, this depression stems from President Reagan's economic policies—policies which seek to redistribute our nation's wealth to corporate interests under the guise that "corporate" America will do what's right. President Reagan's policies have not worked and voters made that very clear by defeating those Congressional representatives who supported Reaganomics.

It now becomes the obligation of the newly elected Congress to respond to that "Voter Mandate" by taking initiatives to turn the country around and restore a more equitable distribution of American resources. It is time to exercise the Constitutional balance of power between the Congress and the President, and bring to an end the days of "rubber stamping" the President's policies.

It is time for the new Congress to take the steps to put America back to work. We need and want "Jobs".

Our responsibility in that process is to develop and present alternatives, to speak out in a loud and clear voice, and to call to task those who stray from the "1982 Mandate".

Further, and perhaps more importantly, we as the American Labor Movement must begin to recognize and accept that our traditional collective bargaining role is changing; that the protection and improvement of our conditions and benefits of work is becoming more and more a function of State and Federal legislation and that the battlefield of the future is changing from the bargaining table to our political systems. If we, as the American Labor Movement, do not respond to that change, both philosophically and structurally, then those who seek our demise will prevail. It is important to remember that our history has been such that the Union workers of this country have experienced great sacrifices to provide basic benefits for all workers, organized and unorganized. We have won that battle. Our future role of being in the vanguard is not likely to change—that role will be to forge a new course in behalf of the interests and protection of all workers. Our new course will be to place more of our resources on the political and legislative fronts. Political, to support not only candidates who support labor, but also labor candidates from our own ranks. Legislative, to develop and present realistic alternatives.

Within this format, we look to our convention to explore this new course with our priority being "Jobs and the New Congress".●

COSTLY FUN IN THE SUN—THE SIGNING OF THE LAW OF THE SEA TREATY

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BROOMFIELD. Mr. Speaker, this is a period when the United Nations is being asked to tighten its belt. Many of its 157 members are scrutinizing that organization's activities, and searching for ways to eliminate wasteful spending. In spite of this effort, the United Nations may soon vote to provide $20 million to fund the signing of the Law of the Sea Treaty. In addition to having the official document signing ceremony in Jamaica, a permanent U.N. Law of the Sea Secretariat staff will be shifted from New York to Jamaica.

I have some serious reservations about this entire signing effort as well as the Law of the Sea Treaty itself. The U.N.'s conference on the Law of the Sea established a permanent Preparatory Commission for this Third World grab of mineral resources at the ocean bottom. This conference plans to have a posh reception at the sumptuous Montego Bay facilities on December 6 to initiate the 4-day-long treaty-signing ceremony.

Transportation, housing, and food costs for U.N. diplomats and Secretariat staff attending the function and supporting the group Preparatory Commission will come out of the U.N.'s general budget. Since U.S. taxpayers pay one-fourth of the U.N. budget, the U.S. share of the signing ceremony and associated support costs will be about $5 million. Many fear that financing the bureaucracy of the Preparatory Commission will become a bottomless pit into which annually great sums will be poured. Needless to say, the Government of Jamaica is delighted with this entire undertaking and is encouraging the U.N.'s spendthrift administrators to pursue these plans. Jamaica was named as the headquarters of the International Seabed Authority which will manage the mining of ore-bearing nodules from the ocean floor.

This expensive signing ceremony, and even costlier staff relocation, comes at a time when the United States and many nations in the world are having severe economic difficulties. Recently, delegates from the United States, the Soviet Union, and Britain met with the Secretary General of the United Nations to express their concern over the rising costs of the organization. The United States introduced amendments to a number of resolutions approving their substance only to the extent that they can be financed without exceeding the level or resources approved in the budget. Unfortunately, all three amendments were soundly defeated.

U.N. spending has risen over 80 percent in 5 years. This has meant a rise in the U.S. contribution from $99 million in 1977 to $180 million this year. At the United Nations itself, there is a crisis in morale which was recently manifested when 1,500 employees walked off the job because of "low salaries". Costly "Club Seabed" treaty-signing bashes in Jamaica play well neither in Peoria, nor in Ouagadougou.

I support the administration's position on the treaty. The Law of the Sea Accord is definitely not in our Nation's interest. The U.S. Government rightly objected to provisions in the treaty governing deep-sea mining. These seabed mining provisions are flawed. Under the present treaty, future development of resources as manganese and cobalt would be deterred, not advanced. The treaty creates a decision-making process which would not give the United States and others a role that fairly reflects and protects their interests. In addition, amendments to the treaty could take effect without U.S. approval. This provision is incompatible with the U.S. approach to such treaties. It is also against the Constitution. Finally, the treaty provides for the transfer of deep-sea mining technology to all participating nations, with the possibility that national liberation movements could share in the benefits. In its present form, the accord does not protect U.S. economic, political, and security interests. The administration is already developing a new oceans policy. It is working on a system for alternate sea-bed mining in cooperation with our allies.

During a period when many of the poor nations of the world are worrying about where their next dollar is coming from, there is no excuse for this boondoggle and relocation to Jamaica. Since one of the stated objectives of the Law of the Sea Accord is to promote development of Third World countries, I suggest that the United Nations immediately begin helping these poor countries. Why does not the United Nations arrange for a formal signing in New York and insist that the Secretariat staff responsible for administering the accord remain in New York. This is a classic opportunity for the United Nations to improve its image both here in the States, as well as overseas, with a gesture showing both good judgment and fiscal responsibility. The big festivities in Jamaica next month deserve a bit of dampening. Let us hope that this world assembly sees the writing on the wall.●

H.R. 7357 — IMMIGRATION REFORM AND CONTROL ACT OF 1982

HON. JONATHAN BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BINGHAM. Mr. Speaker, while I tend to favor the overall thrust of H.R. 7357, the Immigration Reform and Control Act of 1982, and believe it should be acted upon before the Congress adjourns, there are some provisions of the bill which are controversial. The Immigration and Nationality Law Committee of the Association of the Bar of the City of New York has issued a report on the proposed summary exclusion procedures and proposed restrictions in Federal court jurisdiction. I believe that report is worthy of the attention of the Members as they study the matter of immigration law reform, and I insert it herewith:

REPORT ON THE SUMMARY EXCLUSION AND JUDICIAL REVIEW PROVISIONS OF PENDING LEGISLATION TO AMEND THE IMMIGRATION LAWS

INTRODUCTION

In March of 1982, Senator Alan K. Simpson and Congressman Romano L. Mazzoli introduced legislation (the Simpson-Mazzoli bill), proposing comprehensive immigration reforms, including a proposed summary exclusion procedure and proposed restrictions on federal court jurisdiction.[1] On August 17, 1982, the Senate passed its version of the bill with relatively few changes. On September 22, 1982, the Committee on the Judiciary of the House of Representatives reported out a re-numbered bill with substantial changes.[2] It is possible that the House Committee version will be considered by the full House in early December of 1982 during the "lame-duck" session of Congress.

The Committee on Immigration and Nationality Law recognizes the need for reform in our country's immigration laws. The problem of illegal immigration is a problem of national dimension. The Committee is concerned, however, with several aspects of the Simpson-Mazzoli bill. The concerns include the risks posed to arriving refugees by the proposed summary exclusion procedure, as well as the impact upon applicants for political asylum and others of the proposed restrictions on federal court jurisdiction.

THE PROPOSED SUMMARY EXCLUSION PROCEDURE

The Simpson-Mazzoli bill would introduce new procedures for inspecting certain aliens seeking to cross the border. In particular, under the Senate version, any alien who appears to lack entry documents (i.e., a passport and/or visa) or a basis for entry, or who has not "applied for asylum," is to be "excluded from entry into the United States without further inquiry or hearing." [3] A determination of the alien's inadmissibility at this juncture would be subject neither to administrative nor to junction review under the Senate version.

Under the House committee version, summary exclusion is required for aliens who have no apparent documentation, or basis for entry. Exclusion is also mandated if the alien "does not indicate an intention" to apply for asylum.[4] While the House version does not provide for judicial review of a determination of admissibility at this juncture, a form of administrative review is provided. Specifically, the bill provides that:

"Before excluding an alien without a hearing under clause (i), the examining immigration officer shall inform the alien of his right to have an administrative law judge redetermine the conditions described in clause (i). If the alien requests such a redetermination by an administrative law judge, the alien shall not be so excluded without a hearing until and unless the administrative law judge (after a nonadversarial, summary proceeding in which the alien may appear personally) redetermines that the alien meets the conditions of sub-clauses (I) through (III) of the clause (i)." [5]

Both the Senate and House Committee versions provide that:

"The Attorney General shall establish, after consultation with the Judiciary Committees of the Congress, procedures which assure that aliens are not excluded under paragraph (1)(B) without an inquiry into their reasons for seeking entry into the United States." [6]

THE RISKS OF SUMMARY EXCLUSION FOR ARRIVING REFUGEES AND THE NEED FOR NOTICE OF THE RIGHT TO COUNSEL

Initially, if should be noted that a summary exclusion procedure is a radical departure from current inspection and inquiry procedures in the Immigration and Nationality Act which afford an alien the opportunity to present his or her case for admissibility (or for asylum) through counsel, at an adversarial hearing before an immigration judge.[7] The consequence of the failure of an alien to satisfy an inspector as to admissibility would change from a full exclusion hearing before a separate fact-finder to summary exclusion with, at best, a limited hearing and restricted access to counsel.

A summary exclusion procedure may encourage the United States to violate its obligation to refrain from refoulement under Article 33(1)[8] of the 1951 Convention and 1967 Protocol Relating to the Status of Refugees.[9] This is the duty to not expel or return a refugee to the frontiers of territories where his or her life or freedom would be threatened on account of race, religion, nationality, or membership in a particular social group or political opinion.[10] A refugee who would experience persecution might be turned away from the border under the proposed procedures without any recourse simply because of an inability to articulate the reasons that persecution is feared, or to persuade the inspector (or adminstrative law judge) that the fear is well-founded, or because he or she is afraid to speak to authorities.

The international experience indicates that a refugee who arrives at the border after a stressful and surreptitious journey often lacks the documentary resources, the psychological reserve, and even perhaps the willingness then to persuade someone of the bona fides of the claim. Indeed, the "Handbook on Procedures and Criteria for Determining Refugee Status" published in 1979 by the United Nations High Commissioner for Refugees (UNHCR) graphically describes the difficulties experienced by aliens in pursuing asylum at the border:

"It should be recalled that an applicant for refugee status is normally in a particularly vulnerable situation. He finds himself in an alien environment and may experience serious difficulties, technical and psychological, in submitting his case to the authorities of a foreign country, often in a language not his own. His application should therefore be examined within the framework of specifically established procedures by qualified personnel having the necessary knowledge and experience, and an understanding of an applicant's particular difficulties and needs." (para. 190.)

". . . [A]n applicant may not be able to support his statements by documentary or other proof, and cases in which an applicant can provide evidence of all his statements will be the exception rather than the rule. In most cases a person fleeing from persecution will have arrived with the barest necessities and very frequently even without personal documents. . ." (Para. 196.)

* * * * *

"A person, who, because of his experiences, was in fear of the authorities in his own country may still feel apprehensive vis-a-vis any authority. He may therefore be afraid to speak freely and give a full and accurate account of his case." (Para. 198.)

* * * * *

In fact, in comments on the House committee version of the bill itself, the UNHCR stated specifically:

"In view of the precarious and vulnerable situation in which an asylum seeker may find himself at the frontier, it is necessary to ensure that the existence of an asylum claim is not overlooked by the examining officer." [11]

A summary exclusion procedure fails to address these concerns.

RECOMMENDATION: NOTICE OF THE RIGHT TO COUNSEL

In order to protect against refoulement, aliens should, at the very least, be informed of their right to counsel prior to being barred from entry into the United States.

The right to be represented by counsel is one of the most important elements of due process of law. Indeed, the Immigration and Nationality Act provides:

"In any exclusion or deportation proceedings before a special inquiry officer and in any appeal proceedings before the Attorney General from any such exclusion or deportation proceedings, the person concerned shall have the privilege of being represented (at no expense to the Government) by such counsel, authorized to practice in such proceedings, as he shall choose." [12]

In fact, indigent aliens who have been placed under exclusion or deportation proceedings are given lists of available free legal services by the Immigration and Naturalization Service as a matter of course in view of the critical nature of the interests implicated in the process.[13]

The Senate and House committee versions of the proposed legislation do not purport to abrogate in any respect the right to counsel in the exclusion context, irrespective of whether or not the procedure is "summary" in character. Indeed, under current law, aliens have a right to representation in numerous "nonadversarial" immigration proceedings, such as examinations in connection with permanent residence applications.[14] The important interests at stake in the immigration context generally are recognized in the entitlement to counsel. The interests of asylum applicants in this regard are even more basic—liberty or life.

Since the right to counsel exists in the exclusion context, it should be announced to arriving aliens who would be subject to summary exclusion in view of the interests at

stake for arriving aliens. The announcement, moreover, should be translated as appropriate and confirmed in writing. Giving notice of the right is crucial to its preservation in an otherwise unreviewable exclusion process.[15]

THE PROPOSED RESTRICTIONS ON FEDERAL COURT JURISDICTION

Under the Senate version of the proposed Immigration Reform and Control Act, review of denials of asylum requests would be limited to exercising the "right of habeas corpus under the Constitution."[16] The House committee version provides for exclusive review of asylum denials by petitions for review to the appropriate United States Circuit Courts of Appeals. Residual habeas corpus jurisdiction is retained in the House version and petitions may be "based upon custody effected pursuant to . . . [the Immigration and Nationality] Act," and may be brought "individually or on a multiple party basis as the interests of judicial efficiency and justice may require.[17]

THE NEED TO PRESERVE JUDICIAL AND FULL ADMINISTRATIVE REVIEW

The Senate version, to the extent that it reserves the right of habeas corpus "under the Constitution," may be misinterpreted to limit the availability of the writ to address statutory and treaty violations, including violations of the Protocol Relating to the Status of Refugees. The House committee version avoids the risk of confusion or misinterpretation by incorporating the "right of habeas corpus under chapter 153 of title 28, United States Code,[18] which confers jurisdiction to address violations of Constitution, statute, or treaty." [19] The House committee version is preferred for this reason.

Furthermore, the adjudicatory system envisaged by the Senate and House committee versions of the bill is limited in scope to the consideration of individual asylum claims that have been litigated in the agency. The House committee report counsels that "there is to be no judicial review of any aspect of the asylum process" until an order of exclusion or deportation has been finalized.[20] Such an approach, however, would be an overly rigid one.

Though the requirement that one exhaust administrative remedies before seeking judicial review is a long-standing feature of administrative law, equally long-standing are the exceptions to that requirement. Thus, for instance, one may turn directly to the courts without exhausting agency proceedings when a) the agency cannot supply an adequate remedy; b) the agency action will cause irreparable injury; c) the agency has exceeded its statutory authority; or d) pursuing an administrative remedy would be futile.[21] The point is that exhaustion is a common-sense requirement; therefor, an exception is made when the drawbacks of exhaustion outweigh the advantages in a particular case.[22] These specific exceptions to exhaustion, as well as a general one permitting evaluation of the specific circumstances, should be taken into account in the bill, lest the new statute be misinterpreted as radically changing the traditional rules on exhaustion.

Put another way, direct federal court jurisdiction should be preserved in cases that attack patterns and practices inimical to the assertion of asylum-related and other rights. Such cases are very few in number, but they are crucial to protecting rights such as an alien's right to pursue asylum. See, e.g., *Haitian Refugee Center* v. *Civiletti*, 503 F. Supp. 442 (S.D. Fla. 1980), modified on other grounds, 676 F.2d 1023 (5th Cir. 1982), in which the district court found that the asylum adjudication process had been perverted in connection with a government Haitian Program designed to expel Haitians without regard to the individual circumstances of their cases. It would make no sense, for example, to require asylum applicants to go through biased or unfair proceedings in order to be able to challenge pattern and practice violations. Jurisdiction for these purposes should be maintained.

CONCLUSION

The Committee on Immigration and Nationality Law is deeply concerned about the risks posed to arriving refugees by the summary exclusion procedure, as well as the impact upon applicants for political asylum and others of the restrictions on federal court jurisdiction proposed under the Simpson-Mazzoli bill. The House committee version is preferred to the extent that it makes clear that habeas corpus jurisdiction includes violations of Constitution, law, or treaty. Both the Senate and House committee versions, however, should be amended to provide notice of the right to representation for aliens who may be subject to summary exclusion, and to provide direct access to the federal district courts to correct violations of law which cannot be corrected in the agency.

Respectfully submitted,

Arthur C. Helton, Chair, J. Philip Anderegg,* Brenda Berkman, George Theng Chew, Michael I. Davis, Michael John Dell, Henry S. Dogin, Diane Englander, Grace Goodman, Alice H. Henkin, Frederick M. Joseph, Dung Quoc Nguyen, Jane C. Rubens, Elaine F. Shea, George Bundy Smith, Committee on Immigration and Nationality Law.

*Mr. Anderegg does not subscribe to the views in this report.

APPENDIX OF PROPOSED AMENDMENTS TO THE HOUSE COMMITTEE VERSION

Summary exclusion

Section 121. Subsection (b) of section 235 (8 U.S.C. 1225) is amended to read as follows:

"(b)(1)(B)(ii) Before excluding an alien without a hearing under clause (i), the examining immigration officer shall inform the alien of his right to have an administrative law judge redetermine the conditions described in clause (i), and of his right to representation as set forth in Section 292 of the Act. If the alien requests such a redetermination by an administrative law judge, the alien shall not be so excluded without a hearing until and unless the administrative law judge (after a nonadversarial, summary proceeding in which the alien may appear personally) redetermines that the alien meets the conditions of subclauses (I) through (III) of clause (i)."

Judicial review

Section 123. Subsection (a) of section 106 (8 U.S.C. Section 1105(a) is amended . . . by striking out (11) and inserting in lieu thereof

"The district courts shall have original jurisdiction over all causes concerning violations of this title to the extent that the exhaustion of the administrative remedies set forth in this section would not be appropriate or in the interest of justice. An action brought under this section may be brought individually or on a multiple party basis as the interests of justice may require."

VIOLENCE AGAIN REARS ITS UGLY HEAD IN NORTHERN IRELAND

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. BIAGGI. Mr. Speaker, throughout my 5 years as chairman of the Ad Hoc Congressional Committee for Irish Affairs, I have been an ardent foe of all forms of violence which are such a common way of life in Northern Ireland.

Yesterday another senseless and deplorable act of violence occurred in Northern Ireland. In this latest episode, a popular nightclub in Londonderry was bombed and a total of 17 people were killed and another 66 injured seriously. As in so many previous cases—many of the casualties were innocent people in this case enjoying a night of dancing at the club.

As one might expect and has become familiar with—reactions in the form of condemnations have been heard from the British Government including from Prime Minister Thatcher and the Secretary of State for Northern Ireland, James Prior. I concur with their

call for swift apprehension and prosecution of those responsible. However mere statement of condemnation will not end violence in Northern Ireland. One must look to the causes to violence and work to eradicate them. One must identify those ingredients which incite acts of violence.

As one addresses the problem of violence in Northern Ireland one must look at all its manifestations. Clearly there are acts of violence perpetrated by civilians; but acts of official violence are also all too common in Northern Ireland.

The ad hoc committee exists to try and advance a more positive U.S. role in the effort to bring about a nonviolent political solution to the troubles in Northern Ireland. Violence impedes this worthy cause and will continue to as long as it exists.

Violence also delays the incentives for negotiations which must take place if we are to move in the necessary direction of advancing a political solution in Northern Ireland. In the past these negotiations have been far too limited in scope and as a result have ostensibly failed. If the goal is a lasting political solution—then the discussions must involve all segments of political thought especially those who participate in the political process. I hope that the British Government will pursue a political settlement with the same intensity that they will try and apprehend those involved with acts of violence.●

WOMEN IN COMBAT

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. DORNAN of California. Mr. Speaker, now that we have young women in our combat divisions, I would like to bring to the attention of my colleagues the sobering words of Gen. Robert C. Kingston, former commander of the 2d Infantry Division in Korea: "There's no such thing, if there's a war on the Korean peninsula, as separating combat from noncombat. And we're going to get young American women, women soldiers, burned, disfigured, amputee victims, killed and sent home in body bags. That will happen."●

KEEPING OUR PROMISE TO THOSE WHO HAVE SERVED

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. WON PAT. Mr. Speaker, as a member of both the House Armed Services Committee and the Committee on Veterans Affairs, I have always been deeply committed toward a policy of fairness toward those who have served with honor in our uniformed services. Recently, however, several events in my home district of Guam have revealed a flaw in the current military codes which prevents the Department of Defense from carrying out this policy in an area of great sensitivity.

The problem is this: The Department of Defense does not have the authority under chapter 75 of title 10, United States Code, to authorize the Secretary of the Individual Services to transport to their home of record the remains of retirees who die in a military medical facility away from their home. This was brought to my attention with a shocking force several months ago when my office found that a resident of Guam who was sent for medical care to Tripler Military Hospital in Hawaii died there of his illness. The military provided transportation for him to Hawaii but told my office that it could not, under current law, bring his remains home to his family for burial. As a result, this soldier had to be transported back to Guam at considerable expense for his family.

My constitutents and I were frankly astounded to hear that this was the case. They and I do not understand how this Nation could permit the law to deny so fundamentally a benefit to those who have served this Nation with dignity in time of war and peace. I must point out that this problem exists for military retirees living in all of the various States and territories of this great Nation. The legislation I introduce today is designed to provide immediate authority for the Secretary of Defense to correct this loophole in the law and thus permit us to render to those who die under these conditions away from their family and friends a guarantee that they will be returned for proper internment to their homes.

In the near future I will ask my colleagues in the House to join me in support of this long overdue proposal. I am pleased to note that the Department of Defense has also asked the Congress to enact this legislation and for the RECORD, I introduce following my statement, a copy of a letter sent on May 11, 1982, to the Speaker of the House by Hon. James F. Goodrich, Acting Secretary of the Navy. In that letter, Mr. Goodrich outlines the rationale behind this legislation and calls for its adoption.

We in this body are duly proud of our record of support for programs which benefit the veterans, the military retired, and their families. Yet it seems that more needs to be done to assure that there will never again be a repeat of the tragic incident which left my constituents at the mercy of a heartless flaw in the law. This man, and others like him, deserve to be brought home regardless of whether they are living or deceased. My bill will see that this is done and in the process bring dignity and honor to both the individual and our Nation. Thank you.

The letter follows:

DEPARTMENT OF THE NAVY,
OFFICE OF THE SECRETARY,
Washington, D.C., May 11, 1982.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Enclosed is a draft of proposed legislation, "To amend chapter 75 of title 10, United States Code, to authorize the Secretary concerned to defray the costs of transporting the remains of members of the uniformed services entitled to retired or retainer pay who die in a military medical facility of the armed forces."

This proposal is part of the Department of Defense Legislative Program for the 97th Congress. The Office of Management and Budget advises that there is no objection to the presentation of this proposal to Congress. It is recommended that this proposal be enacted by Congress.

PURPOSE OF THE LEGISLATION

Under current law, the uniformed services are without authority to transport the remains of a retired member who, subsequent to retirement, receives medical treatment in accordance with 10 U.S.C. 1074(b) at a military facility and becomes deceased while in that state. By contrast, under the provisions of 10 U.S.C. 1482, the Secretary concerned may pay the expenses incident to the death of any retired member who becomes a patient in a United States hospital while on active duty for a period of more than thirty days, is retired while hospitalized, and who continues to be such a patient until the date of death, (10 U.S.C. 1481(a)(7)). The expenses that may be covered are enumerated at 10 U.S.C. 1482 and include the transportation of the remains. Similar costs may be paid by the Veterans' Administration when death occurs in a Veterans' Administration facility to which the deceased was properly admitted for hospital or domiciliary care as a veteran of the armed forces (38 U.S.C. 903). The Veterans' Administration also provides transportation services when death is the result of a service-connected disability and burial is in a national cemetery, (38 U.S.C. 908).

The proposed legislation would remove a current inequity in law and provide similar treatment among retired members to that accorded veterans and other members hospitalized incident to death. Uniformity of entitlement would be established among categories of members and former members when deceased in a medical facility of the Veterans' Administration or the military departments. The present inequity concerning transportation of a deceased retired member's remains would be removed by the proposed legislation.

Enactment of this legislation would provide the Secretary concerned the discretionary authority to transport the remains of a retired member who dies while admitted to a medical facility of that department to the place of burial. As an alternative to actual transportation, the Secretary concerned would be authorized to pay the costs of transporting the remains to the place of burial. However, transportation could not be

to a place farther than the deceased's last place of permanent residence and the costs could not exceed those of transporting the remains to the deceased's last place of permanent residence. Transportation, or the payment of such transportation, is not authorized to foreign areas; rather, such transportation is confined within the fifty states, the Commonwealth of Puerto Rico, or the territories and possessions of the United States. In order to avoid duplication of transportation benefits, the proposed legislation makes transportation available only in instances when such services are not available from the Veterans' Administration or from the uniformed services under other authority, and the retired member dies while hospitalized in a military medical facility.

Retired members of the uniformed services are entitled to military medical care, to include hospitalization, in a facility of the armed forces subject to the availability of space and the capabilities of the professional. Should such a member die while in that care, the services are without authority to transport the remains, unless the member was on active duty for a period of more than thirty days, retired while under care, and continues to be a patient until he/she dies. All transportation expenses must be borne by the survivors. However, should such a member die while under care in a Veterans' Administration hospital, transportation expenses would be defrayed. Such an inequity is dependent upon the medical service available—Veterans' Administration as opposed to military medical care—and the condition of death, rather than neglect on the part of the member. As such, it is recommended that the proposal be enacted to extend benefits to that segment of the retired population who are otherwise entitled.

COST AND BUDGET DATA

The enactment of this proposal is estimated to cause a minimal increase in annual cost of:

Army	$96,000
Navy	62,493
Air Force	41,250
Coast Guard	8,000
Total	207,743

Sincerely,

JAMES F. GOODRICH,
Acting Secretary of the Navy.●

TRIBUTE TO THE HONORABLE HENRY REUSS

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 7, 1982

● Mr. BEVILL. Mr. Speaker, one of this body's most able Members, my good friend HENRY REUSS, is retiring from service in the Congress of the United States.

As chairman of the Joint Economic Committee and former chairman of the House Banking, Finance and Urban Affairs Committee, HENRY REUSS provided deep insight into the economic problems of this Nation. From his rich background as an economist, HENRY evolved into a master legislative tactician whose opinions on our economic future were widely respected.

For 5 years, it was my great pleasure to serve on the Banking Committee with HENRY, and I came to have the highest regard for his abilities and his deep integrity.

The people of the Fifth District of Wisconsin have been fortunate to have a man of such high caliber representing them in the U.S. Congress. We will miss HENRY REUSS, but his service has been a tremendous contribution to this Nation.●

SOLAR ENERGY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, December 8, 1982, into the CONGRESSIONAL RECORD:

SOLAR ENERGY

The practical use of solar energy is centuries old. Numerous buildings and even entire cities in ancient Greece were designed with solar energy in mind, as were pueblos made 800 years ago by the Navajo Indians. In 1973, Americans shocked by the energy crisis quickly looked for more reliable sources of energy: solar energy seemed to fill the bill. Congress made money available for a solar energy program for the first time that year, and the federal role grew steadily. In 1979, President Carter committed the United States to a goal of meeting 20 percent of our energy needs with solar and other renewable sources of energy by the year 2000. When President Reagan took office, direct federal spending for solar energy and other such programs had grown to $630 million per year, and tax credits for the installation of solar energy devices had reached $150 million per year.

President Reagan quickly altered these priorities, shifting the emphasis of the programs away from near-term projects and into long-term, high-risk research and development. In his first year as President he cut funding for solar energy in half, and his proposed budget for 1983 would have reduced it by 90 percent. He also suggested an early end to the tax credits, and he attempted to block implementation of the Solar Energy Bank. Congress went along with the shift for the most part, but it has resisted terminating programs outright and has reaffirmed its support for the Bank and the tax credits.

The President is pushing for a phase-out of solar energy programs because of his desire to reduce federal spending and bureaucracy and because he favors petroleum and the atom as energy sources. In addition, the President believes that energy programs should depend more heavily on free-market forces and private-sector investments: commercialization and near-term technological development should be left to the private sector, with the federal government attending only to those projects that the private sector cannot adequately handle. Thus, the President has sharply reduced funding for solar energy research grants, demonstration projects, feasibility studies, public information programs, and the like. The key question is whether the solar energy industry is strong enough at this time to compete in the market without federal help.

Advocates of solar energy say that it is not. What the President considers short-term they often consider long-term. Also, the most cost-effective solar systems today ("active" ones such as water heaters and "passive" ones such as roof overhangs and extra-thick walls) often require high initial investments and typically do not begin to pay for themselves for several years. Sales of solar systems have been hurt in recent years for various reasons, and they could drop significantly if federal aid were eliminated at this time.

The solar energy advocates do not stop there. They contend that the solar energy industry is being unfairly singled out to "go it on its own". They point to the fact that solar energy is being forced to compete, for example, with hydroelectric power from the highly subsidized dams built in the 1920's and 1930's. They also question why the President is cutting back solar energy funding in order to trim the budget, while at the same time increasing spending on the development and promotion of nuclear power and providing tax breaks for oil companies. The advocates object to the President's actions more on account of their symbolism: he is sending out exactly the wrong sort of signal. His desire to end federal involvement in solar energy has led many to think—incorrectly—that the federal government finds solar energy a bad investment. This discourages the very private-sector involvement the President says he wants to see.

Finally, solar energy advocates are worried about funding for research on photovoltaics, which the President has cut in half and wants to cut to one fifth of its former level. Photovoltaic cells are specially treated silicon wafers which change the sun's rays directly into electricity. These cells represent perhaps the most promising of all solar energy technologies. Photovoltaic energy is clean, safe, reliable, and virtually inexhaustible. The principal problem is cost: electricity produced by photovoltaic cells is still ten times more costly than power generated from oil, a fact which makes present photovoltaic systems practical mainly in remote sites. However, advances in technology and engineering are continually being made, and the price of photovoltaic cells continues to fall. The advocates of photovoltaic research point out that three of the four major American photovoltaic firms are either partly or wholly owned by oil companies. This pattern of ownership has led them to wonder whether these companies will aggressively pursue a technology that will reduce the value of their investments in oil and uranium. They also point out that while the United States still holds the lead in photovoltaics, the cutbacks come at a time when the governments of other nations—notably France, West Germany, and Japan—are helping their industries capture the future of multi-billion-dollar photovoltaic market. Loss of leadership could mean fewer jobs at home as well as an unhealthy reliance on photovoltaic cells from abroad.

Some advocates of solar energy predict that despite the cutbacks, solar energy may be one of the largest growth industries of the 1980's. There are several reasons for that optimism: Polls indicate that Americans want solar energy developed more than any other source; solar energy companies have improved their customer service; traditional energy sources are becoming more expensive; solar energy is playing a larger role

in the economic planning of countries around the world; solar energy technology is advancing.

My view is that although solar energy should not be immune from scrutiny, we should not go too fast in making reductions. The key role that solar energy will play in our future is not in doubt, but reduced federal support does increase the uncertainty about when that role will become prominent and whether the United States will be in the forefront of developments. In the present situation, solar energy must not be cut too far.●

SOVIET WATCH: IS ANDROPOV "NASTIER THAN A SNAKE?"

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. FIELDS. Mr. Speaker, I wish to bring to my colleagues' attention the following article from the Washington Inquirer:

[From the Washington Inquirer, Nov. 26, 1982]

IS ANDROPOV "NASTIER THAN A SNAKE?"

(By Reed Irvine)

"A senior Air Force commander has been 'counseled' for calling the new Soviet leader, Yuri V. Andropov, 'nastier than a snake,' military officials said." So said a wire service story last week. The officer who made the statement was Lt. Gen. Charles Donnelly, commander of American forces in Japan and the United States Air Force in South Korea. The nature of the counseling Gen. Donnelly was given was not reported, but presumably he was advised not to tell his troops the truth about Yuri Andropov.

A lot has been written about the Soviet dictator since he won the only election that counts in the Soviet Union. He was elected by a group of 12 men, including himself, known as the Politburo. The rest of the 265 million citizens of the Soviet Union had absolutely no voice in deciding who their new ruler would be. You may have noticed that our media have not focused attention on the fact that Andropov is the fifth dictator to rule the Soviet Union since the Bolshevik revolution in 1917, and not one of them has dared to run the risk of a popular election. Not only have our great newspapers and television networks refrained from scornfully pointing to this sad record, but they invariably refer to the Soviet ruler by some nice sounding title such as "leader," rather than "dictator."

It has been acknowledged by some in the media that early this year the Soviets, probably the KGB, launched a disinformation campaign to portray Yuri Andropov as a nice guy. In its two-page spread on Andropov in its November 22 issue, Time magazine led off with this: "Yuri Vladimirovich Andropov, 68, is said to be a witty conversationalist, a bibliophile, a connoiseur of modern art—a kind of 'closet liberal.'" Time added: "This impression has been fostered assiduously by the Soviets in an effort to soften his image."

This effort has met with considerable success, as the "counseling" of Gen. Donnelly suggests. There have been few if any discussions of Andropov that have reminded the American people of his man's "nastier-than-a-snake" qualities. It was only two months ago that both NBC and Reader's Digest presented some pretty convincing evidence that the conspiracy to murder Pope John Paul II was hatched and nurtured by the Bulgarian secret police, who just happen to be under the control of the Soviet KGB. Those who are knowledgeable in these matters think it is inconceivable that the Bulgarians would have undertaken such a sensitive project without the knowledge and approval of their Soviet masters. Mr. Andropov can be considered one of the prime suspects in the conspiracy to murder the Pope.

The largely successful campaign to break the Soviet liberalization movement over the past decade can also be credited to Andropov. While he headed the KGB the use of psychiatric torture to break those who dared to agitate for observance of human rights in the Soviet empire was refined and its application extended. Andrei Sakharov, the great Soviet physicist who won the Nobel Peace prize for his encouragement of the liberalization movement, was exiled to the city of Gorky, where no foreigner is permitted to visit. Andropov put this brilliant and courageous scientist under virtual house arrest. He is only the most eminent of the many victims of Yuri Andropov's "liberalism."

Andropov first qualified for Gen. Donnelly's "nastier-than-a-snake" title even before he became the head of the dreaded KGB. He was the Soviet ambassador to Hungary in 1956 when the Soviets brutally crushed the Hungarian freedom fighters. He promised the Hungarian government headed by Imre Nagy that the Soviets would withdraw the troops sent to crush the revolt, and Nagy accepted the promise. Negotiations between Andropov and the Hungarian hero of the revolt, Pal Maleter, were set up. As Maleter dined with Andropov, KGB thugs crashed into the room and took Maleter prisoner. He was later shot. Freedom fighter Bela Kiraly says of Andropov, "He'd kill his mother with a grin. While thousands were dying, he continued to smile."●

CANCELLATION OF MX GIVES WORLD A FUTURE

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. PEYSER. Mr. Speaker, the President said yesterday that the House of Representatives was sleepwalking into the future. The truth is that the halting of the production of the MX missile will give the world a future.

This Congress believes that the freedom of the American people is worth fighting for and, if need be, dying for. However, we are awake enough to know that to take a course of action that will do nothing but speed up the nuclear arms race and lead the world down the road to complete destruction is a nightmare that none of us should have to face.

I am proud to have been a part of the action taken by the 97th Congress.●

SOUTH BRONX, THE STIRRING OF REGENERATION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. GARCIA. Mr. Speaker, slowly, yet with great promise, the South Bronx that for so long has been the example of urban decay is attempting a comeback.

The road to recovery will be long and difficult especially during these times of drastically limited urban budgets. However, those individuals located within the inner city are determined to rebuild and defend their communities. As evidence of this determination, the South Bronx has found itself the site of several new single-family developments. One such project is supported by the section 235 program and is about to get off the ground just a few short blocks from the Charlotte Street area made infamous by the visits of Presidents Carter and Reagan.

I am including an article which appeared last week in the New York Times entitled, "About New York: In the South Bronx, Some Stirrings of Regeneration" for the interest of my colleagues. It records the hope and determination that is present in our inner cities which can spark the renewal of these areas when the Government offers a helping hand.

ABOUT NEW YORK: IN THE SOUTH BRONX, SOME STIRRINGS OF REGENERATION

(By Anna Quindlen)

The other night, a group of people clutching floor plans gathered in an office off East 149th Street to sign contracts on the first homes that most of them would ever own.

Some of them seemed very solemn and others were giddy with walk-in closets and tile baths. The houses are not even built yet, but they had seen the two models, and some of them were already figuring where to put the sofa and how to finish the basement.

The houses they are purchasing will be in the South Bronx and, flush with house pride, they don't want to hear any wisecracks about that fact. They have heard enough.

"If I've heard 'You're crazy' once, I've heard it a hundred times," said Celeste Bonilla, who raised four children in the area and says they've all turned out fine. "And I intend to have all the people who said that over when my house is done so they can take a look at it. I've always defended the South Bronx and I'm going to keep defending it. It can't go down anymore, it's got to go up."

What have gone up on the corner of 169th Street and Tinton Avenue in the Morrisania section are two little attached houses of the kind that are multiplying like rabbits on vacant plots of land in Nassau County and suburban New Jersey. One has three bedrooms, the other four. The former sells for $51,000, the latter $60,500.

In most other neighborhoods, this would be progress. In the South Bronx, it is monu-

mental. People stop outside the models and stare, enrapt. One woman who has lived nearby on Boston Road for nearly all of her 70 years looked up at the two houses the other day and just said "My, my, my."

Something is happening in the South Bronx. There are signs of life.

The two model homes are part of a group of 250 single-family houses on four sites in the area. Although only about half of the 74 in Morrisania have gone to contract so far, nearly all the other have been sold.

Two homeowners who live across the street from the Morrisania houses have had aluminum siding put on their buildings. So have two nearby store owners.

This does not mean, of course, that the South Bronx has become Bay Ridge. It remains, in many ways, the neighborhood that exhausted all the metaphors for devastation, disaster, decay, the end of the world in the city of New York.

Building after building on Boston Road is simply a stately shell of decades-old brickwork. There are vacant lots large enough for a regulation game of football. On some side streets, the dogs are wild and the rats are not shy. One tenants' association is called Last Hope. To someone who has never been there before, whole sections of the area remain incredible, a kind of stage set of urban destruction, except that it is real.

"My mother-in-law acts like I go to hell every day," said Gail Gremse, who is assistant director and counsel for the South Bronx Development Office, which is overseeing the construction of the single family homes.

But for someone who knows the South Bronx, it is clear that something is happening. Here is a building, just like its abandoned neighbors, which has new windows and a rehabilitated lobby. There, a vacant lot has been planted with vegetables and outfitted with park benches.

"Signs are beginning to be shown," said Gordon Camp, a bank employee who with his wife, Joyce, is buying one of the Morrisania houses. "I'd say in the next five, maybe 10 years, things will be better."

The people who have signed contracts on the Morrisania houses are relying on that. They are working people, secretaries, sanitation workers, subway maintenance men, nursing aides. Those who want the three-bedroom home are putting down $3,500; for four bedrooms, the amount is $5,500.

Their homes were built under, a program called 235, which means their mortgage payments will be based upon their income and subsidized by the Government if their gross income is around $35,000 or less. But they must also make enough money and have good enough credit to quality for a mortgage.

After they had signed contracts the other night, they met with Ira Hamilton, who is the builder of the Morrisania project.

"We wanted the track record," Mr. Hamilton says of undertaking the construction. "We feel that there will be continued activity in the area."

Mr. Hamilton has learned, however, that he still has something to learn about the South Bronx. The living room of the model home has large sliding-glass doors leading to the backyard.

"They must have been dreaming when they put in those doors," said Mrs. Bonilla, shaking her head. "It's like wearing your jewelry out on the subway."

Mr. Hamilton has agreed to substitute a standard door for the glass ones for those who want it. "I suppose it is more of a suburban than an inner-city design," Mr. Hamilton said of the model house.

So this is the story: a suburb grows in the South Bronx. On the map in the sales office for the Morrisania project, nearly all the houses on the map are studded with red pins, for those already under contract, or yellow and blue pins signifying that someone has placed a binder. But some of those who place binders will not be approved for a mortgage, and those houses will go back on the market again.

Any that are not sold by Dec. 31 will not be built at all because of the demise that day of the Government subsidies that made them possible. The Morrisania project may be smaller than envisioned. What is happening in the South Bronx is not a miracle, but it is something.

"People can only run so far, said Mrs. Bonilla, who is itching to decorate her new home. "Then they have to turn and fight for their neighborhood. I'm turning here."●

HUMANITARIAN, M.D.

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. MOTTL. Mr. Speaker, as chairman of the Veterans' Affairs Subcommittee on Hospitals and Health Care the past 2 years, it is my special pleasure to recognize a disabled veteran who has dedicated his life to the highest ideals of the medical profession.

Louis L. Keppler, M.D., served in the U.S. Army's combat infantry from 1944-45 in the European theater. Overcoming his combat injuries, he took an accelerated program and graduated from the St. Louis University Medical School in 1951. He interned at St. John Hospital of Cleveland and from 1952-54, he served as a resident at Milwaukee Children's Hospital. Since 1954, Dr. Keppler has conducted his practice in pediatrics at his same office at 5500 Ridge Road, Parma, Ohio. There he has treated thousands of children and alleviated concerns of even more parents.

In addition to his private practice, Dr. Keppler worked from 1954-70 at the East 35th Street Welfare Dispensary of Cleveland Metropolitan General Hospital. Those 17 years, he treated sick black children from indigent families.

From 1975-80, Dr. Keppler was jail physician for the Cuyahoga County Justice Center.

In his service on the executive committees of both Deaconess Hospital of Cleveland and Parma Community General Hospital, Dr. Keppler has been vocal in his calls for curbs in rising health care costs.

Dr. Keppler and his wife, Joan, have nine children including four who are following health careers.

At the age of 56, Dr. Keppler plans to continue working in pediatrics at his vigorous pace as long as his good health continues. For the welfare of children in southwest Greater Cleveland, I hope he puts in at least another 30 years at his Parma office.●

THE BENEFITS OF PRIVATE EDUCATION

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 8, 1982

● Mr. DORNAN of California. Mr. Speaker, the role of private schools, especially church-related schools, in American education is often misunderstood. Rather than being a haven for the rich, those institutions are often of greatest service to low income families, whose personal sacrifices keep them going.

In many of our troubled cities, parochial schools are providing first-rate educations to hundreds of thousands of youngsters, at a fraction of the per pupil costs in public schools. At the same time, they are proving that a quality education depends less upon finances and more upon discipline, parental involvement, and a sense of values and commitment to true education.

A recent Associated Press article compared certain schools in the city of Bridgeport, Conn. The graphic contrast between high-cost public institutions and low-budget, but high-spirited, parochial schools can tell us much about contemporary education. More important, it should highlight those reforms—principally, tuition tax credits—which can restore both family rights and quality to American education. I would like to bring this AP story to the attention of my colleagues and of the public.

The story referred to follows:

THE BENEFITS OF PRIVATE EDUCATION

(By Lee Mitgang, Associated Press)

BRIDGEPORT, CONN.—Visitors to Kolbe-Cathedral High School are greeted by a statute of Maximillian Kolbe, a Polish Catholic priest who volunteered to die in place of a Jew in a Nazi death camp.

There are no graffiti. In fact, the walls have been freshly painted—by volunteer students on weekends.

It is a different story at Bridgeport's 1,900-student public high school, Central High. There the walls have also been painted—with years of graffiti including obscenities on the girls' lavatory door.

At Blessed Sacrament-St. Mary School, an elementary Catholic school in Bridgeport's impoverished East End, a third-grader's poem on a bulletin board compares the Resurrection to a butterfly's emergence from a cocoon. "The butterfly reminds us of Jesus coming from the dead," it says.

They display poetry of a different sort at Central High: "Nobodies gonna mess me around," a student verse says. "I'm on the highway to hell."

As the paint and the poetry indicate, there are two very different school systems in this ethnically diverse city of 142,000, most of Italian, Portuguese, Hispanic, Polish, Irish or black descent.

One school system seems unsoiled by urban influences, the other scarred. One is disciplined, the other is often chaotic. One has more money, but the other enjoys a greater investment of parental concern.

One is Catholic. The other is public.

For as long as anyone can recall, public schools have existed side-by-side with a sizable parochial system here. More than 6,000 children—about 24 percent of all school-aged youngsters—attend the 13 Catholic schools.

Even school board president Stephen Sedensky's seven children have gone to Catholic schools.

Bridgeport is not unique. There are 212,000 children in Catholic schools in New York City, 19 percent of all students. There are big parochial systems in Chicago, Los Angeles, Philadelphia, Detroit, Boston, Miami, and many smaller cities like Erie, Pa., and Omaha, Neb., and Trenton, N.J.

But in may ways, Bridgeport's Catholic schools are typical of the 9,500 Catholic elementary and secondary schools across America.

More than half of the nation's Catholic schools are located in the inner-city. There are few frills. Bridgeport Catholic Schools spend $675 per elementary school student, and about $1,100 per high school pupil.

Per pupil costs at Bridgeport public schools are $2,321. That means if all the Catholic school students suddenly enrolled, Bridgeport and the state of Connecticut would have to spend about $14 million a year more on public education.

The bill in New York City would be $600 million, according to the New York Archdiocese.

President Reagan wants to give parents who send their children to private schools tuition tax credits. His plan eventually would give private school parents tax breaks of up to $500 a year.

Reagan has sided with advocates who say private schools offer healthy competition to public education. He also points to a "double burden" for parents who pay public school taxes as well as parochial school tuition.

Not surprisingly, the president's support for tax credits intensified a long-simmering debate: Do Catholic schools, despite their virtues, sap the strength of beleaguered public schools?

As the Bridgeport experience indicates, there are many ways to look at the question. Many, parents especially, begin with discipline.

Blessed Sacrament third graders open the day with a hand-clapping prayer, "This is the day the Lord has made," followed by the Pledge of Allegiance.

A bulletin board near the principal's office lists about 30 pupils being punished with detention for infractions like chewing gum. On another wall is a dress code reminder: No sweater dresses, no shorts, no T-shirts or sweatshirts.

As school opened at Central High on a recent morning, a squad car was on the grounds and a teacher was telling two police officers how he had been jumped by a student who was in a fierce brawl with another student.

"Nothing unusual," principal Dr. Richard Mayer said with a shrug. "It's spring, I guess. Then again it doesn't have to be spring. A full moon will serve.

People in Bridgeport still talk about Central High's "gun incident." A youngster brought a gun to school last March and fired a shot in a classroom.

Beer bottles litter the unmowed grass. Graffiti are everywhere. "I suppose we could ask our kids to help clean the walls like those parochial school kids did. But a lot of our kids would probably view it as punishment," said Mayer.

Ethel Walton has two school-aged children, 6 and 14. They are Baptists. Yet she spends $600 a year to sent them to Blessed Sacrament, where more than half the 320 pupils are black or Hispanic. Like many people, Mrs. Walton views Catholic schools as a haven from public school troubles.

"Sending the kids to Catholic school means we don't go to Florida anymore," she says. "We eat rice instead of steak. But it's worth it. My kid used to throw his homework in the garbage can. At this school, he doesn't do that."

There is similar motivation for a three-year waiting list for admission to Kolbe-Cathedral. The gymnasium ceiling has holes and classrooms are cramped, but parents of the 391 children enrolled there willingly spend $1,140 for a year's tuition—in addition to their local school taxes.

"You get what you pay for. In public school you get nothing for nothing," says Kathy Filo, whose son Bobby is a freshman.

Bruno Manno, research director of the National Catholic Educational Association in Washington, D.C., says that typical parents of Catholic school youngsters are active in school affairs. Many Catholic schools, in fact, demand parent involvement, including in fund-raising.

At Blessed Sacrament, parents sign a contract saying they will be involved in school affairs and attend school meetings.

No less important to many parents and children are the religious and moral values that Catholic schools are free to stress.

"It'll make them better Christians," said Alida Acevedo, who sends three children to Blessed Sacrament at a cost of $775. "When they're young, this is the roots. This is where they get their foundations."

Says Sister Veritas, the principal, "A lot of parents will say they send their kids here for the discipline, but it's more than that they want the follow-up on what they're trying to do in the home: the good manners, the prayers."

Public school officials counter that parochial schools have lured away concerned parents and well-behaved children.

Michael Basciglia, a Republican school board member, says the presence of a large parochial school system "has definitely hurt us. You just don't get the support of the total community."

Catholic educators see it another way. "If either our schools or the public schools had a monopoly, what would be the motivation to do better?" said Bernard Helfrich, superintendent of Bridgeport's Catholic schools.

However, public school officials respond that such "competition" is inherently unfair, since public schools must accept all students, while private schools can select among the best-behaved and academically capable.

James Connelly, Bridgeport public school superintendent, says up through eighth grade, reading scores of public school children are at the national average. From high school on, though, scores fall off dramatically.

"What that tells me is that at ninth grade, the best and brightest get weeded out, and many go to parochial schools," he said.

At Central High, 60 percent of graduates go on to further education, but only 28 percent go to four-year colleges. At Kolbe-Cathedral, 89 percent are college-bound.

"Tuition tax credits concern me," said Connelly. "The fear I have is that public schools like ours would become the place for the underclass."

An Associated Press-NBC News poll last November said 26 percent of those surveyed would be more likely to enroll their children in private schools if tax credits were available.

Race is another factor in the debate.

Connelly said many white youngsters fled public school following a 1977 court-ordered busing plan to achieve racial balance. In 1976, 33 percent of public school enrollment was white. It now stands at 20 percent.

By comparison, a third of the children in Bridgeport's Catholic schools are minorities—Hispanic, Oriental or black. Nationwide, about 19 percent of Catholic school enrollment is minority.

"I'd have to be naive to say that desegregation didn't help us," said Helfrich. But he added that the Catholic schools took steps to screen out applicants whose only apparent motive was to flee integration.

Catholic and public schools compete economically in some cities.

Around the country, some of the more aggressive Catholic dioceses such as Omaha, Cleveland and Hartford, Conn., have been competing with public schools for dollars and services from local businesses.

Kolbe-Cathedral hired a full-time development officer, Dave Hennessey, to attract outside funds. He said alumni who work at local businesses, including General Electric and Allied Chemical have persuaded those firms to give matching grants to the school.

Hennessey said business donations to Kolbe average $5,000–$8,000 a year, but have been as high as $25,000 in very good years.

Much harder to assess is the impact parochial schools have on the city's willingness to tax, and spend on public schools. School board member Sedensky said that over the last decade public schools have lacked the political clout to get adequate city funding, at least partly because many of the city's most vocal parents and taxpayers were sending their children to parochial schools.

In the current school year, the city appropriated $36.7 million for education, up only 3.4 percent over the $35.5 million a year earlier.

Not that Catholic schools have had an easy time of it.

In aging cities like Bridgeport, Catholic schools have been afflicted with tight finances and declining enrollment, just like public schools. At the peak in 1965, there were 13,484 Catholic schools serving 5.5 million children. Today, there are 9,500 with 3.27 million pupils.

But unlike public school counterparts, Catholic school officials are optimistic they are on the threshold of a rebound. Manno says the private school market is growing. Private enrollments are projected to grow from 11.1 percent of all pupils in 1900 to 12.9 percent by 1989.

Catholic school enrollments are already up in several cities: Chicago, Los Angeles, Cleveland and St. Louis. And 32 Southern and Western dioceses and archdioceses are showing enrollment increases.

But many urban Catholic schools are in an ironic bind.

There are long waiting lists to attend parochial schools in Bridgeport, said Helfrich. But as affluent Catholics have joined others in leaving the cities, so urban Catholic schools find themselves serving poorer parishes. Many inner-city parishes barely have enough funds to survive, much less expand their schools to accommodate more children.

Blessed Sacrament's budget is just $190,000 a year. Eight nuns, including the principal, are paid a total of $52,500. The school's five non-clergy or lay teachers earn from $7,500 to $10,000. Three of those five hold second jobs.

At Bridgeport public schools, teachers earn from $11,500 to $24,700.

Nationwide, according to Manno, lay Catholic school teachers earn 10 to 15 percent less on average than public school teachers.

Tuition tax credits would certainly help both parents and teachers with their chronic financial problems, said Helfrich. The Reagan administration says 54 percent of families sending children to private schools earn less than $25,000 a year.

Tax credits would "be great", said Helfrich. "They'd take the pressure off so many working-class people." He adds, however, that credits would lead many parishes to raise tuitions to provide higher lay teacher salaries.

"That's just simple social justice," he said.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, December 9, 1982, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 10

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold oversight hearings on the report of banking regulators regarding the Penn Square National Bank in Oklahoma.
5302 Dirksen Building

Finance
Taxation and Debt Management Subcommittee
To hold hearings on S. 2647, to allow a deduction for the expenses of business conventions conducted on cruise ships registered in the United States, S. 2987, to create a general exemption from the Federal motor vehicle excise tax for all operated bloodmobiles, and S. 3064, to extend for an additional 4 years the temporary rule of current law that no amount is includible in income by reason of the discharge of certain student loans.
2221 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Household Goods Transportation Act (Public Law 96-454).
235 Russell Building

Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings, on S. 2503, S. 2680, S. 2681, and S. 2824, bills providing for the reinstatement for certain oil and gas leases.
3110 Dirksen Building

Foreign Relations
East Asian and Pacific Affairs Subcommittee
To receive a briefing on Micronesian status negotiations.
4221 Dirksen Building

Judiciary
Juvenile Justice Subcommittee
To hold hearings on S. 2856, increasing the penalties for the sexual exploitation of children.
2228 Dirksen Building

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

DECEMBER 13

10:00 a.m.
Energy and Natural Resources
To hold hearings to review current conditions in the natural gas market, and related proposals to modify existing law.
3110 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Government payments and the potential for fraud.
3302 Dirksen Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

2:00 p.m.
Foreign Relations
Closed meeting, to consult with administration officials on the intermediate nuclear forces negotiations (INF).
S-116, Capitol

3:00 p.m.
Foreign Relations
Closed meeting, to consult with administration officials on the strategic arms reduction talks (START).
S-116, Capitol

DECEMBER 14

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Diane K. Morales, of Texas, to be a Member of the Civil Aeronautics Board.
235 Russell Building

9:30 a.m.
Labor and Human Resources
Business meeting, to consider the nomination of Donald L. Dotson, of Pennsylvania, to be a member of the National Labor Relations Board.
4232 Dirksen Building

10:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold oversight hearings on the implementation of the Motor Carrier Act (Public Law 96-296).
235 Russell Building

Foreign Relations
To hold open and closed hearings on U.S. strategic doctrine.
4221 Dirksen Building

Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold oversight hearings on the Department of Defense use of polygraph for Federal employees.
3302 Dirksen Building

2:00 p.m.
Energy and Natural Resources
Public Lands and Reserved Water Subcommittee
To hold hearings on S. 2811 and S. 3060, bills providing for the preservation of certain wild and scenic rivers.
3110 Dirksen Building

Foreign Relations
Business meeting, to consider pending calendar business.
4221 Dirksen Building

DECEMBER 15

9:30 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Government debt collection procedures.
5302 Dirksen Building

Governmental Affairs
Oversight of Government Management Subcommittee
To hold oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.
3302 Dirksen Building

Labor and Human Resources
Business meeting, to consider pending nominations.
4232 Dirksen Building

DECEMBER 16

9:30 a.m.
Governmental Affairs
Oversight of Government Management Subcommittee
To continue oversight hearings on computer matching programs to detect fraud and mismanagement in Government programs.
3302 Dirksen Building

Small Business
To hold oversight hearings on the small business investment companies (SBIC) program of the Small Business Administration.
424 Russell Building

10:00 a.m.
Foreign Relations
Closed meeting, to consult with an official of the Department of State on the threshold test ban and peaceful nuclear explosion treaties.
S-116, Capitol

Select on Intelligence
Budget Authorization Subcommittee
Closed meeting on budget matters relating to intelligence activities.
S-407, Capitol

JANUARY 12

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings to review Federal programs which create certain job opportunities.
4232 Dirksen Building

JANUARY 25

9:30 a.m.
Finance
To hold hearings on the administration's assessment of the meeting of ministers to the General Agreement on Tariffs and Trade (GATT).
2221 Dirksen Building
